[Program Announcement 04232]

Strengthening HIV/AIDS, STI and TB Prevention, Control and Treatment Activities in the Addis Ababa University; Notice of Intent To Fund Single Eligibility Award

A. Purpose

The Centers for Disease Control and Prevention (CDC) announces the intent to fund fiscal year (FY) 2004 funds for a cooperative agreement program to strengthen activities for the prevention, control, and treatment of HIV/AIDS, STI, and TB in the Addis Ababa University (AAU). The Catalog of Federal Domestic Assistance number for this program is 93.941.

B. Eligible Applicant

Assistance will be provided only to the Addis Ababa University (AAU). No other applicants are solicited. The AAU is the only appropriate and qualified organization to conduct the activities supported by the CDC/GAP in Ethiopia because:

1. The AAU and its TAH are uniquely positioned in terms of legal authority, ability, and credibility to supported technical capacity development for HIV/AIDS/STI/TB prevention and control efforts of the country.

2. The AAU is mandated by the Ethiopian Government to provide training for all cadres of health care professionals and health social scientists who are deployed to all regions of the country.

3. As the only National Central Medical Center with the only medical speciality/residency training in the country, the University and its colleges and faculties constitute the oldest and largest training institution, and the most experienced research facility in the country.

4. The University is associated with the Ministry of Education, and works closely with the Ministry of Health and other sector ministries, as well as with a number of regional and international institutions, including U.S. universities.

C. Funding

Approximately \$200,000 is available in FY 2004 to fund this award. It is expected that the award will begin on or before September 1, 2004, and will be made for a 12-month budget period within a project period of up to five years. Funding estimates may change.

D. Where To Obtain Additional Information

For general comments or questions about this announcement, contact: Technical Information Management, CDC Procurement and Grants Office, 2920 Brandywine Road, Atlanta, GA 30341-4146, telephone: 770-488-2700.

For program technical assistance, contact: Dr. Tadesse Wuhib, Project Officer, U.S. Embassy, Entoto Road, P.O. Box 1014, Addis Ababa, Ethiopia, telephone: 251-1-669566, e-mail: wuhibt@etcdc.com.

For financial, grants management, or budget assistance, contact: Shirley Wynn, Contract Specialist, CDC Procurement and Grants Office, 2920 Brandywine Road, Atlanta, GA 30341, telephone: 770-488-1515, e-mail: zbx6@cdc.gov.

Dated: July 15, 2004.

William P. Nichols,

Acting Director, Procurement and Grants Office, Centers for Disease Control and Prevention.

Comprehensive STD Prevention Systems, Prevention of STD-Related Infertility, and Syphilis Elimination

Announcement Type: Competing Continuation.

Funding Opportunity Number: 05004.

Catalog of Federal Domestic

Assistance Number: 93.977.

Key Dates:

Application Deadline: September 15, 2004.

I. Funding Opportunity Description

Authority: This program is authorized under Section 318 (a) (b) (c) of the Public Health Service Act [42 U.S.C. Section 247c (a)(b)and(c)], as amended. Regulations governing the implementation of this legislation are covered under 42 CFR Part 51b, Subparts A and D.

Purpose: The purpose of the program is to support sexually transmitted disease (STD) programs in designing,

implementing, and evaluating Comprehensive STD Prevention Systems (CSPS), including, where applicable, initiatives and strategies specific to (1) the Infertility Prevention Program (IPP) to prevent STD-related infertility; (2) the Syphilis Elimination Program (SE) to eliminate syphilis in High Morbidity Areas; and (3) the Gonococcal Isolate Surveillance Project (GISP) to monitor gonococcal resistance to multiple antibiotics. As an optional activity some programs may choose to participate in the Quality Evaluation Initiative (QEI) to evaluate one program activity. This program announcement addresses the "Healthy People 2010" focus area of Sexually Transmitted Disease which is aimed at addressing health disparities (Areas of Special Emphasis) among racial and ethnic minority populations at greater risk for STDs due to health disparities, high risk sexual behaviors, the settings in which they are found, or because they are at risk for or have acquired other diseases. These Areas of Special Emphasis represent high priority prevention opportunities and have direct relevance to multiple essential functions. The Areas of Special Emphasis identified by each grantee will depend on disease and behavioral surveillance (e.g. case reports, prevalence monitoring, behavioral assessments) and other locally determined data and criteria. While all gender, age, racial, cultural, and economic groups are potentially affected by STDs, some population groups are disproportionately affected by STDs and their complications. As noted in Healthy People 2010, these population groups include African Americans, Hispanics, American Indian/Alaskan Natives, Asian and Pacific Islanders, women, and adolescents and young adults. Groups considered at risk because of high risk sexual behaviors include men who have sex with men and persons with multiple sex partners. Additionally, high priority prevention opportunities may exist for groups that can be accessed in certain settings. These settings include, but are not limited to, correctional facilities, HIV prevention and care clinics, substance abuse centers or private medical care facilities. Finally, opportunities exist for STD programs to collaborate and integrate with HIV and hepatitis prevention programs to better serve groups that are at risk for or are infected with all of these diseases. Examples of collaborative activities include, but are not limited to, encouraging medical providers to provide HIV, hepatitis and STD screening in high prevalence settings;
