Newark-Union

Selected Indicators

This fact sheet presents recent **employment and unemployment** figures for the Newark-Union Metropolitan Division, New Jersey, and the United States. In addition, price and pay indexes for the larger metropolitan area that includes Newark-Union are shown. The **Consumer Price Index (CPI)** measures price changes or inflation for particular commodities and services at the retail level. The **Producer Price Index (PPI)** measures price changes or inflation for particular commodities and services at the wholesale level and is widely used by business firms as an escalator in long-term contracts. The **Employment Cost Index (ECI)** measures price changes or inflation of labor costs which includes wages and salaries and employer costs for employee benefits. An **occupational pay relative** is a calculation of pay—wages, salaries, commissions, and production bonuses—for a given metropolitan area relative to the nation as a whole; the calculation controls for differences among areas in occupational composition, establishment, and occupational characteristics, and the fact that data are collected for areas at different times during the year.
