JAN 14 1997

Incident Description: Our 8 year old son was playing with a toy he had received for Christmas when a piece of the toy flew off and struck him in the mouth breaking off his two front teeth at the roots. The toy is called "Flying Warriors" and is made of plastic. It consists of a plastic launcher and a plastic figure that is mounted on top of the launcher. The figure has two arms/wings that hang down at the figure's sides until it is launched. Then the wings spread as the figure is launched into the air. The figure then glides back down to the ground. While playing with the toy it apparently became cracked where the two halves of the figure are glued together. This caused one of the arm/wings to pull out of its socket after it was launched and strike our son in the mouth. Our son is seeing a dentist to have his front teeth reconstructed. Any info or help in this matter would be greatly appreciated. Thank you.
Eric and Barbara [redacted]

U. S. CONSUMER PRODUCT SAFETY COMMISSION

AUTHORIZATION FOR RELEASE OF NAME

Thank you for assisting us in collecting information on a potential product safety problem. The Consumer Product Safety Commission depends on concerned people to share product safety information with us. We maintain a record of this information, and use it to assist us in identifying and resolving product safety problems.

We routinely forward this information to manufacturers and private labelers to inform them of the involvement of their product in an accident situation. We also give the information to others requesting information about specific products. Manufacturers need the individual's name so that they can obtain additional information on the product or accident situation.

Would you please indicate on the bottom of this page whether you will allow us to disclose your name. If you request that your name remain confidential, we will of course, honor that request. After you have indicated your preference, please sign your name and date the document on the lines provided.

You are hereby authorized to disclose my name and address with the information collected on this case.

My identity is to remain confidential.

Barbara [REDACTED]

Excisions/Revisions

Firm has not requested further notice

5-24-99 AB

980421CCN0253

PRE-ACCIDENT:

The victim and two other children were playing with some donated toys in a church basement. It was the youth room. A boy played with this flying toy by launching it successfully about five times, without a problem. The user puts the toy figure into the hand held launcher, holds it at arms length, pulls the string ring out to wind up the inner spindle, then pulls the trigger and lets the toy fly free in the air. The warrior toy figure is spinning rapidly. Its arm/wings spread out, and it flies like a helicopter. The way a person holds the launcher in relation to the horizon gives it its initial direction. But then the flying toy can strike a wall, person, or other object, and change direction, and still have enough energy to keep in the air.

ACCIDENT:

To use this toy, the boy put the toy figure in the top of the base. He held the base in his left hand and pulled the ring with the cord with his right hand. He then pulled back on the trigger, while holding the entire toy at arms length away from him, just below eye level.

The next time the boy launched this flying figure, it quickly came toward him instead of away from him. One of the arms of the flying warrior toy struck the 14-year-old boy in the face. His left eye was injured.

POST-ACCIDENT:

The boy felt his face was cut near his eye. He lay on the floor awhile. Then, he went to the bathroom to look in the mirror. His eye was swollen and bruised. He went upstairs, to his parents, who were attending a dinner. They saw his injury and took him to a hospital. He required immediate care. He was hospitalized for five days. Later he had an artificial lens implant. He is still undergoing medical treatment. He still has blurred vision in that eye. He will need laser surgery as a final step in the procedure.

The toy was recovered from the room a few days after the incident. The flying warrior's arms came off during this incident. One arm is intact. The other arm broke into pieces. These pieces were not recovered from the scene.

This toy was sent to a testing laboratory. They found that the tips of the whirling arm/wings reach speeds of 51 MPH, as it spins at 1,740 RPM.

The family hired an attorney. He sent a Freedom of Information request to CPSC. Soon afterward he received a phone call from an attorney from Hedstrom Corp. The Hedstrom attorney asked "Is this another eye injury case?" The family attorney said yes. That was the only time he heard anything from Hedstrom. The family is preparing to file suit against Hedstrom. **They asked NOT to be identified to the company in this report.**

The victim was 14 years old, 5'8" tall, weighed 130 lbs., and is right-handed.

PRODUCT IDENTIFICATION:

This product was new when it was given to the church charity for use by children. It was not known when it was put in this room. It is a "Sky Warrior" toy made in China for the Tara Corp. Hauppauge, NY. It is a red and gray plastic figure, 7 inches long. The figure's arms extend to form 5-inch-long, wing-like parts that let the toy fly. It has a base with the trigger and spinning mechanism. The words "TARA CORP" are on the side of the base. "Made in China" is embossed on the back of the toy figure.

The toy warrior's left shoulder has an open area where a piece is missing. The left arm/wing is missing. The right arm/wing is intact, but separated from the figure.

980421CCN0253

Their attorney provided me with a copy of another injury report obtained from CPSC. In this IDI #980609CCC3200, a blister card Label states, in part": FLYING WARRIORS Soars over 20 feet. CAUTION :Do not launch at people or animals. Be careful not to pull the launch cord too fast or too hard. Conforms to ASTM F963-95. ***." An eye injury resulted when one of the wings detached just after the toy was launched, and struck the victim in the face. This occurred on 5-10-97.

STANDARDS:

There are no special standards for this product.

ATTACHMENTS:

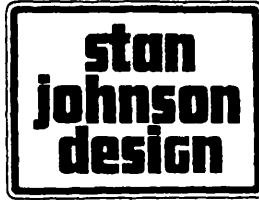

- 1. There is a two page laboratory report.
- 2. Five pages for IDI 970609CCC3200, Las Vegas, NV.
- 3. There are 17 photographs of the toy warrior.

=====
A description of the photographs:

- 1. The three parts of the flying warrior toy; the left arm, the body of the warrior, and the base stand.
- 2. A closer view of the toy body and a side view of the right side of the stand.
- 3. This is the back end of the stand. The ring is for the pull cord to wind up the toy's catapult system in the stand.
- 4. A closer view of the arm and the front of the toy warrior.
- 5. A closer view of the back of the arm and the back of the toy warrior.
- 6. An edge view of the arm's wing tip.
- 7. This shows the wing/arm to be 4.75" long.
- 8. This shows the toy figure to be 7" long.
- 9. A side view of the broken left shoulder.
- 10. This shows the top of the left wing/arm.
- 11. A close up of broken toy shoulder, and the edge of the wing/arm.
- 12. The top of the spindle in the base of the handle.
- 13. A side view of the handle and base. It says:"Tara Toy Corp., Made in China".
- 14. A close up of the intact right shoulder of this toy figure.
- 15. The arm, body, and front view of the base.

980421CCN0253

16. This shows a side view of the base with the figure inserted into the spindle.
17. A close up of the foot and spindle part of the base of the toy figure.

Re: Lukasick v. Tara Toy

Description: The Fly Warrior toy is designed to be launched by the child at approximately eye level. A failure or separation of the wings can direct parts, at a speed of 51mph, directly at the child's facial area. Prior to launch, wings are at a vertical rest position at the figure's legs, upon launch wings spin at high speed and rise to a horizontal position, resulting in the wing's edges being directed at the child's face/eyes. The wings are rigid plastic with a relatively sharp edges that measure approximately .060" inches in thickness and edge radii of .030" inches.

Condition: Toy is used, right wing is intact and separated from the figure, left wing is missing, figure's left shoulder is broken with sections missing that would no longer retain the wing. Figure's material is brittle plastic with wall thickness measuring .030"-.050". Right shoulder is intact except for small breakage and material loss at opening. Body seam immediate to arm opening is opened and not glued (hot glue). Sleeve over the drive mechanism is cracked in approximately six places, several small pieces of material are missing from the edge. Sleeve is rigid plastic .025"-.030" thick. Figure's leg shows molded "Made in China". There are no warnings on figure.

Gun/Launcher: Launcher is intact and in good condition. Missile is propelled with air generated by squeezing trigger. Missile is missing. Fly Warrior is launched by placing it in the receptacle in the top of the launcher and pulling the 14" string which spins the internal gear, thereby spinning the Fly Warrior, extending its wings (arms) and flying in similar action to that of a helicopter. The Fly Warrior spins 14.5 revolutions per pull of the 14.5" string which requires about .5 seconds. This results in the figure spinning at approximately 1,740 rpm with a wing tip speed of 51mph! Identification on gun/launcher (molded): Tara Toy Corp. Made in China. There are no warnings on launcher.

Continued...

Page two
April 21, 1998
Mr. James Fennerty

Opinion: The Fly Warrior is an accident waiting to happen. The concept of launching a toy spinning at 50mph at arm's length from a child's face presents an unreasonable danger to all present. The toy is not only defective in its basic design, but also in manufacture. The parts are defectively designed (brittle material, edges of exposed flying parts with a .030" edge profile). The parts are defective in assembly that allows foreseeable breakage and disassembly.

The flying parts intact or in pieces, are sharp enough and moving at a speed that will break teeth and injure eyes of the operator and bystanders. The toy should be recalled!

John Vecey
Consumer Products Safety Commission
230 S. Dearborn Street, 2944
Chicago, IL 60604

Dear Mr. Vecey:

I am writing to register a complaint about a toy that recently injured my fourteen year old son, Matthew Lukasick. My son was injured by this toy while playing with friends in a church basement. The toy had apparently been donated to the church. It appears to have been manufactured by Tara Toy corporation and resembles the recently recalled "Sky Dancer".

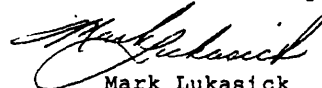

Like the Skydancer, it had various parts that spun into the air. One of those parts spun into my son's eye, causing him to be taken immediately to the emergency room and ultimately, to have an artificial lens implant placed in his eye. The full extent of the damage is still not known.

Because the toy did not belong to us, I do not know where it was purchased or the brand name of the product. I have attached copies of pictures that we have of the toy, unfortunately this is all of the information that we have at this time.

I will forward to you any further information I obtain. In the meantime, if you have any questions, please contact me. I can be reached at (773) 582-4838.

Dear Ms. Stevens:

Thank you for providing copies of pictures of the toy that was involved in the incident with Mark Lukasick. Because of the quality of the photocopies of the pictures it is difficult to say, but the toy does seem to resemble other flying toys which have been the subject of Commission recalls in the past. My information is that Tara Toys is located in Hauppauge, NY but it appears that your firm has already been contacted by their representatives. Thank you for providing the pictures.

Re: Lukasick

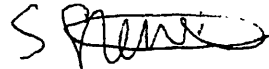

Dear Mr. Ault:

As per our conversation today, please find enclosed copies of the pictures that we have of the toy that injured our client, Mark Lukasick.

Our firm was contacted by an attorney at Tara Toy Company based on our freedom of information act request regarding their company. He informed us that the name of the toy that injured our client is the "Flying Warrior". That is all the information that I have at this time.

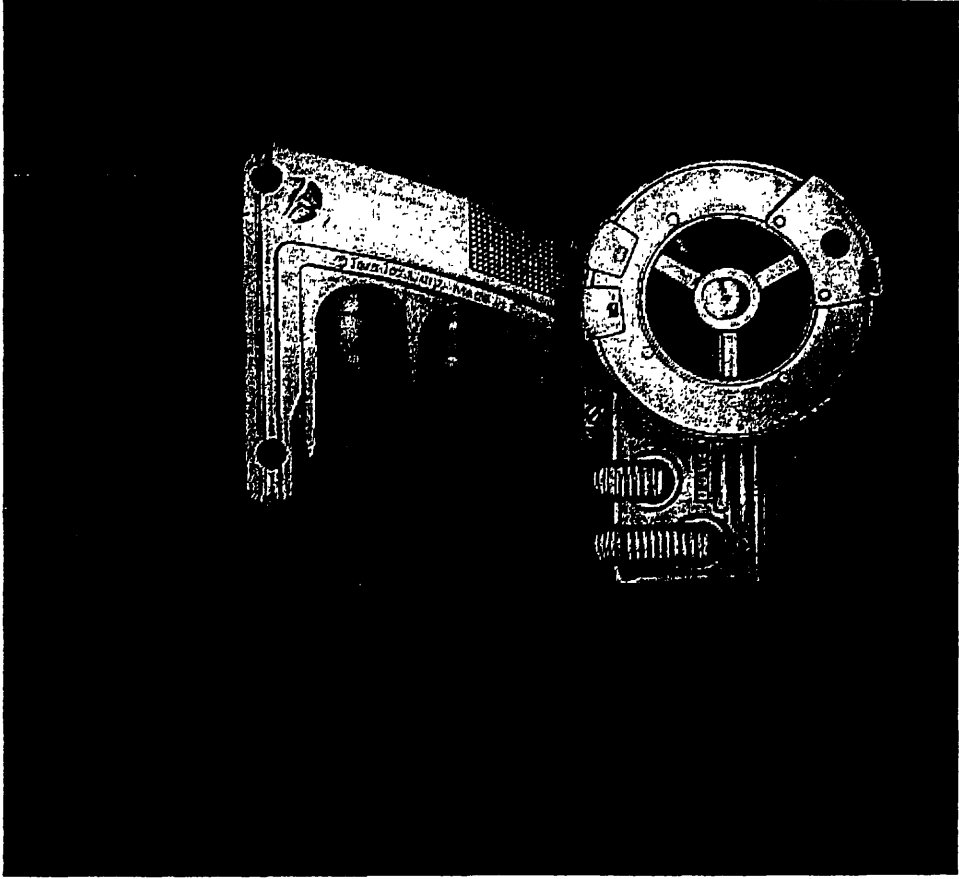

Thank you in advance for your assistance.

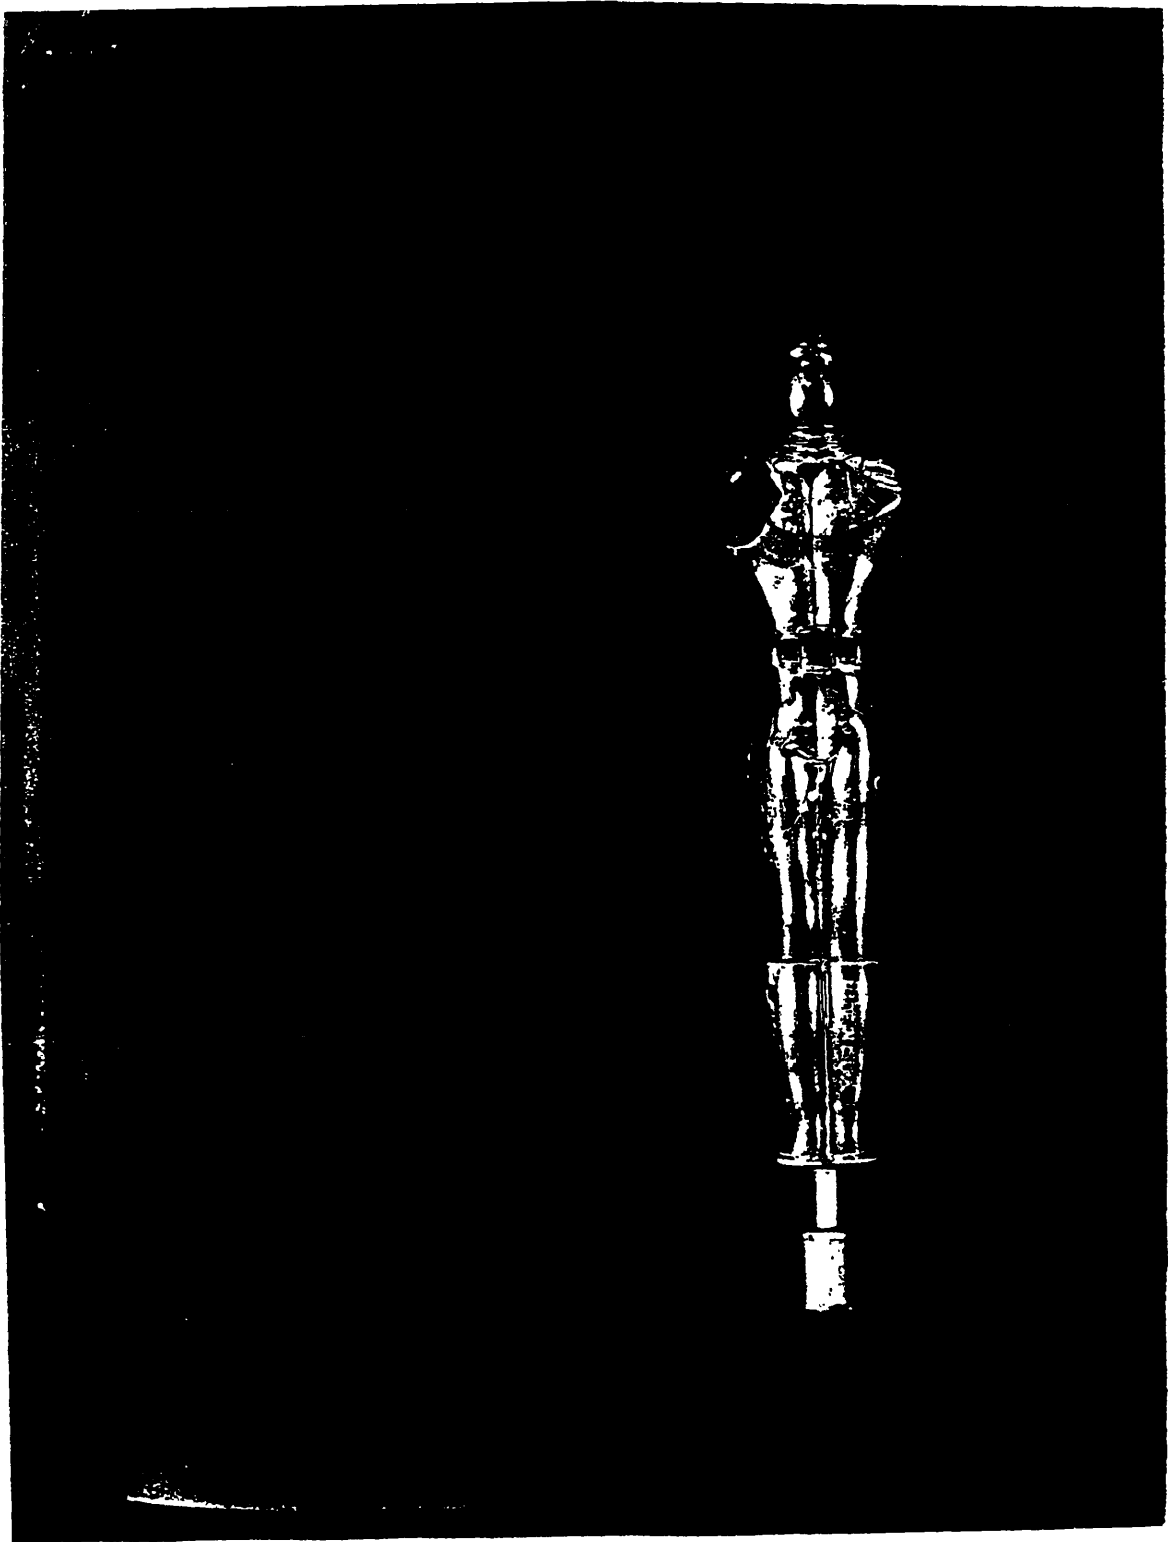

Very Truly Yours,

Shannon K. Stevens

Re: Lukasick v. Tara Toy

Description: The Fly Warrior toy is designed to be launched by the child at approximately eye level. A failure or separation of the wings can direct parts, at a speed of 51mph, directly at the child's facial area. Prior to launch, wings are at a vertical rest position at the figure's legs, upon launch wings spin at high speed and rise to a horizontal position, resulting in the wing's edges being directed at the child's face/eyes. The wings are rigid plastic with a relatively sharp edges that measure approximately .060" inches in thickness and edge radii of .030" inches.

Condition: Toy is used, right wing is intact and separated from the figure, left wing is missing, figure's left shoulder is broken with sections missing that would no longer retain the wing. Figure's material is brittle plastic with wall thickness measuring .030"-.050". Right shoulder is intact except for small breakage and material loss at opening. Body seam immediate to arm opening is opened and not glued (hot glue). Sleeve over the drive mechanism is cracked in approximately six places, several small pieces of material are missing from the edge. Sleeve is rigid plastic .025"-.030" thick. Figure's leg shows molded "Made in China". There are no warnings on figure.

Gun/Launcher: Launcher is intact and in good condition. Missile is propelled with air generated by squeezing trigger. Missile is missing. Fly Warrior is launched by placing it in the receptacle in the top of the launcher and pulling the 14" string which spins the internal gear, thereby spinning the Fly Warrior, extending its wings (arms) and flying in similar action to that of a helicopter. The Fly Warrior spins 14.5 revolutions per pull of the 14.5" string which requires about .5 seconds. This results in the figure spinning at approximately 1,740 rpm with a wing tip speed of 51mph! Identification on gun/launcher (molded): Tara Toy Corp. Made in China. There are no warnings on launcher.

to have his eye checked for glaucoma. Consumer discontinued grandsons' use of toy. Silver, red, and green action figure called "Gyro" came with a hard plastic launcher. Child places action figure on launching device and pulls launcher's cord which propels action figure into the air. Consumer has seen a similar toy called "Sky Dancer" distributed by Galoob and feels it can also cause the same problem.

2/96 Consumer had purchased an identical toy for another grandson and went to dealer and explained incident. Dealer's rep. (name unknown) who offered consumer a refund; consumer accepted.

Warning: "Choking hazard. Small parts not for children under 3 yrs.
Caution: do not launch at people or animals. Conforms to ASTM S963-95."

1997

Incident Description: Our 8 year old son was playing with a toy he had received for Christmas when a piece of the toy flew off and struck him in the mouth breaking off his two front teeth at the roots. The toy is called "Flying Warriors" and is made of plastic. It consists of a plastic launcher and a plastic figure that is mounted on top of the launcher. The figure has two arms/wings that hang down at the figure's sides until it is launched. Then the wings spread as the figure is launched into the air. The figure then glides back down to the ground. While playing with the toy it apparently became cracked where the two halves of the figure are glued together. This caused one of the arm/wings to pull out of its socket after it was launched and strike our son in the mouth. Our son is seeing a dentist to have his front teeth reconstructed. Any info or help in this matter would be greatly appreciated. Thank you.
Eric and Barbara Martin

Victim's age = 8
Victim's sex = Male
Date of incident = 12/29/96
Product involved = Flying Warrior plastic figure and launcher
Product brand name/manufacturer = Tara Toy Corp.
Product involved still available = Yes
Product model and serial number = 18500
Date product purchased = before Christmas

Narrative Continued

12/29/96 Consumer called and explained incident to family pediatrician, Crossan O'Donovan, MD, TEL: 410-284-1133 who told consumer to call dentist.

12/29/96 Consumer called and explained incident to dentist, Dr. Fred Magaziner, TEL: 410-668-5151, 7650 Belair Road, Baltimore, MD, who told consumer he would call endodontist, Charles Mann, TEL: 410-931-0250, schedule an appointment, and call consumer back.

12/29/96 Dr. Magaziner called consumer and told her an appointment was set for 12/30/96.

12/30/96 Son went to see Dr. Mann, who took x-rays and prescribed son valium to calm him.

12/31/96 Consumer took son to Dr. Mann's office and he examined nerves to his missing teeth. Dr. Mann determined that teeth roots were not damaged and told consumer to take son to Dr. Magaziner to have son's teeth reconstructed. Consumer scheduled an appointment with Dr. Magaziner for 1/3/97.

Toy consists of a 5.5" tall hard plastic launching pad and a hard plastic figure with a gold head, silver body, and pink accents which is mounted onto launching pad. The figure has two wings that hang down at the figure's sides until a string is pulled from launching pad to launch toy into air.

Warning on box: "Choking hazard: Small parts. Not for children under 3 years [sic]."

Re: CPSC CA970108
Tara Toy Corporation
Flying Warrior dolls

Dear Mr. Pearl:

The U.S. Consumer Product Safety Commission (CPSC) has received information concerning incidents of serious eye injuries to children and adults who were using flying toy doll figures. Enclosed are two incidents reported to CPSC that involved a Flying Warrior doll imported from China by Tara Toy Corporation. Also enclosed is the press release issued jointly by CPSC and Placo for the recall of Placo Star Wonders dolls because of several serious eye injuries.

Enclosed for your information are the Consumer Product Safety Act and the Commission's regulation, "Substantial Product Hazard Reports," 16 C.F.R. Part 1115. These documents explain the Commission's authority and policy regarding products that may present substantial product hazards and also explain the firm's rights and obligations under the Act.

One of the responsibilities of the Compliance staff is to determine preliminarily whether a defect is present in a product and, if so, whether that defect rises to the level of a substantial product hazard as defined by section 15(a) of the Consumer Product Safety Act (CPSA), 15 U.S.C. § 2064(a).

1

Information Requested

For the staff to assess accurately the potential safety hazard, if any, associated with the subject product, it needs certain information from the manufacturer or importer. While the staff recognizes that your firm is not filing a report pursuant to Section 15(b) regarding a possible defect with this product, the type of information requested for a full report is generally the information needed by the staff. Please follow 16 C.F.R. § 1115.13(d) (1-14) and provide the specified information, to the extent applicable to the product and problem described above. In your response, please reference each question number (1-14).

In addition to providing the information requested above, please also submit the following information:

- 15(a) Regarding question 6, include copies of all consumer or dealer complaints, warranty claims, and reports of injury related to the product being investigated. Include copies of all court complaints and related documents for lawsuits involving the product and the resolution of those lawsuits.

If copies of consumer complaints and other documents requested above are unavailable, indicate the reason they are unavailable and provide a summary containing the names, addresses and telephone numbers of the consumers or of the plaintiffs' attorneys.

- 15(b) Copies of all test reports, analyses, evaluations, and premarket tests related to the subject product and problem.
- 15(c) Copies of all engineering drawings, engineering change notices and material specifications related to the subject problem.
- 15(d) Please provide UPC codes for all models involved.
- 15(e) Provide eight (8) samples of each model involved, including the retail packaging and all instructions. If the product has been redesigned since the production of the product described in

paragraph 1, please also provide a sample incorporating the new design.

Information Disclosure

Section 6(b) (5) of the CPSA, 15 U.S.C. § 2055(b) (5), prohibits the release of information submitted under section 15(b) of the CPSA unless a remedial action plan has been accepted in writing, a complaint has been issued, or a firm consents to such release.

If the firm submits any information that it considers to be a trade secret, or confidential commercial or financial information, it must mark it "confidential" in accordance with section 6(a) (3) of the CPSA, as amended, 15 U.S.C. § 2055(a) (3). The Commission may not disclose to the public trade secret information or proprietary commercial or financial data. If the firm does not request confidential treatment at the time of its submission, or within ten days thereafter, the staff will assume that it does not consider information in the submission to be a trade secret or otherwise exempt from disclosure under section 6(a) of the CPSA and the Freedom of Information Act, 5 U.S.C. § 552(b) (4).

Continuing Obligation

The firm has a continuing obligation to supplement or correct its "Full Report." If, after filing the "Full Report," the firm receives or learns of information concerning other incidents or injuries, or information that affects the scope, prevalence or seriousness of the defect or hazard, it must report that information to this Division immediately.

The Division of Corrective Actions requests that the firm respond within ten working days of your receipt of this letter. Please reference the CPSC file number in your response. If you seek assistance or if you have any questions, you may contact Jean Kennedy, at: (301) 504-0608, extension 1360. To respond to this letter using the U.S. Postal Service, please address your correspondence to: Division of Corrective Actions, U.S. Consumer Product Safety Commission, Washington, D.C. 20207-0001. For other delivery services, please address the material to: Division of Corrective Actions, U.S. Consumer Product Safety Commission, Room 613, 4330 East West Highway, Bethesda, MD 20814-4408. The Office of Compliance telefax number is (301) 504-0359.

RE: DAVID HUDDLER

DATE OF EVALUATION: May 11, 1997

Dear Helga:

Thank you very much for allowing me to see David this morning. He is a very pleasant 15-year-old boy who was hit with a flying toy in his left eye in May 10, 1997. David complains of decreased vision and pain in the left eye since that time.

PAST OCULAR HISTORY: Unremarkable.

PAST MEDICAL HISTORY: Unremarkable.

PAST SURGICAL HISTORY: None.

MEDICATIONS: Pred Forte 1% left eye Q one hourly
and Ocufen left eye QID.

ALLERGIES: Patient denies any drug allergies.

PERSONAL HISTORY: Unremarkable.

On evaluation vision in right eye is best corrected for distance is 20/20. Vision left eye is hand motion.

External examination shows mild chemosis in the left eye. Motility examination shows full range of ductions and versions. Pupils are 8 mm, pharmacologically cycloped at the time of examination.

SLIT LAMP EXAMINATION:

Slit lamp examination of the right eye is unremarkable.

Slit lamp examination left eye shows mild conjunctival injection. Cornea is clear. Anterior chamber shows fiber and a small hyphema. Iridodialysis is noted extending from 1:00 to 4:00 hours. Lens appears cataractous. Intraocular pressure is 16 mmHg in the right eye and 9 mmHg in the left eye.
