PTA to accomplish individual weapons qualification, this may not increase training costs, but could result in even more time away from home station. Constructing QTR2 at PTA would pose conflicts with the use of Range 8 and the potential development of an SBCTspecific anti-armor and live-fire tracking range. Acquiring the full acreage in the South Range Acquisition Area (SRAA) partially cures the shortage of Army training lands in Hawaii, provides a buffer to incompatible development along the southern border of SBMR, and provides some additional safety zones for Wheeler Army Airfield's runway. Additionally, based on The Nature Conservancy's comments, changes to the orientation of QTR2 have minimized the impact on access to the Honouliuli Preserve.

Therefore, we select the Proposed Action for implementation. We have fully considered the environmental impacts associated with the Proposed Action. Notwithstanding these impacts, we have decided to implement all facets of the Proposed Action because it best meets the purpose and need for this action and it is critical to achieving current and future national security objectives in U.S. Pacific Command's Area of Responsibility (AOR). This AOR is vital to the security of the United States and key allies. The AOR covers more than 50 percent of earth's surface and traverses 16 times zones. It includes nearly 60 percent of the world's population living in 43 countries. The world's six largest armed forces operate within this AOR: Peoples Republic of China, United States, Russia, India, North Korea, and South Korea. Nations within this AOR are parties to five of the seven worldwide U.S. mutual defense treaties. Additionally, approximately 35 percent of U.S. international trade is transacted within this AOR.

The ROD also commits to the implementation of mitigation and monitoring measures to rectify, reduce, or eliminate adverse effects to land use and recreation, visual resources, air quality, noise, traffic, water resources, geology, soils and seismicity, biological resources, cultural resources, human health and safety, and socioeconomic and Environmental Justice. The mitigation and monitoring measures are defined in the Final EIS.
