

The Employee List is a fairly complete list of all personnel who have worked at Patuxent in an official capacity. The 1,853 names include those in all agencies (USFWS, USGS, USDA), and include those persons who have worked as official volunteers. The list does not include those who possibly worked on the grounds of Patuxent as students or in other capacities, but were not part of the official employee list. The list was created mainly from telephone directories, and therefore short-time employees may have been missed. We would welcome corrections and additional information to improve the quality of this list. To protect the privacy of all individuals on this list no contact information will ever be given to anyone for any reason. Most of the work on this list was done by Volunteer Marcia Holmes.

Contact person for this list is: Matthew C. Perry (Matt_Perry@USGS.GOV).
