

INITIAL CAPABILITY EVALUATION LIST

Updated: 28 October 2008

PURPOSE: The Initial Capability Evaluation (ICE) List includes information on all readers that demonstrated to the Transportation Security Administration and the U.S. Coast Guard successful completion of the evaluation. Broad Agency Announcements (BAA) available elsewhere on this web site contain details of the ICE and other information about the Transportation Worker Identification Credential (TWIC) reader testing program.

DISCLAIMER: This list serves no other purpose other than to identify readers that have demonstrated their ability to complete the ICE satisfactorily.

UPDATES: The ICE List will be updated from time to time as more readers complete the ICE.

DESCRIPTION OF THE ICE LISTS:

Two ICE lists are maintained.

The first list includes readers which support the TWIC Privacy Key (TPK) enciphered biometrics during registration and in operation.

A second, separate list includes readers which support the TPK and enciphered biometrics only at time of registration into the Physical Access Control System (PACS). (Such a verification and validation process is required to preserve the Chain of Trust).

Once a successful validation of the credential and cardholder is performed, the cardholder would be enrolled into the specified alternate operational biometric solution for use in operation.

INITIAL CAPABILITY EVALUATION LIST

Readers Using TWIC TPK and TWIC Reference Biometrics

Vendor	H/W Model	Type	URL
