

Educational Children's Theatre Program

TVA and Local Power Distributors Partner to bring Energized Guyz to the Valley

About *The Energized Guyz*

TVA and local power distributors have partnered together to help bring "The Energized Guyz," a live children's theater production to over 1,000 schools in the Tennessee Valley. The program seeks to help students and their families learn how to get more for their energy dollars through a live show that helps educate grade-school kids about how energy is made and how using energy and water wisely is good for our budgets, good for the environment, and good for the future.

National Theatre for Children

The production is from the National Theatre for Children www.nationaltheatre.com and features *The Energized Guyz* bringing their messages about the value of energy efficiency, renewable energy and water conservation. TVA and distributors of TVA power hope to encourage kids and their families to use energy more efficiently which can help reduce dependence on more costly power sources.

Valley Performances

Ninety-three distributors of TVA power have provided the opportunity for *The Energized Guyz* to perform at elementary schools in their areas. Performances will begin in late September, and over 200 schools will host the *Guyz* in the fall semester. About 100 to 300 students will participate in each 25-minute performance. At the end of the school year, more than 250,000 children will have participated in the performance.

Classroom Materials

Classroom materials and on-line, follow-up activities are available to help students implement energy efficiency tips at home and school. More information is available at www.tvakids.com.

Consumer Information

This is one of many initiatives TVA and local distributors are partnering on to increase consumer awareness on ways to use energy and water more efficiently and stretch consumer energy dollars. For more information on simple steps to help save energy and money on power bills, visit www.tva.com.
