

DEPARTMENT OF ENERGY**Energy Information Administration****Agency Information Collection****Activities: Submission for OMB****Review; Comment Request; Correction**

AGENCY: Energy Information Administration (EIA), Department of Energy (DOE).

ACTION: Agency Information Collection Activities: Submission for OMB Review; Comment Request; Correction.

SUMMARY: This notice corrects a document published in the **Federal Register** on October 22, 2003 (68 FR 60342) FR Doc. No. 03-26652. The EIA submitted the Supplemental Electric Power Program Survey to the Office of Management and Budget (OMB) for review under section 3507(h)(1) of the Paperwork Reduction Act of 1995 (Pub. L. 104-13) (44 U.S.C. 3501 *et seq.*). Instead of a review and three-year extension, the request is for a revision to three surveys: Forms EIA-826, 861, and 906, and the creation of a fourth, EIA-920. The proposed changes to the Form EIA-826 and Form EIA-861 are identical. The proposed changes are intended to eliminate reporting of data under an industry sector category of "other" which has proven to be too vague to be useful for analytical purposes, and to collect more specific data on electricity use for transportation. The changes to the Form EIA-906 are intended to facilitate data collection from combined heat and power plants, and to improve the overall quality of EIA's data on power plants. The Form EIA-906 will split into two forms, with the new Form EIA-920, "Combined Heat and Power (CHP) Plant Report," designed for the specific purpose of collecting data from CHP facilities. Also, in "Supplementary Information," numeral "4." should say, "Revision," not "Three-year extension and revision."

I. Con Edison's Hudson Avenue Station

On September 27, 2002, the EPA received a petition from NYPIRG, requesting that EPA object to the issuance of the title V operating permit to the Consolidated Edison Hudson Avenue Station. The petition raises issues regarding the permit application, the permit issuance process, and the permit itself. NYPIRG asserts that: (1) The permit was issued in violation of the requirements of the New Source Review program; (2) the permit is deficient because it fails to incorporate the requirements from pre-existing
