INVESTMENT POLICY GUIDELINES

Investment applications will be competitively evaluated on their ability to meet or exceed the following investment policy guidelines:

Be market-based and results driven.

An investment will capitalize on a region's competitive strengths and will positively move a regional economic indicator measured on EDA's Balanced Scorecard, such as: an increased number of higher-skill, higher-wage jobs; increased tax revenue; or increased private sector investment.

Have strong organizational leadership.

An investment will have strong leadership, relevant project management experience and a significant commitment of human resources talent to ensure a project's successful execution.

Advance productivity, innovation, and entrepreneurship.

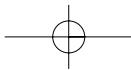

An investment will embrace the principles of entrepreneurship, enhance regional clusters, and leverage and link technology innovators and local universities to the private sector to create the conditions for greater productivity, innovation, and job creation.

Look beyond the immediate economic horizon.

Anticipate economic changes and diversify the local regional economy. An investment will be part of an overarching, long-term comprehensive economic development strategy that enhances a region's success in achieving a rising standard of living by supporting existing industry clusters, developing emerging new clusters, or attracting new regional economic drivers.

Demonstrate a high degree of commitment by exhibiting:

- High levels of local government or non-profit matching funds and private sector leverage.
- Clear and unified leadership and support by local elected officials.
- Strong cooperation between the business sector, relevant regional partners and local, state and federal governments.
