COLOR PALETTE

USAID has standards for reproducing colors so they will always look consistent, no matter where they appear. For example, the brandmark and logo should be reproduced in full color—USAID Blue, USAID Red, and Solid Black—whenever possible. These colors serve as the source for our standard color palette.

These colors should be employed throughout our communications and are equivalent to the PANTONE® numbers listed in the table below. For four-color process printing (also known as full-color printing), refer to the CMYK values shown. For desktop publishing, such as Microsoft® Word or Microsoft PowerPoint®, refer to RGB (print/on-screen). For Web applications, refer to the RGB Web values or Hexadecimal Web values.

The PANTONE and CMYK values provided can be used on both coated and uncoated paper when printing. Although variations in color will occur, try to match the colors as closely as possible. For applications in color systems not included here, use the PANTONE values for color matching.
