

motor vehicle safety standards in the same manner as their U.S. certified counterparts, or are capable of being readily altered to conform to those standards.

Specifically, the petitioner claims that non-U.S. certified 2004 360 series Ferrari passenger cars are identical to their U.S. certified counterparts with respect to compliance with Standard Nos. 102 *Transmission Shift Lever Sequence*, 103 *Defrosting and Defogging Systems*, 104 *Windshield Wiping and Washing Systems*, 106 *Brake Hoses*, 109 *New Pneumatic Tires*, 113 *Hood Latch System*, 116 *Brake Fluid*, 118 *Power-operated Window, Partition, and Roof Panel Systems*, 124 *Accelerator Control Systems*, 135 *Passenger Car Brake Systems*, 202 *Head Restraints*, 203 *Impact Protection for the Driver from the Steering Control System*, 204 *Steering Control Rearward Displacement*, 205 *Glazing Materials*, 206 *Door Locks and Door Retention Components*, 207 *Seating Systems*, 210 *Seat Belt Assembly Anchorages*, 212 *Windshield Retention*, 214 *Side Impact Protection*, 216 *Roof Crush Resistance*, 219 *Windshield Zone Intrusion*, and 302 *Flammability of Interior Materials*.

The petitioner also contends that the vehicles are capable of being readily altered to meet the following standards, in the manner indicated:

Standard No. 101 *Controls and Displays*: (a) Modification of the existing instrument cluster, or installation of entire U.S.-model instrument cluster assembly; (b) downloading of U.S.-version software information so that the vehicle complies with the standard.

No. 108 *Lamps, Reflective Devices and Associated Equipment*: (a) Installation of U.S.-model front and rear sidemarker lamp assemblies that incorporate side reflex reflectors; (b) installation of U.S.-model headlamp assemblies; (c) installation of U.S.-model taillamp assemblies, or modification of the existing taillamp assemblies to comply with the requirements of this standard.

Standard No. 110 *Tire Selection and Rims*: Installation of a tire information placard.

Standard No. 111 *Rearview Mirror*: Inscription of the required warning statement on the face of the passenger side rearview mirror, or replacement of the passenger side mirror with a U.S.-model component.

Standard No. 114 *Theft Protection*: Downloading of U.S.-version software information so that the vehicle complies with the requirements of this standard.

Standard No. 201 *Occupant Protection in Interior Impact*: Inspection of all vehicles and installation, on

vehicles that are not already so equipped, of trim components that are necessary to comply with the upper interior impact requirements of the standard.

Standard No. 208 *Occupant Crash Protection*: (a) Inspection of all vehicles and replacement of non-compliant seat belt assemblies with U.S.-model components; (b) downloading of U.S.-version software information so that the vehicle complies with the seat belt audible warning requirements of this standard.

Standard No. 209 *Seat Belt Assemblies*: Inspection of all vehicles and replacement of the seat belt assemblies with U.S.-model components on vehicles that are not already so equipped.

Standard No. 225 *Child Restraint Anchorage Systems*: Installation of U.S.-model tether anchorages in coupe model.

Standard No. 301 *Fuel System Integrity*: Replacement of any non U.S. model components with U.S.-model components so that the vehicle complies with the requirements of this standard.

Standard No. 401 *Interior Trunk Release*: Installation of U.S. model components to permit the trunk lid to be released from inside the trunk, so that the vehicle complies with the requirements of this standard.

In addition, the petitioner states that front and rear bumper reinforcements must be added to the vehicles to comply with the Bumper Standard found in 49 CFR Part 581. The petitioner states that it will use components that have already been tested to the requirements of the Bumper Standard when installed on 2001 360 Ferrari passenger cars that it believes are the same as 2004 360 Ferrari passenger cars with respect to conformity with this standard (As part of a Petition for a decision that nonconforming 2001 360 Series Ferrari Passenger Cars are eligible for importation (see NHTSA docket 2001-9628), JK submitted a report from MGA Research of Burlington, Wisconsin, dated March 7, 2002, which indicates that it tested a Ferrari 360 Spider to the requirements of Part 581 and that there was no damage to the vehicle during this testing. JK has represented this vehicle to be a non-U.S. certified 2001 Ferrari 360 that it modified to conform to the requirements of Part 581.)

In addition, a supplemental visible label must be affixed to the vehicles near the left windshield post to meet the requirements of 49 CFR Part 565, and a reference and certification label must be affixed to the edge of the driver's side

door to ensure compliance with the requirements of 49 CFR Part 567.

Interested persons are invited to submit comments on the petition described above. Comments should refer to the docket number and be submitted to: Docket Management, Room PL-401, 400 Seventh St., SW., Washington, DC 20590. [Docket hours are from 9 a.m. to 5 p.m.]. Regulatory Flexibility Analysis

Pursuant to 5 U.S.C. 603(b), we conclude that our action in this proceeding will not have a significant economic impact on a substantial number of small entities. The purpose and effect of the action is merely to update the annual railroad industry revenue adequacy finding. No new reporting or other regulatory requirements are imposed, directly or indirectly, on small entities.

Decided: August 11, 2004.
