<sup>1</sup> Annual average employment values previously published by the 2003 Survey of Occupational Injuries and Illnesses were derived primarily from the BLS-Quarterly Census of Employment and Wages (QCEW) program. The annual average employment values for published industries that include agricultural production activities (NAICs subsectors 111 and 112) were not adjusted to exclude estimates of employment in farms with fewer than 11 employees that are not surveyed. The values in this table provide a revised annual average employment which is equal to annual average employment previously published minus the estimate of non-covered agriculture production establishments.

<sup>2</sup> Data cover all 50 States and the District of Columbia.

Note: Dash indicates that a revision was not necessary or that the State did not publish the industry specified. Because of rounding, components may not add to totals.
