

- (1) Two silver-zinc cells from the production lot used for qualification testing must undergo each test designated with an X, each year of the manufacturer's specified storage life, to demonstrate that they still satisfy their performance specifications.
- (2) This test only applies if normal operation of the battery includes charging.
- (3) Each cell must undergo the electrical performance test of paragraph (k) of this section under ambient conditions before the cell undergoes this operating environment test and again while the cell is subjected to the operating environment.
- (4) Each cell sample must undergo this test at the end of the wet stand time after the last operating charge.
