The National Center for Education Statistics (NCES) is the primary federal entity for collecting, analyzing, and reporting data related to education in the United States and other nations. It fulfills a congressional mandate to collect, collate, analyze, and report full and complete statistics on the condition of education in the United States; conduct and publish reports and specialized analyses of the meaning and significance of such statistics; assist state and local education agencies in improving their statistical systems; and review and report on education activities in foreign countries.

NCES activities are designed to address high-priority education data needs; provide consistent, reliable, complete, and accurate indicators of education status and trends; and report timely, useful, and high-quality data to the U.S. Department of Education, the Congress, the states, other education policymakers, practitioners, data users, and the general public. Unless specifically noted, all information contained herein is in the public domain.

We strive to make our products available in a variety of formats and in language that is appropriate to a variety of audiences. You, as our customer, are the best judge of our success in communicating information effectively. If you have any comments or suggestions about this or any other NCES product or report, we would like to hear from you. Please direct your comments to

# FOREWORD

The 2007 edition of the *Digest of Education Statistics* is the 43rd in a series of publications initiated in 1962. The *Digest* has been issued annually except for combined editions for the years 1977–78, 1983–84, and 1985–86. Its primary purpose is to provide a compilation of statistical information covering the broad field of American education from prekindergarten through graduate school. The *Digest* includes a selection of data from many sources, both government and private, and draws especially on the results of surveys and activities carried out by the National Center for Education Statistics (NCES). To qualify for inclusion in the *Digest*, material must be nationwide in scope and of current interest and value. The publication contains information on a variety of subjects in the field of education statistics, including the number of schools and colleges, teachers, enrollments, and graduates, in addition to educational attainment, finances, federal funds for education, libraries, and international comparisons. Supplemental information on population trends, attitudes on education, education characteristics of the labor force, government finances, and economic trends provides background for evaluating education data. Although the *Digest* contains important information on federal education funding, more detailed information on federal activities is available from federal education program offices.

The *Digest* contains seven chapters: All Levels of Education, Elementary and Secondary Education, Postsecondary Education, Federal Programs for Education and Related Activities, Outcomes of Education, International Comparisons of Education, and Libraries and Educational Technology. Preceding these chapters is an Introduction that provides a brief overview of current trends in American education, which supplements the tabular materials in chapters 1 through 7. The *Digest* concludes with three appendixes. The first appendix, Guide to Sources, provides a brief synopsis of the surveys used to generate the *Digest* tables; the second, Definitions, is included to help readers understand terms used in the *Digest*; and the third, Index of Table Numbers, allows readers to quickly locate tables on specific topics.

In addition to updating many of the statistics that have appeared in previous years, this edition contains new material, including

- percentage distribution of kindergarten through 12th-grade students by school type (public assigned, public chosen, or private) or participation in homeschooling and selected child, parent, and household characteristics (table 38);
- child care arrangements of 22- to 25-month-old children, by type and quality of arrangement, and selected child, parent, and household characteristics (table 44);
- percentage of public schools with enrollment under, at, or over capacity, by selected school characteristics (table 99);
- percentage of 22- to 25-month-old children demonstrating specific cognitive and motor skills, by selected child, parent, and household characteristics (table 109);
- average civics scale score and percentage of students attaining civics achievement levels, by grade level and selected student characteristics (table 122);
- average economics scale score of 12th-graders, percentage attaining economics achievement levels, and percentage with different levels of economics coursework, by selected student and school characteristics (table 123);
- percentage distribution of public and private high school graduates, by level of mathematics and science courses completed and selected student characteristics (table 143);
- estimated rate of 2003–04 high school graduates attending degree-granting institutions in fall 2004, by state (table 194);
- employees in degree-granting institutions, by sex, employment status, control and type of institution, and primary occupation (table 233);
- average amount of financial aid awarded to full-time, full-year undergraduates, by type and source of aid and control and type of institution (table 329); and
- total expenditures of private for-profit degree-granting institutions, by purpose and type of institution (table 352).

Updates to tables from the next *Digest of Education Statistics* will appear on the NCES website prior to printing the full edition. The *Digest* can be accessed from http://nces.ed.gov/programs/digest.

Val Plisko
Associate Commissioner
Early Childhood, International, and Crosscutting Studies Division

# ACKNOWLEDGMENTS

Many people have contributed in one way or another to the development of the *Digest of Education Statistics 2007*. Thomas D. Snyder was responsible for the overall development and preparation of this edition of the *Digest*, which was prepared under the general direction of Valena Plisko. William Sonnenberg and Bernard Greene provided statistical computing consultation.

Much of the work for this report was performed by staff of the Education Statistics Services Institute (ESSI), which is funded by the National Center for Education Statistics (NCES) and composed of staff from the American Institutes for Research (AIR) and a number of partner organizations. Numerous ESSI staff contributed to this work, which was performed under the management of AIR project leader Sally Dillow. Mary Ann Fox of AIR served as overall manager for ESSI annual reports work, which includes the *Digest* project, and provided statistical consultation and programming support. Also at AIR, Richa Arora played a key role in coordinating the updating and formatting of the *Digest* tables, along with Mary Jo Metzler and Lauren Gilbertson. Kevin Bianco and Lauren Drake of MacroSys Research and Technology and Jana Kemp of Child Trends also worked on updating and formatting the tables. Charlene Hoffman, a consultant, did most of the work on chapter 4 as well as the tables on degrees conferred. At AIR, Tom Nachazel provided proofreading and editorial support, while Rachel Dinkes and Paul Guerino contributed programming support. Sze-Wei Tang of Quality Information Partners and Nancy Collins, an independent contractor, also supplied programming support. At MacroSys Research and Technology, Qingshu Xie provided programming support and Mike Stock with the assistance of Katie Ferguson desktopped the volume under the supervision of Kalle Culotta.

This year's edition of the *Digest* has received extensive reviews by many individuals within and outside the U.S. Department of Education. We wish to thank them for their time and expert advice. Andrew White, Special Assistant to the Commissioner of NCES, supervised the review of the publication. Duc-Le To of the Institute of Education Sciences reviewed the publication. NCES staff who reviewed portions of the manuscript were Stephen Broughman, Kathryn Chandler, Chris Chapman, Bernard Greene, Kerry Gruber, Elvie Hausken, Lee Hoffman, Barbara Holton, Lisa Hudson, Frank Johnson, Dan McGrath, Frank Morgan, Gail Mulligan, Jennifer Park, Valena Plisko, Sabrina Ratchford, Reneé Rowland, John Sietsema, Emmanuel Sikali, Bill Sonnenberg, Tom Weko, and John Wirt. The ESSI technical review team included staff of AIR (Kevin Bromer, Alison Slade, Aparna Sundaram, Jed Tank, and Zeyu Xu); Child Trends (Siri Warkentien); MacroSys Research and Technology (Stephen Hocker); the National Institute of Statistical Sciences (Xiaolei Wang); and Quality Information Partners (Alexandra Henning).

# List of Figures

| Figure | | Page |
|---|---|---|
| 1. | The structure of education in the United States | 9 |
| 2. | Enrollment, total expenditures in constant dollars, and expenditures as a percentage of the gross domestic product (GDP), by level of education: Selected years, 1965–66 through 2006–07 | 10 |
| 3. | Percentage of persons 25 years old and over, by highest level of educational attainment: Selected years, 1940 through 2007 | 11 |
| 4. | Percentage of persons 25 through 29 years old, by highest level of educational attainment: Selected years, 1940 through 2007 | 11 |
| 5. | Highest level of education attained by persons 25 years old and over: March 2007 | 12 |
| 6. | Enrollment, number of teachers, pupil/teacher ratio, and expenditures in public schools: 1960–61 through 2005–06 | 55 |
| 7. | Total and full-day preprimary enrollment of 3- to 5-year-olds: October 1970 through October 2006 | 56 |
| 8. | Percentage change in public elementary and secondary enrollment, by state: Fall 2000 to fall 2005 | 56 |
| 9. | Percentage of revenue for public elementary and secondary schools, by source of funds: 1970–71 through 2004–05 | 57 |
| 10. | Current expenditure per pupil in fall enrollment in public elementary and secondary schools: 1970–71 through 2004–05 | 57 |
| 11. | Enrollment, degrees conferred, and expenditures in degree-granting institutions: 1960–61 through 2006–07 | 264 |
| 12. | Percentage change in total enrollment in degree-granting institutions, by state: Fall 2000 through fall 2005 | 265 |
| 13. | Enrollment in degree-granting institutions, by age: Fall 1970 through fall 2016 | 265 |
| 14. | Full-time-equivalent (FTE) students per staff member in public and private degree-granting institutions: 1976 and 2005 | 266 |
| 15. | Trends in bachelor's degrees conferred by degree-granting institutions in selected fields of study: 1995–96, 2000–01, and 2005–06 | 266 |
| 16. | Sources of total revenue of public degree-granting institutions: 2004–05 | 267 |
| 17. | Sources of total revenue of private not-for-profit degree-granting institutions: 2004–05 | 267 |
| 18. | Federal on-budget funds for education, by level or other educational purpose: Selected years, 1965 through 2007 | 525 |
| 19. | Percentage of federal on-budget funds for education, by agency: Fiscal year 2006 | 526 |
| 20. | Department of Education outlays, by type of recipient: Fiscal year 2007 | 526 |
| 21. | Labor force participation rate of persons 20 to 64 years old, by age group and highest level of education: 2006 | 544 |
| 22. | Unemployment rates of persons 25 years old and over, by highest level of education: 2006 | 545 |
| 23. | Labor force status of 2005–06 high school dropouts and completers not enrolled in college: October 2006 | 545 |
| 24. | Median annual earnings of persons 25 years old and over, by highest level of education and sex: 2006 | 546 |
| 25. | Average salaries of bachelor's degree recipients 1 year after graduation, by field: 1991, 1994, and 2001 | 546 |
| 26. | Percentage change in enrollment, by selected areas of the world and level of education: 1990 to 2004 | 569 |
| 27. | Bachelor's degree recipients as a percentage of the population of the typical ages of graduation, by country: 2004 | 570 |
| 28. | Public direct expenditures for education as a percentage of the gross domestic product (GDP), by country: 2003 | 570 |
| 29. | Percentage of all public schools and instructional rooms with internet access: Various years, fall 1994 through fall 2005 | 600 |

# List of Tables

## Chapter 1. All Levels of Education

### *Enrollment, Teachers, and Schools*

| Table | | Page |
|---|---|---|
| 1. | Projected number of participants in educational institutions, by level and control of institution: Fall 2007 | 13 |
| 2. | Enrollment in educational institutions, by level and control of institution: Selected years, fall 1980 through fall 2007 | 13 |
| 3. | Enrollment in educational institutions, by level and control of institution: Selected years, 1869–70 through fall 2016 | 14 |
| 4. | Number of teachers in elementary and secondary schools, and instructional staff in postsecondary degree-granting institutions, by control of institution: Selected years, fall 1970 through fall 2016 | 16 |
| 5. | Number of educational institutions, by level and control of institution: Selected years, 1980–81 through 2005–06 | 17 |

### *Enrollment Rates*

| | | |
|---|---|---|
| 6. | Percentage of the population 3 to 34 years old enrolled in school, by sex, race/ethnicity, and age: Selected years, 1980 through 2006 | 18 |
| 7. | Percentage of the population 3 to 34 years old enrolled in school, by age group: Selected years, 1940 through 2006 | 20 |

### *Educational Attainment*

| | | |
|---|---|---|
| 8. | Percentage of persons age 25 and over and 25 to 29, by race/ethnicity, years of school completed, and sex: Selected years, 1910 through 2007 | 22 |
| 9. | Number of persons age 18 and over, by highest level of education attained, age, sex, and race/ethnicity: 2007 | 24 |
| 10. | Persons age 18 and over who hold at least a bachelor's degree in specific fields of study, by sex, race/ethnicity, and age: 2001 | 25 |
| 11. | Educational attainment of persons 18 years old and over, by state: 2000 and 2005 | 26 |
| 12. | Educational attainment of persons 25 years old and over, by race/ethnicity and state: April 1990 and April 2000 | 27 |
| 13. | Educational attainment of persons 25 years old and over for the 25 largest states, by sex: 2006 | 29 |
| 14. | Educational attainment of persons 25 years old and over for the 15 largest metropolitan areas, by sex: 2002 | 29 |

### *Population*

| | | |
|---|---|---|
| 15. | Estimates of resident population, by age group: 1970 through 2006 | 30 |
| 16. | Estimates of resident population, by race/ethnicity and age group: Selected years, 1980 through 2006 | 31 |
| 17. | Estimated total and school-age resident populations, by state: Selected years, 1970 through 2006 | 32 |

### *Characteristics of Families With Children*

| | | |
|---|---|---|
| 18. | Number and percentage of families, by family status and presence of own children under 18: Selected years, 1970 through 2006 | 33 |
| 19. | Characteristics of families with own children under 18, by race/ethnicity and family structure: 2006 | 34 |
| 20. | Household income and poverty rates, by state: 1990, 2000, and 2004–06 | 35 |
| 21. | Poverty status of persons, families, and children under age 18, by race/ethnicity: Selected years, 1959 through 2006 | 37 |

### *Opinions on Education*

22. Average grade that the public would give the public schools in their community and in the nation at large: 1974 through 2007 . . . . . 40
23. Percentage of elementary and secondary school children whose parents were involved in school activities, by selected child, parent, and school characteristics: 1999 and 2003 . . . . . 41
24. Percentage of kindergartners through fifth-graders whose parents were involved in education-related activities, by selected child, parent, and school characteristics: 1999 and 2003 . . . . . 42

### *Finances*

25. Expenditures of educational institutions related to the gross domestic product, by level of institution: Selected years, 1929–30 through 2006–07 . . . . . 43
26. Expenditures of educational institutions, by level and control of institution: Selected years, 1899–1900 through 2006–07 . . . . . 44
27. Amount and percentage distribution of direct general expenditures of state and local governments, by function: Selected years, 1970–71 through 2004–05 . . . . . 45
28. Direct general expenditures of state and local governments for all functions and for education, by level of education and state: 2004–05 . . . . . 46
29. Direct general expenditures per capita of state and local governments for all functions and for education, by level of education and state: 2004–05 . . . . . 47
30. Gross domestic product, state and local expenditures, personal income, disposable personal income, median family income, and population: Selected years, 1929 through 2006 . . . . . 48
31. Gross domestic product price index, Consumer Price Index, education price indexes, and federal budget composite deflator: Selected years, 1919 through 2006 . . . . . 49

## Chapter 2. Elementary and Secondary Education

### *Enrollment*

32. Historical summary of public elementary and secondary school statistics: Selected years, 1869–70 through 2004–05 . . . . . 58
33. Enrollment in public elementary and secondary schools, by state or jurisdiction: Selected years, fall 1990 through fall 2007 . . . . . 60
34. Enrollment in public elementary and secondary schools, by level, grade, and state or jurisdiction: Fall 2005 . . . . . 62
35. Enrollment in public elementary and secondary schools, by level, grade, and state or jurisdiction: Fall 2004 . . . . . 64
36. Enrollment in public elementary and secondary schools, by grade: Selected years, fall 1980 through fall 2005 . . . . . 66
37. Number and percentage of homeschooled students ages 5 through 17 with a grade equivalent of kindergarten through 12th grade, by selected child, parent, and household characteristics: 1999 and 2003 . . . . . 67
38. Percentage distribution of students ages 5 through 17 attending kindergarten through 12th grade, by school type or participation in homeschooling and selected child, parent, and household characteristics: 1999 and 2003 . . . . . 68
39. Average daily attendance in public elementary and secondary schools, by state or jurisdiction: Selected years, 1969–70 through 2004–05 . . . . . 69
40. Percentage distribution of enrollment in public elementary and secondary schools, by race/ethnicity and state or jurisdiction: Fall 1995 and fall 2005 . . . . . 70
41. Enrollment of 3-, 4-, and 5-year-old children in preprimary programs, by level of program, control of program, and attendance status: Selected years, 1965 through 2006 . . . . . 71

42. Number of children under 6 years old and not yet enrolled in kindergarten, percentage in center-based programs, average weekly hours in nonparental care, and percentage in various types of primary care arrangements, by selected child and family characteristics: 2005 . . . . . 72
43. Child care arrangements of 3- to 5-year-old children who are not yet in kindergarten, by age and race/ethnicity: Various years, 1991 through 2005 . . . . . 73
44. Child care arrangements of children at about 2 years of age, by type and quality of arrangement, and selected child and family characteristics: 2003–04 . . . . . 74
45. Children of prekindergarten through second-grade age, by enrollment status, selected maternal characteristics, and household income: 1995, 2001, and 2005 . . . . . 75
46. Percentage of 3- to 5-year-olds not yet enrolled in kindergarten who have participated in home literacy activities with a family member, by type of activity and selected child and family characteristics: 1993, 2001, and 2005 . . . . . 76
47. Children 3 to 21 years old served in federally supported programs for the disabled, by type of disability: Selected years, 1976–77 through 2005–06 . . . . . 77
48. Percentage distribution of students with disabilities 6 to 21 years old receiving education services for the disabled, by educational environment and type of disability: Selected years, fall 1989 through fall 2005 . . . . . 78
49. Number and percentage of children served under Individuals with Disabilities Education Act, Part B, by age group and state or jurisdiction: Selected years, 1990–91 through 2005–06 . . . . . 79
50. Number of gifted and talented students in public elementary and secondary schools, by sex, race/ethnicity, and state: 2002 and 2004 . . . . . 80
51. Percentage of gifted and talented students in public elementary and secondary schools, by sex, race/ethnicity, and state: 2002 and 2004 . . . . . 81
52. Enrollment in grades 9 through 12 in public and private schools compared with population 14 to 17 years of age: Selected years, 1889–90 through fall 2007 . . . . . 82
53. Enrollment in foreign language courses compared with enrollment in grades 9 through 12 in public secondary schools: Selected years, fall 1948 through fall 2000 . . . . . 83
54. Number and percentage of schools with students enrolled in distance education courses and enrollment in distance education courses, by instructional level and district characteristics: 2002–03 84

***Private Elementary and Secondary Schools***

55. Private elementary and secondary enrollment, teachers, and schools, by orientation of school and selected school characteristics: Fall 2003 . . . . . 85
56. Private elementary and secondary enrollment, number of schools, and average tuition, by school level, orientation, and tuition: 1999–2000 and 2003–04 . . . . . 86
57. Private elementary and secondary school full-time-equivalent staff and student to full-time-equivalent staff ratios, by orientation of school, school level, and type of staff: 2003–04 . . . . . 87
58. Enrollment and instructional staff in Catholic elementary and secondary schools, by level: Selected years, 1919–20 through 2006–07 . . . . . 89
59. Private elementary and secondary schools, enrollment, teachers, and high school graduates, by state: Selected years, 1997 through 2003 . . . . . 90

***Teachers and Other Staff***

60. Public elementary and secondary pupil/teacher ratios, by enrollment size, type, and level of school: Fall 1987 through fall 2005 . . . . . 91
61. Public and private elementary and secondary teachers, enrollment, and pupil/teacher ratios: Selected years, fall 1955 through fall 2016 . . . . . 92
62. Public elementary and secondary teachers, by level and state or jurisdiction: Fall 2000 through fall 2005 93
63. Teachers, enrollment, and pupil/teacher ratios in public elementary and secondary schools, by state or jurisdiction: Fall 2000 through fall 2005 . . . . . 94
64. Highest degree earned, years of full-time teaching experience, and average class size for teachers in public elementary and secondary schools, by state: 2003–04 . . . . . 95

65. Highest degree earned and years of full-time teaching experience for teachers in public and private elementary and secondary schools, by selected teacher characteristics: 1999–2000 and 2003–04 96
66. Selected characteristics of public school teachers: Selected years, spring 1961 through spring 2001 98
67. Percentage of public school teachers of grades 9 through 12, by field of main teaching assignment and selected demographic and educational characteristics: 2003–04 . . . . . 99
68. Teachers' perceptions about serious problems in their schools, by control and level of school: 1993–94, 1999–2000, and 2003–04 . . . . . 100
69. Teachers' perceptions about teaching and school conditions, by control and level of school: 1993–94, 1999–2000, and 2003–04 . . . . . 101
70. Mobility of public and private elementary and secondary teachers, by selected teacher and school characteristics: Selected years, 1987–88 through 2004–05 . . . . . 102
71. Average base salary for full-time teachers in public elementary and secondary schools, by highest degree earned and years of full-time teaching: Selected years, 1990–91 through 2003–04 . . . . . 103
72. Average salaries for full-time teachers in public and private elementary and secondary schools, by selected characteristics: 2003–04 . . . . . 105
73. Average base salary for full-time public elementary and secondary school teachers with a bachelor's degree as their highest degree, by years of full-time teaching experience and state: 1993–94, 1999–2000, and 2003–04 . . . . . 107
74. Average base salary for full-time public elementary and secondary school teachers with a master's degree as their highest degree, by years of full-time teaching experience and state: 1993–94, 1999–2000, and 2003–04 . . . . . 108
75. Estimated average annual salary of teachers in public elementary and secondary schools: Selected years, 1959–60 through 2005–06 . . . . . 109
76. Estimated average annual salary of teachers in public elementary and secondary schools, by state or jurisdiction: Selected years, 1969–70 through 2005–06 . . . . . 110
77. Staff employed in public elementary and secondary school systems, by functional area: Selected years, 1949–50 through fall 2005 . . . . . 111
78. Staff employed in public elementary and secondary school systems, by type of assignment and state or jurisdiction: Fall 2005 . . . . . 112
79. Staff employed in public elementary and secondary school systems, by type of assignment and state or jurisdiction: Fall 2004 . . . . . 113
80. Staff and teachers in public elementary and secondary school systems, by state or jurisdiction: Fall 1999 through fall 2005 . . . . . 114
81. Staff, enrollment, and pupil/staff ratios in public elementary and secondary school systems, by state or jurisdiction: Fall 1998 through fall 2005 . . . . . 115
82. Principals in public and private elementary and secondary schools, by selected characteristics: 1993–94, 1999–2000, and 2003–04 . . . . . 116

***Schools and School Districts***

83. Number of public school districts and public and private elementary and secondary schools: Selected years, 1869–70 through 2005–06 . . . . . 117
84. Number and enrollment of regular public school districts, by enrollment size of district: Selected years, 1979–80 through 2005–06 . . . . . 118
85. Number of public elementary and secondary education agencies, by type of agency and state or jurisdiction: 2004–05 and 2005–06 . . . . . 119
86. Public elementary and secondary students, schools, pupil/teacher ratios, and finances, by type of locale: 2004–05 and 2005–06 . . . . . 120
87. Selected statistics on enrollment, teachers, dropouts, and graduates in public school districts enrolling more than 15,000 students, by state: 1990, 2000, 2003–04, 2004–05, and 2005 . . . . . 122
88. Revenues, expenditures, poverty rate, and Title I allocations of public school districts enrolling more than 15,000 students, by state: 2004–05 and fiscal year 2007 . . . . . 136

89. Enrollment, poverty, and federal funds for the 100 largest school districts, by enrollment size in 2005: Fall 2005, 2004–05, and fiscal year 2007 . . . . . 150
90. Public elementary and secondary schools, by type of school: Selected years, 1967–68 through 2005–06 . . . . . 153
91. Number and percentage distribution of public elementary and secondary schools and enrollment, by type and enrollment size of school: 2004–05 and 2005–06 . . . . . 154
92. Average enrollment and percentage distribution of public elementary and secondary schools, by type and size: Selected years, 1982–83 through 2005–06 . . . . . 155
93. Public elementary and secondary school students, by racial/ethnic enrollment concentration of school: Fall 1995, fall 2000, and fall 2005 . . . . . 156
94. Public elementary and secondary schools, by type and state or jurisdiction: 1990–91, 2000–01, and 2005–06 . . . . . 157
95. Public elementary schools, by grade span, average school size, and state or jurisdiction: 2005–06 158
96. Public secondary schools, by grade span, average school size, and state or jurisdiction: 2005–06 159
97. Number and enrollment of traditional public and public charter elementary and secondary schools and percentages of students, teachers, and schools, by selected characteristics: 2003–04 . . . . . 160
98. Percentage of public schools with permanent and portable (temporary) buildings and with environmental factors that interfere with instruction in classrooms, by selected school characteristics, type of factor, and extent of interference: 2005 . . . . . 162
99. Percentage of public schools with enrollment under, at, or over capacity, by selected school characteristics: 1999 and 2005 . . . . . 162

***High School Completers and Dropouts***

100. High school graduates, by sex and control of school: Selected years, 1869–70 through 2007–08 . 163
101. Public high school graduates, by state or jurisdiction: Selected years, 1980–81 through 2005–06. 164
102. Averaged freshman graduation rates for public secondary schools, by state: Selected years, 1990–91 through 2004–05 . . . . . 165
103. Public high school graduates and dropouts, by race/ethnicity and state or jurisdiction: 2003–04 and 2004–05 . . . . . 166
104. General Educational Development (GED) test takers and test passers, by age: 1971 through 2005 167
105. Percentage of high school dropouts among persons 16 through 24 years old (status dropout rate), by sex and race/ethnicity: Selected years, 1960 through 2006 . . . . . 168
106. Percentage of high school dropouts among persons 16 through 24 years old (status dropout rate), by income level, and percentage distribution of status dropouts, by labor force status and educational attainment: 1970 through 2006 . . . . . 169
107. Number of students with disabilities exiting special education, by basis of exit, age, and type of disability: United States and other jurisdictions, 2003–04 and 2004–05 . . . . . 170

***Educational Achievement***

108. Percentage of children demonstrating specific cognitive and motor skills at about 9 months of age, by child's age at assessment: 2001–02 . . . . . 171
109. Percentage of children demonstrating specific cognitive and motor skills at about 2 years of age, by selected characteristics: 2003–04 . . . . . 172
110. Mean reading scale scores and specific reading skills of fall 1998 first-time kindergartners, by time of assessment and selected characteristics: Selected years, fall 1998 through spring 2004 . . . . 173
111. Mean mathematics and science scale scores and specific mathematics skills of fall 1998 first-time kindergartners, by time of assessment and selected characteristics: Selected years, fall 1998 through spring 2004 . . . . . 174
112. Average reading scale score, by age and selected student and school characteristics: Selected years, 1971 through 2004 . . . . . 175
113. Student scale score in reading, by age and percentile: Selected years, 1971 through 2004. . . . . 177

114. Average reading scale score, by age and amount of time spent on reading and homework: Selected years, 1984 through 2004 . . . . . 178
115. Percentage of students at or above selected reading score levels, by age, sex, and race/ethnicity: Selected years, 1971 through 2004 . . . . . 179
116. Average reading scale score and percentage of 4th-graders in public schools attaining reading achievement levels, by race/ethnicity and state or jurisdiction: Selected years, 1992 through 2007 181
117. Average reading scale score and percentage of 8th-graders in public schools attaining reading achievement levels, by locale and state or jurisdiction: Selected years, 1998 through 2007 . . . . . 183
118. Average reading scale scores of 4th- and 8th-graders, by selected student and parent characteristics and school type: Various years, 2000 through 2005 . . . . . 185
119. Percentage of students attaining writing achievement levels, by grade level and selected student characteristics: 2002 . . . . . 186
120. Percentage of students attaining U.S. history achievement levels, by grade level and selected student characteristics: 2001 and 2006 . . . . . 187
121. Average U.S. history scale score, by grade level and selected student characteristics, and percentage distribution of 12th-graders, by selected student characteristics: 1994, 2001, and 2006 188
122. Average civics scale score and percentage of students attaining civics achievement levels, by grade level and selected student characteristics: 1998 and 2006 . . . . . 189
123. Average economics scale score of 12th-graders, percentage attaining economics achievement levels, and percentage with different levels of economics coursework, by selected student and school characteristics: 2006 . . . . . 190
124. Percentage of students attaining geography achievement levels, by grade level and selected student characteristics: 2001 . . . . . 191
125. Average mathematics scale score, by age and selected student and school characteristics: Selected years, 1973 through 2004 . . . . . 192
126. Percentage of students at or above selected mathematics proficiency levels, by age, sex, and race/ethnicity: Selected years, 1978 through 2004 . . . . . 193
127. Mathematics performance of 17-year-olds, by highest mathematics course taken, sex, and race/ethnicity: Selected years, 1978 through 2004 . . . . . 195
128. Average mathematics scale score, percentage attaining mathematics achievement levels, and selected statistics on mathematics education of 4th-graders in public schools, by state or jurisdiction: Selected years, 1992 through 2007 . . . . . 196
129. Average mathematics scale score and percentage attaining mathematics achievement levels of 8th-graders in public schools, by level of parental education and state or jurisdiction: Selected years, 1990 through 2007 . . . . . 197
130. Selected statistics on mathematics education for public school students, by state or jurisdiction: 2000, 2003, 2004, and 2006 . . . . . 199
131. Average mathematics scale scores of 4th-, 8th-, and 12th-graders, by selected student and parent characteristics and school type: 2000, 2003, and 2005 . . . . . 200
132. Average science scale scores and percentage of 4th-, 8th-, and 12th-graders attaining science achievement levels, by selected student characteristics and percentile: 1996, 2000, and 2005 . . 201
133. Average science scale score for 8th-graders in public schools, by selected student characteristics and state or jurisdiction: 1996, 2000, and 2005 . . . . . 202
134. SAT score averages of college-bound seniors, by race/ethnicity: Selected years, 1986–87 through 2006–07 . . . . . 204
135. SAT score averages of college-bound seniors, by sex: 1966–67 through 2006–07 . . . . . 205
136. SAT score averages of college-bound seniors, by selected student characteristics: Selected years, 1995–96 through 2006–07 . . . . . 206
137. SAT score averages of college-bound seniors and percentage of graduates taking SAT, by state or jurisdiction: Selected years, 1987–88 through 2006–07 . . . . . 208

138. ACT score averages and standard deviations, by sex and race/ethnicity, and percentage of ACT test takers, by selected composite score ranges and planned fields of study: Selected years, 1995 through 2007 . . . . . 209
139. Percentage distribution of elementary and secondary school children, by average grades and selected child and school characteristics: 1996, 1999, and 2003 . . . . . 210

***Coursetaking***

140. Average number of Carnegie units earned by public high school graduates in various subject fields, by selected student characteristics: Selected years, 1982 through 2005 . . . . . 211
141. Average number of Carnegie units earned by public high school graduates in career/technical education courses, by selected student characteristics: Selected years, 1982 through 2005 . . . . 214
142. Percentage of public and private high school graduates taking selected mathematics and science courses in high school, by sex and race/ethnicity: Selected years, 1982 through 2005 . . . . . 217
143. Percentage distribution of public and private high school graduates, by highest level of mathematics and science course completed and selected student characteristics: 2003–04 . . . . 218
144. Percentage of public and private high school graduates earning minimum credits in selected combinations of academic courses, by sex and race/ethnicity: Selected years, 1982 through 2005 219
145. Public high schools that offered and students enrolled in dual credit, Advanced Placement, and International Baccalaureate courses, by school characteristics: 2003. . . . . 220

***Student Activities and Behavior***

146. Percentage of high school seniors who say they engage in various activities, by selected student and school characteristics: 1992 and 2004 . . . . . 221
147. Percentage of high school sophomores who participate in various school-sponsored extracurricular activities, by selected student characteristics: 1990 and 2002. . . . . 222
148. Percentage distribution of 4th-graders, by time spent on homework and television viewing each day and selected student and school characteristics: Selected years, 1992 through 2000 . . . . . 223
149. Tenth-graders' attendance patterns, by selected student and school characteristics: 1990 and 2002 224
150. Percentage of schools with various security measures, by school control and selected characteristics: 2003–04 . . . . . 225
151. Percentage of public schools reporting crime incidents, and number and rate of incidents, by school characteristics and type of incident: 1999–2000 and 2005–06 . . . . . 226
152. Number and percentage of students expelled from public elementary and secondary schools, by sex, race/ethnicity, and state: 2004 . . . . . 230
153. Number and percentage of students suspended from public elementary and secondary schools, by sex, race/ethnicity, and state: 2004 . . . . . 231
154. Percentage of students in grades 9 through 12 who reported experience with drugs and violence on school property, by race/ethnicity, grade, and sex: Selected years, 1997 through 2005. . . . . 232
155. Percentage of 12- to 17-year-olds reporting substance abuse during the past 30 days and the past year, by drug used: Selected years, 1982 through 2005 . . . . . 233
156. Percentage of high school seniors reporting drug use, by type of drug and reporting period: Selected years, 1975 through 2006 . . . . . 234

***State Regulations***

157. Age range for compulsory school attendance and special education services, and policies on year-round schools and kindergarten programs, by state: Selected years, 1997 through 2006 . . . . . 235
158. State requirements for a standard high school diploma: 2006. . . . . 236
159. States that use criterion-referenced tests (CRTs) aligned to state standards, by subject area and level: 2005–06 . . . . . 237

160. States using minimum-competency testing, by grade levels assessed, expected uses of standards, and state or jurisdiction: 2001–02 . . . . . 238
161. States requiring testing for initial certification of elementary and secondary teachers, by skills or knowledge assessment and state: 2006 and 2007 . . . . . 239

***Revenues and Expenditures***

162. Revenues for public elementary and secondary schools, by source of funds: Selected years, 1919–20 through 2004–05 . . . . . 240
163. Revenues for public elementary and secondary schools, by source and state or jurisdiction: 2004–05 . . . . . 241
164. Revenues for public elementary and secondary schools, by source and state or jurisdiction: 2003–04 . . . . . 242
165. Summary of expenditures for public elementary and secondary education, by purpose: Selected years, 1919–20 through 2004–05 . . . . . 243
166. Current expenditures for public elementary and secondary education, by state or jurisdiction: Selected years, 1969–70 through 2004–05 . . . . . 244
167. Total expenditures for public elementary and secondary education, by function and state or jurisdiction: 2004–05 . . . . . 246
168. Total expenditures for public elementary and secondary education, by function and state or jurisdiction: 2003–04 . . . . . 248
169. Total expenditures for public elementary and secondary education, by function and subfunction: Selected years, 1990–91 through 2004–05 . . . . . 250
170. Expenditures for instruction in public elementary and secondary schools, by subfunction and state or jurisdiction: 2003–04 and 2004–05 . . . . . 252
171. Total and current expenditures per pupil in public elementary and secondary schools: Selected years, 1919–20 through 2004–05 . . . . . 253
172. Total and current expenditures per pupil in fall enrollment in public elementary and secondary education, by function and state or jurisdiction: 2004–05 . . . . . 254
173. Total and current expenditures per pupil in fall enrollment in public elementary and secondary education, by function and state or jurisdiction: 2003–04 . . . . . 255
174. Current expenditure per pupil in fall enrollment in public elementary and secondary schools, by state or jurisdiction: Selected years, 1969–70 through 2004–05 . . . . . 256
175. Current expenditure per pupil in average daily attendance in public elementary and secondary schools, by state or jurisdiction: Selected years, 1959–60 through 2004–05 . . . . . 258
176. Students transported at public expense and current expenditures for transportation: Selected years, 1929–30 through 2004–05 . . . . . 260

**Chapter 3. Postsecondary Education**

***Enrollment***

177. Enrollment, staff, and degrees conferred in postsecondary institutions participating in Title IV programs, by level and control of institution, sex of student, and type of degree: Fall 2005 and 2005–06 . . . . . 268
178. Historical summary of faculty, students, degrees, and finances in degree-granting institutions: Selected years, 1869–70 through 2005–06 . . . . . 269
179. Total fall enrollment in degree-granting institutions, by attendance status, sex of student, and control of institution: Selected years, 1947 through 2005 . . . . . 270
180. Total fall enrollment in degree-granting institutions, by control and type of institution: 1963 through 2005 . . . . . 271
181. Total fall enrollment in degree-granting institutions, by sex, age, and attendance status: Selected years, 1970 through 2016 . . . . . 272

182. Total fall enrollment in degree-granting institutions, by level, sex, age, and attendance status of student: 2005 . . . 273
183. Total fall enrollment in degree-granting institutions, by control and type of institution, age, and attendance status of student: 2005 . . . 274
184. Total fall enrollment in degree-granting institutions, by level of enrollment, sex, attendance status, and type and control of institution: 2005 . . . 275
185. Total fall enrollment in degree-granting institutions, by level of enrollment, sex, attendance status, and type and control of institution: 2004 . . . 276
186. Total fall enrollment in degree-granting institutions, by level of enrollment, sex, attendance status, and type and control of institution: 2003 . . . 277
187. Total fall enrollment in degree-granting institutions, by attendance status, sex of student, and type and control of institution: Selected years, 1970 through 2005 . . . 278
188. Fall enrollment and number of degree-granting institutions, by control and affiliation of institution: Selected years, 1980 through 2005 . . . 279
189. Total first-time freshmen fall enrollment in degree-granting institutions, by attendance status, sex of student, and type and control of institution: 1955 through 2005 . . . 281
190. Total first-time freshmen fall enrollment in degree-granting institutions, by attendance status, sex, control of institution, and state or jurisdiction: 2000 through 2005 . . . 282
191. College enrollment and enrollment rates of recent high school completers, by sex: 1960 through 2006 . . . 283
192. College enrollment and enrollment rates of recent high school completers, by race/ethnicity: 1960 through 2006 . . . 284
193. Graduation rates of previous year's 12th-graders and college attendance rates of those who graduated, by selected high school characteristics: 1999–2000 and 2003–04 . . . 286
194. Estimated rate of 2003–04 high school graduates attending degree-granting institutions, by state: 2004 287
195. Enrollment rates of 18- to 24-year-olds in degree-granting institutions, by sex and race/ethnicity: 1967 through 2006 . . . 288
196. Total undergraduate fall enrollment in degree-granting institutions, by attendance status, sex of student, and control of institution: 1969 through 2005 . . . 289
197. Total graduate fall enrollment in degree-granting institutions, by attendance status, sex of student, and control of institution: 1969 through 2005 . . . 290
198. Total first-professional fall enrollment in degree-granting institutions, by attendance status, sex of student, and control of institution: 1969 through 2005 . . . 291
199. Total fall enrollment in degree-granting institutions, by state or jurisdiction: Selected years, 1970 through 2005 . . . 292
200. Total fall enrollment in public degree-granting institutions, by state or jurisdiction: Selected years, 1970 through 2005 . . . 293
201. Total fall enrollment in private degree-granting institutions, by state or jurisdiction: Selected years, 1970 through 2005 . . . 294
202. Total fall enrollment in all degree-granting institutions, by attendance status, sex, and state or jurisdiction: 2004 and 2005 . . . 295
203. Total fall enrollment in public degree-granting institutions, by attendance status, sex, and state or jurisdiction: 2004 and 2005 . . . 296
204. Total fall enrollment in private degree-granting institutions, by attendance status, sex, and state or jurisdiction: 2004 and 2005 . . . 297
205. Total fall enrollment in private not-for-profit degree-granting institutions, by attendance status, sex, and state or jurisdiction: 2004 and 2005 . . . 298
206. Total fall enrollment in degree-granting institutions, by control and type of institution and state or jurisdiction: 2004 and 2005 . . . 299
207. Total fall enrollment in degree-granting institutions, by level of enrollment and state or jurisdiction: 2004 and 2005 . . . 300

208. Total fall enrollment in degree-granting institutions, by control, level of enrollment, type of institution, and state or jurisdiction: 2005 . . . 301
209. Total fall enrollment in degree-granting institutions, by control, level of enrollment, type of institution, and state or jurisdiction: 2004 . . . 302
210. Full-time-equivalent fall enrollment in degree-granting institutions, by control and type of institution: 1969 through 2005 . . . 303
211. Full-time-equivalent fall enrollment in degree-granting institutions, by control and type of institution and state or jurisdiction: 2000, 2004, and 2005 . . . 304
212. Full-time-equivalent fall enrollment in degree-granting institutions, by control and state or jurisdiction: Selected years,1980 through 2005 . . . 305
213. Residence and migration of all freshmen students in degree-granting institutions, by state or jurisdiction: Fall 2004 . . . 306
214. Residence and migration of all freshmen students in degree-granting institutions who graduated from high school in the previous 12 months, by state or jurisdiction: Fall 2004 . . . 307
215. Residence and migration of all freshmen students in 4-year degree-granting institutions who graduated from high school in the previous 12 months, by state or jurisdiction: Fall 2004 . . . 308
216. Total fall enrollment in degree-granting institutions, by race/ethnicity, sex, attendance status, and level of student: Selected years,1976 through 2005 . . . 309
217. Total fall enrollment in degree-granting institutions, by race/ethnicity of student and type and control of institution: Selected years,1976 through 2005 . . . 312
218. Fall enrollment in degree-granting institutions, by race/ethnicity of student and by state or jurisdiction: 2005 . . . 314
219. Fall enrollment in degree-granting institutions, by race/ethnicity of student and by state or jurisdiction: 2004 . . . 316
220. Total number of degree-granting institutions and fall enrollment in these institutions, by type and control of institution and percentage of minority enrollment: 2005 . . . 318
221. Number and percentage of students enrolled in postsecondary institutions, by level, disability status, and selected student characteristics: 2003–04 . . . 319
222. Enrollment in postsecondary education, by student level, type of institution, age, and major field of study: 2003–04 . . . 320
223. Graduate enrollment in science and engineering programs in degree-granting institutions, by field of study: Fall 1993 through fall 2005 . . . 322
224. Number of degree-granting institutions and enrollment in these institutions, by size, type, and control of institution: Fall 2005 . . . 324
225. Enrollment of the 120 largest degree-granting college and university campuses, by selected characteristics and institution: Fall 2005 . . . 325
226. Selected statistics for degree-granting institutions enrolling more than 15,000 students in 2005: Selected years, 1990 through 2006 . . . 326
227. Enrollment and degrees conferred in degree-granting women's colleges, by selected characteristics and institution: Fall 2005 and 2005–06 . . . 336
228. Enrollment and degrees conferred in degree-granting institutions that serve large proportions of Hispanic students, by selected characteristics and institution: Fall 2005 and 2005–06 . . . 337
229. Enrollment and degrees conferred in degree-granting tribally controlled institutions, by institution: Fall 2000 through fall 2005, and 2004–05 and 2005–06 . . . 347
230. Fall enrollment, degrees conferred, and expenditures in degree-granting historically Black colleges and universities, by institution: 2004, 2004–05, 2005, and 2005–06 . . . 348
231. Selected statistics on degree-granting historically Black colleges and universities, by control and type of institution: Selected years, 1980 through 2006 . . . 350
232. Fall enrollment in degree-granting historically Black colleges and universities, by type and control of institution: 1976 through 2005 . . . 351

***Staff***

233. Employees in degree-granting institutions, by sex, employment status, control and type of institution, and primary occupation: Selected years, fall 1987 through fall 2005 . . . . . 352
234. Total and full-time-equivalent staff in degree-granting institutions, by employment status, control of institution, and occupation: Fall 1976, fall 1995, and fall 2005 . . . . . 353
235. Employees in degree-granting institutions, by employment status, sex, control and type of institution, and primary occupation: Fall 2005 . . . . . 354
236. Employees in degree-granting institutions, by race/ethnicity and residency status, sex, employment status, control and type of institution, and primary occupation: Fall 2005 . . . . . 356
237. Number of full-time-equivalent (FTE) staff and faculty, and FTE staff and faculty/FTE student ratios in degree-granting institutions, by control and type of institution and state or jurisdiction: Fall 2005 357
238. Number of instructional faculty in degree-granting institutions, by employment status and control and type of institution: Selected years, fall 1970 through fall 2005 . . . . . 359
239. Full-time instructional faculty in degree-granting institutions, by race/ethnicity and residency status, sex, and academic rank: Fall 2003 and fall 2005 . . . . . 360
240. Percentage distribution of full-time instructional faculty and staff in degree-granting institutions, by type and control of institution, selected instruction activities, and number of classes taught for credit: Fall 2003 . . . . . 361
241. Percentage distribution of part-time instructional faculty and staff in degree-granting institutions, by type and control of institution, selected instruction activities, and number of classes taught for credit: Fall 2003 . . . . . 363
242. Full-time and part-time instructional faculty and staff in degree-granting institutions, by type and control of institution and selected characteristics: Fall 1992, fall 1998, and fall 2003 . . . . . 365
243. Full-time and part-time instructional faculty and staff in degree-granting institutions, by race/ethnicity, sex, and selected characteristics: Fall 2003 . . . . . 367
244. Full-time and part-time instructional faculty and staff in degree-granting institutions, by field and faculty characteristics: Fall 1992, fall 1998, and fall 2003 . . . . . 369
245. Full-time and part-time instructional faculty and staff in degree-granting institutions, by race/ethnicity, sex, and program area: Fall 1998 and fall 2003 . . . . . 371
246. Average base salary of full-time instructional faculty and staff in degree-granting institutions, by type and control of institution and field of instruction: Selected years, 1987–88 through 2003–04 373
247. Average salary of full-time instructional faculty on 9-month contracts in degree-granting institutions, by academic rank, control and type of institution, and sex: Selected years, 1970–71 through 2006–07 374
248. Average salary of full-time instructional faculty on 9-month contracts in degree-granting institutions, by sex, academic rank, and control and type of institution: Selected years, 1999–2000 through 2006–07 377
249. Average salary of full-time instructional faculty on 9-month contracts in degree-granting institutions, by control and type of institution and state or jurisdiction: 2006–07. . . . . 378
250. Average salary of full-time instructional faculty on 9-month contracts in degree-granting institutions, by control and type of institution and state or jurisdiction: 2005–06. . . . . 379
251. Average salary of full-time instructional faculty on 9-month contracts in 4-year degree-granting institutions, by type and control of institution, rank of faculty, and state or jurisdiction: 2006–07. . 380
252. Average salary of full-time instructional faculty on 9-month contracts in 4-year degree-granting institutions, by type and control of institution, rank of faculty, and state or jurisdiction: 2005–06. . 381
253. Average benefit expenditure for full-time instructional faculty on 9-month contracts in degree-granting institutions, by type of benefit and control of institution: Selected years, 1977–78 through 2006–07. 382
254. Percentage of full-time instructional staff with tenure for degree-granting institutions with a tenure system, by academic rank, sex, and control and type of institution: Selected years, 1993–94 through 2005–06 . . . . . 384

### *Institutions*

255. Degree-granting institutions, by control and type of institution: Selected years, 1949–50 through 2006–07 . . . 385
256. Degree-granting institutions and branches, by type and control of institution and state or jurisdiction: 2006–07 . . . 386
257. Degree-granting institutions that have closed their doors, by control and type of institution: 1969–70 through 2006–07 . . . 388

### *Degrees*

258. Degrees conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1869–70 through 2016–17 . . . 389
259. Associate's degrees conferred by degree-granting institutions, by field of study: 1994–95 through 2005–06 . . . 390
260. Associate's degrees and other subbaccalaureate awards conferred by degree-granting institutions, by length of curriculum, sex of student, and field of study: 2005–06 . . . 391
261. Bachelor's degrees conferred by degree-granting institutions, by discipline division: Selected years, 1970–71 through 2005–06 . . . 392
262. Master's degrees conferred by degree-granting institutions, by discipline division: Selected years, 1970–71 through 2005–06 . . . 393
263. Doctor's degrees conferred by degree-granting institutions, by discipline division: Selected years, 1970–71 through 2005–06 . . . 394
264. Bachelor's, master's, and doctor's degrees conferred by degree-granting institutions, by field of study and year: Selected years, 1970–71 through 2005–06 . . . 395
265. Bachelor's, master's, and doctor's degrees conferred by degree-granting institutions, by sex of student and field of study: 2005–06 . . . 396
266. Degrees conferred by degree-granting institutions, by control of institution and level of degree: 1969–70 through 2005–06 . . . 411
267. Degrees conferred by degree-granting institutions, by control of institution, level of degree, and discipline division: 2005–06 . . . 412
268. Number of degree-granting institutions conferring degrees, by control, level of degree, and discipline division: 2005–06 . . . 413
269. First-professional degrees conferred by degree-granting institutions in dentistry, medicine, and law, by number of institutions conferring degrees and sex of student: Selected years, 1949–50 through 2005–06 . . . 414
270. First-professional degrees conferred by degree-granting institutions, by sex of student, control of institution, and field of study: Selected years, 1985–86 through 2005–06 . . . 415
271. Associate's degrees conferred by degree-granting institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2005–06 . . . 416
272. Associate's degrees conferred by degree-granting institutions, by sex, race/ethnicity, and major field of study: 2005–06 . . . 417
273. Associate's degrees conferred by degree-granting institutions, by sex, race/ethnicity, and major field of study: 2004–05 . . . 418
274. Bachelor's degrees conferred by degree-granting institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2005–06 . . . 419
275. Bachelor's degrees conferred by degree-granting institutions, by sex, race/ethnicity, and major field of study: 2005–06 . . . 420
276. Bachelor's degrees conferred by degree-granting institutions, by sex, race/ethnicity, and major field of study: 2004–05 . . . 421
277. Master's degrees conferred by degree-granting institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2005–06 . . . 422
278. Master's degrees conferred by degree-granting institutions, by sex, race/ethnicity, and major field of study: 2005–06 . . . 423

279. Master's degrees conferred by degree-granting institutions, by sex, race/ethnicity, and major field of study: 2004–05 . . . 424
280. Doctor's degrees conferred by degree-granting institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2005–06 . . . 425
281. Doctor's degrees conferred by degree-granting institutions, by sex, race/ethnicity, and major field of study: 2005–06 . . . 426
282. Doctor's degrees conferred by degree-granting institutions, by sex, race/ethnicity, and major field of study: 2004–05 . . . 427
283. First-professional degrees conferred by degree-granting institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2005–06 . . . 428
284. First-professional degrees conferred by degree-granting institutions, by sex, race/ethnicity, and major field of study: 2005–06 . . . 429
285. First-professional degrees conferred by degree-granting institutions, by sex, race/ethnicity, and major field of study: 2004–05 . . . 429
286. Degrees in agriculture and natural resources conferred by degree-granting institutions, by level of degree and sex of student: 1970–71 through 2005–06 . . . 430
287. Degrees in architecture and related services conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1949–50 through 2005–06 . . . 431
288. Degrees in the biological and biomedical sciences conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1951–52 through 2005–06 . . . 432
289. Degrees in biology, microbiology, and zoology conferred by degree-granting institutions, by level of degree: 1970–71 through 2005–06 . . . 433
290. Degrees in business conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1955–56 through 2005–06 . . . 434
291. Degrees in communication, journalism, and related programs and in communications technologies conferred by degree-granting institutions, by level of degree and sex of student: 1970–71 through 2005–06 . . . 435
292. Degrees in computer and information sciences conferred by degree-granting institutions, by level of degree and sex of student: 1970–71 through 2005–06 . . . 436
293. Degrees in education conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1949–50 through 2005–06 . . . 437
294. Degrees in engineering and engineering technologies conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1949–50 through 2005–06 . . . 438
295. Degrees in chemical, civil, electrical, and mechanical engineering conferred by degree-granting institutions, by level of degree: 1970–71 through 2005–06 . . . 439
296. Degrees in English language and literature/letters conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1949–50 through 2005–06 . . . 440
297. Degrees in modern foreign languages and literatures conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1949–50 through 2005–06 . . . 441
298. Degrees in French, German, and Spanish conferred by degree-granting institutions, by level of degree: Selected years, 1949–50 through 2005–06 . . . 442
299. Degrees in the health professions and related sciences conferred by degree-granting institutions, by level of degree and sex of student: 1970–71 through 2005–06 . . . 443
300. Degrees in mathematics and statistics conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1949–50 through 2005–06 . . . 444
301. Degrees in the physical sciences and science technologies conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1959–60 through 2005–06 . . . 445
302. Degrees in chemistry, geology and earth science, and physics conferred by degree-granting institutions, by level of degree: 1970–71 through 2005–06 . . . 446
303. Degrees in psychology conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1949–50 through 2005–06 . . . 447

304. Degrees in public administration and social services conferred by degree-granting institutions, by level of degree and sex of student: 1970–71 through 2005–06 . . . . . 448
305. Degrees in the social sciences and history conferred by degree-granting institutions, by level of degree and sex of student: 1970–71 through 2005–06 . . . . . 449
306. Degrees in economics, history, political science and government, and sociology conferred by degree-granting institutions, by level of degree: Selected years, 1949–50 through 2005–06 . . . . 450
307. Degrees in visual and performing arts conferred by degree-granting institutions, by level of degree and sex of student: 1970–71 through 2005–06 . . . . . 451
308. Statistical profile of persons receiving doctor's degrees, by field of study and selected characteristics: 2004–05 . . . . . 452
309. Degrees conferred by degree-granting institutions, by control, level of degree, and state or jurisdiction: 2005–06 . . . . . 453
310. Bachelor's and master's degrees conferred by degree-granting institutions, by field of study and state or jurisdiction: 2005–06 . . . . . 454
311. Degrees conferred by degree-granting institutions, by level of degree and state or jurisdiction: 2004–05 and 2005–06 . . . . . 456
312. Doctor's degrees conferred by the 60 institutions conferring the most doctor's degrees: 1996–97 through 2005–06 . . . . . 457

***Outcomes***

313. Percentage distribution of 1990 high school sophomores, by highest level of education completed through 2000 and selected student characteristics: 2000 . . . . . 458
314. Mean number of semester credits completed by bachelor's degree recipients, by course area and major: 1976, 1984, and 1992–93 . . . . . 459
315. Number and percentage of degree-granting institutions with first-year undergraduates using various selection criteria for admission, by type and control of institution: Selected years, 2000–01 through 2006–07 . . . . . 460
316. Number of applications, admissions, and enrollees; their distribution across institutions accepting various percentages of applications; and SAT and ACT scores of applicants, by type and control of institution: 2006–07 . . . . . 461
317. Percentage of degree-granting institutions offering remedial services, by type and control of institution: 1989–90 through 2006–07 . . . . . 462
318. Percentage distribution of enrollment and completion status of first-time postsecondary students starting during the 1995–96 academic year, by type of institution and other student characteristics: 2001 . . . . . 463
319. Scores on Graduate Record Examination (GRE) general and subject tests: 1965 through 2006 . . 465

***Student Charges and Student Financial Assistance***

320. Average undergraduate tuition and fees and room and board rates charged for full-time students in degree-granting institutions, by type and control of institution: 1964–65 through 2006–07 . . . . 467
321. Average undergraduate tuition and fees and room and board rates charged for full-time students in degree-granting institutions, by type and control of institution and state or jurisdiction: 2005–06 and 2006–07 . . . . . 470
322. Undergraduate tuition and fees and room and board rates for full-time students in degree-granting institutions, by percentile of students and control and type of institution: 2000–01 through 2006–07 471
323. Average graduate and first-professional tuition and required fees in degree-granting institutions, by first-professional discipline and control of institution: 1987–88 through 2006–07 . . . . . 472
324. Percentage of undergraduates receiving aid, by type and source of aid and selected student characteristics: 2003–04 . . . . . 473
325. Average amount of financial aid awarded to full-time, full-year undergraduates, by type and source of aid and selected student characteristics: 2003–04 . . . . . 474

326. Average amount of financial aid awarded to part-time or part-year undergraduates, by type and source of aid and selected student characteristics: 2003–04 . . . . . 475
327. Amount borrowed, aid status, and sources of aid for full-time and part-time undergraduates, by control and type of institution: 2003–04 . . . . . 476
328. Percentage of full-time, full-year undergraduates receiving aid, by type and source of aid and control and type of institution: Selected years, 1992–93 through 2003–04 . . . . . 477
329. Average amount of financial aid awarded to full-time, full-year undergraduates, by type and source of aid and control and type of institution: Selected years, 1992–93 through 2003–04. . . . . 478
330. Percentage of part-time or part-year undergraduates receiving aid, by type and source of aid and control and type of institution: Selected years, 1992–93 through 2003–04 . . . . . 480
331. Percentage of full-time and part-time undergraduates receiving federal aid, by aid program and control and type of institution: 2003–04 . . . . . 481
332. Amount borrowed, aid status, and sources of aid for full-time, full-year postbaccalaureate students, by level of study and control and type of institution: Selected years, 1992–93 through 2003–04 . 482
333. Amount borrowed, aid status, and sources of aid for part-time or part-year postbaccalaureate students, by level of study and control and type of institution: Selected years, 1992–93 through 2003–04 . . . 483
334. Percentage of full-time, full-year postbaccalaureate students receiving aid, by type of aid, level of study, and control and type of institution: Selected years, 1992–93 through 2003–04 . . . . . 484
335. Percentage of part-time or part-year postbaccalaureate students receiving aid, by type of aid, level of study, and control and type of institution: Selected years, 1992–93 through 2003–04 . . . . . 485

***Revenue***

336. Current-fund revenue of degree-granting institutions, by source of funds: Selected years, 1919–20 through 1995–96. . . . . 486
337. Current-fund revenue of public degree-granting institutions, by source of funds: Selected years, 1980–81 through 2000–01. . . . . 487
338. Revenues of public degree-granting institutions, by type of institution and source of revenue: 2003–04 and 2004–05 . . . . . 488
339. Revenues of public degree-granting institutions, by source of revenue and state or jurisdiction: 2004–05 489
340. Appropriations from state and local governments for public degree-granting institutions, by state or jurisdiction: Selected years, 1990–91 through 2004–05 . . . . . 490
341. Total revenue of private not-for-profit degree-granting institutions, by source of funds and type of institution: 1996–97 through 2004–05 . . . . . 491
342. Total revenue of private not-for-profit degree-granting institutions, by source of funds and type of institution: 2004–05 . . . . . 493
343. Total revenue of private for-profit degree-granting institutions, by source of funds and type of institution: 1998–99 through 2004–05 . . . . . 494
344. Total revenue of private for-profit degree-granting institutions, by source of funds and type of institution: 2003–04 and 2004–05 . . . . . 495
345. Current-fund revenue received from the federal government by the 120 degree-granting institutions receiving the largest amounts, by control and rank order: 2004–05 . . . . . 496

***Expenditures***

346. Current-fund expenditures and current-fund expenditures per full-time-equivalent student in degree-granting institutions, by type and control of institution: Selected years, 1970–71 through 2000–01. . 497
347. Current-fund expenditures and educational and general expenditures of institutions of higher education, by purpose and per student: Selected years, 1929–30 through 1995–96 . . . . . 498
348. Expenses of public degree-granting institutions, by type of expense and type of institution: 2003–04 and 2004–05. . . . . 499
349. Voluntary support for degree-granting institutions, by source and purpose of support: Selected years, 1959–60 through 2005–06 . . . . . 500

350. Total expenditures of private not-for-profit degree-granting institutions, by purpose and type of institution: 1996–97 through 2004–05 . . . . . 501
351. Total expenditures of private not-for-profit degree-granting institutions, by purpose and type of institution: 2004–05 . . . . . 503
352. Total expenditures of private for-profit degree-granting institutions, by purpose and type of institution: 1998–99 through 2004–05 . . . . . 504
353. Total expenditures of private for-profit degree-granting institutions, by purpose and type of institution: 2003–04 and 2004–05 . . . . . 506
354. Total expenditures of private not-for-profit and for-profit degree-granting institutions, by level and state or jurisdiction: 1997–98 through 2004–05 . . . . . 507
355. Endowment funds of the 120 colleges and universities with the largest endowments, by rank order: 2005 and 2006 . . . . . 508

***Adult Education***

356. Participants in adult basic and secondary education programs, by type of program and state or jurisdiction: Selected fiscal years, 1990 through 2005 . . . . . 509
357. Participation of employed persons, 17 years old and over, in career-related adult education during the previous 12 months, by selected characteristics of participants: Various years, 1995 through 2005 . 510
358. Participation of persons, 17 years old and over, in adult education during the previous 12 months, by selected characteristics of participants: Selected years, 1991 through 2005 . . . . . 513

***Vocational Education***

359. Number of non-degree-granting Title IV institutions offering postsecondary education, by control and state or jurisdiction: Selected years, 2000–01 through 2006–07 . . . . . 515

**Chapter 4. Federal Programs for Education and Related Activities**

360. Federal support and estimated federal tax expenditures for education, by category: Selected fiscal years, 1965 through 2007 . . . . . 527
361. Federal on-budget funds for education, by agency: Selected fiscal years, 1970 through 2006 . . . . 529
362. Federal on-budget funds for education, by level/educational purpose, agency, and program: Selected fiscal years, 1970 through 2007 . . . . . 530
363. Estimated federal support for education, by type of ultimate recipient and agency: Fiscal year 2006 537
364. U.S. Department of Education outlays, by type of recipient and level of education: Selected fiscal years, 1980 to 2007 . . . . . 538
365. U.S. Department of Education appropriations for major programs, by state or jurisdiction: Fiscal year 2006 . . . . . 539
366. Appropriations for Title I and selected other programs under the No Child Left Behind Act of 2001, by program and state or jurisdiction: Fiscal years 2006 and 2007 . . . . . 540
367. Federal obligations for research, development, and R&D plant, by performers, fields of science, and category of obligation: Fiscal years 1998 through 2006 . . . . . 541

**Chapter 5. Outcomes of Education**

***Educational Characteristics of the Workforce***

368. Labor force participation rates and employment to population ratios of persons 16 to 64 years old, by highest level of education, age, sex, and race/ethnicity: 2006 . . . . . 547
369. Unemployment rate of persons 16 years old and over, by age, sex, race/ethnicity, and educational attainment: 2004, 2005, and 2006 . . . . . 548
370. Occupation of employed persons 25 years old and over, by educational attainment and sex: 2006 549

371. Median annual income of year-round, full-time workers 25 years old and over, by highest level of educational attainment and sex: 1990 through 2006 . . . . . 550
372. Distribution of earnings and median earnings of persons 25 years old and over, by highest level of educational attainment and sex: 2006 . . . . . 553
373. Literacy skills of adults, by type of literacy, proficiency levels, and selected characteristics: 1992 and 2003 . . . . . 555
374. Percentage of 12th-graders working different numbers of hours per week, by selected student characteristics and school locale type: 1992 and 2004 . . . . . 556

***Recent High School and College Graduates***

375. College enrollment and labor force status of 2004, 2005, and 2006 high school completers, by sex and race/ethnicity: 2004, 2005, and 2006 . . . . . 557
376. Labor force status of high school dropouts, by sex and race/ethnicity: Selected years, 1980 through 2006 . . . . . 559
377. Current postsecondary education and employment status, wages earned, and living arrangements of special education students out of secondary school up to 4 years, by type of disability: 2005 . 560
378. Full-time employment status of bachelor's degree recipients 1 year after graduation, by field of study: Selected years, 1976 through 2001 . . . . . 560
379. Percentage distribution of 1999–2000 bachelor's degree recipients 1 year after graduation, by field of study, time to completion, enrollment status, employment status, occupational area, job characteristics, and annual salaries: 2001 . . . . . 561
380. Enrollment in postbaccalaureate certificate or advanced degree programs and highest degree attained by 1992–93 bachelor's degree recipients, by education characteristics: 2003. . . . . 562
381. Average annual salary of bachelor's degree recipients employed full time 1 year after graduation, by field of study: Selected years, 1976 through 2001 . . . . . 563
382. Percentage of 18- to 25-year-olds reporting drug use during the past 30 days and the past year, by drug used: Selected years, 1982 through 2005 . . . . . 564
383. Percentage of 1972 high school seniors, 1992 high school seniors, and 2004 high school seniors who felt that certain life values were "very important," by sex: Selected years, 1972 through 2004 565

**Chapter 6. International Comparisons of Education**

384. Selected population and finance statistics, school enrollment, and teachers, by major areas of the world: Selected years, 1980 through 2004. . . . . 571
385. Selected population and enrollment statistics for countries with populations over 10 million, by continent: Selected years, 1990 through 2005. . . . . 572
386. School-age populations as a percentage of total population, by age group and country: Selected years, 1985 through 2004 . . . . . 574
387. Percentage of population enrolled in secondary and postsecondary institutions, by age group and country: Selected years, 1985 through 2005 . . . . . 575
388. Pupils per teacher in public and private elementary and secondary schools, by level of education and country: Selected years, 1985 through 2005 . . . . . 576
389. Average mathematics literacy, reading literacy, science literacy, and problem-solving scores of 15-year-olds, by sex and country: 2003 . . . . . 577
390. Mean scores and percentage distribution of 15-year-olds scoring at each mathematics literacy proficiency level, by country: 2003 . . . . . 578
391. Average fourth-grade mathematics scores, by content areas, index of time students spend doing mathematics homework in a normal school week, and country: 2003. . . . . 579
392. Average eighth-grade mathematics scores, by content areas, index of time students spend doing mathematics homework in a normal school week, and country: 2003. . . . . 580

393. Percentage of lesson time spent on various mathematics activities, yearly mathematics instructional time, and mathematics instructional time as a percentage of total instructional time in eighth grade, by country: 2003 . . . 582
394. Average size and scores of eighth-grade mathematics classes and Index of Teachers' Emphasis on Mathematics Homework (EMH), by country: 2003 . . . 584
395. Eighth-grade students' perceptions about mathematics and hours spent on leisure activities, by country: 2003 . . . 586
396. Average mathematics scores at the end of secondary school, by sex, average time spent studying mathematics out of school, and country: 1995 . . . 587
397. Average fourth-grade science scores in content areas and average time spent teaching science in school, by country: 2003 . . . 588
398. Average eighth-grade science scores in content areas and average time spent studying out of school, by country: 2003 . . . 589
399. Instructional practices and time spent teaching science in eighth grade, by country: 2003 . . . 591
400. Average science scores at the end of secondary school, by sex, average time spent studying science out of school, and country: 1995 . . . 593

# INTRODUCTION

In the fall of 2007, about 73.7 million people were enrolled in American schools and colleges (table 1). About 4.6 million people were employed as elementary and secondary school teachers and as college faculty, in full-time equivalents (FTE). Other professional, administrative, and support staff at educational institutions totaled 5.2 million. All data for 2007 in this Introduction are projected. Some data for other years are projected or estimated as noted. In discussions of historical trends, different time periods and specific years are cited, depending on the timing of important changes as well as the availability of relevant data.

## Elementary/Secondary Education

### Enrollment

Enrollment in public elementary and secondary schools rose 26 percent between 1985 and 2007 (table 2). The fastest public school growth occurred in the elementary grades (prekindergarten through grade 8), where enrollment rose 28 percent over this period, from 27.0 million to 34.6 million. Part of the relatively fast growth in public elementary school enrollment resulted from the expansion of prekindergarten programs (table 36). Between 1985 and 2005, enrollment in prekindergarten increased by 585 percent, while enrollment in other elementary grades increased by 25 percent. Public secondary school enrollment declined 8 percent from 1985 to 1990, but then began increasing from 1990 to 2007, for a net increase of 21 percent (table 2). In more recent years, secondary school enrollment has been increasing more rapidly than elementary school enrollment. Between 2000 and 2007, public elementary school enrollment rose 3 percent compared to an increase of 11 percent for public secondary school enrollment. Private school enrollment grew more slowly than public school enrollment from 1985 to 2007, rising 11 percent, from 5.6 million to 6.2 million. As a result, the percentage of students enrolled in private schools declined from 12.4 percent in 1985 to 11.0 percent in 2007.

Since the enrollment rates of kindergarten, elementary, and secondary school-age children did not change substantially between 1985 and 2006 (table 7), increases in public and private elementary school enrollment have been driven primarily by increases in the number of children in this age group. The enrollment rate of prekindergarten age children (ages 3 and 4) rose between 1985 and 2006, which was reflected by a substantial increase in prekindergarten enrollment.

The National Center for Education Statistics (NCES) forecasts record levels of total elementary and secondary enrollment through at least 2016, reflecting expected increases in the school-age population. The projected fall 2007 public school enrollment is expected to be a new record, but new records are expected every year through 2016, the last year for which NCES enrollment projections have been developed (table 3). Public elementary school enrollment (prekindergarten through grade 8) is projected to increase by 10 percent between 2007 and 2016. Public secondary school enrollment (grades 9 through 12) is expected to be 2 percent higher in 2016 than in 2007.

### Teachers

A projected 3.7 million full-time-equivalent (FTE) elementary and secondary school teachers were engaged in classroom instruction in the fall of 2007 (table 4). This number has risen 17 percent since 1997. The 2007 projected number of FTE teachers includes 3.2 million public school teachers and 0.5 million private school teachers.

The number of public school teachers has risen faster than the number of public school students over the past 10 years, resulting in declines in the pupil/teacher ratio (table 61). In the fall of 2007, there were a projected 15.4 public school pupils per teacher, compared with 16.8 public school pupils per teacher 10 years earlier.

The salaries of public school teachers lost purchasing power in the 1970s due to inflation, but increased at a greater rate than inflation in the 1980s, and since 1990–91 the salaries have generally maintained pace with inflation (table 75). The average salary for teachers in 2005–06 was $49,109, about 1 percent higher than in 1995–96, after adjustment for inflation.

### Student Performance

Most of the student performance data in the *Digest* are drawn from the National Assessment of Educational Progress (NAEP). The NAEP assessments have been conducted using three basic designs: the national main NAEP, state NAEP, and long-term trend NAEP. The national main NAEP and state NAEP provide current information about student performance in a variety of subjects, while long-term trend NAEP provides information on performance over time in reading and mathematics only.

The main NAEP reports current information for the nation and specific geographic regions of the country. The assessment program includes students drawn from both public and

private schools and reports results for student achievement at grades 4, 8, and 12. The main NAEP assessments follow the frameworks developed by the National Assessment Governing Board and use the latest advances in assessment methodology. Because the assessment items reflect curricula associated with specific grade levels, the main NAEP uses samples of students at those grade levels.

Since 1990, main NAEP assessments have also been conducted at the state level. Participating states receive assessment results that report on the performance of students in that state. In its content, the state assessment is identical to the assessment conducted nationally. However, because the national NAEP samples prior to 2002 were not designed to support the reporting of accurate and representative state-level results, separate representative samples of students were selected for each participating jurisdiction/state. From 1990 through 2001, the national sample was a subset of the combined sample of students assessed in each participating state along with an additional sample from the states that did not participate in the state assessment. Since 2002, a combined sample of public schools has been selected for both state and national NAEP, and the national NAEP sample has been augmented by a sample of private schools.

NAEP long-term trend assessments are designed to give information on the changes in the basic achievement of America's youth since the early 1970s. They are administered nationally and report student performance at ages 9, 13, and 17 in reading and mathematics. Measuring long-term trends of student achievement requires the precise replication of past procedures. For example, students of specific ages are sampled in order to maintain consistency with the original sample design. Similarly, the long-term trend instrument does not evolve based on changes in curricula or in educational practices. The differences in procedures between the main NAEP and the long-term trend NAEP mean that their results cannot be compared directly.

### *Reading*

Overall achievement scores on the NAEP long-term trend reading assessment for the country's 9-, 13-, and 17-year-old students are mixed. The average reading scores at ages 9 and 13 were higher in 2004 than in 1971 (table 112). The average score for 17-year-olds in 2004 was similar to that in 1971.

For Black 9-, 13-, and 17-year-olds, average reading scores in 2004 were higher than in 1971. At age 9, Black students scored higher on average in 2004 than in any previous administration year. For Blacks ages 13 and 17, scores increased between 1971 and 2004 (table 112). For White students, the average scores for 9- and 13-year-olds were also higher in 2004 than in 1971. Separate data for Hispanics were not gathered in 1971, but as with the other racial/ethnic groups, the average reading score for Hispanic students at age 9 was higher in 2004 than in any other assessment year (the first reading assessment with Hispanics separately identified was conducted in 1975). The average score for Hispanic students at age 13 shows an increase between 1975 and 2004. The scores for 17-year-old Hispanic students also increased between 1975 and 2004, but no measurable changes were seen between 1999 and 2004.

The 2007 main NAEP reading assessment of states found that reading proficiency varied among public school fourth-graders in participating jurisdictions (the 50 states, the Department of Defense overseas and domestic schools, and the District of Columbia) (table 116). The U.S. average score was 220. The scores for the participating jurisdictions ranged from 191 in the District of Columbia to 236 in Massachusetts.

### *Mathematics*

Results from NAEP long-term trend assessments of mathematics proficiency indicate that the scores of 9- and 13-year-old students were higher in 2004 than in 1973 (table 125). For White, Black, and Hispanic 9-, 13-, and 17-year-olds, average mathematics scale scores were higher in 2004 than in 1973.

The 2007 main NAEP assessment of states found that mathematics proficiency varied among public school eighth-graders in participating jurisdictions (the 50 states, the Department of Defense overseas and domestic schools, and the District of Columbia) (table 129). Overall, 70 percent of these eighth-grade students performed at or above the *Basic* level in mathematics, and 31 percent performed at or above the *Proficient* level.

### *International Comparisons*

In 2003, the performance of U.S. 15-year-olds in mathematics literacy and problem solving, as measured by the Program for International Student Assessment (PISA), was lower than the average performance for most Organization for Economic Cooperation and Development (OECD) countries (table 389). Along with the scale scores, PISA also used seven proficiency levels (below level 1 and levels 1 through 6, with level 6 being the highest level of proficiency) to describe student performance in mathematics literacy (table 390). In mathematics literacy, the United States had greater percentages of students below level 1 and at levels 1 and 2 than the OECD average percentages. The United States also had lower percentages of students at levels 4, 5, and 6 than the OECD average percentages.

## High School Graduates and Dropouts

About 3,303,000 high school students are expected to graduate during the 2007–08 school year (table 100), including 2,988,000 public school graduates and 315,000 private school graduates. High school graduates include only recipients of diplomas, not recipients of equivalency credentials. The 2007–08 record number of high school graduates exceeds the former records of 2005–06 and 2006-07, as well as the high point during the baby boom era in 1976–77, when 3,152,000 students earned diplomas.

The number of General Educational Development (GED) credentials issued rose from 330,000 in 1977 to 487,000 in 2000 (table 104). A record number of 648,000 GED credentials were issued in 2001. In that year, candidates who had already taken any of the five tests in the GED test battery had to complete the entire battery before the end of the year or else

take all five tests over again. The reason is that a new GED test series was introduced in 2002. In the same year, data collection procedures changed, with data from the states on the number of credentials issued being replaced by test data from individual test-takers. In 2005, 424,000 passed the GED tests, up from 330,000 in 2002, the first year of the new test series.[1]

In 2004–05, 74.7 percent of public high school students graduated on time—that is, received a diploma 4 years after beginning their freshman year (table 102). This 2004–05 percentage is higher than the percentage for 1994–95 (71.8 percent), but similar to the percentage for 1976–77 (74.4 percent). The status dropout rate—that is, the percentage of 16- to 24-year-olds who are not enrolled in school and have received neither a diploma nor an equivalency credential—declined from 14 percent in 1977 to 9 percent in 2006 (table 105).

### Educational Technology

The number of computers in public schools has increased. In 2005, the average public school contained 154 instructional computers, compared to 90 in 1998 (table 413). One important technological advance that has come to classrooms following the introduction of computers has been connections to the Internet. The percentage of instructional rooms with access to the Internet increased from 51 percent in 1998 to 94 percent in 2005 (figure 29). Nearly all schools had access to the Internet in 2005 (table 413).

## Postsecondary Education

### College Enrollment

College enrollment hit a projected record level of 18.0 million in fall 2007. College enrollment is expected to continue setting new records throughout the fall 2008 through fall 2016 period (table 3). Between fall 2007 and fall 2016, enrollment is expected to increase by 14 percent. Despite decreases in the traditional college age population during the late 1980s and early 1990s, total enrollment increased during this period (tables 7, 15, 181, and 192). The traditional college-age population (18 to 24 years old) rose 15 percent between 1995 and 2005, which was reflected by an increase of 23 percent in college enrollment. Between 1995 and 2005, the number of full time students increased by 33 percent compared to a 9 percent increase in part-time students (table 179). During the same time period, the number of males enrolled increased 18 percent, while the number of females enrolled increased 27 percent.

### Faculty and Staff

In the fall of 2005, degree-granting institutions—defined as postsecondary institutions that grant an associate's or higher degree and are eligible for Title IV federal financial aid programs—employed 1.3 million faculty members, including 0.7 million full-time and 0.6 million part-time faculty (table 235). About 19 percent of full-time faculty taught 15 or more hours per week, compared with 8 percent of part-time faculty (tables 240 and 241). About 9 percent of full-time faculty taught 150 or more students, compared with 2 percent of part-time faculty.

### Postsecondary Degrees

During the 2007–08 academic year, postsecondary degrees are projected to number 699,000 associate's degrees; 1,544,000 bachelor's degrees; 631,000 master's degrees; 89,300 first-professional degrees; and 55,300 doctor's degrees (table 258).

### Educational Attainment

The U.S. Census Bureau collects annual statistics on the educational attainment of the population. Between 1997 and 2007, the percentage of the adult population 25 years of age and over who had completed high school rose from 82 percent to 86 percent, and the percentage of adults with a bachelor's degree increased from 24 percent to 29 percent (table 8). High school completers include those people who graduated from high school with a diploma, as well as those who completed high school through equivalency programs. The percentage of young adults (25- to 29-year-olds) who had completed high school in 2007 (87 percent) was about the same as it was in 1997 (87 percent). Also, the percentage of young adults who had completed a bachelor's degree in 2007 (30 percent) was not substantively different from the percentage in 1997 (28 percent).

### Education Expenditures

Expenditures for public and private education, from prekindergarten through graduate school (excluding postsecondary schools not awarding associate's or higher degrees), are estimated at $972 billion for 2006–07 (table 25). Expenditures of elementary and secondary schools are expected to total $599 billion, while those of degree-granting postsecondary institutions are expected to total $373 billion. Total expenditures for education are expected to amount to 7.4 percent of the gross domestic product in 2006–07, about 0.5 percentage points higher than in 1996–97.

### Interpreting Statistics

Readers should be aware of the limitations of statistics. These limitations vary with the exact nature of a particular survey. For example, estimates based on a sample of institutions will differ somewhat from the figures that would have been obtained if a complete census had been taken using the same survey procedures. Standard errors are available for sample survey data appearing in this report. In most cases, standard errors for all items appear in the printed table. In some cases, only standard errors for key items appear in the

[1] Information on changes in GED test series and reporting is based on the 2003 edition of *Who Passed the GED Tests?*, by the GED Testing Service of the American Council on Education, as well as communication with staff of the GED Testing Service.

printed table. Standard errors that do not appear in the tables are available from NCES upon request. Although some of the surveys conducted by NCES are census or universe surveys (which attempt to collect information from all potential respondents), all surveys are subject to design, reporting, and processing errors and errors due to nonresponse. Differences in sampling, data collection procedures, coverage of target population, timing, phrasing of questions, scope of nonresponse, interviewer training, data processing, coding, and so forth mean that the results from the different sources may not be strictly comparable. More information on survey methodologies can be found in the Guide to Sources (appendix A).

Estimates presented in the text and figures are rounded from original estimates, not from a series of roundings. Percentages in the text are rounded to whole numbers, while ratios and percentage distributions are normally presented to one decimal place, where applicable.

Unless otherwise noted, all data in this report are for the 50 states and the District of Columbia. Unless otherwise noted, all financial data are in current dollars, meaning not adjusted for changes in the purchasing power of the dollar due to inflation. Price indexes for inflation adjustments can be found in table 31.

Common data elements are collected in different ways in different surveys. Since the *Digest* relies on a number of data sources, there are discrepancies in definitions and data across tables in the volume. For example, several different surveys collect data on public school enrollment, and while similar, the estimates are not identical. The definitions of racial/ethnic groups also differ across surveys, particularly with respect to whether Hispanic origin is considered an ethnic group regardless of race, or counted separately as a racial/ethnic group. Individual tables note the definitions used in the given studies.

All statements cited in the text about differences between two or more groups or changes over time were tested for statistical significance and are statistically significant at the .05 level. Various test procedures were used, depending on the nature of the statement tested. The most commonly used test procedures were *t* tests, equivalence tests, and linear trend tests. Equivalence tests were used to determine whether two statistics are substantively equivalent or substantively different. This was accomplished by using a hypothesis test to determine whether the confidence interval of the difference between sample estimates is substantively significant (i.e., greater or less than a preset substantively important difference). In most cases involving percentages, a difference of 3.0 was used to determine substantive equivalence or difference. In some comparisons involving only very small percentages, a lower difference was used. In cases involving only relatively large values, a larger difference was used, such as $1,000 in the case of annual salaries. Linear trend tests were conducted by evaluating the significance of the slope of a simple regression of the data over time, and a *t* test comparing the end points.

# GUIDE TO TABULAR PRESENTATION

This section is intended to assist the reader in following the basic structure of the Digest tables and to provide a legend for some of the common symbols and indexes used throughout the book. Unless otherwise noted, all data are for the 50 states and the District of Columbia. Changes in survey instruments sometimes mean that data for specific categories are not available in a consistent manner over the entire reporting period. Because of these survey limitations, data for these specific categories may be noted as included with other categories where applicable.

## Table Components

***Title*** Describes the table content concisely.

***Unit indicator*** Informs the reader of the measurement unit in the table—"In thousands," "In millions of dollars," etc. Noted below the title unless several units are used, in which case the unit indicators are generally given in the spanner or individual column heads.

***Spanner*** Describes a group of two or more columns.

***Column head*** Describes a specific column.

***Stub*** Describes a row or a group of rows. Each stub row is followed by a number of dots (leaders).

***Field*** The area of the table which contains the data elements.

## Example of Table Structure

***Table Number and Title*** — **Table 0. Projected number of participants in educational institutions, by level and control of institution: Fall 2006**

***Unit Indicator*** → [In millions]

| Participants | All levels (elementary, secondary, and postsecondary degree-granting) | Elementary and secondary schools ← *Spanner* | | |
|---|---|---|---|---|
| | | Total | Public | Private |
| 1 | 2 | 3 | 4 | 5 |
| **Total** | **82.2** | **62.0** | **55.0** | **6.8** |
| Enrollment | 72.7 | 55.1 | 48.9 | 6.1 |
| Teachers and faculty | 4.5 | 3.6 | 3.2 | 0.5 |
| Other professional, administrative, and support staff | 5.0 | 3.2 | 2.9 | 0.3[1] |

*Column Heads* / *Column Numbers* / *Stub* / *Field*

***Footnote*** → [1]Reference (numbered) notes refer to specific parts of the table.

***Note*** → NOTE: Includes enrollments in local public school systems and in most private schools (religiously affiliated and nonsectarian). Excludes federal schools. Excludes private preprimary enrollment in schools that do not offer kindergarten or above. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Data for teachers and other staff in public and private elementary and secondary schools and colleges and universities are reported in terms of full-time equivalents. Detail may not sum to totals because of rounding.

***Source*** → SOURCE: U.S. Department of Education, National Center for Education Statistics, *Projections of Education Statistics to 2015*; and unpublished projections and estimates. (This table was prepared September 2006.)

***Special notes*** Symbols used to indicate why data do not appear in designated cell.

— Not available.

† Not applicable.

# Rounds to zero.

! Interpret data with caution.

‡ Reporting standards not met.

***Footnote*** Describes a unique circumstance relating to a specific item within the table.

***Note*** Furnishes general information that relates to the entire table.

***Source*** The document or reference from which the data are drawn. This note may also include the organizational unit responsible for preparing the data.

## Descriptive Terms

***Measures of central tendency*** A number that is used to represent the "typical value" of a group of numbers. It is regarded as a measure of "location" or "central tendency" of a group of numbers.

***Arithmetic mean (average)*** is the most commonly used average. It is derived by summing the individual item values of a particular group and dividing that sum by the number of items. This value is often referred to simply as the "mean" or "average."

***Median*** is the measure of central tendency that occupies the middle position in a rank order of values. It generally has the same number of items above it as below it. If there is an even number of items in the group, the median is the average of the middle two items.

***Average per capita,*** or per person, figure represents an average computed for every person in a specified group, or population. It is derived by dividing the total for an item (such as income or expenditures) by the number of persons in the specified population.

***Index number*** A value that provides a means of measuring, summarizing, and communicating the nature of changes that occur from time to time or from place to place. An index is used to express changes in prices over periods of time, but may also be used to express differences between related subjects at a single point in time.

The *Digest* most often uses the Consumer Price Index to compare purchasing power over time.

To compute a price index, a base year or period is selected. The base-year price is then designated as the base or reference price to which the prices for other years or periods are related.

A method of expressing the price relationship is:

Index number =

$$\frac{\text{Price of a set of one or more items for related year}}{\text{Price of the same set of items for base year}} \times 100$$

When 100 is subtracted from the index number, the result equals the percent change in price from the base year.

***Current and constant dollars*** are used in a number of tables to express finance data. Unless otherwise noted, all figures are in current dollars, not adjusted for inflation. Constant dollars provide a measure of the impact of inflation on the current dollars.

***Current dollar*** figures reflect actual prices or costs prevailing during the specified year(s).

***Constant dollar*** figures attempt to remove the effects of price changes (inflation) from statistical series reported in dollar terms.

The constant dollar value for an item is derived by dividing the base-year price index (for example, the Consumer Price Index for 1999) by the price index for the year of data to be adjusted and multiplying by the price of item to be adjusted. The result is an adjusted dollar value as it would presumably exist if prices were the same as the base year—in other words, as if the dollar had constant purchasing power. Any changes in the constant dollar amounts would reflect only changes in the real values.

In the 2007 edition of the *Digest*, the following 20 tables include finance data that are adjusted to school year 2006–07 dollars: tables 26, 32, 71, 75, 76, 82, 171, 174, 175, 176, 246, 247, 253, 338, 341, 343, 346, 347, 350, and 410. Data adjusted to calendar year 2006 dollars appear in tables 20, 371, 381, and 404. Table 360 includes adjustments to fiscal year (FY) 2007 dollars.

NOTE: Tables may not include data for all years implied in table titles. When this is the case, the title will include the term "Selected years."

# CHAPTER 1
# All Levels of Education

This chapter provides a broad overview of education in the United States. It brings together material from preprimary, elementary, secondary, and postsecondary education, as well as from the general population to present a composite picture of the American educational system. Tables feature data on the total number of people enrolled in school, the number of teachers, the number of schools, and total expenditures for education at all levels. This chapter also includes statistics on education related topics such as educational attainment, family characteristics, population, and opinions about schools. Economic indicators and price indexes have been added to facilitate analyses.

Figure 1 shows the structure of education in the United States. It presents the three levels of formal education (elementary, secondary, and postsecondary) and gives the approximate age range of people at the elementary and secondary levels. Students ordinarily spend from 6 to 8 years in the elementary grades, which may be preceded by 1 to 3 years in nursery school and kindergarten. The elementary school program is followed by a 4- to 6-year program in secondary school. Students normally complete the entire program through grade 12 by age 18.

High school graduates who decide to continue their education may enter a technical or vocational institution, a 2-year community or junior college, or a 4 year college or university. A 2-year college normally offers the first 2 years of a standard 4-year college curriculum and a selection of terminal vocational programs. Academic courses completed at a 2-year college are usually transferable for credit at a 4-year college or university. A technical or vocational institution offers postsecondary technical training leading to a specific career.

An associate's degree requires at least 2 years of college-level coursework, and a bachelor's degree normally requires 4 years of college-level coursework. At least 1 year of coursework beyond the bachelor's is necessary for a master's degree, while a doctor's degree usually requires a minimum of 3 or 4 years beyond the bachelor's.

Professional schools differ widely in admission requirements and program length. Medical students, for example, generally complete a bachelor's program of premedical studies at a college or university before they can enter the 4-year program at a medical school. Law programs normally require 3 years of coursework beyond the bachelor's degree level.

Many of the statistics in this chapter are derived from the statistical activities of the National Center for Education Statistics (NCES). In addition, substantial contributions have been drawn from the work of other groups, both governmental and nongovernmental, as shown in the source notes of the tables. Information on survey methodologies is contained in Appendix A: Guide to Sources and in the publications cited in the table source notes.

## Enrollment and Teachers

Enrollment in elementary and secondary schools grew rapidly during the 1950s and 1960s and reached a peak in 1971 (table 3 and figure 2). This enrollment rise was caused by what is known as the "baby boom," a dramatic increase in births following World War II. From 1971 to 1984, total elementary and secondary school enrollment decreased every year, reflecting the decline in the school-age population over that period. After these years of decline, enrollment in elementary and secondary schools started increasing in fall 1985, began hitting new record levels in the mid-1990s, and has continued to reach a new record level in each subsequent year. Since the enrollment rates of kindergarten, elementary, and secondary school-age children did not change substantially between 1985 and 2006 (table 7), increases in public and private elementary school enrollment have been driven primarily by increases in the number of children in this age group. Increases in the enrollment rate of prekindergarten age children (ages 3 and 4) between 1985 and 2006 have also contributed to overall enrollment increases.

Public school enrollment in prekindergarten through grade 8 rose from 29.9 million in fall 1990 to 34.2 million in 2003 (table 3). After a small decrease between fall 2003 and fall 2004, elementary enrollment increased to a projected total of 34.6 million for fall 2007. Public elementary enrollment is projected to continue this pattern of annual increases through 2016 (the last year for which NCES has projected school enrollment). Public school enrollment in the upper grades rose from 11.3 million in 1990 to 14.9 million in 2005, with a projected enrollment of 15.0 million for 2007. Public secondary enrollment is projected to decrease 2 percent between 2007 and 2011, and then begin increasing again through 2016. Public secondary school enrollment in 2016 is expected to be about 2 percent higher than in 2007. Total public elementary and secondary enrollment is projected to set new records every year from 2007 to 2016.

The percentage of students in private elementary and secondary schools changed little over the 10 years preceding 2003, remaining between 11 and 12 percent of the total elementary and secondary school enrollment (table 3). The percentage of college students who attended private colleges and universities rose from 22 to 26 percent between 1995 and 2005. In 2007, a projected 6.2 million students were enrolled in private schools at the elementary and secondary levels and 4.5 million students were in private (not-for-profit and for-profit) degree-granting institutions.

College enrollment reached 14.5 million in fall 1992 and decreased to 14.3 million in fall 1995 (table 3). Total college enrollment increased between 1995 and 2005, and further increases are expected through 2016.

School enrollment rates among 5- and 6-year-olds, 7- to 13-year-olds, and 14- to 17-year-olds remained relatively steady between 1996 and 2006 (table 7). The percentage of 18- and 19-year-olds enrolled in school rose from 62 to 65 percent between 1996 and 2006. About 35 percent of 20- to 24-year-olds enrolled in school in 2006.

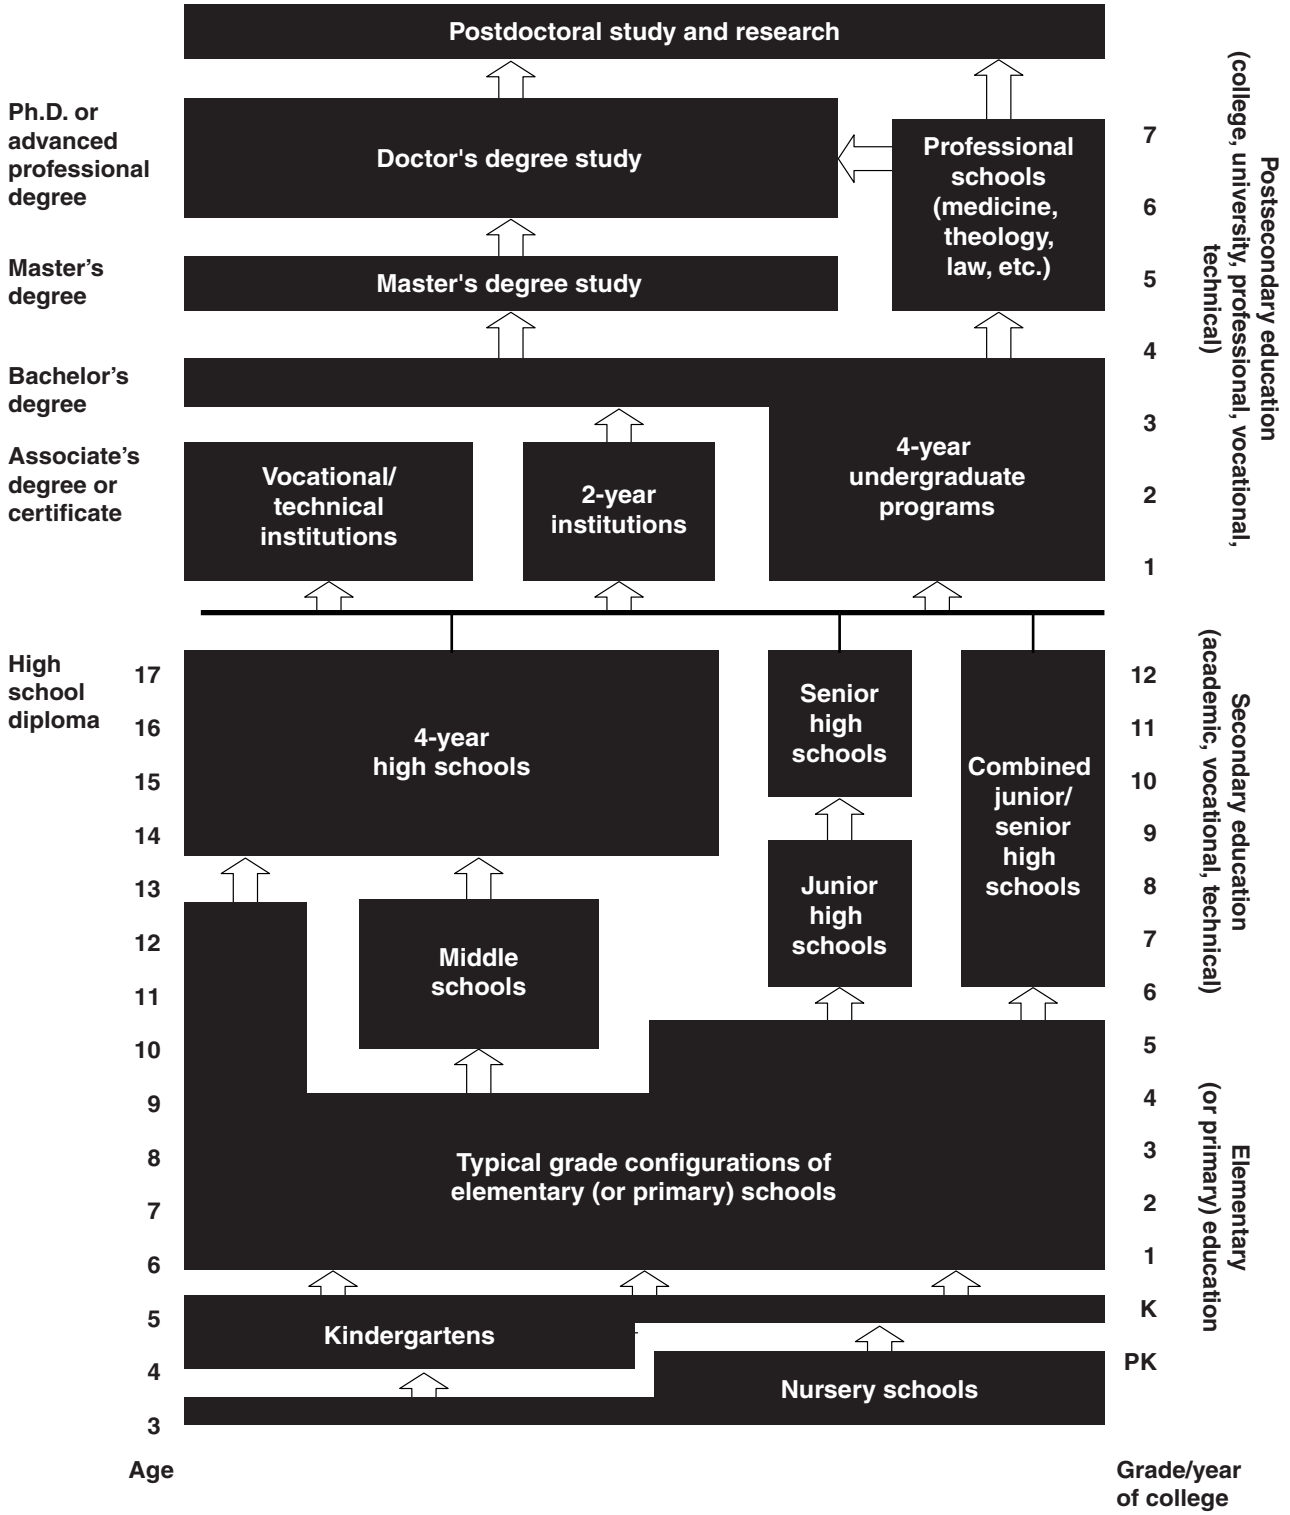
The percentages of adults 25 years old and over completing high school and higher education have been rising. In 2007, 86 percent of the population 25 years old and over had completed at least high school and 29 percent had completed a bachelor's or higher degree (table 8 and figure 3). This is higher than in 1997, when 82 percent had completed at least high school and 24 percent had completed a bachelor's or higher degree. In 2007, about 7 percent of people 25 years old or over held a master's degree as their highest degree, 2 percent held a professional degree (e.g., medicine or law), and 1 percent held a doctor's degree (table 9 and figure 5).

An estimated 3.7 million elementary and secondary school full-time-equivalent teachers were engaged in classroom instruction in the fall of 2007 (table 4). This number has risen about 17 percent since 1997. The number of public school teachers in 2007 was about 3.2 million, and the number in private schools was estimated at 0.5 million.

## Expenditures

Expenditures of educational institutions rose to an estimated $972 billion for the 2006–07 school year (table 26). Elementary and secondary schools spent about 62 percent of this total, and colleges and universities accounted for the remaining 38 percent. After adjustment for inflation, total expenditures for all educational institutions rose by an estimated 40 percent between 1996–97 and 2006–07. Expenditures for elementary and secondary schools rose by an estimated 38 percent during this period, while total expenditures for colleges and universities rose by 45 percent. In 2006–07, expenditures of educational institutions were an estimated 7.4 percent of the gross domestic product (table 25).

**Figure 1. The structure of education in the United States**



NOTE: Figure is not intended to show relative number of institutions nor relative size of enrollment for the different levels of education. Figure reflects typical patterns of progression rather than all possible variations. Adult education programs, while not separately delineated above, may provide instruction at the adult basic, adult secondary, or postsecondary education levels.

## Table 1. Projected number of participants in educational institutions, by level and control of institution: Fall 2007

[In millions]

| Participants | All levels (elementary, secondary, and postsecondary degree-granting) | Elementary and secondary schools | | | Postsecondary degree-granting institutions | | |
|---|---|---|---|---|---|---|---|
| | | Total | Public | Private | Total | Public | Private |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
| **Total** | **83.5** | **62.9** | **55.9** | **6.8** | **20.7** | **15.3** | **5.4** |
| Enrollment | 73.7 | 55.8 | 49.6 | 6.2 | 18.0 | 13.5 | 4.5 |
| Teachers and faculty | 4.6 | 3.7 | 3.2 | 0.5 | 0.9 | 0.6 | 0.3 |
| Other professional, administrative, and support staff | 5.2 | 3.4 | 3.1 | 0.3 | 1.8 | 1.2 | 0.6 |

NOTE: Includes enrollments in local public school systems and in most private schools (religiously affiliated and nonsectarian). Excludes federal schools. Excludes private preprimary enrollment in schools that do not offer kindergarten or above. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Data for teachers and other staff in public and private elementary and secondary schools and colleges and universities are reported in terms of full-time equivalents. Detail may not sum to totals because of rounding.

| Public | 9,457 | 9,479 | 10,845 | 11,092 | 11,196 | 11,138 | 11,309 | 11,753 | 12,233 | 12,752 | 12,859 | 12,980 | 13,022 | 13,252 | 13,457 |
| Undergraduate | 8,442 | 8,477 | 9,710 | 9,904 | 10,007 | 9,950 | 10,110 | 10,539 | 10,986 | 11,433 | 11,523 | 11,651 | 11,698 | 11,923 | 12,109 |
| First-professional | 114 | 112 | 112 | 115 | 118 | 121 | 123 | 124 | 128 | 132 | 134 | 136 | 138 | 140 | 143 |
| Graduate | 901 | 890 | 1,023 | 1,074 | 1,070 | 1,067 | 1,077 | 1,089 | 1,119 | 1,187 | 1,201 | 1,194 | 1,186 | 1,189 | 1,204 |
| Private | 2,640 | 2,768 | 2,974 | 3,169 | 3,306 | 3,369 | 3,482 | 3,560 | 3,695 | 3,860 | 4,053 | 4,292 | 4,466 | 4,420 | 4,501 |
| Undergraduate | 2,033 | 2,120 | 2,250 | 2,328 | 2,443 | 2,487 | 2,571 | 2,616 | 2,730 | 2,824 | 2,957 | 3,130 | 3,266 | 3,213 | 3,276 |
| First-professional | 163 | 162 | 162 | 183 | 180 | 182 | 180 | 183 | 181 | 187 | 195 | 199 | 199 | 201 | 205 |
| Graduate | 443 | 486 | 563 | 659 | 683 | 701 | 730 | 761 | 784 | 849 | 901 | 963 | 1,001 | 1,006 | 1,020 |

[1]Private elementary and secondary education data are projected.
[2]Includes enrollments in local public school systems and in most private schools (religiously affiliated and nonsectarian). Excludes homeschooled children who were not also enrolled in public and private schools. Based on the National Household Education Survey, the homeschooled children numbered approximately 1.1 million in 2003. Private elementary enrollment includes preprimary students in schools offering kindergarten or higher grades.
[3]Estimated.
NOTE: Degree-granting enrollment projections are based on the middle alternative projections published by the National Center for Education Statistics. Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Detail may not sum to totals because of rounding. Some data have been revised from previously published figures. Private school enrollment data for fall 1999 are based on improved methodology for apportioning the grade-unclassified students.

See notes at end of table.

**Table 3. Enrollment in educational institutions, by level and control of institution: Selected years, 1869–70 through fall 2016—Continued**

[In thousands]

| Year | Total enrollment, all levels | Elementary and secondary, total | Public elementary and secondary schools | | | Private elementary and secondary schools[1] | | | Postsecondary degree-granting institutions[2] | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | Total | Prekindergarten through grade 8 | Grades 9 through 12 | Total | Prekindergarten through grade 8 | Grades 9 through 12 | Total | Public | Private |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 |
| Fall 2010[4] | 75,319 | 56,480 | 50,303 | 35,581 | 14,722 | 6,177 | 4,873 | 1,304 | 18,839 | 14,085 | 4,754 |
| Fall 2011[4] | 75,962 | 56,857 | 50,653 | 35,994 | 14,659 | 6,204 | 4,921 | 1,284 | 19,105 | 14,269 | 4,836 |
| Fall 2012[4] | 76,712 | 57,338 | 51,093 | 36,397 | 14,696 | 6,245 | 4,975 | 1,270 | 19,374 | 14,453 | 4,921 |
| Fall 2013[4] | 77,534 | 57,872 | 51,579 | 36,841 | 14,739 | 6,293 | 5,032 | 1,261 | 19,662 | 14,651 | 5,010 |
| Fall 2014[4] | 78,430 | 58,486 | 52,135 | 37,271 | 14,864 | 6,350 | 5,088 | 1,262 | 19,944 | 14,846 | 5,098 |
| Fall 2015[4] | 79,339 | 59,147 | 52,733 | 37,578 | 15,155 | 6,414 | 5,133 | 1,281 | 20,192 | 15,015 | 5,177 |
| Fall 2016[4] | 80,222 | 59,780 | 53,300 | 37,917 | 15,382 | 6,481 | 5,179 | 1,301 | 20,442 | 15,186 | 5,256 |

—Not available.
[1]Beginning in fall 1980, data include estimates for an expanded universe of private schools. Therefore, direct comparisons with earlier years should be avoided.
[2]Data for 1869–70 through 1949–50 include resident degree-credit students enrolled at any time during the academic year. Beginning in 1959, data include all resident and extension students enrolled at the beginning of the fall term.
[3]Estimated.
[4]Projected.
NOTE: Elementary and secondary enrollment includes students in local public school systems and in most private schools (religiously affiliated and nonsectarian), but generally excludes homeschooled children and students in subcollegiate departments of colleges and in federal schools. Based on the National Household Education Survey, the homeschooled children numbered approximately 1.1 million in 2003. Excludes preprimary pupils in private schools that do not offer kindergarten or above. Postsecondary data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

—Not available.
[1]Includes teachers in local public school systems and in most private schools (religiously affiliated and nonsectarian). Teachers are reported in terms of full-time equivalents.
[2]Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Includes full-time and part-time faculty with the rank of instructor or above in colleges, universities, professional schools, and 2-year colleges. Excludes teaching assistants.
[3]Estimated.
[4]Inclusion of institutions is not consistent with surveys for 1987 and later years.
[5]Projected.
NOTE: Detail may not sum to totals because of rounding. Some data have been revised from previously published figures. Headcounts are used to report data for degree-granting institutions instructional staff.

—Not available.
†Not applicable.
[1]Includes special education, alternative, and other schools not classified by grade span. Because of changes in survey definitions, figures for "other" schools are not comparable from year to year.
[2]Data for 1980–81 and 1990–91 include schools with first or higher grades. Data for 1995–96 and later years include schools with kindergarten or higher grades.
[3]Included in other private school categories.
NOTE: Postsecondary data through 1994–95 are for institutions of higher education, while later data are for Title IV degree-granting and non-degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

NOTE: Includes enrollment in any type of graded public, parochial, or other private schools. Includes nursery schools, kindergartens, elementary schools, high schools, colleges, universities, and professional schools. Attendance may be on either a full-time or part-time basis and during the day or night. Enrollments in "special" schools, such as trade schools, business colleges, or correspondence schools, are not included. Beginning in 1994, preprimary enrollment was collected using new procedures and may not be comparable to figures for earlier years. Total includes persons from other racial/ethnic groups not shown separately. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, selected years, 1980 through 2006. (This table was prepared August 2007.)

—Not available.
†Not applicable.
[1]Preprimary enrollment collected using new procedures. Data may not be comparable to figures for earlier years.
NOTE: Data for 1940 are for April. Data for all other years are as of October. Includes enrollment in any type of graded public, parochial, or other private schools. Includes nursery schools, kindergartens, elementary schools, high schools, colleges, universities, and professional schools. Attendance may be on either a full-time or part-time basis and during the day or night. Enrollments in "special" schools, such as trade schools, business colleges, or correspondence schools, are not included. Standard errors appear in parentheses.

#Rounds to zero.
[1]Includes persons of Hispanic ethnicity for years prior to 1980.
[2]Data for years prior to 1993 are for persons with 4 or more years of high school. Data for later years are for high school completers—i.e., those persons who graduated from high school with a diploma, as well as those who completed high school through equivalency programs.
[3]Data for years prior to 1993 are for persons with 4 or more years of college.
[4]Estimates based on Census Bureau retrojection of 1940 census data on education by age.
NOTE: Totals include other racial/ethnic groups not separately shown. Race categories exclude persons of Hispanic ethnicity except where otherwise noted. Standard errors appear in parentheses.

†Not applicable.
‡Reporting standards not met.
NOTE: Total includes other racial/ethnic groups not shown separately. Although cells with fewer than 75,000 weighted persons are subject to relatively wide sampling variation, they are included in the table to permit various types of aggregations; see Guide to Sources or http://www.census.gov/apsd/techdoc/cps/cps-main.html for information on calculating standard errors. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

—Not available.
[1]Included under Asian.
[2]Data on persons of more than one race group were collected beginning in 2000. Direct comparability of the data (other than Hispanic) prior to 2000 with the data for 2000 and later years is limited by the extent to which people reporting more than one race in later years had been reported in specific race groups in earlier years.

NOTE: Resident population includes civilian population and armed forces personnel residing within the United States; it excludes armed forces personnel residing overseas. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures. Estimates as of July 1.

[1]As of April 1.
[2]Estimates as of July 1.
NOTE: Resident population includes civilian population and armed forces personnel residing within the United States and within each state; it excludes armed forces personnel residing overseas. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

[1]Adjusted by the Consumer Price Index research series using current methods (CPI-U-RS).
[2]Related children in a family include own children and all other children in the household who are related to the householder by birth, marriage, or adoption.
[3]Based on 1989 incomes collected in the 1990 census. Data may differ from figures derived from the Current Population Survey.
[4]Based on 1999 incomes collected in the 2000 census. Data may differ from figures derived from the Current Population Survey.
NOTE: Standard errors appear in parentheses. Standard errors in columns 12 and 13 cannot be shown with greater precision due to data source limitations.

†Not applicable.
[1]The respondent was the parent most knowledgeable about the child's education. Responding parents reported on their own and their spouse's, or other household adults', activities.
[2]Excludes children who do not have homework and children who never do homework.
[3]Included under vocational/technical or some college.

NOTE: Includes children enrolled in kindergarten through grade 12. Excludes homeschooled children. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

[1]In 1999, one item was used to ask parents if they had attended an event sponsored by a community, ethnic, or religious group. In 2003, attendance at an event sponsored by a religious group was asked about separately from attendance at an event sponsored by a community or ethnic group.

NOTE: The respondent was the parent most knowledgeable about the child's education. The responding parent reported on their own and their spouse's, or other household adults', activities. Excludes homeschooled children. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Parent Survey (Parent:1999) and Parent and Family Involvement in Education Survey (PFI:2003) of the National Household Education Surveys Program, unpublished tabulations. (This table was prepared June 2005.)

**Table 25. Expenditures of educational institutions related to the gross domestic product, by level of institution: Selected years, 1929–30 through 2006–07**

| Year | Gross domestic product (GDP) (in billions of current dollars) | School year | Expenditures for education in current dollars | | | | | |
|---|---|---|---|---|---|---|---|---|
| | | | All educational institutions | | All elementary and secondary schools | | All postsecondary degree–granting institutions | |
| | | | Amount (in millions) | As a percent of GDP | Amount (in millions) | As a percent of GDP | Amount (in millions) | As a percent of GDP |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 |
| 1929 | $103.6 | 1929–30 | — | — | — | — | $632 | 0.6 |
| 1939 | 92.2 | 1939–40 | — | — | — | — | 758 | 0.8 |
| 1949 | 267.3 | 1949–50 | $8,494 | 3.2 | $6,249 | 2.3 | 2,246 | 0.8 |
| 1959 | 506.6 | 1959–60 | 22,314 | 4.4 | 16,713 | 3.3 | 5,601 | 1.1 |
| 1961 | 544.7 | 1961–62 | 26,828 | 4.9 | 19,673 | 3.6 | 7,155 | 1.3 |

—Not available.
[1]Estimated.
NOTE: Total expenditures for public elementary and secondary schools include current expenditures, interest on school debt, and capital outlay. Data for private elementary and secondary schools are estimated. Expenditures for colleges and universities in 1929–30 and 1939–40 include current-fund expenditures and additions to plant value. Public and private degree-granting institutions data for 1949–50 through 1995–96 are for current-fund expenditures. Data for private degree-granting institutions for 1996–97 and later years are for total expenditures. Data for public degree-granting institutions for 1996–97 through 2000–01 are for current expenditures; data for later years are for total expenditures. Data through 1995–96 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

†Not applicable.
#Rounds to zero.
[1]Previously called social insurance administration.
[2]No longer includes transit subsidies.
[3]Includes judicial and legal expenditures and expenditures on general public buildings and other governmental administration.

NOTE: Excludes monies paid by states to the federal government. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

#Rounds to zero.

[1]Includes state and local government expenditures for education services, social services and income maintenance, transportation, public safety, environment and housing, governmental administration, interest on general debt, and other general expenditures.

[2]Includes assistance and subsidies to individuals, private elementary and secondary schools, and colleges and universities, as well as miscellaneous education expenditures.

NOTE: Current expenditure data in this table differ from figures appearing in other tables because of slightly varying definitions used in the Governmental Finances and Common Core of Data surveys. Detail may not sum to totals because of rounding. Standard errors appear in parentheses. Standard errors that are not shown are available upon request.

#Rounds to zero.
[1]Includes state and local government expenditures for education services, social services and income maintenance, transportation, public safety, environment and housing, governmental administration, interest on general debt, and other general expenditures.
[2]Includes assistance and subsidies to individuals, private elementary and secondary schools, and colleges and universities, as well as miscellaneous education expenditures.

NOTE: Per capita amounts are based on population figures as of July 2005. Detail may not sum to totals because of rounding.

—Not available.
[1]Data for years prior to 1963 include expenditures for government fiscal years ending during that particular calendar year. Data for 1963 and later years are the aggregations of expenditures for government fiscal years that ended on June 30 of the stated year. General expenditures exclude expenditures of publicly owned utilities and liquor stores, and of insurance-trust activities. Intergovernmental payments between state and local governments are excluded. Payments to the federal government are included.
[2]Constant dollars based on a chain-price index, which uses the geometric mean of output weights of adjacent time periods compiled over a time series. Chain-price indexes reflect changes in prices, while implicit price deflators reflect both changes in prices and in the composition of output.
[3]Population of the United States including armed forces overseas. Includes Alaska and Hawaii beginning in 1960.
[4]Resident population of the United States. Includes Alaska and Hawaii beginning in 1958. Data for 1990 and later years include revisions based on the 2000 census.
NOTE: Gross domestic product (GDP) data are adjusted by the GDP chained weight price deflator. Personal income data are adjusted by the personal consumption deflator. Some data have been revised from previously published figures.

# CHAPTER 2
# Elementary and Secondary Education

This chapter contains a variety of statistics on public and private elementary and secondary education. Data are presented for enrollments, teachers and other school staff, schools, dropouts, achievement, school violence, and revenues and expenditures. These data are derived from surveys conducted by the National Center for Education Statistics (NCES) and other public and private organizations. The information ranges from counts of students and schools to state graduation requirements.

## Enrollments

Public elementary and secondary school enrollments increased by 4 percent from 2000 to 2005, but enrollment at the elementary and secondary levels increased at different rates (table 36 and figure 6). Between 2000 and 2005, public elementary enrollment rose by 2 percent, while secondary enrollment increased by 10 percent. Enrollment in private elementary and secondary schools decreased by an estimated 1 percent between 2000 and 2005 (table 3).

In 2006, two-thirds of 3- to 5-year-olds were enrolled in preprimary education (nursery and kindergarten), similar to the proportion in 2000 (table 41 and figure 7). Though participation of young children in preprimary schools did not substantially increase, the percentage of children in full-day programs did. In 2006, about 59 percent of the children enrolled in preprimary education attended preprimary school all day, compared with 53 percent in 2000.

A higher percentage of 2-year-old children (51 percent) were primarily cared for by their parents during the day in 2003–04 than were cared for in home-based settings by relatives (19 percent), in home-based settings by nonrelatives (15 percent), or in center-based programs (16 percent) (table 44). There were differences in the average quality of care children received in these settings. A higher percentage of children in center-based programs (23 percent) received high-quality care than those in home-based nonrelative care (9 percent) or those in (nonparental) home-based relative care (4 percent), according to the ratings of trained observers.

Slowly increasing numbers and percentages of children are being served in programs for those with disabilities. During the 2000–01 school year, 13 percent of students were served in these programs, compared with 14 percent in 2005–06 (table 47). Some of the rise since 2000–01 may be attributed to the increasing percentage of children identified as having other health impairments (limited strength, vitality, or alertness due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, or diabetes), which rose from 0.6 to 1.2 percent of enrollment; autism, which rose from 0.2 to 0.5 percent of enrollment; and developmental delay, which rose from 0.4 to 0.7 percent of enrollment.

## Teachers and Other School Staff

During the 1970s and early 1980s, public school enrollment decreased, while the number of teachers generally increased. As a result, the public school pupil/teacher ratio declined from 22.3 in 1970 to 17.9 in 1985 (table 61 and figure 6).[1] After 1985, the number of pupils per teacher continued to decline, reaching 17.2 in 1989. After a period of relative stability during the late 1980s through the mid-1990s, the ratio declined from 17.3 in 1995 to 16.0 in 2000. Small declines have continued since then, and the public school pupil/teacher ratio was 15.7 in 2005. The projected pupil/teacher ratio for private schools for 2005 was 13.5.[1] The average class size in 2003–04 was 20.4 pupils for public elementary schools and 24.7 for public secondary schools (table 64).

In 2003–04, 75 percent of public school teachers were female, 41 percent were under 40, and 48 percent had a master's or higher degree (table 65). Compared to public school teachers, a lower percentage of private school teachers (35 percent) had a master's or higher degree. Seventy-six percent of private school teachers were female.

Public school principals tend to be older and have more advanced credentials than public school teachers. In 2003–04, 15 percent of the public school principals were under age 40 and 98 percent of the public school principals had a master's or higher degree (table 82). A lower percentage of principals than of teachers were female. About 48 percent of public school principals were female, compared to 75 percent of teachers.

The numbers of both teaching and nonteaching staff employed by public schools grew during the 1970s, while the

[1] The pupil/teacher ratio includes teachers for students with disabilities and other special teachers, while these teachers are generally excluded from class size calculations. The student count for the pupil/teacher ratio includes all students enrolled in the fall of the school year.

number of students declined (tables 77 and 3). Between 1970 and 1980, the percentage of staff who were teachers declined from 60 percent to 52 percent. From 1980 to 2005, the number of teachers and other staff grew at more similar rates (44 and 50 percent, respectively) than in the 1970s. As a result, the percentage of teachers among total staff was 1 percentage point lower in 2005 than in 1980, in contrast to the decrease of 8 percentage points during the 1970s. Two staff categories increased over 100 percent between 1980 and 2005—instructional aides, which rose 114 percent, and instructional coordinators, which rose 131 percent. Taken together, the percentage of staff with some instructional responsibilities (teachers and instructional aides) increased between 1980 and 2005, from 60 to 63 percent. In 2005, there were 8 pupils per staff member (total staff), compared with 10 pupils per staff member in 1980. In 2003, the number of pupils per staff member at private schools was 7 (table 57).

## Schools

During most of the last century, the trend to consolidate small schools brought a large decline in the total number of public schools in the United States. In 1929–30, there were approximately 248,000 public schools, compared with about 97,000 in 2005–06 (table 83). But this number has been increasing in recent years; between 1995–96 and 2005–06, there was an increase of approximately 10,300 schools.

The shift in structure of public school systems toward middle schools (grade spans beginning with 4, 5, or 6 and ending with 6, 7, or 8) since the early 1970s has continued (table 90). The number of all elementary schools (beginning in grade 6 or below, with no grade higher than grade 8) rose by 10 percent to 67,291 between 1995–96 and 2005–06, and the subset of middle schools rose by 23 percent during the same time period. Meanwhile, the number of junior high schools (grades 7 and 8 or 7 to 9) declined by 13 percent.

The average number of students in elementary schools declined from an average of 476 students in 1995–96 to 473 students in 2005–06 (table 92). The average enrollment size of secondary schools increased from 703 in 1995–96 to 722 in 2003–04, but then decreased to an average of 709 students in 2005–06. The average size of regular secondary schools, which exclude alternative, special education, and vocational education schools, rose from 771 to 819 between 1995–96 and 2005–06.

## High School Graduates and Dropouts

About 3,303,000 high school students are expected to graduate during the 2007–08 school year (table 100), including 2,988,000 public school graduates and 315,000 private school graduates. High school graduates include only recipients of diplomas, not recipients of equivalency credentials. The 2007–08 record number of high school graduates exceeds the former records of 2005–06 and 2006–07, as well as the high point during the baby boom era in 1976–77, when 3,152,000 students earned diplomas. In 2004–05, an estimated 74.7 percent of public high school students graduated on time—that is, received a diploma 4 years after beginning their freshman year (table 102).

The number of General Educational Development (GED) credentials issued rose from 330,000 in 1977 to 487,000 in 2000 (table 104). A record number of 648,000 GED credentials were issued in 2001. In that year, candidates who had already taken any of the five tests in the GED test battery had to complete the entire battery before the end of the year or else take all five tests over again. The reason is that a new GED test series was introduced in 2002. In the same year, data collection procedures changed, with data from the states on the number of credentials issued being replaced by test data from individual test-takers. In 2005, 424,000 passed the GED tests, up from 330,000 in 2002, the first year of the new test series.[2]

The percentage of dropouts among 16- to 24-year-olds has shown some decreases over the past 20 years. (People who left school but went on to receive a GED credential are not treated as dropouts.) This percentage includes all people in the 16- to 24-year-old age group who are not enrolled in school and who have not completed a high school program, regardless of when they left school. Between 1986 and 2006, the dropout rate declined from 12.2 percent to 9.3 percent (table 105). Although the dropout rate declined for both Blacks and Hispanics during this period, their dropout rates (10.7 and 22.1 percent, respectively) remained higher than the rate for White 16- to 24-year-olds (5.8 percent) in 2006. This measure is based on the civilian noninstitutionalized population, which excludes people in prisons, people in the military, and other people not living in households.

## Achievement

Much of the student performance data in the *Digest* are drawn from the National Assessment of Educational Progress (NAEP). The NAEP assessments have been conducted using three basic designs: the national main NAEP, state NAEP, and long-term trend NAEP. The main NAEP reports current information for the nation and specific geographic regions of the country. The assessment program includes students drawn from both public and private schools and reports results for student achievement at grades 4, 8, and 12. The main NAEP assessments follow the frameworks developed by the National Assessment Governing Board and use the latest advances in assessment methodology. Because the assessment items reflect curricula associated with specific grade levels, the main NAEP uses samples of students at those grade levels.

Since 1990, NAEP assessments have also been conducted at the state level. Participating states receive assessment results that report on the performance of students in

[2] Information on changes in GED test series and reporting is based on the 2003 edition of *Who Passed the GED Tests?*, by the GED Testing Service of the American Council on Education, as well as communication with staff of the GED Testing Service.

that state. In its content, the state assessment is identical to the assessment conducted nationally. However, because the national NAEP samples prior to 2002 were not designed to support the reporting of accurate and representative state-level results, separate representative samples of students were selected for each participating jurisdiction/state. From 1990 through 2001, the national sample was a subset of the combined sample of students assessed in each participating state along with an additional sample from the states that did not participate in the state assessment. Since 2002, a combined sample of public schools has been selected for both state and national NAEP.

NAEP long-term trend assessments are designed to give information on the changes in the basic achievement level of America's youth since the early 1970s. They are administered nationally and report student performance at ages 9, 13, and 17 in reading and mathematics. Measuring long-term trends of student achievement requires the precise replication of past procedures. For example, students of specific ages are sampled in order to maintain consistency with the original sample design. Similarly, the long-term trend instrument does not evolve based on changes in curricula or in educational practices. The differences in procedures between the main NAEP and the long-term trend NAEP mean that their results cannot be compared directly.

Long-term trend data have shown improvements in achievement in a number of areas. The average reading score at age 9 was higher in 2004 than in any previous assessment year (table 112). The average score at age 13 was higher in 2004 than in 1971, but not measurably different from the average score in 1999. Between 1999 and 2004, average reading scores at age 17 showed no measurable changes. The average score for 17-year-olds in 2004 was similar to that in 1971.

Significant gaps in performance continue to exist between racial/ethnic subgroups. For Black 9-, 13-, and 17-year-olds, average reading scores in 2004 were higher than in 1971 (table 112). At age 9, Black students scored higher on average in 2004 than in any previous administration year. For White students, the average scores for 9- and 13-year-olds were also higher in 2004 than in 1971. Separate data for Hispanics were not gathered in 1971, but as with the other racial/ethnic groups, the average reading score for Hispanic students at age 9 was higher in 2004 than in any other assessment year. The average score for Hispanic students at age 13 increased between 1975 and 2004. The scores for 17-year-old Hispanic students also increased between 1975 and 2004, but no measurable changes were seen between 1999 and 2004.

Female students scored higher on average in reading assessments than their male counterparts in 2004. The gender score gap at age 9 decreased from 1971 to 2004. In contrast, there has been no measurable change in the gender score gap at age 13 between 2004 and any previous assessment year. For 17-year-olds, the gender score gap in 2004 was larger than the gaps in 1980 and 1988, but showed no measurable difference from the gaps in other assessment years.

On the main NAEP reading assessment, public school fourth-graders scored higher in 2007 than in all previous assessment years. The average reading score was up 2 points since 2005 (based on unrounded scores) and up 5 points compared to the first main NAEP reading assessment in 1992.

The 2007 main NAEP reading assessment of states found that reading proficiency varied among public school fourth-graders in participating jurisdictions (the 50 states, the Department of Defense overseas and domestic schools, and the District of Columbia) (table 116). The U.S. average score was 220. The scores for the participating jurisdictions ranged from 191 in the District of Columbia to 236 in Massachusetts.

Mathematics achievement results from the long-term trend NAEP indicate a significant improvement for ages 9 and 13 between 1973 and 2004, but not for age 17 (table 125). The average score at age 9 in 2004 (241) was higher than in any previous year—up 9 points from 1999 and 22 points from 1973. The average score at age 13 in 2004 was higher than in any other assessment year. The 5-point increase between 1999 and 2004 resulted in an average score in 2004 that was 15 points higher than the average score in 1973. The average score at age 17 was not measurably different from the average score in 1973 or 1999. The apparent difference in average mathematics scores at age 9 between male and female students in 2004 was not statistically significant. Males had higher average scores than females at ages 13 and 17. The gender score gaps for 13- and 17-year-olds were measurably different between 1973 and 2004.

On the main NAEP mathematics assessment, the average score for public school eighth-graders in 2007 was 18 points higher than in 1990, the first assessment year. The average score in 2007 was higher than the score in any previous assessment.

The 2007 main NAEP assessment of states found that mathematics proficiency varied among public school eighth-graders in participating jurisdictions (the 50 states, the Department of Defense overseas and domestic schools, and the District of Columbia) (table 129). The main NAEP results are reported in the *Digest* in terms of both average scale scores and achievement levels. The achievement levels define what students who are performing at *Basic*, *Proficient*, and *Advanced* levels of achievement should know and be able to do. The *Basic* level denotes partial mastery of prerequisite knowledge and skills that are fundamental for proficient work at each grade. The *Proficient* level represents solid academic performance for each grade assessed; students reaching this level have demonstrated competency over challenging subject matter, including subject-matter knowledge, application of such knowledge to real-world situations, and analytical skills appropriate to the subject matter. The *Advanced* level signifies superior performance. Overall, 70 percent of these eighth-grade students performed at or above the *Basic* level in mathematics, and 31 percent performed at or above the *Proficient* level. The percentage of students performing at least at the *Basic* level in math ranged from 31 percent in the District of Columbia to 85 percent in Massachusetts.

Between 1996 and 2005, the national average 4th-grade science score increased from 147 to 151; there was no measurable change in the 8th-grade score; and the 12th-grade score decreased from 150 to 147 (table 132). Certain subgroups outperformed others in science in 2005. For example, males outperformed females at all three grades. White students scored higher, on average, than Black and Hispanic students at all three grades in 2005. At 4th grade, average scores increased for White, Black, Hispanic, and Asian/Pacific Islander students between 1996 and 2005. At 8th grade, the average score for Black students increased, but no measurable increases occurred for other racial/ethnic groups. At 12th grade, there were no significant measurable changes in average scores for any racial/ethnic group during this period. Asian/Pacific Islander 4th-graders' 2000 results are not included because reporting standards were not met.

In addition to student performance data available through NAEP, the *Digest* presents data from other surveys to provide additional perspectives on student achievement. Differences among demographic groups in the acquisition of mental skills have been demonstrated at relatively early ages (table 109). In 2003–04, about 64 percent of 2-year-olds demonstrated skill in expressive vocabulary, which measured toddlers' skill in being able to communicate using gestures, words, and sentences. A higher percentage of females (69 percent) demonstrated expressive vocabulary than males (59 percent). Also, a higher percentage of White 2-year-olds (71 percent) demonstrated expressive vocabulary than Black, Hispanic, or American Indian 2-year-olds (56, 54, and 50 percent, respectively). The percentage of 2-year-olds from families with high socioeconomic status who demonstrated expressive vocabulary (75 percent) was higher than the percentage of children from low socioeconomic status families (52 percent).

The SAT (formerly known as the Scholastic Assessment Test and the Scholastic Aptitude Test) is not designed as an indicator of student achievement, but rather as an aid for predicting how well students will do in college. Between 1996–97 and 2006–07, the mathematics SAT average score increased by 4 points. The critical reading average score was 3 points lower in 2006–07 than in 1996–97 (table 132).

The average number of science and mathematics courses completed by public high school graduates increased between 1982 and 2005. The average number of mathematics courses (Carnegie units) completed in high school rose from 2.6 in 1982 to 3.7 in 2005, and the number of science courses rose from 2.2 to 3.3 (table 140). The average number of courses in career/technical areas completed by all high school graduates was lower in 2005 (4.0 units) than in 1982 (4.6 units). As a result of the increased academic course load, the percentage of students completing the 1983 National Commission on Excellence recommendations for college-bound students (4 units of English, 3 units of social studies, 3 units of science, 3 units of mathematics, 2 units of foreign language, and .5 units of computer science) rose from 2 percent in 1982 to 36 percent in 2005 (table 144).

## School Violence

In 2005–06, about 86 percent of public schools had a criminal incident, which is defined as a serious violent crime or a less serious crime such as a fight without weapons, theft, or vandalism (table 151). The percentage of schools having a criminal incident in 2005–06 was about the same as the percentage of schools having an incident in 1999–2000. In 2005–06, 78 percent of schools reported a violent incident; 46 percent of schools reported a theft/larceny; and 68 percent reported other types of incidents. Overall, there were 4.6 crime incidents reported per 100 students.

## Revenues and Expenditures

The state share of revenues for public elementary and secondary schools generally grew from the 1930s through the mid-1980s, while the local share declined during the same time period (table 162 and figure 9). However, this pattern changed in the late 1980s, when the local share began to increase at the same time the state share decreased. Between 1986–87 and 1993–94, the state share declined from 49.7 percent to 45.2 percent, while the local share rose from 43.9 percent to 47.8 percent. Between 1993–94 and 2000–01, the state share rose again to 49.7 percent, the highest share since 1986–87, but declined every school year afterward until 2004–05, when the state share was 46.9 percent. Between 1994–95 and 2004–05, the federal share of revenues rose to 9.2 percent and the local share declined to 44.0 percent.

After adjustment for inflation, current expenditures per student in fall enrollment in public schools rose during the 1980s, remained stable during the first part of the 1990s, and rose again between 1993–94 and 2003–04 (table 171 and figure 10). There was an increase of 37 percent from 1980–81 to 1990–91; an increase of less than 1 percent from 1990–91 to 1994–95 (which resulted from small decreases at the beginning of this period, followed by small increases after 1992–93); and an increase of 23 percent from 1994–95 to 2004–05. In 2004–05, current expenditures per student in fall enrollment were $8,701 in unadjusted dollars. In 2004–05, 55 percent of students in public schools were transported at public expense at a cost of $692 per pupil, also in unadjusted dollars (table 176).

[1]Data on population and labor force are from the Census Bureau, and data on personal income and national income are from the Bureau of Economic Analysis, U.S. Department of Commerce. Population data through 1900 are based on total population from the decennial census. From 1909–10 to 1959–60, population data are total population, including armed forces overseas, as of July 1. Data for later years are for resident population that excludes armed forces overseas.
[2]Data for 1869–70 through 1959–60 are school year enrollment. Data for later years are fall enrollment.
[3]Data for 1870–71.
[4]Estimated by the National Center for Education Statistics.
[5]Prior to 1919–20, data are for the number of different persons employed rather than number of positions.
[6]Prior to 1919–20, includes interest on school debt.
[7]Because of the modification of the scope of "current expenditures for elementary and secondary schools," data for 1959–60 and later years are not entirely comparable with prior years.
[8]Beginning in 1969–70, includes capital outlay by state and local school building authorities.
[9]Includes summer schools, community colleges, and adult education. Beginning in 1959–60, also includes community services, formerly classified with "current expenditures for elementary and secondary schools."
[10]Excludes community colleges and adult education.
[11]Prior to 1959–60, average includes supervisors, principals, teachers, and other nonsupervisory instructional staff. Data for 1959–60 and later years are estimated by the National Education Association.
[12]Excludes current expenditures not allocable to pupil costs.
[13]"ADA" means average daily attendance in elementary and secondary schools.
[14]Expenditure figure is the sum of current expenditures allocable to pupil costs, capital outlay, and interest on school debt.
[15]Per-day rates derived by dividing annual rates by average length of term.
[16]Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.
NOTE: Some data have been revised from previously published figures. Beginning in 1959–60, data include Alaska and Hawaii. Detail may not sum to totals because of rounding.

NOTE: Because of changes in reporting practices and imputation of data for nonrespondents since 1992, prekindergarten enrollment data for 1992 and later years are not comparable to prekindergarten enrollment data for prior years. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

#Rounds to zero.
[1]Refers to all students in public and private schools and homeschooled students.
[2]Students whose grade-equivalent was "ungraded" were excluded from the grade analysis. The percentage of students with an "ungraded" grade equivalent was 0.03 percent in 1999 and 0.02 percent in 2003.
[3]Urbanicity is based on a U.S. Census Bureau classification of places. Urban is a place with at least 50,000 people. Rural is a place not classified as urban.

NOTE: The number and percentage of homeschoolers exclude students who were enrolled in school for more than 25 hours a week and students who were only homeschooled due to a temporary illness. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

—Not available.
#Rounds to zero.
NOTE: Percentage distribution based on students for whom race/ethnicity was reported, which may be less than the total number of students in the state. Race categories exclude persons of Hispanic ethnicity. DoD = Department of Defense. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 1995–96 and 2005–06. (This table was prepared June 2007.)

**Table 41. Enrollment of 3-, 4-, and 5-year-old children in preprimary programs, by level of program, control of program, and attendance status: Selected years, 1965 through 2006**

[In thousands]

| Year and age | Total population, 3 to 5 years old | | Enrollment by level and control | | | | | | | | | | | | Enrollment by attendance | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | | | | | Nursery school | | | | Kindergarten | | | | | | | | | |
| | | | Total | | Percent enrolled | | Public | | Private | | Public | | Private | | Full-day | | Part-day | | Percent full-day | |
| 1 | 2 | | 3 | | 4 | | 5 | | 6 | | 7 | | 8 | | 9 | | 10 | | 11 | |
| **Total, 3 to 5 years old** | | | | | | | | | | | | | | | | | | | | |

†Not applicable.
[1]Data collected using new procedures. May not be comparable with figures prior to 1994.
[2]Enrollment data include only those students in preprimary programs.
NOTE: Data are based on sample surveys of the civilian noninstitutional population. Although cells with fewer than 75,000 children are subject to wide sampling variation, they are included in the table to permit various types of aggregations. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.
SOURCE: U.S. Department of Education, National Center for Education Statistics, *Preprimary Enrollment*, 1965, 1970, and 1975. U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 1980 through 2006. (This table was prepared August 2007.)

**Table 42. Number of children under 6 years old and not yet enrolled in kindergarten, percentage in center-based programs, average weekly hours in nonparental care, and percentage in various types of primary care arrangements, by selected child and family characteristics: 2005**

| Selected child and family characteristic | Number of children, ages 0 to 5 (in thousands) | | Percent in center-based programs | | Average hours per week in nonparental care[1] | | Percentage distribution, by type of primary care arrangement | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | | | | | | | Nonparental care | | | | | | | | | |
| | | | | | | | | | Center-based care | | | | Nonrelative care | | | | | |
| | | | | | | | Parental care only | | Head Start | | Other center-based | | Family child care (in another home) | | Sitter (in child's home) | | Relative | | Multiple arrangements[2] | |

†Not applicable.
#Rounds to zero.
[1]Mean hours per week per child, among preschool children enrolled in any type of nonparental care arrangement. For children with more than one arrangement, the hours of each weekly arrangement were summed to calculate the total amount of time in child care per week.
[2]Children who spend equal hours per week in multiple nonparental care arrangements.
[3]Excludes children living in households with no mother or female guardian present.
[4]Excludes children living apart from their parents.
[5]Poverty status was determined by household income and number of persons in household.
NOTE: A child's "primary arrangement" was defined as the regular nonparental care arrangement or early childhood education program in which the child spent the most time per week. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

†Not applicable.
[1]Center-based programs include day care centers, nursery schools, prekindergartens, preschools, and Head Start programs.
NOTE: Row percents for nonparental and parental care do not add to 100 percent because some children participated in more than one type of nonparental care arrangement. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

†Not applicable.

‡Reporting standards not met.

[1]Distribution of weighted Early Childhood Longitudinal Study, Birth Cohort survey population between 22 and 25 months of age with data on primary care arrangements.

[2]Primary type of care arrangement is the type of nonparental care in which the child spent the most hours.

[3]Care provided in the child's home or in another private home by a relative (excluding parents).

[4]Care provided in the child's home or in another private home by a person unrelated to the child.

[5]Care provided in places such as early learning centers, nursery schools, and preschools, including Head Start.

[6]Children who spent an equal amount of time in each of two or more arrangements.

[7]Quality rating based on the Family Day Care Rating Scale (FDCRS). Low quality = score of 1 but less than 3. Medium quality = score of 3 but less than 5. High quality = score of 5 to 7.

[8]Quality rating based on the Infant/Toddler Environment Rating Scale (ITERS). Low quality = score of 1 but less than 3. Medium quality = score of 3 but less than 5. High quality = score of 5 to 7.

[9]Poverty status based on Census Bureau guidelines from 2002, which identify a dollar amount determined to meet a household's needs, given its size and composition. In 2002, a family of four was considered to live below the poverty threshold if its income was less than or equal to $18,392.

[10]Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income.

NOTE: Estimates weighted by W2R0. Estimates pertain to children assessed between 22 months and 25 months of age. Children younger than 22 months (less than 1 percent of the survey population) and children older than 25 months (approximately 9 percent of the survey population) are excluded from this table. Ratings of care arrangement quality using both the FDCRS and ITERS scales were based on interviewer observations of children's interactions with adults and peers, children's exposure to materials and activities, the extent to which and the manner in which routine care needs were met, and the furnishings and displays in the classroom. The FDCRS and ITERS metrics are designed to be equivalent. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and suppression of cells that do not meet standards. Standard errors appear in parentheses.

[1]In 1993, respondents were asked about reading frequency in one of two versions. The percentages presented in the table are for all of the respondents who answered three or more times on either version of the questions.
[2]Refers to visiting a library at least once in the past month.
[3]Excludes children living in households with no mother or female guardian present.
[4]Poverty status was determined by household income and number of persons in household.

NOTE: Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.
SOURCE: U.S. Department of Education, National Center for Education Statistics, School Readiness Survey and Early Childhood Program Participation Survey of the National Household Education Surveys Program (SR-NHES:1993 and ECPP-NHES:2001 and 2005). (This table was prepared October 2006.)

## Table 47. Children 3 to 21 years old served in federally supported programs for the disabled, by type of disability: Selected years, 1976–77 through 2005–06

| Type of disability | 1976–77 | 1980–81 | 1990–91 | 1994–95 | 1995–96 | 1996–97 | 1997–98 | 1998–99 | 1999–2000 | 2000–01 | 2001–02 | 2002–03 | 2003–04 | 2004–05 | 2005–06 |

#Rounds to zero.
[1]Other health impairments include having limited strength, vitality, or alertness due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, or diabetes.
[2]Includes preschool children ages 3–5 served under Chapter 1 and IDEA, Part B. Prior to 1987–88, these students were included in the counts by disability condition. Beginning in 1987–88, states were no longer required to report preschool children (ages 0–5) by disability condition. Beginning in 2002–03, preschool children were again identified by disability condition.
[3]Based on the total enrollment in public schools, prekindergarten through 12th grade.
NOTE: Includes students served under Chapter 1 of the Elementary and Secondary Education Act and under the Individuals with Disabilities Education Act (IDEA), formerly the Education of the Handicapped Act. Prior to October 1994, children and youth with disabilities were served under Chapter 1 as well as IDEA, Part B. In October 1994, funding for children and youth with disabilities was consolidated under IDEA, Part B. Data reported in this table for years prior to 1994–95 include children ages 0–21 served under Chapter 1. Counts are based on reports from the 50 states and the District of Columbia only (i.e., table excludes data for other jurisdictions). Increases since 1987–88 are due in part to new legislation enacted in fall 1986, which added a mandate for public school special education services for 3- to 5-year-old disabled children. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

—Not available.
[1]Percentage of students with disabilities is based on the total enrollment in public schools, prekindergarten through 12th grade.
NOTE: Prior to 1994, children and youth with disabilities were served under the Individuals with Disabilities Education Act (IDEA), Part B, and Chapter 1 of the Elementary and Secondary Education Act. In October 1994, funding for children and youth with disabilities was consolidated under IDEA, Part B. Data reported in this table for years prior to 1994 include children served under Chapter 1. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, Office of Special Education and Rehabilitative Services, *Annual Report to Congress on the Implementation of the Individuals with Disabilities Education Act*, selected years, 1992 through 2005, and Individuals with Disabilities Education Act (IDEA) database, retrieved on September 25, 2006, from http://www.idea data.org/PartB-data.asp. National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 2003–04 and 2004–05. (This table was prepared September 2006.)

## Table 50. Number of gifted and talented students in public elementary and secondary schools, by sex, race/ethnicity, and state: 2002 and 2004

!Interpret data with caution.
[1]State/jurisdiction has 25 or fewer school districts; therefore, data are based on universe count (instead of samples).
[2]State has only one school district, but is sampled within the district.
[3]In 2004, although all districts were surveyed, not all schools responded; therefore, standard errors are used.
NOTE: Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses. Detail may not sum to totals because of rounding.

—Not available.
[1]Includes a relatively small number of secondary ungraded students.
[2]Data for 1890 through 1950 are from the decennial censuses of population. Later data are Census Bureau estimates as of July 1 preceding the opening of the school year.
[3]Gross enrollment ratio based on school enrollment of all ages in grades 9 to 12 divided by the 14- to 17-year-old population. Differs from enrollment rates in other tables, which are based on the enrollment of persons in the given age group only.
[4]Data are for 1927–28.
[5]Data are for 1940–41.
[6]Estimated.
[7]Projected.
NOTE: Allocation of ungraded students to secondary levels based on proportions derived from prior years. Includes enrollment in public schools that are a part of state and local school systems and also in most private schools, both religiously affiliated and nonsectarian. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

#Rounds to zero.
[1]Estimated.
[2]Includes enrollment in ancient Greek (not shown separately). Fewer than 1,000 students were enrolled in this language in each of the years shown.
[3]Until 1990, student enrollment in Japanese courses was included in the Other modern foreign languages category.
[4]Includes students enrolled in unspecified modern foreign languages. Since 1990, enrollment in Japanese courses is reported as a separate category.
NOTE: Percent change computed from unrounded numbers.

†Not applicable.
#Rounds to zero.
!Interpret data with caution.
[1]Enrollment is based on students regularly enrolled in the districts. Enrollments include duplicated counts of students, since districts were instructed to count a student enrolled in each course in which he or she was enrolled.
[2]Combined or ungraded schools are those in which the grades offered in the school span both elementary and secondary grades or that are not divided into grade levels.

NOTE: Percentages are based on unrounded numbers. Percentages are based on the estimated 89,310 public schools in the nation in 2002–03. For the FRSS study sample, there were 3 cases for which district enrollment size was missing and 112 cases for which poverty concentration was missing. Detail may not sum to totals because of rounding or missing data.

†Not applicable.
‡Reporting standards not met.
[1]Only includes kindergarten students who attend schools that offer first or higher grade.
[2]Tuition weighted by the number of students enrolled in schools.
NOTE: Excludes schools not offering first or higher grade. Elementary schools have grade 6 or lower and no grade higher than 8. Secondary schools have no grade lower than 7. Combined schools have grades lower than 7 and higher than 8. Excludes prekindergarten students. Includes schools reporting tuition of 0. Detail may not sum to totals because of rounding and cell suppression. Standard errors appear in parentheses.

†Not applicable.
‡Reporting standards not met.
[1]Includes schools beginning with grade 6 or below and with no grade higher than 8.
[2]Schools with no grade lower than 7.
[3]Schools with grades lower than 7 and higher than 8.
[4]Includes student support services professional staff, such as school psychologists, social workers, occupational therapists, and speech therapists.
[5]Includes health and other noninstructional aides, and other employees not identified by function.
NOTE: Data are based on a sample survey and may not be strictly comparable with data reported elsewhere. Excludes all prekindergarten students from calculations, but includes kindergarten students attending schools that offer first or higher grade. Includes only schools that offer first or higher grade. Standard errors appear in parentheses. Detail may not sum to totals because of rounding.

[1]Includes part-time teachers.
[2]Includes estimates for the nonreporting schools.
[3]Reported in full-time equivalents (FTE).
[4]Excludes the Archdiocese of New Orleans.
NOTE: Data collected by the National Catholic Educational Association and data collected by the National Center for Education Statistics are not directly comparable because survey procedures and definitions differ. Excludes prekindergarten enrollment. Some data have been revised from previously published figures.

†Not applicable.
[1]Reported in full-time-equivalents (FTE). Excludes teachers who teach only prekindergarten students.
NOTE: Includes special education, vocational/technical education, and alternative schools. Tabulation includes schools that offer kindergarten or higher grade. Includes enrollment of students in prekindergarten though grade 12 in schools that offer kindergarten or higher grade. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Private School Universe Survey (PSS), various years, 1997–98 through 2003–2004. (This table was prepared September 2006.)

—Not available.
NOTE: Pupil/teacher ratios are based on data reported by types of schools rather than by instructional programs within schools. Only includes schools that reported both enrollment and teacher data. Ratios are based on data reported by schools and may differ from data reported in other tables that reflect aggregate totals reported by states.

[1]Estimated.
[2]Projected.
NOTE: Data for teachers are expressed in full-time equivalents (FTE). Counts of private school teachers and enrollment include prekindergarten through grade 12 in schools offering kindergarten or higher grades. Counts of public school teachers and enrollment include kindergarten through grade 12. The pupil/teacher ratio includes teachers for students with disabilities and other special teachers, while these teachers are generally excluded from class size calculations. Ratios for public schools reflect totals reported by states and differ from totals reported for schools or school districts. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

—Not available.
[1]Data have been revised from previously published figures.
[2]Includes imputed values for states.
[3]Includes imputations for underreporting of prekindergarten teachers.
[4]Imputed.

NOTE: Distribution of elementary and secondary teachers determined by reporting units. Teachers reported in full-time equivalents (FTE). DoD = Department of Defense.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 2000–01 through 2005–06. (This table was prepared July 2007.)

**Table 63. Teachers, enrollment, and pupil/teacher ratios in public elementary and secondary schools, by state or jurisdiction: Fall 2000 through fall 2005**

—Not available.
[1]Data have been revised from previously published figures.
[2]Includes imputed values for states.
[3]Includes imputations for underreporting of prekindergarten teachers/enrollment.
[4]Ratio based on enrollment excluding 6,943 charter school students for whom no teacher counts were reported.
[5]Imputed.
NOTE: Teachers reported in full-time equivalents (FTE). DoD = Department of Defense.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 2000–01 through 2005–06. (This table was prepared July 2007.)

## Table 64. Highest degree earned, years of full-time teaching experience, and average class size for teachers in public elementary and secondary schools, by state: 2003–04

| State | Total number of teachers (in thousands) | | Percent of teachers, by highest degree earned[1] | | | | | | | | Percent of teachers, by years of full-time teaching experience | | | | | | | | Average class size[2] | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | Bachelor's | | Master's | | Education specialist[3] | | Doctor's | | Less than 3 | | 3 to 9 | | 10 to 20 | | Over 20 | | Elementary | | Secondary | |
| 1 | 2 | | 3 | | 4 | | 5 | | 6 | | 7 | | 8 | | 9 | | 10 | | 11 | | 12 | |

†Not applicable.
‡Reporting standards not met.
[1]Teachers with less than a bachelor's degree are not shown separately.
[2]Elementary teachers are those who taught self-contained classes at the elementary level, and secondary teachers are those who taught departmentalized classes (e.g., science, art, social science, or other course subjects) at the secondary level. Teachers were classified as elementary or secondary on the basis of the grades they taught, rather than on the level of the school in which they taught.
[3]Includes certificate of advanced graduate studies.
NOTE: Data are based on a head count of all teachers rather than on the number of full-time-equivalent teachers appearing in other tables. Excludes prekindergarten teachers. Standard errors appear in parentheses. Detail may not sum to totals because of rounding, cell suppression, and omitted categories (less than bachelor's).
SOURCE: U.S. Department of Education, National Center for Education Statistics, Schools and Staffing Survey (SASS), "Public Teacher Questionnaire," 2003–04. (This table was prepared July 2006.)

## Table 65. Highest degree earned and years of full-time teaching experience for teachers in public and private elementary and secondary schools, by selected teacher characteristics: 1999–2000 and 2003–04

| Selected characteristic | Number of teachers, 1999–2000 (in thousands) | | Number of teachers, 2003–04 (in thousands) | | Percent of teachers, by highest degree earned, 2003–04 | | | | | | | | | | Percent of teachers, by years of full-time teaching experience, 2003–04 | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|

—Not available.
†Not applicable.
‡Reporting standards not met.
[1]Includes certificate of advanced graduate studies.
[2]Data are only roughly comparable to 2003–04, because the new category of more than one race was introduced in 2003–04.
[3]Includes Pacific Islander.
[4]Included under other elementary.
[5]Included under other secondary.

NOTE: Excludes prekindergarten teachers. Data are based on a head count of full-time and part-time teachers rather than on the number of full-time-equivalent teachers reported in other tables. Detail may not sum to totals because of rounding and cell suppression. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

—Not available.
[1]Figures for curriculum specialist or professional diploma based on 6 years of college study are not included.
[2]Measured in semester hours.
[3]Includes extra pay for extra duties.

NOTE: Data are based on sample surveys of public school teachers. See Guide to Sources for information on interpreting data from this survey. Data differ from figures appearing in other tables because of varying survey processing procedures and time period coverages. Detail may not sum to totals because of rounding.

†Not applicable.
‡Reporting standards not met.
[1]Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level.
[2]Data are for bachelor's degrees and major fields of study only.

NOTE: Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

†Not applicable.
‡Reporting standards not met.
[1]Includes teachers with levels of education below the bachelor's degree (not shown separately).
[2]Includes certificate of advanced graduate studies.
[3]Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

NOTE: This table includes regular full-time teachers only; it excludes other staff even when they have full-time teaching duties (regular part-time teachers, itinerant teachers, long-term substitutes, administrators, library media specialists, other professional staff, and support staff). Some data have been revised from previously published figures. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

†Not applicable.
‡Reporting standards not met.
[1]Includes additional compensation for extracurricular instruction or other additional activities, and bonuses and state supplements.
NOTE: This table includes regular full-time teachers only; it excludes other staff even when they have full-time teaching duties (regular part-time teachers, itinerant teachers, long-term substitutes, administrators, library media specialists, other professional staff, and support staff). Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses. Detail may not sum to totals because of rounding, missing values in cells with too few cases to report, and survey item nonresponse.

†Not applicable.
‡Reporting standards not met.
NOTE: This table includes regular full-time teachers only; it excludes other staff even when they have full-time teaching duties (regular part-time teachers, itinerant teachers, long-term substitutes, administrators, library media specialists, other professional staff, and support staff). Standard errors appear in parentheses.

‡Reporting standards not met.
NOTE: This table includes regular full-time teachers only; it excludes other staff even when they have full-time teaching duties (regular part-time teachers, itinerant teachers, long-term substitutes, administrators, library media specialists, other professional staff, and support staff). Standard errors appear in parentheses.

—Not available.
[1]Includes school district administrative support staff, school and library support staff, student support staff, and other support services staff.
[2]Because of classification revisions, categories other than teachers, principals, librarians, and guidance counselors are only roughly comparable to figures for years after 1980.
[3]Data included in column 8.

NOTE: Data for 1949–50 through 1969–70 are cumulative for the entire school year, rather than counts as of the fall of the year. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.
SOURCE: U.S. Department of Education, National Center for Education Statistics, *Statistics of State School Systems*, various years; *Statistics of Public Elementary and Secondary Schools*, various years; and Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 1986–87 through 2005–06. (This table was prepared July 2007.)

## Table 78. Staff employed in public elementary and secondary school systems, by type of assignment and state or jurisdiction: Fall 2005

[In full-time equivalents]

| State or jurisdiction | Total | School district staff | | | School staff | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | Officials and administrators | Administrative support staff | Instruction coordinators | Principals and assistant principals | School and library support staff | Teachers | Instructional aides | Guidance counselors | Librarians | Student support staff | Other support services staff |

—Not available.
†Not applicable.
‡Reporting standards not met.
[1]Total differs from data appearing in other tables because of varying survey processing procedures and time period coverages.
[2]Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis. Excludes principals reporting a salary of $0.
[3]Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes certificate of advanced studies.
[4]Data include Pacific Islander.
[5]A city consists of a territory inside an urbanized area and inside a principal city.
[6]A suburb is a territory outside a principal city and inside an urbanized area. An urbanized area includes a central place and densely populated surrounding area with at least 50,000 people.
[7]A town is a territory within an urban cluster. An urban cluster is a central place with a densely populated adjacent territory including at least 2,500 people.
[8]A rural area is a Census-defined rural territory that is outside of an urbanized area and urban clusters.
NOTE: Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and survey item nonresponse. Standard errors appear in parentheses.

—Not available.
[1]Includes operating and nonoperating districts.
[2]Schools with both elementary and secondary programs are included under elementary schools and also under secondary schools.
[3]Data for most years prior to 1976–77 are partly estimated.
[4]Includes regular schools and special schools not classified by grade span.
[5]Includes elementary, secondary, and combined elementary/secondary schools.
[6]These data cannot be compared directly with the data for years after 1980–81.
[7]Because of expanded survey coverage, data are not directly comparable with figures after 1983–84.

†Not applicable.

[1]Data have been revised from previously published figures.

NOTE: Size not reported includes school districts reporting enrollment of zero. Regular districts exclude regional education service agencies and supervisory union administrative centers, state-operated agencies, federally operated agencies, and other types of local education agencies, such as independent charter schools. Enrollment totals differ from other tables because this table represents data reported by school districts rather than states or schools. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Local Education Agency Universe Survey," 1979–80 through 2005–06. (This table was prepared August 2007.)

**Table 85. Number of public elementary and secondary education agencies, by type of agency and state or jurisdiction: 2004–05 and 2005–06**

| State or jurisdiction | Total agencies | | Regular school districts, including supervisory union components[1] | | Regional education service agencies and supervisory union administrative centers | | State-operated agencies | | Federally operated agencies | | Independent charter schools and other agencies | |

[1]Regular school districts include both independent districts and those that are a dependent segment of a local government. Includes nonoperating agencies. Components of supervisory unions operate schools, but share superintendent services with other districts.
[2]New York City counted as one school district.

NOTE: DoD = Department of Defense.

**Table 86. Public elementary and secondary students, schools, pupil/teacher ratios, and finances, by type of locale: 2004–05 and 2005–06—Continued**

| Selected characteristic | Total | City, large[1] | City, midsize[2] | City, small[3] | Suburban, large[4] | Suburban, midsize[5] | Suburban, small[6] | Town, fringe[7] | Town, distant[8] | Town, remote[9] | Rural, fringe[10] | Rural, distant[11] | Rural, remote[12] |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 |
| Current expenditure per student (in dollars) | $8,742 | $9,590 | $8,472 | $8,647 | $9,045 | $8,199 | $8,115 | $8,119 | $8,059 | $7,858 | $8,196 | $8,064 | $8,982 |
| Instruction expenditure per student (in dollars) | 5,364 | 5,959 | 5,129 | 5,313 | 5,560 | 5,057 | 4,925 | 5,003 | 4,917 | 4,796 | 4,984 | 4,923 | 5,396 |

[1]Located inside an urbanized area and inside a principal city with a population of at least 250,000.
[2]Located inside an urbanized area and inside a principal city with a population of at least 100,000, but less than 250,000.
[3]Located inside an urbanized area and inside a principal city with a population less than 100,000.
[4]Located inside an urbanized area and outside a principal city with a population of 250,000 or more.
[5]Located inside an urbanized area and outside a principal city with a population of at least 100,000, but less than 250,000.
[6]Located inside an urbanized area and outside a principal city with a population less than 100,000.
[7]Located inside an urban cluster that is 10 miles or less from an urbanized area.
[8]Located inside an urban cluster that is more than 10 but less than or equal to 35 miles from an urbanized area.
[9]Located inside an urban cluster that is more than 35 miles from an urbanized area.
[10]Located outside any urbanized area or urban cluster, but 5 miles or less from an urbanized area or 2.5 miles or less from an urban cluster.
[11]Located outside any urbanized area or urban cluster and more than 5 miles but less than or equal to 25 miles from an urbanized area, or more than 2.5 miles but less than or equal to 10 miles from an urban cluster.
[12]Located outside any urbanized area or urban cluster, more than 25 miles from an urbanized area, and more than 10 miles from an urban cluster.
[13]Total includes 218 schools not reported by locale type.
[14]Average for schools reporting enrollment. Enrollment data were available for 93,845 out of 97,382 institutions in 2005–06.
[15]Ratio for schools reporting both full-time-equivalent teachers and fall enrollment data.
[16]Includes tuition and fee revenues from other in-state school systems, which are excluded from state data reported through the "National Public Education Financial Survey."
[17]Property tax and parent government contributions are determined on the basis of independence or dependence of the local school system and are mutually exclusive.
NOTE: Locale codes for districts with missing values were imputed, where possible. Detail may not sum to totals because of rounding and missing locale codes for some school districts. Race categories exclude persons of Hispanic ethnicity.

#Rounds to zero.
[1]Alabama, Alaska, Arizona, Florida, Illinois, Maryland, New Jersey, New York, and Tennessee reported data on an alternative July through June cycle, rather than the specified October through September cycle.
[2]Includes regular diplomas only.
NOTE: Total enrollment, staff, and teacher data in this table reflect totals reported by school districts and may differ from data derived from summing school-level data to school district aggregates. SB = school board. ISD = independent school district. CISD = consolidated independent school district. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

†Not applicable.
[1]Poverty is defined based on the number of persons and related children in the family and their income. For information on poverty thresholds for 2004, see http://www.census.gov/hhes/www/poverty/threshld/thresh04.html.
[2]Current expenditure per pupil based on fall enrollment collected through the "School District Finance Survey (Form F-33)," 2004–05.
[3]Fiscal year 2007 Department of Education funds available for spending by school districts beginning with the 2007–08 school year divided by number of poverty children in 2004.
[4]Includes other expenditures not shown separately.
[5]Data included under Modesto City Elementary.
NOTE: Detail may not sum to totals because of rounding. SB = school board. ISD = independent school district. CISD = consolidated independent school district.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "School District Finance Survey (Form F-33)," 2004–05, and "Local Education Agency Universe Survey," 2005–06; and unpublished Department of Education budget data. (This table was prepared August 2007.)

## Table 89. Enrollment, poverty, and federal funds for the 100 largest school districts, by enrollment size in 2005: Fall 2005, 2004–05, and fiscal year 2007

| Name of district | State | Rank order | Enrollment, fall 2005 | 5- to 17-year-old population, 2004 | 5- to 17-year-olds in poverty, 2004 | Poverty rate of 5- to 17-year-olds, 2004[1] | Revenues by source of funds (in thousands), 2004–05 | | | | Revenue for selected federal programs (in thousands), 2004–05 | | | | | | Title I allocations (in thousands), fiscal year 2007[2] | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | | | | | Total | Federal | Federal as a percent of total | Federal revenue per student[3] | Title I basic and concentration grants | School lunch | Vocational education | Drug-free schools | Eisenhower math and science | Special education | Basic grants | Concentration grants | Targeted grants | Education finance incentive grants |

—Not available.

[1]Poverty is defined based on the number of persons and related children in the family and their income. For information on poverty thresholds for 2004, see http://www.census.gov/hhes/www/poverty/threshld/thresh04.html.

[2]Fiscal year 2007 Department of Education funds available for spending by school districts in the 2007–08 school year.

[3]Federal revenue per student is based on fall enrollment collected through the "School District Finance Survey (Form F-33)."

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "School District Finance Survey (Form F-33)," 2004–05, and "Local Education Agency Universe Survey," 2005–06; and unpublished Department of Education budget data. (This table was prepared August 2007.)

[1]Totals differ from those reported in other tables because this table represents data reported by schools rather than by states or school districts. Percentage distribution and average enrollment calculations exclude data for schools not reporting enrollment.
[2]Includes special education, alternative, and other schools not reported by grade span.
[3]Includes schools beginning with grade 6 or below and with no grade higher than 8.
[4]Includes schools with no grade lower than 7.
[5]Includes schools beginning with grade 6 or below and ending with grade 9 or above.
[6]Excludes special education schools, vocational schools, and alternative schools.
[7]Data have been revised from previously published figures.
[8]Data are for schools reporting their enrollment size. Enrollment data were available for 93,303 out of 96,513 schools in 2004–05 and 93,845 out of 97,382 schools in 2005–06.
NOTE: Detail may not sum to totals because of rounding.

†Not applicable.

NOTE: Data reflect racial/ethnic data reported by schools. Because some schools do not report complete racial/ethnic data, totals may differ from figures in other tables. Excludes 1995 data for Idaho and 2000 data for Tennessee because racial/ethnic data were not reported. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

[1]Excludes vocational, special education, and alternative schools.
[2]Vocational schools are also included under appropriate grade span.
[3]Average for schools reporting enrollment data. Enrollment data were available for 22,864 out of 23,800 public secondary schools in 2005–06.

NOTE: Includes schools with no grade lower than 7. Excludes schools not reported by grade level, such as some special education schools for the disabled. DoD = Department of Defense.

—Not available.

[1]Includes graduates of public and private schools.

[2]Data for 1929–30 and preceding years are from *Statistics of Public High Schools* and exclude graduates from high schools that failed to report to the Office of Education.

[3]For most years, private school data have been estimated based on periodic private school surveys.

[4]The averaged freshman graduation rate provides an estimate of the percentage of students who receive a regular diploma within 4 years of entering ninth grade. The rate uses aggregate student enrollment data to estimate the size of an incoming freshman class and aggregate counts of the number of diplomas awarded 4 years later.

[5]Includes estimates for New York and Wisconsin. Without estimates for these two states, the averaged freshman graduation rate for the remaining 48 states and the District of Columbia is 75.0 percent.

[6]Projected.

NOTE: Includes graduates of regular day school programs. Excludes graduates of other programs, when separately reported, and recipients of high school equivalency certificates. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

—Not available.
[1]Includes estimates for New York and Wisconsin. Without estimates for these two states, the averaged freshman graduation rate for the remaining 48 states and the District of Columbia is 75.0 percent.
[2]Estimated high school graduates from NCES 2006-606rev, *The Averaged Freshman Graduation Rate for Public High Schools From the Common Core of Data: School Years 2002–03 and 2003–04*.
NOTE: The averaged freshman graduation rate provides an estimate of the percentage of students who receive a regular diploma within 4 years of entering ninth grade. The rate uses aggregate student enrollment data to estimate the size of an incoming freshman class and aggregate counts of the number of diplomas awarded 4 years later.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 1986–87 through 2005–06; and *The Averaged Freshman Graduation Rate for Public High Schools From the Common Core of Data: School Years 2002–03 and 2003–04*. (This table was prepared June 2007.)

## Table 103. Public high school graduates and dropouts, by race/ethnicity and state or jurisdiction: 2003–04 and 2004–05

| State or other jurisdiction | High school graduates, by race/ethnicity, 2004–05 | | | | | | Event dropout rates (percent of 9th- to 12th-graders who dropped out) during 2003–04, by race/ethnicity[1] | | | | | |

—Not available.
[1]Alabama, Arizona, Florida, Illinois, Maryland, New Jersey, New York, Tennessee, and Vermont reported data on an alternative July through June cycle, rather than the specified October through September cycle for dropout data.
[2]High school graduate counts include estimates for nonreporting states, based on 2003 12th-grade enrollment racial/ethnic distribution reported by state. Event dropout rate totals are totals for reporting states only.
[3]Data differ slightly from figures reported in other tables due to varying reporting practices for racial/ethnic survey data.

NOTE: Includes only graduates for whom race/ethnicity was reported. Race categories exclude persons of Hispanic ethnicity. Event dropout rates measure the percentage of public school students in grades 9 through 12 who dropped out of school between one October and the next (except where noted). DoD = Department of Defense.

—Not available.
[1]People who did not report their age were excluded from this calculation. Age data for 1988 and prior years are for all test takers and may not be comparable to data for later years.
[2]All people taking the GED tests (one or more subtests).
[3]People completing the entire GED battery of five tests.
[4]Data for 2002 and later years are for people passing the GED tests (i.e., earning both a passing total score on the test battery and a passing score on each individual test). Data for 2001 and prior years are for high school equivalency credentials issued by the states to GED test passers. In order to receive high school equivalency credentials in some states, GED test passers must meet additional state requirements (e.g., complete an approved course in civics or government).
[5]Includes other jurisdictions, such as Puerto Rico, Guam, and American Samoa.
NOTE: Data are for the United States only and exclude other jurisdictions, except where noted. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.
SOURCE: American Council on Education, General Educational Development Testing Service, *Who Took the GED? Statistical Report*, various years; *Who Passed the GED Tests? 2005 Statistical Report*, November 2006. (This table was prepared March 2007.)

**Table 105. Percentage of high school dropouts among persons 16 through 24 years old (status dropout rate), by sex and race/ethnicity: Selected years, 1960 through 2006**

| Year | Total status dropout rate | | | | Male status dropout rate | | | | Female status dropout rate | | | |

—Not available.
†Not applicable.
[1]Includes other racial/ethnic categories not separately shown.
[2]Based on the April 1960 decennial census.
[3]White and Black include persons of Hispanic ethnicity.
[4]Because of changes in data collection procedures, data may not be comparable with figures for years prior to 1992.
[5]White and Black exclude persons identifying themselves as more than one race.

NOTE: "Status" dropouts are 16- to 24-year-olds who are not enrolled in school and who have not completed a high school program, regardless of when they left school. People who have received GED credentials are counted as high school completers. All data except for 1960 are based on October counts. Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in prisons, persons in the military, and other persons not living in households. Race categories exclude persons of Hispanic ethnicity except where otherwise noted. Standard errors appear in parentheses.
SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October 1967 through October 2006. (This table was prepared August 2007.)

**Table 106. Percentage of high school dropouts among persons 16 through 24 years old (status dropout rate), by income level, and percentage distribution of status dropouts, by labor force status and educational attainment: 1970 through 2006**

| Year | Status dropout rate | | Status dropout rate, by family income quartile | | | | | | | | Percentage distribution of status dropouts, by labor force status | | | | | | | | Percentage distribution of status dropouts, by years of school completed | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | Lowest quartile | | Middle low quartile | | Middle high quartile | | Highest quartile | | Total | | Employed[1] | | Unemployed | | Not in labor force | | Total | | Less than 9 years | | 9 years | | 10 years | | 11 or 12 years | |
| 1 | 2 | | 3 | | 4 | | 5 | | 6 | | 7 | | 8 | | 9 | | 10 | | 11 | | 12 | | 13 | | 14 | | 15 | |

—Not available.
†Not applicable.
‡Reporting standards not met.
[1]Includes persons employed, but not currently working.
[2]Because of changes in data collection procedures, data may not be comparable with figures for years prior to 1992.
NOTE: "Status" dropouts are 16- to 24-year-olds who are not enrolled in school and who have not completed a high school program, regardless of when they left school. People who have received GED credentials are counted as high school completers.

Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in prisons, persons in the military, and other persons not living in households. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

†Not applicable.

[1]Students may exit special education services due to maximum age beginning at age 18 depending on state law or practice or order of any court.

[2]Data are not reported for 2003–04 or 2004–05.

[3]"Dropped out" is defined as the total who were enrolled at some point in the reporting year, were not enrolled at the end of the reporting year, and did not exit through any of the other bases described. Beginning in 2004–05, includes students previously categorized as "moved, not known to continue."

[4]Includes deaf and hard of hearing.

[5]Totals for 2004–05 do not include persons over the age of 21.

[1]Distribution of weighted Early Childhood Longitudinal Study, Birth Cohort survey population between 22 and 25 months of age with data on primary care arrangements.

[2]Based on assessments collected using the Bayley Short Form Research Edition (BSF-R), a shortened field method of administering the Bayley Scales of Infant Development-II (BSID-II) (Bayley 1993). The scores are fully equated with the BSID-II. The proficiency probabilities indicate mastery of a specific skill or ability within mental or physical domains.

[3]Ability to recognize and understand spoken words or to indicate a named object by pointing.

[4]Verbal expressiveness using gestures, words, and sentences.

[5]Ability to understand actions depicted by a story, in pictures, or by verbal instructions.

[6]Ability to match objects by their properties (e.g., color) or differentiate one object from another.

[7]Knowledge of counting words, knowledge of ordinality, and understanding of simple quantities.

[8]Ability to walk independently.

[9]Ability to maintain balance when changing position.

[10]Ability to use fine motor control with hands, such as grasping a pencil or holding a piece of paper while scribbling.

[11]Ability to walk up and down stairs, with and without alternating feet.

[12]Ability to maintain balance when changing position or when in motion, such as jumping.

[13]Ability to anticipate, regulate, and execute motor movements, such as being able to attempt to replicate the motions of others.

[14]The type of nonparental care in which the child spent the most hours.

[15]Care provided in the child's home or in another private home by a relative (excluding parents).

[16]Care provided in the child's home or in another private home by a person unrelated to the child.

[17]Care provided in places such as early learning centers, nursery schools, and preschools, including Head Start.

[18]Children who spent an equal amount of time in each of two or more arrangements.

[19]Poverty status based on Census Bureau guidelines from 2002, which identify a dollar amount determined to meet a household's needs, given its size and composition. In 2002, a family of four was considered to live below the poverty threshold if its income was less than or equal to $18,392.

[20]Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income.

NOTE: Estimates weighted by W2R0. Estimates pertain to children assessed between 22 months and 25 months of age. Children younger than 22 months (less than 1 percent of the survey population) and children older than 25 months (approximately 9 percent of the survey population) are excluded from this table. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

[1]Status during kindergarten year.
[2]Family risk factors included living below the federal poverty level, primary home language was not English, mother's highest education was less than a high school diploma/GED, and living in a single-parent household. Values range from 0 to 4.
NOTE: Detail may not sum to totals because of rounding. Estimates reflect the sample of children assessed in English in all assessment years. ECLS-K was not administered in 2000–01, when most of the children in the sample were in second grade. Most of the children were in first grade in 1999–2000, but 5 percent were in kindergarten or other grades (e.g., second grade, ungraded classrooms); most were in third grade in 2001–02, but 11 percent were in second grade or other grades (e.g., fourth grade, ungraded classrooms); most were in fifth grade in 2003–04, but 14 percent were in fourth grade or other grades (e.g., sixth grade). Reading scale ranges from 0 to 186. Data were calculated using C1_6FC0 weight and therefore differ from previously published figures. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

[1]Status during kindergarten year.
[2]Family risk factors included living below the federal poverty level, primary home language was not English, mother's highest education was less than a high school diploma/GED, and living in a single-parent household. Values range from 0 to 4.
NOTE: Detail may not sum to totals because of rounding. Estimates reflect the sample of children assessed in English in all assessment years. ECLS-K was not administered in 2000–01, when most of the children in the sample were in second grade. Most of the children were in first grade in 1999–2000, but 5 percent were in kindergarten or other grades (e.g., second grade, ungraded classrooms); most were in third grade in 2001–02, but 11 percent were in second grade or other grades (e.g., fourth grade, ungraded classrooms); most were in fifth grade in 2003–04, but 14 percent were in fourth grade or other grades (e.g., sixth grade). Mathematics scale ranges from 0 to 153. Science scale ranges from 0 to 92. Data were calculated using C1_6FC0 weight and therefore differ from previously published figures. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

[1]Data for 1971 include persons of Hispanic ethnicity.
[2]Test scores of Hispanics were not tabulated separately.
NOTE: The NAEP reading scores have been evaluated at certain performance levels. Scale ranges from 0 to 500. Students scoring 150 (or higher) are able to follow brief written directions and carry out simple, discrete reading tasks. Students scoring 200 are able to understand, combine ideas, and make inferences based on short uncomplicated passages about specific or sequentially related information. Students scoring 250 are able to search for specific information, interrelate ideas, and make generalizations about literature, science, and social studies materials. Students scoring 300 are able to find, understand, summarize, and explain relatively complicated literary and informational material. Includes public and private schools. Excludes persons not enrolled in school and those who were unable to be tested due to limited proficiency in English or due to a disability. Race categories exclude persons of Hispanic ethnicity, except where noted. Some data have been revised from previously published figures. Standard errors appear in parentheses.

†Not applicable.

‡Reporting standards not met.

NOTE: The NAEP reading scores have been evaluated at certain performance levels. Scale ranges from 0 to 500. Students scoring 150 (or higher) are able to follow brief written directions and carry out simple, discrete reading tasks. Students scoring 200 are able to understand, combine ideas, and make inferences based on short uncomplicated passages about specific or sequentially related information. Students scoring 250 are able to search for specific information, interrelate ideas, and make generalizations about literature, science, and social studies materials. Students scoring 300 are able to find, understand, summarize, and explain relatively complicated literary and informational material. Includes public and private schools. Excludes persons not enrolled in school and those who were unable to be tested due to limited proficiency in English or due to a disability. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

—Not available.
†Not applicable.
‡Reporting standards not met.
[1]Data for 1971 include persons of Hispanic ethnicity.
[2]Test scores of Hispanics were not tabulated separately.
NOTE: The NAEP reading scores have been evaluated at certain performance levels. Scale ranges from 0 to 500. Students scoring 150 (or higher) are able to follow brief written directions and carry out simple, discrete reading tasks. Students scoring 200 are able to understand, combine ideas, and make inferences based on short uncomplicated passages about specific or sequentially related information. Students scoring 250 are able to search for specific information, interrelate ideas, and make generalizations about literature, science, and social studies materials. Students scoring 300 are able to find, understand, summarize, and explain relatively complicated literary and informational material. Includes public and private schools. Excludes persons not enrolled in school and those who were unable to be tested due to limited proficiency in English or due to a disability. Race categories exclude persons of Hispanic ethnicity, except where noted. Standard errors appear in parentheses.

†Not applicable.
‡Reporting standards not met.
[1]Scale ranges from 0 to 500.
[2]Race/ethnicity based on school records.
[3]*Basic* denotes partial mastery of the knowledge and skills that are fundamental for proficient work at the 4th-grade level.
[4]*Proficient* represents solid academic performance for 4th-graders. Students reaching this level have demonstrated competency over challenging subject matter.
[5]*Advanced* signifies superior performance.
[6]Based on nationally representative sample.
[7]Did not satisfy one or more of the guidelines for school participation in 1998. Data are subject to appreciable nonresponse bias.
[8]Did not satisfy one or more of the guidelines for school participation in 2002. Data are subject to appreciable nonresponse bias.
[9]Did not satisfy one or more of the guidelines for school participation in 1994. Data are subject to appreciable nonresponse bias.
[10]The definition of the nationally representative sample changed in 2005; it now includes all of the Department of Defense schools.
NOTE: The reading data include students for whom accommodations were permitted except for the 1992 data. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

‡Reporting standards not met.
[1]Scale ranges from 0 to 500.
[2]Central city is a large or mid-size central city of a Metropolitan Statistical Area (MSA). Urban fringe/large town includes places that are within an MSA of a central city but not primarily within its central city, as well as towns that are incorporated places not within an MSA and have a population greater than or equal to 25,000. Rural/small town includes places that are defined as rural by the U.S. Bureau of the Census and have a population less than 2,500 and/or a population density of less than 1,000 per square mile, as well as towns that are incorporated places not within an MSA and have a population less than 25,000 but greater than or equal to 2,500.
[3]*Basic* denotes partial mastery of the knowledge and skills that are fundamental for proficient work at the 8th-grade level.
[4]*Proficient* represents solid academic performance for 8th-graders. Students reaching this level have demonstrated competency over challenging subject matter.
[5]*Advanced* signifies superior performance.
[6]Based on nationally representative sample.
[7]Did not satisfy one or more of the guidelines for school participation in 1998. Data are subject to appreciable nonresponse bias.
[8]Did not satisfy one or more of the guidelines for school participation in 2002. Data are subject to appreciable nonresponse bias.
[9]Did not satisfy one or more of the guidelines for school participation in 2003. Data are subject to appreciable nonresponse bias.
[10]The definition of the nationally representative sample changed in 2005; it now includes all of the Department of Defense schools.
NOTE: The reading data include students for whom accommodations were permitted. Standard errors appear in parentheses.
SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 2002, 2003, 2005, and 2007 Reading Assessments, retrieved October 9, 2007, from the NAEP Data Explorer http://nces.ed.gov/nationsreportcard/nde/. (This table was prepared October 2007.)

## Table 118. Average reading scale scores of 4th- and 8th-graders, by selected student and parent characteristics and school type: Various years, 2000 through 2005

| Year, grade, and school type | All students | | Sex of child: Male | | Sex of child: Female | | Race/ethnicity of child: White | | Race/ethnicity of child: Black | | Race/ethnicity of child: Hispanic | | Race/ethnicity of child: Asian/Pacific Islander | | Race/ethnicity of child: American Indian/Alaska Native | | Highest education level of parents: Less than high school | | Highest education level of parents: Graduated from high school | | Highest education level of parents: Some education after high school | | Highest education level of parents: Graduated from college | | Highest education level of parents: Unknown | |

#Rounds to zero.
NOTE: Includes public and private schools. Excludes persons unable to be tested due to limited proficiency in English or due to a disability (if the accommodations provided were not sufficient to enable the test to properly reflect the students' writing proficiency). In 2002, the NAEP national samples of 4th- and 8th-graders were obtained by aggregating the samples from each state, rather than by independently selecting national samples for grades 4 and 8. As a consequence, the size of the national samples increased for these grade levels, and smaller differences were found to be statistically significant than would have been detected in previous assessments. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

‡Reporting standards not met.
[1]*Basic* denotes partial mastery of the knowledge and skills that are fundamental for proficient work at a given grade.
[2]*Proficient* represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.
[3]*Advanced* signifies superior performance for a given grade.

NOTE: Includes public and private schools. Excludes students unable to be tested due to limited proficiency in English or due to a disability (if the accommodations provided were not sufficient to enable the test to properly reflect the students' U.S. history proficiency). Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not shown separately. Standard errors appear in parentheses. Some data have been revised from previously published figures.

‡Reporting standards not met.
[1]Scale ranges from 0 to 300.
[2]Basic denotes partial mastery of the knowledge and skills that are fundamental for proficient work at a given grade.
[3]Proficient represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.
[4]Advanced signifies superior performance for a given grade.
[5]Accommodations were not permitted for this assessment.
NOTE: Includes public and private schools. Excludes students unable to be tested due to limited proficiency in English or due to a disability (if the accommodations provided were not sufficient to enable the test to properly reflect the students' proficiency in civics). Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not shown separately. Standard errors appear in parentheses.

—Not available.
†Not applicable.
NOTE: Excludes persons not enrolled in school and those who were unable to be tested due to limited proficiency in English or due to a disability. Includes public and private schools. Scale ranges from 0 to 500. A score of 150 implies the knowledge of some basic addition and subtraction facts, and most students at this level can add two-digit numbers without regrouping. They recognize simple situations in which addition and subtraction apply. A score of 200 implies considerable understanding of two-digit numbers and knowledge of some basic multiplication and division facts. A score of 250 implies an initial understanding of the four basic operations. Students at this level can also compare information from graphs and charts and are developing an ability to analyze simple logical relations. A score of 300 implies an ability to compute decimals, simple fractions, and percents. Students at this level can identify geometric figures, measure lengths and angles, and calculate areas of rectangles. They are developing the skills to operate with signed numbers, exponents, and square roots. A score of 350 implies an ability to apply a range of reasoning skills to solve multistep problems. Students at this level can solve routine problems involving fractions and percents, recognize properties of basic geometric figures, and work with exponents and square roots. Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not shown separately. Some data have been revised from previously published figures. Standard errors appear in parentheses.

—Not available.
†Not applicable.
#Rounds to zero.
‡Reporting standards not met.
[1]Virtually no students were able to perform multistep problems and algebra.
[2]Virtually all students knew simple arithmetic facts.
[3]Scale score of 150 or above.
[4]Scale score of 200 or above.
[5]Scale score of 250 or above.
[6]Scale score of 300 or above.
[7]Scale score of 350 or above.
NOTE: Excludes persons not enrolled in school and those who were unable to be tested due to limited proficiency in English or due to a disability. Includes public and private schools. Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not shown separately. Standard errors appear in parentheses.

—Not available.
†Not applicable.
#Rounds to zero.
‡Reporting standards not met.
[1]Includes Asians/Pacific Islanders and American Indians/Alaska Natives.

NOTE: Score level 200 indicates ability to perform simple additive reasoning and problem solving. Score level 250 indicates ability to perform simple multiplicative reasoning and two-step problem solving. Score level 300 indicates ability to perform reasoning and problem solving involving fractions, decimals, percents, elementary geometry, and simple algebra. Score level 350 indicates ability to perform reasoning and problem solving involving geometry, algebra, and beginning statistics and probability. Scale ranges from 0 to 500. Excludes persons not enrolled in school and those who were unable to be tested due to limited proficiency in English or due to a disability. Includes public and private schools. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

—Not available.

†Not applicable.

[1]Scale ranges from 0 to 500.

[2]*Basic* denotes partial mastery of prerequisite knowledge and skills that are fundamental for proficient work at the 4th-grade level.

[3]*Proficient* represents solid academic performance for 4th-graders. Students reaching this level have demonstrated competency over challenging subject matter.

[4]*Advanced* signifies superior performance.

[5]Percentage of students who report spending 30 minutes, 45 minutes, 1 hour, and over 1 hour on mathematics homework each day.

[6]Based on a nationally representative sample.

[7]Did not meet one or more of the guidelines for school participation in 2000. Data are subject to appreciable nonresponse bias.

[8]The definition of the nationally representative sample changed in 2005; it now includes all of the Department of Defense schools.

[9]Because of modifications to the 2005 Puerto Rico administration, results from 2003 should not be compared to results from 2005. Although parallel changes were not made in the nation in 2005, within-year comparisons between Puerto Rico and the nation are valid.

NOTE: Excludes students unable to be tested due to limited proficiency in English or due to a disability. Data for 2000, 2003, 2005, and 2007 include students for whom accommodations were permitted. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

—Not available.
†Not applicable.
‡Reporting standards not met.
[1]Scale ranges from 0 to 500.
[2]Excludes students who responded "I don't know" to the question about educational level of parents.
[3]*Basic* denotes partial mastery of prerequisite knowledge and skills that are fundamental for proficient work at the 8th-grade level.
[4]*Proficient* represents solid academic performance for 8th-graders. Students reaching this level have demonstrated competency over challenging subject matter.
[5]*Advanced* signifies superior performance.
[6]Based on a nationally representative sample.
[7]Did not meet one or more of the guidelines for school participation in 2000. Data are subject to appreciable nonresponse bias.
[8]The definition of the national sample changed in 2005; it now includes all of the Department of Defense schools.
[9]Because of modifications to the 2005 Puerto Rico administration, results from 2003 should not be compared to results from 2005. Although parallel changes were not made in the nation in 2005, within-year comparisons between Puerto Rico and the nation are valid.
NOTE: Excludes persons not enrolled in school and those who were unable to be tested due to limited proficiency in English or due to a disability. Data for 2000, 2003, 2005, and 2007 include students for whom accommodations were permitted. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

†Not applicable.
[1]Percentage of students who report spending 30 minutes, 45 minutes, 1 hour, and over 1 hour on mathematics homework each day.
[2]Percentage of students agreeing or strongly agreeing with this statement: "Mathematics is useful for solving everyday problems."
[3]1994 data.
[4]No statewide policy; varies by district.
[5]The first number of hours is for half-day kindergarten programs, while the second is for full-day programs.
[6]1996 data.
[7]Semester credits.
[8]1998 data.
NOTE: Some states allow for different types of school calendars by setting instruction time in both days and hours. For states in which the number of hours varies by grade, the relevant grade(s) appear in parentheses. In columns 3 through 6, standard errors appear in parentheses.

—Not available.

†Not applicable.

‡Reporting standards not met.

[1]Testing accommodations (e.g., extended time, small group testing) for children with disabilities and limited-English-proficient students were not permitted on the 1996 science assessment.

[2]The percentile represents a specific point on the percentage distribution of all students ranked by their science score from low to high. For example, 10 percent of students scored at or below the 10th percentile score, while 90 percent of students scored above it.

[3]*Basic* denotes partial mastery of the knowledge and skills that are fundamental for proficient work.

[4]*Proficient* represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.

[5]*Advanced* signifies superior performance.

NOTE: The NAEP science scale ranges from 0 to 300. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

‡Reporting standards not met.
[1]Accommodations were not permitted for this assessment.
[2]Did not satisfy one or more of the guidelines for school participation in 1996. Data are subject to appreciable nonresponse bias.
[3]Significantly different from 2005 when only one jurisdiction or the nation is being examined.
[4]Did not satisfy one or more of the guidelines for school participation in 2000. Data are subject to appreciable nonresponse bias.
[5]Before 2005, Department of Defense domestic and overseas schools were separate jurisdictions in NAEP. Data for 1996 and 2000 were recalculated for comparability.

NOTE: Excludes persons not enrolled in school and those who were unable to be tested due to limited proficiency in English or due to a disability (if sample not tested with accommodations or if the accommodations provided in 2000 and 2005 were not sufficient to enable the test to properly reflect the students' science proficiency). Scale ranges from 0 to 300. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses. Some data have been revised from previously published figures.

NOTE: Data are for seniors who took the SAT any time during their high school years through March of their senior year. If a student took a test more than once, the most recent score was used. The SAT was formerly known as the Scholastic Assessment Test and the Scholastic Aptitude Test. Possible scores on each part of the SAT range from 200 to 800. The critical reading section was formerly known as the verbal section. The writing section was introduced in March 2005.

[1]Data for 1966–67 to 1985–86 were converted to the recentered scale by using a formula applied to the original mean and standard deviation. For 1986–87 to 1994–95, individual student scores were converted to the recentered scale and then the mean was recomputed. For 1995–96 to 1998–99, nearly all students received scores on the recentered scale; any score on the original scale was converted to the recentered scale prior to recomputing the mean. From 1999–2000 on, all scores have been reported on the recentered scale.
[2]Writing data are based on students who took the SAT writing section, which was introduced in March 2005.

NOTE: Data for 1966–67 through 1970–71 are estimates derived from the test scores of all participants. Data for 1971–72 and later are for seniors who took the SAT any time during their high school years through March of their senior year. If a student took a test more than once, the most recent score was used. The SAT was formerly known as the Scholastic Assessment Test and the Scholastic Aptitude Test. Possible scores on each part of the SAT range from 200 to 800. The critical reading section was formerly known as the verbal section.

—Not available.
†Not applicable.
#Rounds to zero.
‡Reporting standards not met.
[1]Percentage distribution not reported since this year had less than 80 percent combined unit and item response rate.
[2]Writing data are based on students who took the SAT writing section, which was introduced in March 2005.
[3]Beginning in 2005–06, the College Board has reported third, fourth, and fifth quintiles as the bottom three quintiles instead of reporting them separately as in previous years.
[4]Data may not be comparable over time because of additions to the list of majors and changes in subspecialties within majors.
[5]Home economics was changed to Family and consumer sciences/human sciences as of 2006–07.
[6]Because income categories have not been adjusted for inflation over time, the distribution of students has shifted toward the higher income categories. Differences between specific categories over time should be interpreted with caution.

NOTE: Data are for seniors who took the SAT any time during their high school years through March of their senior year. If a student took a test more than once, the most recent score was used. The SAT was formerly known as the Scholastic Assessment Test and the Scholastic Aptitude Test. Possible scores on each part of the SAT range from 200 to 800. Detail may not sum to totals because of rounding and survey item nonresponse.

[1]Participation rate is based on the projection of high school graduates by the Western Interstate Commission for Higher Education (WICHE), and the number of seniors who took the SAT in each state.

[2]Writing data are based on students who took the SAT writing section, which was introduced in March 2005.

[3]Participation rate is based on self-reported 2002 twelfth-grade enrollment from D.C.'s public and nonpublic schools because WICHE estimated fewer graduating seniors than actual SAT test takers.

[4]Beginning with the spring SAT administration in 2006, all Maine high school juniors, including all students in their third year of high school, are required to take SAT tests in critical reading, writing, and mathematics.

NOTE: Data are for seniors who took the SAT any time during their high school years through March of their senior year. If a student took a test more than once, the most recent score was used. The SAT was formerly known as the Scholastic Assessment Test and the Scholastic Aptitude Test. Possible scores on each part of the SAT range from 200 to 800.

[1]Includes general labor market preparation, consumer and homemaking education, and specific labor market preparation in agriculture, business, marketing, health, occupational home economics, trade and industry, and technical courses.

[2]Includes general skills, personal health and physical education, religion, military sciences, special education, and other courses not included in other subject fields.

[3]Though shown separately here, computer-related courses are also included in the mathematics and career/technical categories.

[4]Includes students who complete at least 12 Carnegie units in academic courses, but less than 3 Carnegie units in any specific labor market preparation field.

[5]Includes students who complete at least 3 Carnegie units in a specific labor market preparation field, but less than 12 Car-negie units in academic courses.

[6]Includes students who complete at least 12 Carnegie units in academic courses and at least 3 Carnegie units in a specific labor market preparation field.

[7]Includes students who complete less than 12 Carnegie units in academic courses and less than 3 Carnegie units in a specific labor market preparation field.

NOTE: The Carnegie unit is a standard of measurement that represents one credit for the completion of a 1-year course. Data differ slightly from figures appearing in other NCES reports because of differences in taxonomies and case exclusion criteria. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

#Rounds to zero.

[1]Includes unclassified courses not shown separately.

[2]Includes students who complete at least 12 Carnegie units in academic courses, but less than 3 Carnegie units in any specific labor market preparation field.

[3]Includes students who complete at least 3 Carnegie units in a specific labor market preparation field, but less than 12 Carnegie units in academic courses.

[4]Includes students who complete at least 12 Carnegie units in academic courses and at least 3 Carnegie units in a specific labor market preparation field.

[5]Includes students who complete less than 12 Carnegie units in academic courses and less than 3 Carnegie units in a specific labor market preparation field.

NOTE: The Carnegie unit is a standard of measurement that represents one credit for the completion of a 1-year course. Data differ slightly from figures appearing in other NCES reports because of differences in taxonomies and case exclusion criteria. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

†Not applicable.

[1]These data only report the percentage of students who earned the indicated credit (0.5 = one semester; 1.0 = one academic year) in each course while in high school and do not count those students who took these courses prior to entering high school.

[2]Excludes pre-algebra.

[3]Includes algebra/trigonometry and algebra/geometry.

NOTE: The Carnegie unit is a standard of measurement that represents one credit for the completion of a 1-year course. Data differ slightly from figures appearing in other NCES reports because of differences in taxonomies and case exclusion criteria. Some data have been revised from previously published figures. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

† Not applicable.

[1]Level 1 = no math; Level 2 = basic math/prealgebra; Level 3 = core secondary through algebra II; Level 4 = trigonometry, statistics, precalculus; and Level 5 = calculus.

[2]Level 1 = no science; Level 2 = primary physical science; Level 3 = secondary physical science and basic biology; Level 4 = general biology; Level 5 = chemistry I or physics I; Level 6 = chemistry I and physics I; Level 7 = chemistry II or physics II or advanced biology; Level 8 = both Levels 6 and 7.

[3]Race categories exclude persons of Hispanic ethnicity.

[4]The first language students learned to speak when they were children.

[5]Transfer students were classified as "mixed" if their base-year school and their transfer school were in different categories (e.g., a Catholic school student who transferred to a public school or a student who transferred from an urban to a rural school).

[6]Region is defined by the U.S. Census Bureau based on the state in which the school is located.

NOTE: Highest mathematics and science courses taken are based on a taxonomy of course types for which the student received a nonzero credit while in high school. Detail may not sum to totals because of rounding. The academic year extended from September 1, 2003, to August 31, 2004. Standard errors appear in parentheses.

†Not applicable.
#Rounds to zero.
!Interpret data with caution.
‡Reporting standards not met.
[1]Enrollments may include duplicated counts of students in each type of course, since schools were instructed to count a student enrolled in multiple courses of a particular type for each course in which he or she was enrolled.
[2]Excludes schools not reporting minority enrollment.

NOTE: Data were collected during the 2002–03 12-month school year. Dual credit courses are those in which high school students can earn both high school and postsecondary credits for the same course. Percentages are based on unrounded numbers. Detail may not sum to totals because of rounding or missing data. Standard errors appear in parentheses.

—Not available.

†Not applicable.

[1]Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income. The "low" SES group is the lowest quartile; the "middle" SES group is the middle two quartiles; and the "high" SES group is the upper quartile.

[2]Question does not specify where computer is used.

NOTE: Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

[1]Interscholastic refers to competition between teams from different schools. Intramural refers to competition between teams or students within the same school. Data on these categories are available only for 2002.

[2]Composite test performance quartile on mathematics, reading, science, and social studies in 1990 and composite test performance quartile on mathematics, reading, and science in 2002.

[3]Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income.

NOTE: Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

[1]Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income. The "low" SES group is the lowest quartile; the "middle" SES group is the middle two quartiles; and the "high" SES group is the upper quartile. Data for 2002 for persons reporting more than one race are not shown separately, but are included in totals.
NOTE: Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

†Not applicable.
‡Reporting standards not met.
[1]Access to buildings is controlled during school hours (e.g., by locked or monitored doors).
[2]Access to grounds is controlled during school hours (e.g., by locked or monitored gates).
[3]All students must pass through a metal detector each day.
[4]All or most students are required to stay on school grounds during lunch.
[5]Elementary schools have grade 6 or below, with no grade higher than 8; secondary schools have no grade lower than 7; and combined schools have grades lower than 7 and higher than 8.
NOTE: Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

—Not available.
†Not applicable.
#Rounds to zero.
!Interpret data with caution.
‡Reporting standards not met.
[1]Excludes the 2 percent of schools for which race/ethnicity data were missing. For this reason, the detailed results do not sum to the totals.
[2]Violent incidents include serious violent incidents (i.e., rape or attempted rape, sexual battery other than rape, physical attack or fight with a weapon, threat of physical attack with a weapon, and robbery with or without a weapon) plus physical attack or fight without a weapon and threat of physical attack without a weapon.
[3]Serious violent incidents include rape or attempted rape, sexual battery other than rape, physical attack or fight with a weapon, threat of physical attack with a weapon, and robbery with or without a weapon.
[4]Rape was defined for respondents as "forced sexual intercourse (vaginal, anal, or oral penetration). This includes penetration from a foreign object."
[5]Sexual battery was defined for respondents as an "incident that includes threatened rape, fondling, indecent liberties, child molestation, or sodomy."
[6]Physical attack or fight was defined for respondents as an "actual and intentional touching or striking of another person against his or her will, or the intentional causing of bodily harm to an individual."
[7]Weapon was defined for respondents as "any instrument or object used with the intent to threaten, injure, or kill. Includes look-alikes if they are used to threaten others."
[8]Robbery was defined for respondents as "the taking or attempting to take anything of value that is owned by another person or organization, under confrontational circumstances by force or threat of force or violence and/or by putting the victim in fear. A key difference between robbery and theft/larceny is that robbery involves a threat or battery."
[9]Theft/larceny (taking things over $10 without personal confrontation) was defined for respondents as "the unlawful taking of another person's property without personal confrontation, threat, violence, or bodily harm. Included are pocket picking, stealing purse or backpack (if left unattended or no force was used to take it from owner), theft from a building, theft from a motor vehicle or motor vehicle parts or accessories, theft of bicycles, theft from vending machines, and all other types of thefts."
[10]Other incidents include possession of a firearm or explosive device; possession of a knife or sharp object; distribution, possession, or use of illegal drugs or alcohol; and vandalism.
[11]Firearm/explosive device was defined as "any weapon that is designed to (or may readily be converted to) expel a projectile by the action of an explosive. This includes guns, bombs, grenades, mines, rockets, missiles, pipe bombs, or similar devices designed to explode and capable of causing bodily harm or property damage."
[12]Vandalism was defined for respondents as "the willful damage or destruction of school property including bombing, arson, graffiti, and other acts that cause property damage. Includes damage caused by computer hacking."
NOTE: Either the school principal or the person most knowledgeable about discipline issues at school completed the SSOCS questionnaire. If the respondent did not provide a value for the total number of specified incidents at the school, the value was imputed to equal the number of specified incidents reported to police. Values associated with violent incidents, serious violent incidents, total incidents, and other incidents were obtained by adding the post-imputed values that comprise each of the preceding composite variables. All public schools include primary schools, middle schools, high schools, and combined schools. The population counts on SSOCS 2000 and 2006 exclude all schools in outlying U.S. territories; nonregular schools such as special education, vocational, alternative/other, and ungraded schools; and schools with a high grade of kindergarten or lower. "At school/at your school" was defined for respondents as including activities happening in school buildings, on school grounds, on school buses, and at places that are holding school-sponsored events or activities. Respondents were instructed to, unless the survey specified otherwise, only respond for those times that were during normal school hours or when school activities/events were in session. Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades, including K–12 schools. Detail may not sum to totals because of rounding.

†Not applicable.
#Rounds to zero.
!Interpret data with caution.
[1]Data are based on universe counts of schools and school districts; therefore, these figures do not have standard errors.

NOTE: Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

†Not applicable.
!Interpret data with caution.
[1]A student is counted only once, even if suspended more than once during the same school year.
[2]Data are based on universe counts of schools and school districts; therefore, these figures do not have standard errors.

NOTE: Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

†Not applicable.
[1]Includes other illegal drug use not shown separately.
NOTE: Marijuana includes hashish usage for 1996 and later years. Due to changes in the survey instrument and administration and to improve comparability with new data, estimates for 1982 through 1993 have been adjusted and may differ from those reported in previous years. Data for 1999 have been revised from previously published figures. Data for 1999 and later years were gathered using Computer Assisted Interviewing (CAI) and may not be directly comparable to previous years. Standard errors appear in parentheses.

†Not applicable.
[1]Survey question changed in 1993; later data are not comparable to figures for earlier years.
[2]Other illicit drugs include any use of LSD or other hallucinogens, crack or other cocaine, or heroin, or any use of other narcotics, amphetamines, barbiturates, or tranquilizers not under a doctor's orders.

NOTE: Standard errors appear in parentheses. Standard errors were calculated from formulas to perform trend analysis over an interval greater than 1 year (for example, a comparison between 1975 and 1990). A revised questionnaire was used in 1982 and later years to reduce the inappropriate reporting of nonprescription stimulants. This slightly reduced the positive responses for some types of drug abuse.

X State has policy.
—Not available.
[1]Most states have a provision whereby education is provided up to a certain age or completion of secondary school, whichever comes first.
[2]Child may be exempted from compulsory attendance if he/she meets state requirements for early withdrawal without meeting conditions for a diploma or equivalency.
[3]State requires either half-day or full-day program.
[4]Parent/guardian may request a waiver to delay entry to a later age per state law/regulation.
[5]Under 21 or until child graduates from high school.
[6]State did not participate in the 2006 online survey.
[7]Compulsory school age for all Manatee County students who turned 16 on or after October 1, 1999, is 18, except for students who earned a high school diploma prior to reaching their 18th birthday.
[8]To be determined by rules and regulations adopted by the state board.
[9]Must be 5 before October 1, and not 20 before start of school year.
[10]Abbott districts only (31). These are districts covered by a New Jersey Supreme Court ruling that found that the education provided to urban school children was inadequate and unconstitutional. The Court ordered the state to implement comprehensive programs and reforms, including standards-based education supported by parity funding; supplemental programs; preschool education; and school facilities improvements.
[11]School-age unless otherwise provided by law.
[12]New York City and Buffalo require school attendance until age 17 unless employed.
[13]Must not be 21 by September 1.
[14]Children from birth through age 2 are eligible for additional services. Eligibility for special education services ceases upon completion of a secondary education program; no age limit.
[15]Student may complete school year if 21st birthday occurs while attending school.
NOTE: The Education of the Handicapped Act (EHA) Amendments of 1986 make it mandatory for all states receiving EHA funds to serve all 3- to 18-year-old disabled children.

[3]Number of required credits scheduled to change for classes graduating in 2007 or later.
[4]Graduation requirements are determined locally.
[5]Takes effect for classes graduating in 2007 or later.
[6]Credit hours for graduating classes for Nebraska are not expressed in Carnegie units.
NOTE: Local school districts frequently have other graduation requirements in addition to state requirements. The Carnegie unit is a standard of measurement that represents one credit for the completion of a 1-year course.

X State has a test.
[1]Off-the-shelf/norm-referenced tests (NRTs) are commercially developed tests that have not been modified to reflect state content standards.
[2]Custom-developed criterion-referenced tests (CRTs) are explicitly designed to measure state content standards.
[3]Augmented or hybrid tests incorporate elements of both NRTs and CRTs. These tests include NRTs that have been augmented or modified to reflect state standards.
NOTE: ES = elementary school, MS = middle school, and HS = high school.
SOURCE: Quality Counts at 10, A Decade of Standards Based Education, *Education Week, 25*(17), 2006. (This table was prepared September 2006.)

**Table 160. States using minimum-competency testing, by grade levels assessed, expected uses of standards, and state or jurisdiction: 2001–02**

| State or jurisdiction | Grade levels in which students are tested on at least one component | Expected uses | | | | | | | | |

X State has program.
[1]Testing program is for instructional purposes.
[2]Testing program is for the purpose of student accountability.
[3]Testing program is for school accountability.
[4]Inclusion is voluntary for students, schools, or school districts for one or more grades.
[5]Endorsed diploma.
[6]Honors diploma.
[7]A sample of students is tested for one or more grades.
[8]High school skills guarantee.

#Rounds to zero.

[1]Includes a relatively small amount from nongovernmental private sources (gifts and tuition and transportation fees from patrons). These sources accounted for 2.3 percent of total revenues in 2004–05.

[2]Revised from previously published figures.

NOTE: Beginning in 1980–81, revenues for state education agencies are excluded. Beginning in 1988–89, data reflect new survey collection procedures and may not be entirely comparable with figures for earlier years. Data are not adjusted for changes in the purchasing power of the dollar due to inflation. Detail may not sum to totals because of rounding.

†Not applicable.
#Rounds to zero.
[1]Includes revenues from gifts, and tuition and fees from patrons.
NOTE: Excludes revenues for state education agencies. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

—Not available.

[1]Prior to 1959–60, items included under "other school services" were listed under "auxiliary services," a more comprehensive classification that also included community services.

[2]Includes expenditures for summer schools, adult education, community colleges, and community services.

[3]Prior to 1969–70, excludes capital outlay by state and local school housing authorities.

[4]Plant operation also includes plant maintenance.

[5]Data not comparable to figures prior to 1989–90.

[6]Data have been revised from previously published figures.

NOTE: Beginning in 1959–60, includes Alaska and Hawaii. Beginning in 1989–90, state administration expenditures were excluded from both "total" and "current" expenditures. Beginning in 1989–90, extensive changes were made in the data collection procedures. Detail may not sum to totals because of rounding.

—Not available.
[1]Includes expenditures for adult education, community colleges, private school programs funded by local and state education agencies, and community services.
[2]Includes expenditures for property and for buildings and alterations completed by school district staff or contractors.
[3]Includes expenditures for operations funded by sales of products or services (e.g., school bookstore or computer time). Also includes small amounts for direct program support made by state education agencies for local school districts.
[4]Includes expenditures for health, attendance, and speech pathology services.
[5]Includes expenditures for curriculum development, staff training, libraries, and media and computer centers.
NOTE: Excludes expenditures for state education agencies. Detail may not sum to totals because of rounding.

[1]Includes expenditures for adult education, community colleges, private school programs funded by local and state education agencies, and community services.

[2]Includes expenditures for property and for buildings and alterations completed by school district staff or contractors.

[3]Includes expenditures for operations funded by sales of products or services (e.g., school bookstore or computer time). Also includes small amounts for direct program support made by state education agencies for local school districts.

[4]Includes expenditures for health, attendance, and speech pathology services.

[5]Includes expenditures for curriculum development, staff training, libraries, and media and computer centers.

NOTE: Excludes expenditures for state education agencies. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

—Not available.
†Not applicable.
[1]Data have been revised from previously published figures.
[2]Includes estimated data for subfunctions of food services and enterprise operations.
[3]Includes expenditures for guidance, health, attendance, and speech pathology services.
[4]Includes expenditures for curriculum development, staff training, libraries, and media and computer centers.
[5]Includes business support services concerned with paying, transporting, exchanging, and maintaining goods and services for local education agencies; central support services, including planning, research, evaluation, information, staff, and data processing services; and other support services.
[6]Includes expenditures for operations funded by sales of products or services (e.g., school bookstore or computer time). Includes very small amounts for direct program support made by state education agencies for local school districts.
[7]Includes expenditures for property, and for buildings and alterations completed by school district staff or contractors.
NOTE: Excludes expenditures for state education agencies. Data are not adjusted for changes in the purchasing power of the dollar due to inflation. Detail may not sum to totals because of rounding.

—Not available.
[1]Data for 1919–20 to 1953–54 are based on school-year enrollment.
[2]Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.
[3]Excludes "Other current expenditures," such as community services, private school programs, adult education, and other programs not allocable to expenditures per student at public schools.
[4]Estimated.
NOTE: Beginning in 1980–81, state administration expenditures are excluded from both "total" and "current" expenditures. Current expenditures include instruction, student support services, food services, and enterprise operations. Total expenditures include current expenditures, capital outlay, and interest on debt. Beginning in 1988–89, extensive changes were made in the data collection procedures. Some data have been revised from previously published figures.

—Not available.
[1]Excludes "Other current expenditures," such as community services, private school programs, adult education, and other programs not allocable to expenditures per pupil in public schools.
[2]Includes expenditures for property and for buildings and alterations completed by school district staff or contractors.
[3]Includes expenditures for operations funded by sales of products or services (e.g., school bookstore or computer time).
[4]Includes expenditures for health, attendance, and speech pathology services.
[5]Includes expenditures for curriculum development, staff training, libraries, and media and computer centers.
NOTE: Excludes expenditures for state education agencies. "0" indicates none or less than $0.50. Detail may not sum to totals because of rounding.

[1]Excludes "Other current expenditures," such as community services, private school programs, adult education, and other programs not allocable to expenditures per pupil in public schools.
[2]Includes expenditures for property and for buildings and alterations completed by school district staff or contractors.
[3]Includes expenditures for operations funded by sales of products or services (e.g., school bookstore or computer time).
[4]Includes expenditures for health, attendance, and speech pathology services.
[5]Includes expenditures for curriculum development, staff training, libraries, and media and computer centers.
NOTE: Excludes expenditures for state education agencies. "0" indicates none or less than $0.50. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

—Not available.
[1]Constant dollars based on the Consumer Price Index (CPI), prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis. The CPI does not account for differences in inflation rates from state to state.
NOTE: Expenditures for state administration are excluded in all years except 1969–70 and 1979–80. Beginning in 1989–90, survey was expanded and coverage of state expenditures for public school districts was improved. Some data have been revised from previously published figures.

—Not available.
[1]Constant dollars based on the Consumer Price Index (CPI), prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis. The CPI does not account for differences in inflation rates from state to state.
[2]Estimated by the National Center for Education Statistics.
NOTE: State administration expenditures are excluded in all years except 1959–60, 1969–70, and 1979–80. Beginning in 1989–90, extensive changes were made in the data collection procedures. There are discrepancies in average daily attendance reporting practices from state to state. Some data have been revised from previously published figures.
SOURCE: U.S. Department of Education, National Center for Education Statistics, *Statistics of State School Systems*, 1959–60 and 1969–70; *Revenues and Expenditures for Public Elementary and Secondary Education*, 1979–80; and Common Core of Data (CCD), "National Public Education Financial Survey," 1989–90 through 2004–05. (This table was prepared July 2007.)

## Table 176. Students transported at public expense and current expenditures for transportation: Selected years, 1929–30 through 2004–05

| School year | Average daily attendance, all students | Students transported at public expense | | Expenditures for transportation (in unadjusted dollars) | | Expenditures for transportation (in constant 2006–07 dollars)[1] | |
|---|---|---|---|---|---|---|---|
| | | Number | Percent of total | Total[2] (in thousands) | Average per student transported | Total[2] (in thousands) | Average per student transported |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
| 1929–30 | 21,265,000 | 1,902,826 | 8.9 | $54,823 | $29 | $653,821 | $344 |

# CHAPTER 3
# Postsecondary Education

Postsecondary education includes an array of diverse educational experiences offered by American colleges and universities, and technical and vocational institutions. For example, a community college may offer vocational training or the first 2 years of training at the college level. A university typically offers a full undergraduate course of study leading to a bachelor's degree, as well as first-professional and graduate programs leading to advanced degrees. Vocational and technical institutions offer training programs that are designed to prepare students for specific careers. Community groups, religious organizations, libraries, and businesses provide other types of educational opportunities for adults.

This chapter provides an overview of the latest statistics on postsecondary education, which includes academic, vocational, and continuing professional education programs after high school. However, to maintain comparability over time, most of the data in the *Digest* are for degree-granting institutions, which are defined as postsecondary institutions that grant an associate's or higher degree and whose students are eligible to participate in the Title IV federal financial aid programs.[1] Degree-granting institutions include almost all 2- and 4-year colleges and universities; they exclude institutions offering only vocational programs of less than 2 years' duration and continuing education programs. The degree-granting institution classification is very similar to the higher education institution classification that the National Center for Education Statistics (NCES) used prior to 1996–97.[2] This chapter highlights historical data that enable the reader to observe long-range trends in college education in America.

Other chapters provide related information on postsecondary education. Data on price indexes and on the number of degrees held by the general population are shown in chapter 1. Chapter 4 contains tabulations on federal funding for postsecondary education. Information on employment outcomes for college graduates is shown in chapter 5. Chapter 7 contains data on college libraries and use of computers by young adults. Further information on survey methodologies is presented in Appendix A: Guide to Sources and in the publications cited in the table source notes.

## Enrollment

Enrollment in degree-granting institutions increased by 16 percent between 1985 and 1995 (table 179 and figure 11). Between 1995 and 2005, enrollment increased at a faster rate (23 percent), from 14.3 million to 17.5 million. Much of the growth between 1995 and 2005 was in female enrollment; the number of females enrolled rose 27 percent, while the number of males rose 18 percent. During the same time period, part-time enrollment rose by 9 percent, compared to an increase of 33 percent in full-time enrollment. Enrollment increases can be affected both by population growth and by rising rates of enrollment. Between 1995 and 2005, the number of 18- to 24-year-olds increased from 25.5 million to 29.3 million (table 16), and the percentage of 18- to 24-year-olds enrolled in college rose from 34 percent to 39 percent (table 195). In addition to the enrollment in accredited 2-year colleges, 4-year colleges, and universities, about 434,000 students attended non-degree-granting, Title IV eligible, postsecondary institutions in fall 2005 (table 177).

The number of young students has been growing more rapidly than the number of older students, but this pattern is expected to shift (table 181 and figure 13). Between 1990 and 2005, the enrollment of students under age 25 increased by 33 percent. Enrollment of people 25 and over rose by 18 percent during the same period. From 2005 to 2016, NCES projects a rise of 15 percent in enrollments of people under 25, and a rise of 21 percent in enrollments of people 25 and over.

Enrollment trends have differed at the undergraduate, graduate, and first-professional levels. Undergraduate enrollment generally increased during the 1970s, but dipped slightly between 1983 and 1985 (table 196). From 1985 to 1992, undergraduate enrollment increased each year, rising 18 percent before declining slightly and stabilizing between 1993 and 1996. Undergraduate enrollment rose 21 percent between 1996 and 2005. Graduate enrollment had been steady at about 1.3 million in the late 1970s and early 1980s, but rose about 59 percent between 1985 and 2005 (table 1971). After rising very rapidly during the 1970s, enrollment in first-professional programs stabilized in the 1980s (table 198). First-professional

[1] Title IV programs, which are administered by the U.S. Department of Education, provide financial aid to postsecondary students.

[2] Included among degree-granting institutions are some institutions (primarily 2-year colleges) that were not previously designated as higher education institutions. Excluded from degree-granting institutions are a few institutions that were previously designated as higher education institutions even though they did not award an associate's or higher degree. Institutions of higher education were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of Education. Institutions of higher education offered courses that led to an associate's or higher degree, or were accepted for credit towards a degree.

enrollment began rising again in the 1990s and showed an increase of 13 percent between 1995 and 2005.

Since 1984, the number of females in graduate schools has exceeded the number of males (table 197). Between 1995 and 2005, the number of male full-time graduate students increased by 27 percent, compared to a 65 percent increase for female graduate students. Among part-time graduate students, the number of males increased by 4 percent and the number of females increased by 18 percent.

The percentage of American college students who are minorities has been increasing. In 1976, 15 percent were minorities, compared with 31 percent in 2005 (table 216). Much of the change from 1976 to 2005 can be attributed to rising numbers of Hispanic and Asian or Pacific Islander students. During that time period, the percentage of Asian or Pacific Islander students rose from 2 percent to 6 percent and the Hispanic percentage rose from 3 percent to 11 percent. The percentage of Black students was 9 percent at the beginning of the time period and it fluctuated during the early part of the period before rising to 13 percent in 2005. Nonresident aliens for whom race/ethnicity is not reported made up 3 percent of the total enrollment in 2005.

Despite the sizable numbers of small degree-granting colleges, most students attend the larger colleges and universities. In fall 2005, 40 percent of institutions had fewer than 1,000 students; however, these campuses enrolled 4 percent of college students (table 224). While 12 percent of the campuses enrolled 10,000 or more students, they accounted for 54 percent of total college enrollment.

In 2005, the five colleges with the highest enrollment were University of Phoenix Online Campus, with 117,309 students; Miami-Dade College, with 54,169 students; Arizona State University at the Tempe Campus, with 51,612 students; the University of Minnesota, Twin Cities, with 51,175 students; and Western International University, with 50,663 students (table 225).

## Faculty, Staff, and Salaries

Approximately 3.4 million people were employed in colleges and universities in the fall of 2005, including 2.5 million professional and 0.9 million nonprofessional staff (table 235). In the fall of 2005, there were 1.3 million faculty members in degree-granting institutions, including 0.7 million full-time and 0.6 million part-time faculty. The proportion of executive and administrative staff was 6 percent in 2005, compared to 5 percent in 1976 (table 234). The proportion of other non-teaching professional staff rose from 10 percent in 1976 to 19 percent in 2005, while the proportion of nonprofessional staff declined from 42 percent to 27 percent. The full-time-equivalent (FTE) student/FTE staff ratio at colleges and universities declined from 5.4 in 1976 to 5.0 in 2005. During the same time period, the FTE student/FTE faculty ratio declined from 16.6 to 15.0.

Colleges differ in their practices of employing part-time and full-time staff. In fall 2005, 48 percent of the employees at public 2-year colleges were employed full time, compared with 68 percent at public 4-year colleges and universities, and 67 percent at private 4-year colleges and universities (table 235). A higher percentage of the faculty at public 4-year colleges and universities were employed full time (70 percent) than at private 4-year colleges and universities (50 percent) or public 2-year colleges (31 percent). In general, the number of full-time staff has been growing at a slower rate than the number of part-time staff (table 233). Between 1995 and 2005, the number of full-time staff increased by 21 percent compared to an increase of 39 percent in the number of part-time staff. Most of the increase in the part-time staff was due to the increase in the number of part-time faculty (61 percent) and instruction and research assistants (47 percent) during this time period.

About 16 percent of U.S. faculty in colleges and universities were minorities in 2005 (based on a total faculty count excluding people whose race/ethnicity was unknown, but including nonresident aliens who were not identified by race/ethnicity) (table 236). Six percent of the faculty were Black, 6 percent were Asian/Pacific Islander, 4 percent were Hispanic, and half a percent were American Indian/Alaska Native. About 45 percent of college faculty were White males, while 36 percent were White females. About 17 percent of executive, managerial, and administrative staffs were minorities in 2005, compared to about 32 percent of the nonprofessional staff. The percentage of minority staffs at public 4-year colleges and universities (23 percent) was similar to their percentage at private 4-year colleges and universities (21 percent).

The percentage of time that full-time instructional faculty and staff spent teaching averaged 58 percent in 2003 (table 240). For the remaining faculty time, research and scholarship accounted for 20 percent of the time and 22 percent was spent on other activities, e.g., administration, professional growth, etc.

Faculty salaries generally lost purchasing power from 1972–73 to 1980–81, when average salaries for faculty on 9-month contracts declined 17 percent after adjustment for inflation (table 247). During the 1980s, average salaries rose and recouped most of the losses. Between 1996–97 and 2006–07, there was a further increase in average faculty salaries, resulting in an average that was about 4 percent higher than the 1972–73 average, after adjustment for inflation. The average salary for males in 2006–07 ($74,167) was higher than the average for females ($61,016). Between 1996–97 and 2006–07, the average salary for males increased by 6 percent and the average salary for females increased by 7 percent, after adjustment for inflation.

The percentage of faculty with tenure has declined in recent years. About 50 percent of full-time instructional faculty had tenure in 2005–06, compared with 56 percent in 1993–94 (table 254). A difference existed between the percentage of males and females with tenure. Fifty-five percent of males compared to 41 percent of females had tenure in 2005–06. About 52 percent of the instructional faculty at public institutions had tenure, compared to 45 percent of faculty at private not-for-profit institutions.

## Degrees

During the 2006–07 academic year, 4,314 accredited institutions offered degrees at the associate's degree level or above (table 256). These included 2,629 4-year colleges and universities, and 1,685 2-year colleges. Institutions awarding various degrees in 2005–06 numbered 2,668 for associate's degrees, 2,214 for bachelor's degrees, 1,658 for master's degrees, and 622 for doctor's degrees (table 268).

Growing numbers of people are completing college degrees. Between 1995–96 and 2005–06, the number of associate's, bachelor's, master's, first-professional, and doctor's degrees rose (table 258). During this period, associate's degrees increased 28 percent, bachelor's degrees increased 28 percent, master's degrees increased 46 percent, and doctor's degrees increased 26 percent. The number of first-professional degrees was 14 percent higher in 2005–06 than it was in 1995–96. Since the mid-1980s, more females than males have earned associate's, bachelor's, and master's degrees (table 258). Also, the number of females receiving all types of degrees has increased at a faster rate than the number for males. Between 1995–96 and 2005–06, the number of bachelor's degrees awarded to males increased by 21 percent, while those awarded to females increased by 33 percent. The number of males earning doctor's degrees was about 7 percent higher in 2005–06 than in 1995–96, while the number of females earning doctor's degrees rose by 54 percent.

Of the 1,485,000 bachelor's degrees conferred in 2005–06, the largest numbers of degrees were conferred in the fields of business (318,000), social sciences and history (161,000), and education (107,000) (table 261). At the master's degree level, the largest numbers of degrees were in the fields of education (175,000) and business (146,000) (table 262). The fields with the largest number of degrees at the doctor's degree level were education (7,600), engineering (7,400), health professions and related clinical sciences (7,100), biological and biomedical sciences (5,800), psychology (4,900), and physical sciences (4,500) (table 263).

In recent years, the numbers of bachelor's degrees conferred have followed patterns that differed significantly by field of study. While the number of degrees increased 28 percent overall between 1995–96 and 2005–06, there was substantial variation among the different fields of study, as well as shifts in the patterns of change during this time period (table 261). The number of bachelor's degrees conferred in the combined fields of engineering and engineering technologies declined 7 percent between 1995–96 and 2000–01, but then rose 12 percent between 2000–01 and 2005–06 (table 261 and figure 15). The number of engineering and engineering technologies degrees conferred in 2005–06 was about 5 percent higher than the number conferred in 1995–96. The number of mathematics degrees declined by 12 percent between 1995–96 and 2000–01, but then rose 32 percent between 2000–01 and 2005–06. Some technical fields experienced sustained increases in degrees conferred from 1995–96 through 2005–06. After an increase of 80 percent between 1995–96 and 2000–01, the number of degrees in computer and information sciences grew 8 percent between 2000–01 and 2005–06. Other fields with sizable numbers of degrees (over 5,000) that showed increases of over 30 percent between 2000–01 and 2005–06 included visual and performing arts; transportation and material moving; philosophy and religious studies; parks, recreation, and leisure studies; mathematics and statistics; and security and protective services. Fifty-eight percent of the students who enrolled in a 4-year college or university as first-time freshmen in 1995–96 had completed a bachelor's degree by 2001 (table 318). About 7 percent of students had completed a certificate or associate's degree, 14 percent were still enrolled without having received a degree, and 21 percent were no longer working towards a bachelor's degree.

## Finances

For the 2006–07 academic year, annual prices for undergraduate tuition, room, and board were estimated to be $11,034 at public institutions and $28,384 at private institutions (table 320). Between 1996–97 and 2006–07, prices for undergraduate tuition, room, and board at public institutions rose by 32 percent, and prices at private institutions rose by 22 percent, after adjustment for inflation (tables 31 and 320). During the 1996–97 to 2006–07 period, consumer prices rose by 28 percent.

Trend data show small increases in the current-fund expenditures per student at public 2-year and 4-year colleges and universities in the late 1980s and larger increases during the 1990s (table 346). After adjustment for inflation, current-fund expenditures per student at public colleges rose about 5 percent between 1985–86 and 1990–91, and another 28 percent between 1990–91 and 2000–01. At public institutions in 2004–05, the average total expenditure per full-time-equivalent student was $23,353 (table 348). At private not-for-profit institutions, total expenditures per full-time-equivalent student rose 14 percent between 1996–97 and 2004–05, after adjustment for inflation (table 350). In 2004–05, total expenditures per full-time-equivalent student at private not-for-profit institutions were $38,472. The expenditures per student at for-profit institutions were $11,205 in 2004–05 (table 352).

As of June 30, 2006, the market value of the endowment funds of the 120 colleges and universities with the largest endowment amounts was $269 billion, reflecting an increase of 14 percent compared to 2005 (table 355). The five colleges with the largest endowments in 2006 were Harvard University, Yale University, Stanford University, University of Texas System, and Princeton University.

†Not applicable.
[1]Includes degree granting and non-degree-granting institutions.
[2]Data are for degree-granting institutions, which grant associate's or higher degrees and participate in Title IV federal financial aid programs.
[3]Data are for institutions that did not offer accredited 4-year or 2-year degree programs, but were participating in Title IV federal financial aid programs. Includes some schools with nonaccredited degree programs.

—Not available.
[1]Prior to 1979–80, excludes branch campuses.
[2]Total number of different individuals (not reduced to full-time equivalent). Beginning in 1959–60, data are for the first term of the academic year.
[3]Estimated.
[4]Estimated number of senior instructional staff. Excludes graduate assistants.
[5]Because of revised survey procedures, data may not be directly comparable with figures prior to 1989–90. Estimated number of senior instructional staff. Excludes graduate assistants.
[6]Data for 1869–70 to 1949–50 are for resident degree-credit students who enrolled at any time during the academic year.
[7]From 1869–70 to 1959–60, first-professional degrees are included under bachelor's degrees.
[8]Figures for years prior to 1969–70 are not precisely comparable with later data.
[9]Includes unexpended plant funds.
[10]Book value. Includes other nonexpendable funds.

NOTE: Data through 1989–90 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Detail may not sum to totals because of rounding.

—Not available.
[1]Degree-credit enrollment only.
[2]Includes part-time resident students and all extension students.
[3]Large increases are due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology.
[4]Because of imputation techniques, data are not consistent with figures for other years.
[5]Data were imputed using alternative procedures. (See Guide to Sources for details.)
[6]Data revised from previously published figures.
NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.)
SOURCE: U.S. Department of Education, National Center for Education Statistics, *Biennial Survey of Education in the United States*; *Opening Fall Enrollment in Higher Education*, 1963 through 1965; Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1966 through 1985; and 1986 through 2005 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:86–99), and Spring 2001 through Spring 2006. (This table was prepared August 2007.)

—Not available.
[1]Data for 2-year branch campuses of 4-year institutions are included with the 4-year institutions.
[2]Large increases are due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology.
[3]Because of imputation techniques, data are not consistent with figures for other years.
[4]Data were imputed using alternative procedures. (See Guide to Sources for details.)
[5]Data revised from previously published figures.
NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.)
SOURCE: U.S. Department of Education, National Center for Education Statistics, *Opening Fall Enrollment in Higher Education*, 1965; Higher Education General Information Survey (HEGIS), "Fall Enrollment in Institutions of Higher Education" surveys, 1966 through 1985; and 1986 through 2005 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:86–99), and Spring 2001 through Spring 2006. (This table was prepared August 2007.)

## Table 181. Total fall enrollment in degree-granting institutions, by sex, age, and attendance status: Selected years, 1970 through 2016

[In thousands]

| Sex, age, and attendance status | 1970 | 1980 | 1990 | 1995 | 2000 | 2001 | 2002 | 2003[1] | 2004 | 2005[1] | Projected 2006[1] | Projected 2011 | Projected 2016 |

[1]Some data have been revised from previously published figures.

NOTE: Distributions by age are estimates based on samples of the civilian noninstitutional population from the U.S. Census Bureau's Current Population Survey. Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1970 and 1980; 1990 through 2005 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:90–99), and Spring 2001 through Spring 2006; and *Projections of Education Statistics to 2016*. U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, selected years, 1970 through 2005. (This table was prepared August 2007.)

## Table 182. Total fall enrollment in degree-granting institutions, by level, sex, age, and attendance status of student: 2005

| Age of student and attendance status | All levels | | | Undergraduate | | | First-professional | | | Graduate | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | Total | Males | Females | Total | Males | Females | Total | Males | Females | Total | Males | Females |
