1 A definition of “reduced risk” and a description of the Conventional Reduced Risk Pesticide Program can be found in [PR Notice 97-3](#); OP alternative status is described in [PR Notice 98-7](#).

2 Pesticide Type: F= fungicide, H= herbicide, I= insecticide, PGR= plant growth regulator, Re= repellent, Ro= rodenticide

3 Reduced Risk/OP alternative: RR= reduced risk, OP Alt.= organophosphate alternative

Note: OP alternative status was not considered by the Reduced Risk Program for conventional pesticides until FY 1999.

New active ingredient reduced risk/OP alternative actions are indicated by italics in the “Chemical” column.
