

**Table 704. Annual Percent Changes From Prior Year in Consumer Price Indexes (CPI-U)—Selected Areas: 2006**

[Represents percent changes of annual averages of monthly figures. Local area CPI indexes are by-products of the national CPI program. Each local index has a smaller sample size than the national index and is therefore subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Area definitions are those established by the Office of Management and Budget in 1983. For further detail, see the U.S. Bureau of Labor Statistics Handbook of Methods, Bulletin 2285, Chapter 19, the Consumer Price Index, and Report 736, the CPI: 1987 Revision. Minus sign (–) indicates decrease. See also text, this section and Appendix III.]
