Affected entities: Entities potentially affected by this action are members of the National Environmental Performance Track Program.

Title: The National Environmental Performance Track Program (OMB #2010-0032; EPA ICR No. 1949.02) expiring June 30, 2003.

Abstract: EPA announced the National Environmental Performance Track program on June 26, 2000. The

program is designed to recognize and encourage facilities that consistently meet their legal requirements, that have implemented management systems to monitor and improve performance, that have voluntarily achieved environmental improvements beyond compliance, and that publicly commit to specific environmental improvements and report on progress. Applications submitted by facilities are used by EPA and participating regulatory entities to determine whether the applicant qualifies for the program. A total of 277 facilities are current members of this voluntary program. Environmental Performance Track members are also required to submit an annual performance report documenting their environmental performance relative to the commitments they made upon entry into the program. This information is important to determine whether participants are meeting their commitments, as well as to evaluate the effectiveness of the program. The public reporting element of the program also provides information to the local community.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement: EPA estimates that all facilities who voluntarily respond to this information collection by electing to participate in the National Environmental Performance Track program have determined that the expected benefits of participation outweigh any burdens associated with preparing the response. EPA estimates that the application will

require approximately 40 hours to complete, and post-acceptance activities such as a demonstration of compliance, Environmental Management System documentation and reporting, a demonstration of continuous improvement, reporting, and public outreach are estimated to require approximately 190 hours per facility. EPA estimates total respondent costs for the 277 current members to be \$295,836 for the application phase and \$1,497,531 for participation in the program. For an individual facility, EPA estimates the application phase to cost \$1068.00 and program participation to cost \$5406.25. Preparing and submitting the application is a one-time event and program participation activities occur on an annual basis provided that the facility remains a member of the program.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Dated: January 14, 2003.

Daniel J. Fiorino,

Director, Performance Incentives Division.
