HIGHLIGHTS FROM THE 2002 FORM 5500 REPORTS

Over the past three decades, as the private pension system has shifted from defined benefit (DB) plans toward 401(k) type defined contribution (DC) plans, the financing of benefits has shifted from employers to participants. In 1978, when legislation was enacted authorizing 401(k) type plans that allow employees to contribute on a pre-tax basis, 29 percent of contributions to DC plans, and only 11 percent of total contributions to all DB and DC pension plans were contributed by participants. The percent of contributions¹ made by the employee to DC plans has doubled since then, to 60 percent. The shift in responsibility for financing for DC plans has stalled for the last four years, remaining at 60% consistently from 1999 to 2002.

The total percent of employee contributions to DB and DC plans has actually fallen over the last four years, from 52 percent in 1999 to 42 percent in 2002. This is due to the continued increase in employer contributions to DB plans, which increased by 75.7% to \$83.5 billion from 2001 to 2002.

Other findings from Form 5500 series reports for 2002 plan years are summarized below.

- While the number of DB plans has fallen in recent years, both DB and DC plans remained unchanged for 2002.
- Between 2001 and 2002, the total active participant count increased slightly from 74.4 million to 74.5 million. The number of active

¹ In this case, the contributions considered are those made by the employer and employee, not those from other sources.

participants in DB plans decreased by 2.0% to 21.6 million. The number of active participants in DC plans increased by 1.0 percent to 52.9 million.

- 401(k) type plans continued to grow in 2002, with the number of plans increasing from 367,000 to 388,000 and the number of active participants increasing from 42.0 million to 43.2 million.
- Cash-balance plans increased by 29%, from 1,477 in 2001 to 1,903 in 2002.
- Money purchase plans decreased by 13%, from 89,193 in 2001 to 77,444 in 2002.
- Pension plan assets decreased for the third year in a row, from \$3.9 trillion in 2001 to \$3.6 trillion in 2002. DB plan assets shrank by 8.7% to \$1.7 trillion, while DC plan assets decreased by 7.8% to almost \$2.0 trillion. 401(k) plans fell 6.5% to \$1.6 trillion.
- DC plan contributions grew by 3% again in 2002 to \$209.7 billion. DB plan contributions increased by 79% to \$89.2 billion. Contributions to pension plans increased by 18% in 2002 to \$298.9 billion.
- In 2002, pension plans disbursed \$314.7 billion in benefits to retirees, survivors, and terminating employees. \$135.8 billion was disbursed from DB plans and \$178.7 billion from DC plans. This was a 5.0% increase for DB plans and a 1.9% decrease for DC plans from 2001.
- Overall, pensions disbursed \$15.8 billion more than they received in contributions, a decrease of 72.7% from 2000. DB plans disbursed \$46.6 billion more than they collected in contributions, while DC plans disbursed \$30.9 billion less than they received in contributions.

Form 5500 Research Files and Private Pension Plan Bulletins – Timing Concepts – Change in Definition

Beginning with this 2002 Private Pension Plan Bulletin, the data for a given calendar year reflects filings for plan years that in general end, rather than begin, in that calendar year. In terms of the 2002 Research File and Bulletin, this means that plans ending in the range 1/1/2002 to 12/31/2002 have been selected, rather than plans ending in the range 12/31/2002 to 12/30/2003. The change in definition does not affect calendar year filers (i.e. plans beginning Jan. 1 and ending Dec. 31), which make up approximately 80% of all filers for a given plan year. The chart below summarizes the number of plans with plan end dates of 12/31/2001, dates ending in each month of 2002 (except for the single day 12/31/2002), and then separately 12/31/2002. The 2001 Bulletin and Research File with the old timing definition used data corresponding to all but the right-most bar of the chart. The 2002 Bulletin and Research Files with the new timing definition use data corresponding to all but the left-most bar – that is, plans ending in calendar year 2002.

Chart 1: Number of Pension Filings, by Plan-Year-Ending Date
Data for 2001 and 2002 Research Files

Moving to this definition means that a given year's Bulletin and Form 5500 Research File can be generated more quickly, since the minority of non-calendar-year filers will largely be processed prior to the filing of the bulk of the plans. As described in the GAO report 05-491 (www.gao.gov/cgi-bin/getrpt?GAO-05-491), however, there will still be substantial lags in the production of any given year's Bulletin and associated Form 5500 Research File because of the reporting deadlines that extend well beyond the plan year, the ability of filers to obtain extensions, and the complexities of the internal processing activities.

1/ Excludes plans covering only one participant.

2/ Includes active, retired, and separated vested participants not yet in pay status. The number of participants also includes double counting of workers in more than one plan.

3/ Active participants include any workers currently in employment covered by a plan and who are earning or retaining credited service under a plan. Active participants also include nonvested former employees who have not yet incurred a break in service.

4/ Total asset amounts shown exclude funds held by life insurance companies under allocated group insurance contracts for payment of retirement benefits. These excluded funds make up roughly 10 to 15 percent of total pension fund assets.

5/ Includes both employer and employee contributions.

6/ Amounts shown include both benefits paid directly from trust funds and premium payments made by plans to insurance carriers. Amounts exclude benefits paid directly by insurance carriers.

1/ Includes single employer plans, plans of controlled groups of corporations and multiple-employer noncollectively bargained plans.

2/ Includes multiemployer plans and multiple-employer collectively bargained plans.

3/ Plans with less than 100 participants are required to provide only the total participant count. For these plans, which cover approximately 10 percent of all participants, the distribution of active, retired, and separated vested participants was assumed to be the same as for larger plans in each column.

4/ Deceased participants whose beneficiaries are receiving or are entitled to receive benefits.

NOTE: Excludes plans covering only one participant.
