<sup>1</sup> Incidence rates represent the number of cases of injuries and illnesses per 100 full-time workers and were calculated as: (N/EH) X 200,000 where,

- N = number of injuries and illnesses,
- EH = total hours worked by all employees during the calendar year,
- 200,000 = base for 100 equivalent full-time workers (working 40 hours per week, 50 weeks per year).
