Millstone Nuclear Power Station, Unit No. 2
Supplemental Response to NRC Bulletin 2001-01
Circumferential Cracking of Reactor Pressure Vessel Head Penetration Nozzles

On January 24, 2002, Dominion Nuclear Connecticut, Inc. (DNC) met with the U.S. Nuclear Regulatory Commission (NRC) to discuss the inspection of the Millstone Unit No. 2 reactor head during the upcoming refueling outage. During this meeting the previous submittals made by DNC on September 4, 2001,⁽¹⁾ and December 28, 2001,⁽²⁾ were discussed along with the plans and contingencies for the upcoming inspection.

Following the January 24, 2002 meeting, the NRC requested that the information presented be summarized and submitted on the docket by DNC. A summary of the inspection methodology, the statistical analysis used for the contingency plan, and the risk associated with a postulated catastrophic failure of a single reactor vessel head nozzle was provided in DNC's letter of February 7, 2002.⁽³⁾

In addition it was requested that DNC provide a copy of the Engineering Record of Correspondence (ERC), documenting DNC's inspection plan for ultrasonic examination of the interference fit of the nozzle penetrations with the reactor vessel head, to the NRC.

Enclosure 1

Millstone Nuclear Power Station, Unit No. 2

Affidavit Requesting Withholding from Public Disclosure

6. The following criteria are customarily applied by FRA-ANP to determine whether information should be classified as proprietary:

- (a) The information reveals details of FRA-ANP's research and development plans and programs or their results.
- (b) Use of the information by a competitor would permit the competitor to significantly reduce its expenditures, in time or resources, to design, produce, or market a similar product or service.
- (c) The information includes test data or analytical techniques concerning a process, methodology, or component, the application of which results in a competitive advantage for FRA-ANP.
- (d) The information reveals certain distinguishing aspects of a process, methodology, or component, the exclusive use of which provides a competitive advantage for FRA-ANP in product optimization or marketability.
- (e) The information is vital to a competitive advantage held by FRA-ANP, would be helpful to competitors to FRA-ANP, and would likely cause substantial harm to the competitive position of FRA-ANP.

7. In accordance with FRA-ANP's policies governing the protection and control of information, proprietary information contained in this Document has been made available, on a limited basis, to others outside FRA-ANP only as required and under suitable agreement providing for nondisclosure and limited use of the information.

8. FRA-ANP policy requires that proprietary information be kept in a secured file or area and distributed on a need-to-know basis.

9. The foregoing statements are true and correct to the best of my knowledge, information, and belief.

SUBSCRIBED before me this 18th
day of February, 2002.
