ABSTRACT

The Survey of Program Dynamics (SPD) Second Longitudinal File [machine-readable data file]/conducted by the U.S. Census Bureau. -Washington: U.S. Census Bureau [producer and distributor], 2002

Type of File:

Micro data; unit of observation is an individual.

Universe Description:

The Survey of Program Dynamics (SPD) universe consists of people who resided in the United States, except people living in institutions, such as prisons and nursing homes or entire military households, in March 1992 and/or March 1993. The universe is represented by original sample persons from the 1992 and 1993 Survey of Income and Program Participation (SIPP) panels, except those who were subsampled out because of cost constraints or leaving the universe before the 1998 interview.

Introduction:

The Second SPD Longitudinal file is a fully edited file that provides socio-economic data for calendar years 1992 - 1999, except 1995. It is intended for longitudinal analyses of effects of welfare reform on individuals, families and households. The file can be linked to the SPD First Longitudinal, the SPD 1998, the SPD 1997 Bridge and the 1992 and 1993 SIPP Panel files.

Subject-Matter Description:

The file contains basic demographic, economic, and social characteristics data for each member of the households for six or seven years depending on the panel. The 1992 panel contains data for 1992, 1993, 1994, 1996, 1997, 1998 and 1999. The 1993 Panel contains data for 1993, 1994, 1996, 1997, 1998 and 1999. There is no data available for 1995 because SIPP did not complete a years worth of data collection in either panel. The subject matter is described as follows:

Demographic:

Data on age, sex, race, ethnic origin, marital status, household relationship, education, and veteran status. Demographic data refer to the time of the interview in 1997 for 1996 data year, in 1998 for 1997 data year, in 1999 for 1998 data year, in 2000 for 1999 data year and December for data years 1992, 1993, and 1994.

Economic:

- Work Experience - Comprehensive work experience information is given on the employment status, occupation, industry, weeks worked and hours per week worked, total income, and income components for people 15 years old and older. The data on employment refer to the preceding year.
- Income - Data covering income sources such as income from jobs, net income from businesses, farm or rent, pensions, dividends, interest, and social security payments. Data on income refer to the preceding year.
- Noncash benefits - Data covering noncash income sources such as food stamps, the school lunch program, employer-provided group health insurance plan, employer-provided pension plans, Medicaid, Medicare, CHAMPUS or military health care, and energy assistance. Most data on noncash benefits refer to the preceding year. However, some questions refer to the week before the interview.

Geographic Coverage:

The geographic coverage area is the United States. The file contains codes for 41 individual states, plus the District of Columbia. *However, the sample is not designed to produce state estimates.* The SPD sample in the nine remaining states are identified in three groups for confidentiality reasons. The three groups are as follows: Maine and Vermont; Iowa, North Dakota, and South Dakota; and Alaska, Idaho, Montana, and Wyoming.

Technical Description:

File Structure: The file is a rectangular person-level file. Household and Family level variables are included on the record for every person in the household.

File Size: 97,677 Records

File Sort Sequence of Sample Units: SIPP panel number, Sample unit identification number, person number and entry ID.

Reference Materials:

Survey of Program Dynamics (SPD) Second Longitudinal File Technical Documentation. The documentation includes this abstract, the data dictionary, an index to the data dictionary, relevant code lists, and general information on SPD.

Survey of Program Dynamics (SPD) First Longitudinal File Technical Documentation. The documentation includes an abstract, the data dictionary, an index to the data dictionary, relevant code lists, and general information on SPD.

Survey of Program Dynamics (SPD) 1998 Technical Documentation. The documentation includes an abstract, the data dictionary, an index to the data dictionary, relevant code lists, questionnaire facsimiles, and general information on SPD.

Survey of Program Dynamics (SPD) 1997 Technical Documentation. The documentation includes an abstract, the data dictionary, an index to the data dictionary, relevant code lists, questionnaire facsimiles, and general information on SPD.

Note: The technical documentation is also available on the U. S. Census Bureau's SPD Internet site at <<http://www.sipp.census.gov/spd>> under "Publications and Analyses".

Survey of Income and Program Participation (SIPP) User's Guide. The User's Guide contains a general overview of the SIPP file as well as chapters on the SIPP survey design and content, structure and use of cross-sectional files, linking waves and reliability of the data. Copies are available from Marketing Services Office, Customer Services Center, U.S. Census Bureau, Washington, DC 20233. The SIPP Users' Guide was revised and updated to include information on the original SIPP data products from the 1984 through 1993 Panels, as well as the new data products coming from the 1996 Panel SIPP. An updated version of the SIPP User's Guide is available at the U.S. Census Bureau's SIPP Internet site at <<http://www.sipp.census.gov/sipp>> under "Publications & Analyses."

Survey of Income and Program Participation Quality Profile. The Quality Profile summarizes the SIPP sample design, sample selection, and data collection procedures. More importantly, the report also summarizes, in convenient form, what is known about the sources and magnitude of errors in estimates from the SIPP. Without such summaries, users seeking information about the quality of the SIPP estimates would need to search through a large body of literature, some of which is not easily accessible. The report covers both sampling and nonsampling error; however, the primary emphasis is on the latter. Copies of this report are available from Marketing Services Office, Customer Services Center, U.S. Census Bureau, Washington, DC 20233. An updated version of the SIPP Quality Profile is also available at the SIPP Internet site at <<http://www.sipp.census.gov/sipp>> under "Methodology."

Additional information (that is, methodology, overview and data access) may also be obtained by visiting the SPD Internet site at <http://www.sipp.census.gov/spd> and the SIPP Internet site at <http://www.sipp.census.gov/sipp>.

Related Printed Reports:

Related printed reports include working papers, compilations of papers presented at annual meetings of the American Statistical Association (*Proceedings of the American Statistical Association*), articles appearing in the *Journal of Economic and Social Measurement*, and reports in the P-70 series of the Current Population Reports. Some of these reports are available on the U.S. Census Bureau Internet site at <http://www.census.gov>, the SIPP Internet site at <http://www.sipp.census.gov/sipp>, and the SPD Internet site at <http://www.sipp.census.gov/spd>.

Related Electronic Data Files:

The SIPP 1992 and 1993 Longitudinal files, the 1997 SPD Bridge file, the 1998 SPD file, and the SPD First Longitudinal file are available from Marketing Services Office, Customer Services Center, U. S. Census Bureau, Washington, D.C. 20233. An extract file of the SIPP 1992 and 1993 Longitudinal files are available for download from the SIPP Internet site at <http://www.sipp.census.gov/sipp> under "Data Access" using one of the following extraction systems: the Federal Electronic Research and Review Extraction Tool (FERRET) or Data Extraction System (DES). Extract files of the 1997 SPD Bridge file are available for download from the SPD Internet site at <http://www.sipp.census.gov/spd> under "Data Access" using FERRET.

File Availability:

Files are available on CD-ROM (compact disc-readable) in ASCII; they may be ordered from Marketing Services Office, Customer Services Center using the [order form](#) at the end of this section. Call Customer Services at 301-763-INFO (4636) for price information. Information on the SPD and some SIPP files may be accessed on the Internet at <http://www.census.gov/ftp/pub/mp/www/tape/mstap17c.html>. The SPD 97 file, SPD 98 file, the First Longitudinal file, and the SPD Second Longitudinal file are accessible on the SPD Internet site at <http://www.sipp.census.gov/spd> under "Data Access" using the FERRET extraction system.

CAUTION STATEMENT:

A note of caution about this file. The weights on this file are longitudinal, therefore, they are only valid for estimates of the characteristics of the cohorts of people who were represented by the original sample persons from the SIPP 1992 and 1993 panels. An original sample person is a sample person who was a self or proxy respondent in Wave 1 of the SIPP 1992 or 1993 panel. Children born since the beginning of the SIPP panel to original sample persons also receive longitudinal weights.

The original sample has undergone a substantial amount of attrition from 1992 (or 1993) through 1998. As a result, estimates from this file are not as representative of the U.S. population as a cross-sectional survey would be. Therefore, results should be viewed with caution.

In addition, it should be noted that this file is based on five different survey collection vehicles: the 1992/93 SIPP instruments that were used to produce data for 1992, 1993, and 1994, a modified March CPS instrument that was used to collect data for calendar-year 1996, the 1998 SPD instrument that was used to collect data for calendar-year 1997, the 1999 SPD instrument that was used to collect data for calendar-year 1998 and the 2000 SPD instrument that was used to collect data for calendar-year 1999. Therefore, changes that are noted over time could be the result of the different survey instruments used to produce the estimates.

OVERVIEW

Why the Survey of Program Dynamics is Needed

On August 22, 1996, President Clinton signed legislation passed by Congress, and the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 became Public Law 104-193. The legislation directed the U.S. Census Bureau to collect data necessary to evaluate the impact of the law from households previously interviewed in the 1992 and 1993 Survey of Income and Program Participation (SIPP) panels. Households are being followed annually from 1997 to 2002, thus providing data for ten years. This survey, the Survey of Program Dynamics (SPD), will simultaneously describe the full range of state welfare programs along with social, economic, demographic and family changes that will help or limit the effectiveness of the reforms.

The goals of the welfare reform legislation are to end welfare dependence by promoting job preparation and work, encouraging the formation and maintenance of two-parent families, and providing states increased flexibility to achieve these goals. States are moving away from a welfare system based on entitlement toward one focused on assistance in finding employment and self-sufficiency. Thus, the primary goals of the SPD are to provide information on spells (occurrences) of actual and potential program participation over a ten-year period, 1992 to 2001, and to examine the causes of program participation and its long-term effects on the well-being of recipients, their families, and their children. The SPD is required by law to pay special attention to the issues of out-of-wedlock births, welfare dependency, the beginning and end of welfare spells, and the causes of repeat welfare spells. The SPD must also obtain information about the status of children. Researchers analyzing these data will use pre-reform characteristics of the population to control for preexisting differences among households in order to evaluate post-reform outcomes for the same people.

The SPD instrument has a core that essentially remains the same over the 1998-2002 period. Core data are collected on employment, income, program participation, health insurance and utilization, child

well-being, marital relationships, and parents' depression. The SPD also has topical modules that vary by year. An adolescent self-administered questionnaire (SAQ) was asked in 1998 and 2001. Additional child-related questions were asked in 1999 and will be asked again in 2002. Residential histories of children were collected in 2000.

Note: Because of confidentiality, the marital relationship and conflict, depression scale, and SAQ are not part of the public release file. To obtain the data, special arrangements are required. See section titled "Obtaining Access to SAQ Data" on page 3-9.

Background of the Survey of Program Dynamics

Several years before the passage of the actual legislation, the U.S. Department of Health and Human Services and the U.S. Department of Agriculture (USDA is responsible for the food stamp program) invested substantial resources in having the U.S. Census Bureau develop a longitudinal survey to provide the data necessary to understand the effects of anticipated public policy changes on the population. Ideally, such a survey should be in place before reforms are effective to allow adequate assessment of baseline circumstances.

The data already collected in the 1992 and the 1993 SIPP panels provide extensive baseline (background) information from which to determine the effects of welfare reform. The SIPP is a longitudinal survey of households, interviewed at least nine times at four-month intervals, and followed if they have moved. The SIPP collects more detailed data than any other national survey on program eligibility, access and participation, transfer income, and in-kind benefits. Coupled with an extensive array of economic and demographic data (for example, employment and job transitions, income, and family composition), the 1992 and 1993 SIPP panels represent the pre-reform situation of households quite well.

By interviewing the same households as SIPP in the SPD, analysts will then have data for the baseline pre-

reform period, the reform implementation period, and the medium-term post-reform period. Researchers require these data to assess short-term and medium-term consequences and outcomes for families and individuals. The use of the 1992 and 1993 SIPP panels doubles the sample size for certain groups of interest.

The topics that the retrospective SPD cover are an extension of those covered by the SIPP, but placed in an annual survey questionnaire, using guidance from such annual surveys as the March supplement to the Current Population Survey (CPS), the Panel Study of Income Dynamics, and the National Longitudinal Surveys.

SPD Status and Plans

Current plans. At its completion, SPD will have collected data for six calendar years, from 1996 through 2002. This will provide panel data for 9 years (1992-2001) when combined with the 1992 and the 1993 SIPP panel data. The U.S. Census Bureau's original plans were to have an instrument ready to test in the field concurrently with welfare reform. Because of legislation that was vetoed twice in 1995, the Census Bureau put its plans on hold. However, we were able to revive the project with funding received late in 1996. In its revived form, the SPD has 3 main components:

- (1) the 1992 and 1993 SIPP panels that cover the 1992-94 time period and part of 1995;
- (2) the 1997 Bridge survey covering 1996, provides the link between the 1992 and 1993 panels of the SIPP and the SPD, and includes "gap" questions to collect program participation data for 1995 for the 1992 SIPP panel; and
- (3) the core SPD starting in 1998, which includes topical modules that vary by year, and covers the 1997-2001 time period.

SPD "Bridge" Survey. Because the Census Bureau received funding for the SPD late in 1996, there was little time to develop a full-scale instrument. It was critical to collect income and program participation data in spring 1997 for calendar year 1996 from as many of the 1992 and 1993 SIPP households as the Census Bureau could find. The SPD was first conducted between April and June of 1997. Data was

collected for 1996 by administering a modified version of the annual March 1997 CPS demographic supplement, with a few new questions designed to collect 1995 program participation data for the 1992 SIPP panel (households and individuals were last interviewed in January 1995). All of the SIPP people interviewed in the first wave of the 1992 and 1993 SIPP panels and still being interviewed at the end of the panel (9 or 10 waves) were eligible for the SPD Bridge sample. The Census Bureau decided not to try to find people in the 1992 and 1993 panels who left the survey (attrited) because they felt that most analysts would need as much baseline data as possible. We reweighed the remaining sample to compensate for this loss.

Finding people who move is critical to the success of the SPD survey, particularly because we focus on low-income population. The SIPP staff have developed many procedures that help find movers. Fortunately, the CPS staff implemented a "mover module" in January 1997 to track people leaving formerly-interviewed CPS households. This also was crucial to the SPD. The Census Bureau was able to track most movers.

1998 SPD. During the first half of 1997, the University of California at Berkeley created the first SPD instrument. The instrument was programmed in the CASES authoring language used for computer-assisted Census Bureau surveys. The Census Bureau carried out a pretest in October 1997 using 400 retired (no longer in use) 1996 CPS households in 4 of its regions. After this test, the Census Bureau modified the questionnaire to correct questionnaire and instrument problems. The 1998 SPD also used a self-administered, audio cassette, adolescent questionnaire (SAQ). The SAQs were broken up into two separate cassettes--one for youths 12 to 13 years old and the other for youths 14 to 17.

Using the fully-developed computer-assisted interview instrument, annual data collection occurs once each year in May through mid-July, with annual recall for the preceding calendar year. The 1998 survey included a set of retrospective questions covering 1997 for all people aged 15 and older in the household. The topics covered were:

- Basic demographic and social characteristics, including educational enrollment and work training, functional limitations and disability, and

- health care use and health insurance;
- Basic economic characteristics, including employment and earnings, income sources and amounts, assets, liabilities, and program eligibility information, and food security;
- Information about children, including their school enrollment and enrichment activities, disability and health care use, contact with absent parent, care arrangements, and payment of child support on their behalf; and,
- Two SAQs: a few questions for adults focusing on marital relationship and conflict and a depression scale, and a lengthy questionnaire for adolescents aged 12 to 17 focusing on such issues as family conflict, vocational goals, educational aspirations, crime-related violence, substance abuse, and sexual activity. The adolescent SAQ was developed in collaboration with the Child and Family Research Network.

1999 SPD. The extended measures of child well-being questions were asked in 1999. In addition, five other new sections of questions were included: substance abuse, health care utilization while uninsured, food expenditures, positive behavior/social competence, and family routines.

2000 SPD. In the 2000 SPD, we collected the core SPD data and the Residential History topical module that collected data on with whom children have lived and the reasons for changes in living arrangements. We added 3500 non-interviewed households from the 1997 Bridge to the sample for SPD 2000 - 2002 data collections.

2001 SPD. In the 2001 SPD, we again collected the adolescent SAQ. We also added back approximately 5540 non-interviewed household from the 1992 and 1993 SIPP panels (in addition to the 3500 from the 1997 Bridge) for the 2001 and 2002 data collections.

2002 SPD. In the 2002 SPD, we will ask the extended child well-being questions again. Due to budget constraints, we reduced the sample by one-third across all regional offices (approximately 10,000 households).

SPD Content

The SPD has two core components in addition to topical modules. The two components consist of adult questions and child-related questions. The topical

modules include the adolescent SAQ, the children's residential history, and children's extended measure of well-being questions.

The Adult Questions cover:

Employment and earnings, income, and program eligibility. For each person age 15 or over in the household, the SPD collects a detailed account of work-related activities in the past calendar year, including weeks they worked, weeks on layoff, and weeks spent looking for work. In addition, the SPD collects information for up to four jobs in the previous calendar year including annual earnings from each job.

Next, the SPD collects income data, including data on cash and non-cash transfer programs. In addition to measuring economic well-being, these questions help examine changes in the characteristics of transfer programs resulting from welfare reform. These questions are similar to those in the SIPP. First an inventory is completed of all the types of income received in the previous calendar year for all household members age 15 or over at the person level. For example, we ask, "Did anyone in this household receive unemployment compensation?" If they answer "yes," we ask who received it. After collecting this inventory, the SPD moves on to the "Amounts" section. In this section, the months during the previous calendar year that the person received the income as well as the amount the person received are collected. It is important to track the number of months the person received the income so that researchers can examine the impact of time limits associated with welfare reform.

In addition to income, information about assets and debts are collected. These include items such as the value of homes, cars, stocks, bonds, mutual funds, and payments made to support children living outside the household. These questions are included because assets and debts are key components in economic well-being and are also critical to measuring program eligibility.

Educational enrollment and work training. Questions on educational enrollment are asked of people 18 and over about the current academic year. People 15 to 17 are included in the childrens' school enrollment questions since the childrens' series of questions are more appropriate for that age group. The adult questions on educational enrollment track the progress of adults toward receiving high school or high school

equivalency degrees as well as college, graduate and professional degrees. The work training questions focus on whether adults received any work training designed to help them look for a job or to train them for a new job.

Disability, health care utilization, and health insurance. Questions on disability, health care utilization and health insurance are condensed versions of a similar series included as topical modules in the SIPP. These questions are included to measure changes in the health care system and how the changes affect accessibility to government health insurance such as Medicaid and Medicare as well as private and employer-provided insurance, utilization of health services, and outcomes.

Food security. This series of questions is taken from the USDA-sponsored Food Security Supplement to the CPS and is intended to measure the subjective experience of hunger. The questions are used as a scale to measure the severity of hunger in a household. Direct changes in the food stamp program account for nearly half the total federal cost savings under the legislation. Additionally, the food stamp benefits of legal immigrants and able-bodied people ages 18-50 years old without dependents are affected by changes in the legislation. Measuring the food security status of a household provides a direct indicator of well-being.

Another objective of welfare reform is to encourage marital and family stability. Answers to questions on these subjects provide indicators of marital happiness and of overall stress, both of which can contribute to marital and family harmony or instability. Changes in program participation and employment can have a large effect on marital and family stability.

The Child questions cover:

We attempt to interview the mother or designated parent when asking questions about children.

Children's school enrollment and enrichment activities. The SPD asks questions about school enrollment and enrichment activities, including extracurricular enrichment activities, which add to the overall portrait of the child's development. The extent to which parents have the financial resources or the time to devote to such activities may be strongly influenced by their program participation and employment in the

labor market. These questions provide the basis to study the effects of welfare reforms on key outcomes through its influence on children's exposure to enrichment activities.

Disability, health care utilization, and child care. These questions are similar to those asked about adults. Additionally, a key objective of welfare reform is to encourage single mothers to enter or re-enter the labor force, so child care is an important issue to measure. The amount of time children spend in child care and the type of care they receive, as well as the stability of care arrangements, has been linked with child well-being.

Child support and contact with an absent parent. Enforcement of child support and contact with an absent parent has been highlighted as a cornerstone of welfare reform. The answers to these questions will allow researchers to examine the nature of the awards and whether the awards are being followed or enforced. Child support payments are also an important factor in determining the economic status of children living in single-parent families.

The adolescent SAQ is designed to provide information which can be used to evaluate several provisions of the TANF program. Included among these provisions are: states may not give benefits to unwed teenage parents who are not living with an adult and attending school; states receive bonuses for reducing illegitimate births, funding to develop abstinence education programs, and funds to devote to family planning. Questions in the SAQ which may be used to evaluate the success of these programs focus on dating histories, sexual initiation, contraception, and childbearing, and knowledge of welfare rules.

Employment of all able-bodied parents is a goal of the 1996 welfare reform law. However, parental employment may reduce the amount of monitoring and support parents can give their children, leading to increased rates of delinquency or poor school achievement. In order to measure these potential consequences, the SAQ includes indicators of adolescents' behaviors and relationships. The indicators focus on adolescents' housework and chores, substance use and problem behaviors, family routines, relationships between children and parents (both co-resident and non-resident parents), and parents' monitoring of adolescents' social and school behavior.

Technical Issues

This section deals with technical issues that affect the administration and usefulness of the survey.

Subsampling. The response rate for the 1997 SPD Bridge survey was 81.7 percent. This yielded a base sample of 29,619 households interviewed. However, the budget for the survey is \$10 million per year, which only allowed us to select a subsample of 19,139 households in 1998. The households were subsampled from interviewed households from the 1997 Bridge survey based upon the following household characteristics:

- all households with income less than 150 percent of poverty, and all households with incomes between 150 percent and 200 percent of poverty with children were selected for the sample with certainty;
- households with incomes above 200 percent of poverty with children were subsampled at a 90 percent rate;
- households with incomes between 150 percent and 200 percent of poverty without children are subsampled at an 82 percent rate; and households with incomes above 200 percent of poverty without children were subsampled at a 27 percent rate.

Weighting and database development. The SPD is designed exclusively to support longitudinal analysis of the impact of welfare reform. It represents the behavior and characteristics of people in two fixed cohorts over a period up to ten years. One cohort represents the population as it existed in March 1992 from the 1992 panel of the SIPP and the other is the population as of March 1993 from the 1993 panel. This is not a traditional longitudinal survey in that it does not repeat the same measure throughout the period. Furthermore, the sample is divided into two parts, each with a different reference period. **Finally, the individual rounds of interviewing beginning with the 1997 SPD Bridge survey are not and cannot be made to look like a cross-sectional snapshot of the U.S. population.**

Data Products

Given the design and our budget constraints, we have designed a series of data products to focus scarce resources on just the data products the users need most. These are:

- A 1998 interim, unedited calendar year file. This file is designed to support preliminary analysis of income and program participation among the original cohort.
- Three longitudinal files. The longitudinal files will contain fully edited, consistently-formatted, and longitudinally-processed core variables derived from the information collected over periods of time. The three longitudinal files will contain data for the following years:
 - First file - 1992 - 1994, 1996 - 1997
 - Second file - 1992 - 1994, 1996 - 1999
 - Third file - 1992 - 1994, 1996 - 2001
- Fully edited cross-sectional files, 1997-2002. These files will contain all remaining SPD variables not contained on the longitudinal files.

Longitudinal Data. The core information common throughout the data collection (although with varying reference periods and question phrasing) consists of basic demographics, labor force activity, income, and program participation. The three longitudinal files will reflect these data, and maintain consistency and similar variable names across time when possible. The longitudinal variables can be supplemented by matching information collected from the calendar year SPD files and from topical modules in the SIPP.

The longitudinal files will be based on people in the original sample, as with SIPP longitudinal files. They will reflect the original cohort plus people with whom these people resided over the length of the SPD survey. On the longitudinal files, the variables are replicated to reflect the number of years of data collection from the SIPP and the SPD. The information repeated across several SPD data collections will appear in the person record following the data common across the SIPP panels, the 1997 Bridge Survey, and the SPD.

For the SPD longitudinal data, person weights will be developed for people belonging to the initial cohorts who continued to be interviewed for as long as they remain with the SIPP/SPD universe as defined by the 1992/1993 SIPP panels (see section 9, Source and Accuracy Statement). We refer to this group of people as the longitudinal sample. Other people to be included in the data file will have zero weights. Their presence in the data file is to facilitate development of household and family characteristics of the people in the longitudinal sample. This will permit the user to construct contextual information on the cohort sample member's household and economic circumstances.

Children born to original sample members after the two cohorts were defined, will be included in the longitudinal file and assigned a nonzero person-based longitudinal weight, so they will appear to be members of the longitudinal sample (even though technically they are not). Thus, the data files will reflect a dynamic population over the ten-year period rather than two fixed cohorts of the population.

The first longitudinal file contains data covering the 1992/1993 through 1997 time frame except for 1995, because the SIPP does not have a complete data set for 1995. Data from the 1992 and 1993 SIPP panels, the 1997 Bridge survey, and the 1998 SPD survey are used for this first longitudinal file.

The second longitudinal file repeats the first and extends the reference period to 1999 (adding in the 1999 and the 2000 SPD data collections). The third longitudinal file will add the data for 2000 and 2001 reference periods collected in the 2001 and the 2002 SPD. The second longitudinal file was expanded to include variables on eligibility (adding in the 1998, 1999 and the 2000 SPD data collections).

The third longitudinal file will contain basic sample persons (1992-1994, 1996-2001) plus the 1997 Bridge Non-interview sample persons (1992 -1994, 1999, 2000, 2001) and the SIPP 1992/1993 Non-interview sample persons (1992-1994, 2000, 2001).

The Two Interim Calendar Year Files. So that the research community can make some preliminary assessment of the immediate impact of welfare reform, we have issued two interim files. The 1997 SPD Bridge survey interim file is identical to the March CPS in format (hierarchical record file), however, the 1998 interim file is in person year format. They contain special weights corresponding to the cohort, and the link-variables needed to merge with the 1997 SPD Bridge and earlier SIPP data. The 1998 SPD interim file contains primarily unedited data for all questions asked in the SPD survey. These are intended to be used for research purposes only and not to be used for cross-sectional analysis.

FILE INFORMATION

Geographic Coverage

State codes are shown except for nine states which are collapsed into three groups. The three state groupings are as follows: Maine and Vermont; Iowa, North Dakota and South Dakota; and Alaska, Idaho, Montana, and Wyoming. The sample was not designed to produce state level estimates. State codes are primarily useful in relating a respondent's reciprocity of benefits to welfare reform thresholds and policies which may vary from state to state.

Identification Number System/Match Key Variables

The SPD identification scheme uses match key variables designed to uniquely identify individuals, provide a means of linking data for the same individuals across files, and grouping individuals into households and families across files over time. The various components of the identification scheme are listed below:

SIPP Panel Number	SIPP_PNL
Sample Unit Identification Number	PP_ID
Entry ID	PP_ENTRY
Person Number	PP_PNUM
Address ID	ADDIDE(2,3,4,7,8,9,0)
SIPP_PNL, PP_ID, ADDID	IHHKEY(2,3,4,7,8,9,0)

File Match Keys

This file includes match keys to merge with SPD and 1992/1993 SIPP data. These match keys link data for each person between the 1992 and 1993 SIPP Panels, the 1997 SPD Bridge, the 1998 SPD file and the first longitudinal SPD file.

Use the following variables to match back at the person level:

SIPP Panel Number	SIPP_PNL
Sample Unit Identification Number	PP_ID
Person Number	PP_PNUM
Entry ID	PP_ENTRY

Use the following variables to match back at the household level:

SIPP Panel Number	SIPP_PNL
Sample Unit Identification Number	PP_ID
Address ID	ADDIDE(2, 3, 4, 7, 8,9,0)

The SIPP panel number identifies the panel in which the respondent participated. The sample person should either have an entry of 1992 or 1993 for their panel number.

The sample unit identification number was created by scrambling together the Primary Sampling Unit, segment, and serial numbers used for Census Bureau administrative purposes. These identifiers are constructed in the same manner as the 1992 and 1993 SIPP panel files, to enable matching to these files. To uniquely identify a household, you must use the sample unit identification (ID) number, the address ID, and the SIPP panel number. The sample unit identification number, the address ID, and the SIPP panel number can be used to link all households back to the original household.

The entry ID represents the address of the person at the time he/she was first interviewed and does not change even if the person moves. It is used in conjunction with the person number to uniquely identify people within the sample unit. This variable is the number 011 for all original sample people. For additional sample people, this variable can be 011 or greater than 011 depending on the current address ID of the unit which the new sample person joined. For example, a person who moves into a household with an ADDIDE0 of 011 will receive an PP_ENTRY of 011. Whereas, a person who enters a household spawned in 2000 (ADDIDE0=141) will have a PP_ENTRY of 141.

The person numbers represent the wave the person entered the sample. Person numbers such as 0101 and 0102 are assigned in Wave 1 of the SIPP. Person numbers such as 0201 and 0202 are assigned to people added to the roster in Wave 2 of the SIPP. People added to the roster in the 2000 SPD have person numbers 1401 and 1402 and following sequentially as needed. People added to the roster in the 1999 SPD have person numbers 1301 and 1302 and following sequentially as needed. People added to the roster in the 1998 SPD have person numbers 1201 and 1202 and following sequentially as needed. People added to the roster in the 1997 SPD Bridge have person numbers 1101 and 1102 and following sequentially as needed.

The address ID is a three digit code that identifies the various household addresses associated with the same sample unit identification number. The first two digits of the address ID code indicate the wave or year in which that address was first interviewed. The third digit sequentially numbers that split into multiple households and have the same address ID. The address ID code is 011 for all sample addresses that are the same as in Wave 1 of the 1992 and 1993 SIPP panels. As the SIPP sample people move to new addresses, new address ID codes are assigned. For example, any new address to which sample unit members moved during the 2000 SPD is numbered from 141 to 149.

Households are defined at each cross sectional time point in this file: 1992, 1993, 1994, 1997, 1998, 1999, and 2000. If you would like to look at the household configuration in any given year, use the IHHKEY variable appropriate for that year. For example, to look at 1999 household structure, use IHHKEY99. The IHHKEY variables are a concatenation of SIPP_PNL; PP_ID and ADDID for the specific year. For example, IHHKEY99 is SIPP_PNL; PP_ID and ADDIDE9.

File Structure

The file is a rectangular person-level file. Household and Family level variables are included on the record for every person in the household.

Edits

The second longitudinal file is a fully edited and imputed data set.

Topcoding of Variables

To protect against the possibility that a user may recognize the identity of a SPD respondent with a very high income, income from every source is topcoded so that no individual amounts above \$100,000 are revealed. This topcode amount is consistent with the topcoding for the 1992 and 1993 SIPP panels. Other economic variables are topcoded at the 97 percentile level, meaning the top 3 percent of values are not disclosed. Variables that have been topcoded will have a "T" in the second to the right position. NOTE: Aggregate amounts (PTOTVLR, PERNVLR, etc.) use topcoded amounts as input.

We topcode age by bottom coding year of birth. For the Second Longitudinal SPD file no age will be older than 88.

Weighting

The SPD panel universe is initially represented by all of the original sample people from the SIPP Panels 1992 and 1993. Each and everyone of these original sample people has an initial weight. Due to nonresponse in both the SIPP and the SPD, and a sample cut in the SPD in 1998, the initial weights of the respondents are adjusted to significantly compensate for the bias. Through the weighting process, the SPD panel universe is represented by the original sample people who have positive weights. The SPD second longitudinal file is the same as the SPD first longitudinal file except that it also includes the data collected from the SPD 1999 and 2000. Thus, like the SPD first longitudinal file, only part of the original sample people from the SIPP Panels 1992 and 1993 are included on the second longitudinal file because the SPD Bridge sample did not include all of the original sample people. Namely, the SPD Bridge (1997) sample which is the starting sample for the SPD consists only of the sample households that were interviewed in the last interview waves of the SIPP Panels 1992 and 1993. Thus, for those original sample people who were not included on the SPD second longitudinal file, their characteristics needed for the weighting process are obtained from the cross-sectional and longitudinal files of the SIPP Panels 1992 and 1993.

There are three weights provided for sample people on the SPD second longitudinal file. These three weights are referred to as the traditional longitudinal panel weight, the 1999 quasi-longitudinal panel weight, and the 2000 quasi-longitudinal panel weight.

The sample people who meet the following definition have a positive *traditional longitudinal* panel final weight:

- 1) Lived in a 1992/1993 SIPP panel household during Wave 1 interview.
- 2) Were interviewed (self, proxy, or imputed) in each and every reference month in SIPP.
- 3) Were interviewed (self, proxy, or imputed) in 1997 SPD Bridge and 1998, 1999, and 2000 SPD.

All the other sample people included on the file have zero traditional longitudinal panel final weights.

The sample people who meet the following definition have a positive *1999 quasi-longitudinal* panel final weight:

- 1) Lived in a 1992/1993 SIPP panel household during Wave 1 interview.
- 2) Were interviewed (self, proxy, or imputed) in each and every reference month in SIPP.
- 3) Were interviewed (self, proxy, or imputed) in 1997 SPD Bridge and 1999 SPD, but may have been or may not have been interviewed in either or both the 1998 and 2000 SPD.

All the other sample people included on the file have zero 1999 quasi-longitudinal panel final weights.

The sample people who meet the following definition have a positive *2000 quasi-longitudinal* panel final weight:

- 1) Lived in a 1992/1993 SIPP panel household during Wave 1 interview.
- 2) Were interviewed (self, proxy, or imputed) in each and every reference month in SIPP.
- 3) Were interviewed (self, proxy, or imputed) in 1997 SPD Bridge and 2000 SPD, but may have been or may not have been interviewed in either or both the 1998 and 1999 SPD.

All other sample people included on the file have zero 2000 quasi-longitudinal panel final weights.

To provide a means for estimating the annual or calendar characteristics of young children based on the data on the SPD second longitudinal file, the characteristics of the non-original sample children *born after* Wave 1 of the SIPP Panels 1992 and 1993 must be also taken into account. To enable an accounting for the characteristics of these non-original sample children in any annual estimates, positive weights are assigned to a cohort of these non-original sample children. For each non-original sample child aged eight and below in 2000 if originated from the SIPP Panel 1992, or aged seven and below in 2000 if originated from the SIPP Panel 1993, having a designated parent that is an original sample person with positive traditional longitudinal (1999 quasi-longitudinal, 2000 quasi-longitudinal) weight, then a positive weight is assigned to the child based on the procedure described in more detail below. The weights of these non-original children together with the traditional longitudinal (1999 quasi-longitudinal, 2000 quasi-longitudinal) weights of the original sample adults and children enable the users to make annual estimates of young children's characteristics. Thus, we refer to these three SPD longitudinal annual weights as the traditional longitudinal annual weight, the 1999 quasi-longitudinal annual weight, and the 2000 quasi-longitudinal annual weight which are derived from the tradition

longitudinal panel final weight, the 1999 quasi-longitudinal panel final weight, and the 2000 quasi-longitudinal panel final weight, respectively.

The procedure used for calculating the three longitudinal panel final weights and the three corresponding longitudinal annual weights of the sample people on the second longitudinal file is briefly described in the eight steps provided below. Refer to section 4 (Glossary) of the Technical Documentation for definitions for the key terms used in the eight steps of weighting described below.

STEP 1 – March 1993 was chosen as the reference point in time (control date) for the SPD panel universe used for measuring the effect of the Welfare Reform. Namely, the SPD panel universe consists of persons (including children) residing in the United States households and persons living in group quarters in March 1993. (Note that persons living in military barracks and institutions, such as prisons and nursing homes, are excluded.) The SPD panel universe is represented by combining the SIPP Panels 1992 and 1993 into one sample. The effect of the Welfare Reform can be assessed based on the various longitudinal (time dependent) characteristics of the people in the SPD panel universe.

STEP 2 – An initial weight was assigned to each original sample person (including children). An original sample person is a person who at the time of the SIPP Wave 1 interview resided in an interviewed sample household or group quarters. The inverse of this initial weight represents the probability of an original sample person residing in an interviewed Wave 1 sample household in either the SIPP Panel 1992 or 1993, depending on which SIPP panel he/she originally belonged.

Every sample person who was not an original sample person was assigned an SPD traditional longitudinal, 1999 quasi-longitudinal, and 2000 quasi-longitudinal panel final weights of zero.

For sample children aged eight or less if spawned from the SIPP Panel 1992 and aged seven or less if spawned from the SIPP Panel 1993 (as of March 2000) who was not an original sample person, they are assigned annual weights according to the procedure provided in Step 8. Note that this group of non-original sample persons nominally represents the children born after the inception of the SPD panel universe.

STEP 3 – Since each of the SIPP Panels 1992 and 1993 (samples) was a nationally representative sample by itself and their sample sizes are approximately the same, combining them into one sample reduces the weight of each panel sample person by half.

STEP 4 – Original sample persons were then divided into two cohorts as follows: the first cohort consists of the original sample persons who are qualified as longitudinally interviewed between Wave 1 of the SIPP Panels 1992 and 1993 up to the SPD Bridge. The second cohort consists of the original sample persons who are not qualified as longitudinally interviewed between Wave 1 of the SIPP Panels 1992 and 1993 up to the SPD Bridge. The first group is referred to as the SPD Bridge longitudinally interviewed. The second group is referred to as the SPD Bridge longitudinally non-interviewed.

The SPD Bridge non-interview adjustment served as a means of appropriately transferring the weights from the SPD Bridge longitudinally non-interviewed to the SPD Bridge longitudinally interviewed with

similar demographic and economic characteristics¹. Sample persons were classified based on the following variables: age, race, ethnicity, education, labor force status, employment status, income types, assets, and income level.

Every SPD Bridge longitudinally interviewed person was assigned a non-interview adjustment factor to inflate their initial weights.

Every SPD Bridge longitudinally non-interviewed person was assigned a traditional longitudinal, 1999 quasi-longitudinal, and 2000 quasi-longitudinal panel final weight of zero, and excluded from further processing.

STEP 5 – Due to budget constraints, some sample household units were cut² in the SPD 1998. SPD Bridge longitudinally interviewed persons were divided into two cohorts. The first consists of those belonging to the sample households selected into the SPD 1998 sample, and we call this group “the selected SPD Bridge longitudinally interviewed.” Those belonging to the sample households not selected into SPD 1998 sample are called “the not-selected SPD Bridge longitudinally interviewed.”

A sample cut factor was assigned to the selected group in accordance with the household demographic characteristics provided in the document referred to in Footnote 2. The adjustment served as a means to appropriately transfer the weights from the not-selected SPD Bridge longitudinally interviewed to the selected SPD Bridge longitudinally interviewed.

Every not-selected SPD Bridge longitudinally interviewed person was assigned an SPD traditional longitudinal, 1999 quasi-longitudinal, and 2000 quasi-longitudinal panel final weight of zero and excluded from further processing.

STEP 6 – For each of the three panel weights, the selected SPD Bridge longitudinally interviewed persons were divided into two cohorts.

For each panel weight, the first cohort consists of the selected SPD Bridge longitudinally interviewed persons who do qualify as interviewed. The second cohort consists of the selected SPD Bridge longitudinally interviewed persons who do not qualify as interviewed. A list of requirements that must be met to qualify as interviewed for each of the panel weights was given earlier in the weighting section.

For each panel weight (traditional, 1999 quasi-longitudinal, and 2000 quasi-longitudinal), a second non-interview adjustment procedure was independently performed in the same manner as the first non-interview adjustment in Step 4. Namely, this second adjustment served as a means to

¹A full detailed specification for calculating adjustment factors can be obtained from the memorandum dated January 4, 2002 on “Weighting Procedure for the SPD Second Longitudinal File” for C. E. Bowie from A. R. Tupek.

² The sample cut procedure and the sampling rates (sample cut factor) for each of the six household strata of the SPD Bridge sample can be obtained from the memorandum dated January 22, 1999 on “1998 SPD: Sampling Specifications” for C. E. Bowie from L. S. Cahoon.

appropriately transfer the weights from the non-interviewed to the interviewed with similar demographic and economic characteristics as classified in Step 4.

For each panel weight, those people who qualify as interviewed were assigned a second non-interview adjustment factor to inflate their weights.

For each panel weight, those people who qualify as non-interviewed were assigned a weight of zero and excluded from further processing.

STEP 7 – A ratio adjustment procedure was independently performed to finish each panel weight (traditional, 1999 quasi-longitudinal, and 2000 quasi-longitudinal). The ratio adjustment procedure involved raking to match a set of SPD population estimates with a corresponding set of control (benchmark) population estimates at a representative control date. The control population estimates were available for the classifications based on the following demographic variables: age, sex, race, ethnicity, householder living with or not living with relative, non-householder related to or not related to householder. As described in Step 1, the representative control date for the SPD panel universe was March 1993. The control population estimates are from the CPS population estimates produced for March 1993. The ratio adjustment procedure served as a means to improve the population coverage of the SPD sample. The classification of the sample persons into groups for the ratio adjustment also served as a post-sampling stratification. Therefore, as a byproduct of the ratio adjustment, the variance estimates of the estimates based on the SPD sample are generally improved as well.

The three sets of positive weights obtained after the ratio adjustment were the final weights for the SPD traditional longitudinal panel interviewed persons, the 1999 quasi-longitudinal panel interviewed persons, and the 2000 quasi-longitudinal panel interviewed persons.

STEP 8 – Creation of the traditional longitudinal, 1999 quasi-longitudinal, and 2000 quasi-longitudinal annual weights was done in two parts. For the first part, all sample people except the non-original young sample children, the traditional longitudinal, 1999 quasi-longitudinal, and 2000 quasi-longitudinal annual weights were set equal to their traditional longitudinal, 1999 quasi-longitudinal, and 2000 quasi-longitudinal panel final weights, respectively.

For the second part, each non-original young sample child (eight or less) whose designated parent is an original sample person, three intermediate weights were created by giving them their designated parent's traditional longitudinal, 1999 quasi-longitudinal, and 2000 quasi-longitudinal annual weights, respectively.

Each of the three intermediate weights of these weighted non-original children was independently adjusted by ratio adjusting their weighted totals to various controls (classified by sex, race, and ethnicity) for June 2000. Once the ratio adjustment factors were applied to the intermediate weights, these non-original children were assigned their final traditional longitudinal, 1999 quasi-longitudinal, and 2000 quasi-longitudinal annual weights. Their application is described in the next section.

Longitudinal Weight Associated with Non-original Sample Children

The traditional longitudinal, 1999 quasi-longitudinal, and 2000 quasi-longitudinal *annual* weights are for calculating annual or calendar year estimates.

The traditional longitudinal annual weight is positive only for original sample people who provided a self or proxy, or whose data were imputed, in each and every reference month for SIPP, SPD 1997 Bridge, SPD 1998, SPD 1999, and SPD 2000, and for non-original sample children (aged eight or less) born after the SIPP 1992/1993 Wave 1 interview whose designated parents are original sample people and have positive traditional longitudinal annual weight.

The 1999 quasi-longitudinal annual weight is positive only for original sample people who provided a self or proxy, or whose data were imputed, in each and every reference month for SIPP, SPD 1997 Bridge, and SPD 1999, and for non-original sample children (aged eight or less) born after the SIPP 1992/1993 Wave 1 interview whose designated parents are original sample people and have a positive 1999 quasi-longitudinal annual weight.

The 2000 quasi-longitudinal annual weight is positive only for original sample people who provided a self or proxy, or whose data were imputed, in each and every reference month for SIPP, SPD 1997 Bridge, and SPD 2000, and for non-original sample children (aged eight or less) born after the SIPP 1992/1993 Wave 1 interview whose designated parents are original sample people and have a positive 2000 quasi-longitudinal annual weight.

The annual weights of the weighted non-original sample children together with the annual weights of the original sample adults and children associated with the traditional longitudinal (1999 quasi-longitudinal, 2000 quasi-longitudinal) panel weight enable the users to make annual estimates of young children's characteristics. When calculating an annual estimate of a characteristic of young children, the portion of the estimate contributed by the weighted non-original sample children must be calculated based only on the weighted non-original sample children born in or prior to the calendar year under consideration. The non-original sample children weights, for those aged eight or less, are intended only to approximate growth in the universe. Some caution should be given when interpreting results for children aged 8 or less. The annual estimates of the characteristics of these children for a calendar year closer to 2000 are likely to be more accurate than those for a calendar year further away from 2000. This is because all three types of annual weights for these children were adjusted to improve the population coverages for June 2000.

Estimation of Person Characteristics

Some basic types of longitudinal estimates that can be constructed using the longitudinal weight are described below in terms of estimated numbers. Of course, more complex estimates, such as percents, averages, and ratios can be constructed from the estimated numbers. The SPD longitudinal weights can be used to construct the following types of longitudinal estimates:

1. The number of people who have ever experienced a characteristic or situation during a given time. (For example, the number of people who experience unemployment during 1999.) To construct such an estimate, sum the weights over all people who possessed the characteristic of interest at some point during the time period of interest.
2. The amount of a characteristic accumulated by people during a given time. (For example, the amount of unemployment compensation received by unemployed people during 1999.) To construct such an estimate, compute the product of the weight times the amount of the characteristic and sum this product over all appropriate people.

Longitudinal Research Using This File

The SPD is designed exclusively to support longitudinal analysis of the impact of welfare reform. The Second Longitudinal SPD data can be linked to the 1992 and 1993 SIPP Panel and Cross-sectional files, the 1997 SPD Bridge, the 1998 SPD file and the First Longitudinal SPD file using the following variables:

SIPP Panel Number	SIPP_PNL
Sample Unit Identification Number	PP_ID
Entry ID	PP_ENTRY
Person Number	PP_PNUM
Address ID	ADDIDE(2,3,4,7,8,9,0)

A Longitudinal weight is assigned to 100-level persons with full panel weights in the 1992/1993 SIPP file who were successfully interviewed in 2000. Note the full panel weights on the SIPP files were assigned to 100-level people who were interviewed for the entire time they remained in the SIPP universe or who had at most 1 missing interview bounded by successful interviews.

The SPD data represent the behavior and characteristics of people in two fixed cohorts. One cohort represents the population as it existed in March 1992 from the 1992 panel of the SIPP and the other population as of March 1993 from the 1993 panel. This is not a traditional longitudinal survey in that it does not repeat the same measure throughout the period. Each round of the SPD interviewing, beginning with the Bridge in 1997, does not represent cross-sectional snapshots of the U.S. population. It does offer insight into what the current condition is of the people in the U. S. population in the early 1990s just prior to welfare reform.

The core information common throughout the data collection (although reference periods and question phrasing vary) consists of basic demographics, labor force activity, income, and program participation. The longitudinal file consists of data collected using three different instruments, each with variations in wording and context.

Obtaining Access to SAQ Data

The SAQ data (adult and adolescent) will only be available through the Census Bureau's Research Data Centers. Contact the Research Data Center staff for the requirements for reviewing the SAQ data.

GLOSSARY

This glossary includes definitions of terms that apply to the Survey of Program Dynamics (SPD).

- 401K Plan*** A 401K plan is a retirement qualified profit sharing or stock bonus plan that contains a cash-or-deferred arrangement. Elective contributions are excluded from the employee's gross income for the year in which they are made and are not subject to taxation until distributed. Retirement payments from 401K's should be considered as "regular retirement income".
- Additional People*** People who join original sample households, as well as anyone else who lives with them in that or any future household. An additional person remains in the survey until he or she no longer shares a household with the original sample person.
- Address ID*** The three-digit address ID code identifies each household associated with the same sample unit identification number. The first two digits of the address ID code indicate the wave in which that address was first assigned for interview. The third digit sequentially numbers multiple households that have the same serial number. The address ID code is 011 for all sample addresses that are the same as in Wave 1 of the 1992 and the 1993 SIPP panels. As the SIPP sample people move to new addresses, new address ID codes are assigned. For example, any new address to which sample unit members moved during Wave 4 of the SIPP is numbered from 040 to 049.
- Address Unit*** Often referred to as "household", this collection unit is a person or group of people living at the same address at the time of each interview. The address unit consists of one person living alone, a group of unrelated individuals, or one or more families
- Adult*** Household members 15 years old or older. Information is collected for each adult.
- AFDC or ADC*** The Aid to Families with Dependent Children (AFDC) or Aid for Dependent Children (ADC) program has been abolished as a result of the 1996 Welfare Reform Act. Each state now has its own welfare program. Some states use the generic name, Temporary Assistance to Needy Families (TANF). Most states have a unique name. All references to AFDC/ADC in the instrument have been

changed to "public assistance". *See public assistance for more information.*

Age

Date of birth is recorded to compute the age for subsequent interviews or reference months.

The public use microdata files include year of birth. For the SIPP 1992 panel, year of birth is bottom coded at 1910 to maintain confidentiality. For the SIPP 1993 panel, year of birth is bottom coded at 1911 to maintain confidentiality. Similarly, the top code for age is 88.

Aid to Families With Dependent Children

See AFDC

Alimony Payments

Support payments received from a former spouse. These payments may be received directly from the former spouse or through the courts.

Annuity

Annuities are purchased by people at retirement or during the person's working years to guarantee a regular income after retirement. Include all such annuities purchased by the person, except any already reported as part of the person's employee pension.

Armed Forces

People in the Armed Forces include any members of the United States:

- Army, Navy, Air Force, Marines
- Coast Guard
- Reserve component of any of the above organizations on active duty status for several months. This includes the 4-6 month period served in connection with the provisions of the Reserve Forces Act of 1955.
- Commissioned officers of U. S. Public Health Service who are attached to any branch of the Armed Forces (Army, Navy, Air Force).
- National Guard in Federal Service (when all or part of their service was during a period when their unit was blanketed into the regular forces by Presidential Order). This includes the 6 month active duty served by National Guardsmen.

- Cadets in the United States military academies (West Point, Naval Academy, Air Force Academy, and the Coast Guard Academy).

Exclusions:

- People who have served in the Armed Forces of foreign countries.
- People whose only service was in the Coast Guard Temporary Reserve.
- Employees of the Merchant Marines, Maritime Commission, American Field Service, and civilian employees of the Department of Defense.
- People whose only service was in a National Guard unit blanketed into the regular forces by Presidential Order and who did not serve the 4-6 months of active duty in connection with the provisions of the Reserve Forces Act of 1955.
- People in short periods of active reserve training or who attended weekly reserve meetings.
- Reserve Officer's Training Corps (R. O. T. C).
- VISTA or Peace Corps

***Armed Forces
Vocational
Rehabilitation
Program***

This program provides for veterans who are in need of vocational rehabilitation to overcome a handicap resulting from a service-connected disability. Veterans may receive up to 48 months of education or training to restore their employability "unless a longer period is prescribed by a VA Administrator."

The full cost of their training is paid by the Department of Veterans Affairs (VA). In addition, they receive a subsistence allowance while in training and for 2 months after rehabilitation. These disabled veterans are provided counseling assistance in selecting a suitable objective and planning a program of rehabilitative training. While in training they are provided continuing help by vocational rehabilitation specialists. Necessary employment assistance is provided following completion of training.

Asset Income

Asset income for the SPD is collected on an annual basis. The focus is on income earned from each asset during the reference period, not on the value of the asset.

***Asset and Asset
Ownership***

The SPD collects ownership information for a variety of asset types. These include savings and interest-earning checking accounts, certificates of deposit (CD), money market and mutual funds, stocks, rental property, and other such assets. The value of home and information about automobile ownership is also collected.

If assets are owned jointly by two household members (for example, a husband and wife), the SPD collects this information from one spouse. This prevents double-counting of joint assets. Respondents report income from assets on an annual basis, or select from a range that represents the amount of interest earned.

Assets and Liabilities

Assets and Liabilities are included to broaden our understanding of resources available to households and individuals. These data allow an examination of economic well-being beyond that which can be observed through the study of current income. Participation in many federal programs is contingent upon not just the basic income level, but upon the assets and liabilities of the individual or household as well.

Some information on assets and liabilities is gathered in the "Amounts" sections. The questions ask for the value of certain assets such as the balance in checking accounts, ownership of and value of stocks and bonds, receipt of interest dividends and royalties and rental income. Respondents are also asked about outstanding debts and obligations, such as unpaid bank loans or credit card bills.

***Below Market
Interest Rate***

Under the Federal Housing Authority's "below market-interest rate" programs, the amount of interest paid on the mortgage by the project owner is reduced so that the owner can charge rents that can be afforded by families and individuals of low and moderate income. The FHA pays the mortgage lender the difference between the interest payment required at the market rate and the lower interest payment made by the owner.

***Bonuses, non-
military***

Payments made by employers to employees as supplements to wages and salaries; for example, bonuses based on a percentage of the profits and cash from employers to employees.

Business

A business exists when one of the following conditions is met:

- the person has invested substantial capital in machinery or equipment used by him/her in conducting the business
- an office, store, or other place of business is maintained, or
- some public advertising of the business or profession exists

Computer Assisted Interviewing (CAI)

A collection of methods for using computers to assist with data collection.

Certificates of Deposit or Other Savings Certificates

A certificate of deposit or other savings certificate is an investment in which people invest money for a fixed period of time usually at a fixed interest rate. These accounts are available at banks, savings and loans, and credit unions.

Child care or day care center

A child care center provides adult supervision and care for children under the age of 14.

CHAMPUS/Tricare

"CHAMPUS" (Civilian Health and Medical Program of the Uniformed Services) is a health benefit program for all of the armed forces. It will be replaced by Tricare. The following is a list of people covered by CHAMPUS:

- Husbands, wives, and unmarried children of active duty service members
- Retirees, their spouses and unmarried children
- Not remarried husbands and wives and unmarried children of active duty or retired service members who have died
- Husbands, wives and unmarried children of reservists who are ordered to active duty for 30 days or longer (They are covered only during the reservist's tour.)
- Not remarried divorcees/divorces, without other health coverage, who were divorced after February 1, 1983, after at least 20 years of marriage to a service member who was on active duty during those 20 years
- Unmarried children up to age 21 (21 and over if severely handicapped and to age 23 if in school full time) are covered
- Children (including stepchildren who are adopted by the sponsor) are still covered even if the spouse gets divorced or remarried. A stepchild who was not adopted by the sponsor and leaves the sponsors household is no longer covered

CHAMPVA

CHAMPVA (Civilian Health and Medical Program, Department of Veterans Affairs) is a medical program through which the VA helps pay for medical services obtained from civilian sources by eligible dependents and survivors of veterans. The following is a list of people covered by CHAMPVA:

- The spouse or child of a veteran who has a permanent, total disability, resulting from a service-connected disability
- The surviving spouse or child of a veteran who died as the result of a service-connected disability, or who at the time of death had a total disability, permanent in nature, resulting from a service-connected disability

The term "child" refers to an unmarried child who is:

- A legitimate child, a legally adopted child, a stepchild who is a member of the veteran's household or who was a household member at the time of the veteran's death, or an illegitimate child
- A child who is 18 years of age or older, but incapable of self-support because of a mental or physical incapacity that existed before the age of 18, or
- A child who is under the age of 23 and is in school

Child Support Payments

Child support is money paid to the custodial parent (that is, for example, the respondent) by the non-custodial parent for the support of their child(ren). The payment may be made directly to the respondent or indirectly through the court system or other public agency, sometimes called "pass-through payments."

When a public agency is involved with child support collection, it is particularly important that it not be confused with any government-administered programs such as other public assistance (formerly known as AFDC), food stamps, general assistance, WIC, school lunches, or breakfasts.

Chronic Condition

A condition marked by long duration of frequent occurrence. One that is always present or constantly vexing, weakening, or troubling.

Citizens of Foreign Countries

Citizens of foreign countries staying at the sample unit are interviewed if:

Temporarily in the United States

- They are not living on the premises of an embassy, ministry, legation, chancellery, or consulate or
- They are not merely visiting or traveling in the United States

COBRA

COBRA makes it possible for certain workers and their families to retain for either 18, 29 or 36 months the health insurance benefits they had when they were covered under an employer's group health insurance plan. Named for the Consolidated Omnibus Budget Reconciliation Act, which contains the key provisions, COBRA provides for continuation of health insurance benefits available to the employee or conversion to an individual or individual family health insurance policy. After reaching a certain age, a dependent can be covered for a period of up to 36 months. A worker terminated from employment can be covered for up to 18 months. In the SPD, COBRA usage is considered insurance through an employer or former employer.

College/School Educational Assistance

Colleges offer many types of aid to students, and also act as "pass through" agents for public and private aid.

College Work-Study - This program provides financial assistance to students by placing them in on-campus jobs that pay at least the minimum wage. Part of the wage is often paid by the employer, which may be the college or another organization. The rest of the wage is subsidized through funding provided by the federal government and administered by the college or university financial aid office.

Tuition Remission - Many private schools offer lowered tuition to students from families with income and assets below a certain threshold. Some students pay less than the "full" tuition.

Teaching or Research Assistantship - Teaching or research assistantship are usually offered to graduate students or, sometimes, advanced undergraduates as a form of support. Paid work in laboratories or teaching by students pursuing a degree fall under this category.

Commissions

Money received by a person for transacting business for another person or corporation. In some occupations, such as sales clerks, truck drivers, and launderers, commissions may constitute a large portion of wages or salary.

Condominium and Association Fees

Payments made by the residents of most condominium buildings and some residential communities for property management. The fees are sometimes included in the rent or mortgage payment.

Confidentiality

The SPD is authorized and protected by Title 13, Section 182, of the U.S. Code. This means that the Census Bureau is responsible for protecting the confidentiality of all individual information collected. The term confidentiality refers to the guarantee that is made to individuals who provide survey information regarding disclosure of that information to others, as well as the uses of that information. No other government agencies such as the FBI, IRS, and CIA have access to identifiable information collected by the Census Bureau.

Information is made available to the public and other data users only in the form of statistical summaries, tables, and microdata files, with no individuals identified. The Census Bureau does not publish data if the number of contributors is small enough to identify individuals from the data. Unauthorized disclosure of individual information by a sworn Census Bureau employee is punishable by a fine of up to \$5,000 or imprisonment of up to 5 years, or both. A notice of confidentiality is contained on the Advance Letter to respondents.

Coverage Unit

See Housing Unit.

Cross-sectional

Data for only a single collection period.

Data Suppression

Data are suppressed to protect the confidentiality of survey respondents and to ensure that respondents cannot be identified. Confidentiality is accomplished by blanking, imputing, recoding, top coding and swapping data items.

Day care or child care center

A child care center is a center providing adult supervision and care for a number of children under the age of 14.

Dependents' and Survivors Educational Assistance Program

See Veterans' Educational Assistance.

Designated Parent

In married couple families, the mother is the designated parent and normally responds for all children related questions. If the mother is not available for interview, a proxy response from the father is

acceptable. In single parent families, the resident parent is the designated parent. If neither parent is resident in the household, the guardian is the respondent. If the designated parent is unavailable, a callback is scheduled.

Direct Access

A living quarters has direct access when the occupant can either enter his/her living quarters directly from the outside of the structure, or enter his/her living quarters from a common hall or lobby that is used by occupants of more than one unit. The hall or lobby must not be part of any unit and must be clearly separate from all units in the structure. If the only entrance to a living quarters is through a room or a hall of another living quarters, then the living quarters does not have direct access.

Disability

For a person 15 years or older a disability is a physical or mental impairment that substantially limits one or more of life's major activities. In this survey we assess a person's functional limitations in a series of questions concerning the following:

- functional activities such as seeing, hearing and walking
- activities of daily living such as getting in and out of bed and bathing, and
- instrumental activities of daily living such as going outside the home

The SPD also identifies people with a work disability. A work disability is a physical, mental or other health condition which limits the kind or amount of work a person can perform. A work limitation may affect only the kind or amount of work the respondent can do, or it may prevent him/her from working altogether. Short-term illnesses or conditions are not work limiting. For example, a broken bone may keep a person from working for several weeks, but this would not constitute a work limitation. Pregnancy is not considered a work-limiting condition.

For children under 15 years old, the SPD assesses functional limitation in activities such as seeing, hearing, and walking as well as the following:

- presence of a developmental or learning disability.

- ability to perform age appropriate tasks (children under 6), and
- presence of behavioral or emotional problems (children 6-14).

Disability Income

Income that a household member received due to a health condition or other disability during the reference period (other than Social Security, SSI, or Veteran's compensation).

Domestic Workers

Workers in occupations concerned with tasks in and around a private household. They perform duties such as cleaning, washing, and ironing clothes, making beds, caring for children, planning meals, going to the market, and cooking.

Educational Assistance

Many students in 2-and 4-year colleges, universities, and various types of vocational and training institutions receive financial assistance in paying both tuition and living expenses. Assistance may be in the form of scholarships, grants, loans, college work-study, employer assistance (for example, employer-paid tuition payments), veterans' benefits, and other forms of aid from sources other than from students or their families to help students finance post-secondary education.

(For more information about specific programs, see entries under (1) College/School Educational Assistance, (2) Federal Educational Assistance, (3) Other Educational Assistance, and (4) Veterans' Educational Assistance.)

The following are specific examples of educational assistance:

- GI Bill
- Other Veterans Administration Educational Assistance Programs
- Survivors' and Dependents' Educational Assistance Program
- Armed Forces Vocational Rehabilitation Program
- Post-Vietnam Vocational Educational Assistance Program
- College Work-Study
- Pell Grant
- Supplementary Educational Opportunity Grants
- National Direct Student Loan
- Guaranteed Student Loan
- Job Training Partnership Act Training

- Employer Assistance
- Fellowship/Scholarship
- Other Financial Aid

Educational Attainment

Educational attainment codes are entered for each household member 15 years of age or older. They are as follows:

- (31) Less than 1st grade
- (32) 1st, 2nd, 3rd or 4th grade
- (33) 5th or 6th grade
- (34) 7th or 8th grade
- (35) 9th grade
- (36) 10th grade
- (37) 11th grade
- (38) 12th grade, no diploma
- (39) HIGH SCHOOL GRADUATE - high school DIPLOMA or equivalent (for example, GED)
- (40) Some college, but no degree
- (41) Diploma or certificate from a vocational, technical, trade or business school beyond the high school level
- (42) Associate degree in college Occupational/vocational program
- (43) Associate degree in college - Academic program
- (44) Bachelor's degree (For example, BA, AB, BS)
- (45) Master's degree (For example, MA, MS, MEng, MEd, MSW, MBA)
- (46) Professional School Degree (For example, MD, DDS, DVM, LLB, JD)
- (47) Doctorate degree (For example, PhD, EdD)

The following special situations also apply:

Junior high - If the person's highest grade was in "junior high," a determination of the equivalent in elementary grades (1-8) or high school grades (9-12) is made by the field representative (FR).

"Post-graduate" high school - For people who have attended "post-graduate" high school courses after completing high school, but have not attended college, a code of "39" is entered.

Equivalency tests - For people who pass a high school equivalency test (GED) or finished high school while in the Armed Forces, but did not attend college, a code of "39" is entered.

Miscellaneous school system - The entry represents the equivalent grade in the regular school system for a person who obtained a formal education through any of the following methods:

- Foreign schools
- Ungraded schools
- Home schools (children who are taught at home by their parents or by a paid tutor)
- Night schools or instruction by tutors (if such instruction was counted toward promotion in the regular school system).

People still in school - For people still attending school, educational attainment is the highest grade or level the individual completed (usually the grade attended the previous year), or the highest degree attained.

Summer status - For people who are on summer vacation or in school, the entry represents the grade or year they were enrolled in the previous school year, provided they completed that grade (not the grade or year they will attend in the fall or an uncompleted year).

The following situations are excluded:

Vocational or other trade schools - Education obtained at vocational schools, business schools or colleges, and other trade and specialized schools are not included unless a certificate has been awarded. The training must also take place after high school is completed, or at a level beyond high school.

Correspondence schools - Training received by mail from "correspondence" schools is not included unless the correspondence course counted toward promotion in a regular school.

"On-the-Job" training - Training received as "on-the-job" training is not included.

Adult Education Classes - Adult education classes are not included unless such schooling is being counted for credit in a regular school system. If a person is taking adult education classes but not for credit, he/she is not regarded as enrolled in a "regular" school. Which category the person fits into depends on whether or

not the schooling can advance a person toward an elementary school certificate, a high school diploma, or college degree.

Training under the Manpower and Training Act of 1962, Comprehensive Employment and Training Act (CETA), Job Training Partnership Act of 1983, or the Poverty Program - Most of the training under these acts consisted of courses at private vocational or trade schools or on-the-job training and was not in regular schools. However, if the training gave credit toward regular school, it is included. See further definition under "regular school."

Employer

Wage and salary workers: The employer is the person, company, corporation, or agency, who paid them. A change of occupation under the same payroll is not considered a different employer.

Self-employed workers: People who were self-employed the whole year, even though they may have changed their type of business, had one employer. If a person was self-employed, but closed his/her business and took a job with someone else, or if a wage and salary worker became self-employed, this person is recorded as having two employers.

Domestic workers: Individuals who work in and take care of people's homes.

- a person who was employed exclusively as a domestic worker or was an odd-job worker, such as gardeners, babysitters, and housekeeper is considered having one employer regardless of the number of different households the person worked (see below).
- a domestic or odd-job worker who moved between this type of job and something entirely different had two or three employers depending on the number of jobs employed at during the year.

Number of employers: People employed as domestics or odd-job workers, such as gardeners, babysitters, and housekeepers may regularly work for a number of people throughout the year. For these people, consider their type of work as their employer.

- one employer for a person who did housework for five different families all in 1996, even if each of the five families paid him/her for doing different tasks.
- two employers for a person who switched from doing

housework the first part of the year to painting houses the second part of the year.

- only one employer in the following type of case: a field representative who, during 1996, did CPS interviewing for 3 months, did not work at all for 6 months, and then did CPS interviewing again for another 3 months (example of only one job).

***Employer or Union
Temporary Sickness
Program***

This privately run program (usually established by an employer or union) pays benefits to people with temporary sickness or disability. This program is not connected with any government program.

Enrollment

See School Enrollment

Entry ID

The entry ID represents the address of the person at the time he/she was first interviewed and does not change even if the person moves. It is used in conjunction with the person number to uniquely identify people within the sample unit. This variable is the number 011 for all original sample people. For additional sample people, this variable can be 011 or greater than 011 depending on the current address ID of the unit which the new sample person joined. For example, a person who moves into a household with an ADDIDE0 of 011 will receive an PP_ENTRY of 011. Whereas, a person who enters a household spawned in 1998 (ADDIDE0=141) will have a PP_ENTRY of 141.

Estates and Trusts

Money received from the property or possessions of a deceased person. This money can be received on a regular basis (monthly, yearly) or may be received all at one time; for example, upon reaching a specific age. If the money is received all at once, it should be considered as a "lump sum payment."

Ethnic Origin

See Origin.

***Excluded Persons
Associated with the
Traditional
Longitudinal Panel
Weighting***

The excluded persons associated with the traditional longitudinal panel weighting consist of all the sample persons, including children, who were not qualified as a SPD Bridge longitudinally interviewed person, a SPD Bridge longitudinally non-interviewed person, a traditional longitudinal panel interviewed person, or a traditional longitudinal panel non-interviewed person.

By definition, all the non-original (200+ level) sample persons

were the excluded persons associated with the traditional longitudinal panel weighting. All these excluded persons are completely excluded from the traditional longitudinal panel weighting process. This amounts to setting the traditional longitudinal panel weight of everyone of these excluded persons to zero on the SPD second longitudinal file.

***Excluded Persons
Associated with the
1999
Quasi-longitudinal
Panel Weighting***

The excluded persons associated with the 1999 quasi-longitudinal panel weighting consist of all the sample persons, including children, who were not qualified as a SPD Bridge longitudinally interviewed person, a SPD Bridge longitudinally non-interviewed person, a 1999 quasi-longitudinal panel interviewed person, or a 1999 quasi-longitudinal panel non-interviewed person.

By definition, all the non-original (200+ level) sample persons were the excluded persons associated with the 1999 quasi-longitudinal panel weighting. All these excluded persons are completely excluded from the 1999 quasi-longitudinal panel weighting process. This amounts to setting the 1999 quasi-longitudinal panel weight of every one of these excluded persons to zero on the SPD second longitudinal file.

***Excluded Persons
Associated with the
2000
Quasi-longitudinal
Panel Weighting***

The excluded persons associated with the 2000 quasi-longitudinal panel weighting consist of all the sample persons, including children, who were not qualified as a SPD Bridge longitudinally interviewed person, a SPD Bridge longitudinally non-interviewed person, a 2000 quasi-longitudinal panel interviewed person, or a 2000 quasi-longitudinal panel non-interviewed person.

By definition, all the non-original (200+ level) sample persons were the excluded persons associated with the 2000 quasi-longitudinal panel weighting. All these excluded persons are completely excluded from the 2000 quasi-longitudinal panel weighting process. This amounts to setting the 2000 quasi-longitudinal panel weight of every one of these excluded persons to zero on the SPD second longitudinal file.

Family

The family is defined by the Census Bureau as two or more people living together and related by blood, marriage, or adoption. On this longitudinal file, economic and demographic data are summarized for each primary and unrelated sub-family unit and each unrelated individual. A primary family is the family containing the household reference person. An unrelated subfamily is a family that does not contain the reference person or

anyone related to the reference person.

Family Business (or Farm)

A business (or farm) run by a member of the household who is related to the respondent by marriage, blood, or adoption.

Family Day Care Home

A family day care home is an arrangement in which a provider takes care of two or more children *of different parents* in the *provider's home*. This does *not* include day care centers. It also excludes arrangements in which a sitter or nanny only takes care of one or more of this parent's children.

Family With Two or More Homes

Some families have two or more homes and may spend part of the time in each. For such cases, the "usual residence" is the place in which the person spends the largest part of the calendar year. Only one unit can be the "usual residence."

Farmers' Home Administration Rental Program

In rural areas and towns with a population under 20,000 outside metropolitan areas, or 10,000 inside metropolitan areas, the Department of Agriculture program offers rental assistance to tenants of rental units built under this direct loan program. The tenants pay 30 percent of their income and the FHA pays the remainder of the rent (up to a flexible ceiling determined by the difference between operating cost of the project and the cost of repaying the loan on the project).

Federal Civil Service or Other Federal Civilian Employee Pension

Federal employee retirement pensions are payments by the federal government to its retired and/or disabled civilian employees and their survivors. Civilian federal government employees usually worked in the U.S. Civil Service, but may also have been postal workers or former employees of other civilian branches of the federal government, such as the Federal Reserve Bank System, Foreign Service, Tennessee Valley Authority, and the Public Health Service.

Payments are made by U.S. Treasury checks or direct deposit to the person's bank account. Currently, most payments are made by check.

Payments are monthly and usually arrive in the first few days of the month. Military retirement pensions are not included.

Federal Educational Assistance

The federal government is a major provider of financial aid to college and university students. There are two major categories of aid — grants and loans.

1. Federal Grant Programs:

College Work-Study - This program provides financial assistance to students by placing them in on-campus jobs which pay at least the minimum wage. Part of the wage is often paid by the employer, which may be the college or may be another organization. The rest of the wage is subsidized through funding provided by the federal government and administered by the college or university financial aid office.

Pell Grant - Pell Grants, formerly known as Basic Educational Opportunity Grants (BEOG), are available to undergraduates enrolled in college at least half time. A student applies when entering college and the federal government notifies the student and the educational institution if awarded.

Supplemental Educational Opportunity Grants (SEOG's) - The Supplemental Educational Opportunity Grants (SEOG) are awarded to students on the basis of exceptional financial need. Like the Pell Grants, SEOGs are entirely federally funded, but they are awarded through the financial aid offices of approved educational institutions. The criteria for awarding them are, therefore, not nationally standardized. Students who receive SEOGs may receive Pell Grants as well.

National Science Foundation (NSF) Grants - These are competitively-awarded grants for advanced undergraduate and graduate study.

2. Federal Loan Programs:

Perkins National Direct Students Loans (NDSL) - The National Direct Student Loan Program (NDSL), now called the Perkins NDSL, differs from the Guaranteed Student Loan program in that funds are allocated to post-secondary institutions for the purpose of making long-term, low-interest loans to students with financial need. They are fully underwritten by the federal government. Repayment begins 9 months after leaving school.

Parent Loan for Undergraduate Students (PLUS) and Supplemental Loan for Students (SLS) - The Parent Loan for Undergraduate Students (PLUS) and the Supplemental Loan

for Students (SLS) programs provide educational loans either to parents for payment of their children's educational expenses, or directly to the student for his/her school expenses. The entire cost of the loan is underwritten by banking institutions. The main difference between PLUS/SLS loans and Stafford and Perkins Loans is that PLUS/SLS loan recipients must begin the repayment of their loan immediately. Stafford loans are partially underwritten by the government.

Supplemental Loan for Students (SLS) - The Supplemental Loan for Students (SLS) programs provide educational loans either to parents for payment of their children's educational expenses, or directly to the student for his/her school expenses. The entire cost of the loan is underwritten by banking institutions. Repayment begins immediately after leaving school.

Stafford Loan or Guaranteed Student Loan (GSL) - The Guaranteed Student Loan Program (GSL) provides low-interest loans to students attending institutions of higher learning and certain vocational, technical, business and trade schools. The principal of the loan is provided by participating lending institutions such as, banks and savings and loans; repayment of the loan currently begins 6 months after leaving school (although in the past this has been different), and is guaranteed by a state or private non-profit agency or it is insured directly by the U.S. Department of Education.

***Federal
Supplemental
Security Income
(SSI)***

See Supplemental Security Income.

***FHA Rent
Supplement Program***

Under this program the Federal Housing Authority (FHA) pays part of the rent for low-income families and individuals occupying certain types of HUD-assisted rental housing projects. To be eligible for assistance under the program, the family or individual must have an income below a certain maximum set for the area.

The family or individual is required to spend at least 25 percent of their income for rent. The difference between this amount and the rent charged for the unit occupied by the family or

individual, is paid by the FHA to the project owner. This FHA payment is known as the rent supplement payment.

Food Stamps

The food stamp program provides coupons or ATM cards for low-income households to purchase food. The food stamp program is a federal program, which is administered by state and local governments.

Foster Child Care Payments

Money paid by a state or local welfare office to a person in return for his/her providing care to children placed in his/her home by the local welfare department. Expenses incurred by the person caring for the children are included.

Full-time (school)

School enrollment is considered full-time when the course load meets a school's definition of "full time" or when the course load is the same as that of a student who pursues his or her studies as his or her only activity. If all students in a school combine studies with other activities generally recognized standards from other schools were used to make a decision as to what constitutes "full time."

Full-time (work)

A position is considered full time when the person works 35 hours or more per week at that position. A person who is regularly scheduled for under 35 hours may be considered full time in certain cases (for example, airline pilots and certain unionized jobs).

General Assistance or General Relief

State and local programs provide cash assistance to people not eligible for cash assistance, (formerly AFDC/ADC) or Supplemental Security Income (SSI), and to people awaiting enrollment in SSI. These programs are also available to people out of work who cannot qualify for unemployment insurance or whose benefits under that program are inadequate or have been exhausted. General assistance or general relief programs are often called by other names. Check with state or

local welfare offices to be sure of the correct title of the program in your locality.

General Income

General income information is collected for all people 15 years old and over and for children under 15 years of age if the income is received by an adult on their behalf. It includes any type of income except earnings and assets income. Examples include food stamps, all types of public assistance, pension and retirement

income, social security, and gifts from friends.

***G.I. Bill/VEAP
Education Benefits***

See Veterans' Educational Assistance.

Group Quarters

Group quarters are non-institutional housing units occupied by nine or more persons unrelated to the head and having shared kitchen facilities or common entrance. By definition, group quarters generally include rooming and boarding houses, college dormitories, convents, monasteries, and dwellings and family-type housing (excluding barracks) on military bases.

Gross Pay

Total earnings before deductions such as, income tax and health insurance.

Head Start

Head Start is a federally-funded preschool program organized to provide educational experiences for preschool children. The child care center receives Federal Head Start funding to pay for the cost of the child care; parents of the children do not pay anything.

Health Insurance

A respondent is covered by health insurance if the person has a health insurance policy or is covered by a policy in his/her spouse's or parent's name. A private health insurance plan is obtained through the place of employment (an employer, union, or former employer) or from a private health insurance provider or company. This does not include plans that provide only dental care. The respondent can be covered by a government health insurance program, such as Medicare, Medicaid, or CHAMPUS/Tricare.

Hispanic Persons

A Hispanic (Spanish) person is a person who has one of the following ethnicities: Mexican American, Chicano, Mexican (Mexicano), Puerto Rican, Cuban, Central or South American, and other Spanish.

Note that, in accordance with the weighting specifications, Spanish population estimates do not include the Spanish sample persons in the military not living in barracks. Instead, they are treated as if they were non-Spanish.

Hot Deck

A hot deck is a tool used to impute missing data (see Imputation). The hot deck is usually a multi-dimensional array of values used in imputation. For example, if we want to create a hot deck to impute marital status we might define an array "MS" on three dimensions, where those dimensions are defined by the variables sex, age, and

race.

Each person on the data set who has an unreported marital status is assigned a marital status from the array.

MS (missing)=MS (Sex, Age, Race)

Each person on the data set who has a reported marital status is used to update or refresh the hot deck, that is, the reported value replaces the value stored in the hot deck.

MS (Sex, Age, Race)=MS (reported)

This keeps the values in the hot deck current and relevant to the data set. This means that people receiving an imputed value for a data item, in this case marital status, will be assigned the same value as someone else with some similar characteristics, in this case someone of the same sex, age group, and race.

Householder

Householder is also known as the "reference person." The reference person is the person in whose name the home is owned or rented. If the house is owned jointly by a married couple, either the husband or the wife may be listed as the "reference person."

Household Members

Individuals whose usual place of residence at the time of interview, is the sample unit and those people staying in the sample unit who have no usual place of residence elsewhere (URE).

Households

Households, defined each interview period based on people sharing an address are synonymous with address units. However, household composition is not explicitly collected. Instead, it is inferred from the

interviews conducted at each address, based on information obtained regarding people entering and leaving the address.

***Housing for Elderly -
- Direct Loan
Program***

Under this program (also known as the "Section 202" program), HUD makes 100 percent loans for a maximum term of 50 years to nonprofit organizations. This housing is for older people with incomes too high for public housing, but too low to pay rent in the private housing market.

The low-interest payments permit nonprofit organizations to charge lower rents. Churches, labor unions, fraternal

organizations, and civic clubs are generally the owners of these projects.

Housing Unit

A group of rooms or a single room occupied as separate living quarters or intended for occupancy as separate living quarters. A housing unit may be occupied by a family or one person. A housing unit may also be occupied by two or more unrelated people who share the living quarters.

***Housing Unit
Classification Items***

The following items are used to determine housing unit classification.

- What is your exact address?
- Is this also the mailing address?
- What is the housing unit's geographic location (movers only)?
- Classification of living quarters.
- How many housing units, both occupied and vacant, are there in the structure?
- Tenure of the unit.
- Characteristics of the unit (in subsidized housing).

***Housing Units Not
Within Structures***

Possible housing units not located within structures include trailers, tents, boats, cars, buses and caves. Before a unit is listed, it must meet the housing unit definition. If a trailer or tent, houseboat or yacht, converted car, bus, or railroad boxcar is either occupied or intended for occupancy as a separate living quarters on a site, it is a housing unit. Houseboats and yachts used only for vacations or overflow sleeping quarters are not housing units.

***Housing Units
Within Structures***

Double or duplex houses, row houses, townhouses, multi-unit structures, and housing units that occupy the top portion of nonresidential structures.

Imputation

The process of determining a missing characteristic based on an individual's social, economic, and demographic characteristics. In general, an imputation procedure enhances the usefulness of the data. It simplifies processing for the microdata user by eliminating "not reported" categories. It gives a user the ability to work with a more complete data set. Statistically, there are advantages and disadvantages to the use of imputed data.

Incidental or Casual Earnings

Earnings not received on a regular basis, for example, mowing a person's yard or babysitting weekly. These earnings are usually unplanned and sporadic.

Income Assistance From a Charitable Group

Includes cash assistance given by a church, synagogue, social welfare group, or some other charitable non-profit organization. Excluded are items such as meals, clothing, or a place to sleep, which are "in-kind" types of charity.

Income From Roomers or Boarders

Includes all money received from any roomers or boarders. Expenses incurred by the respondent (landlord) are not deducted.

Incorporated business

A business that has undergone the legal process of incorporating, according to the laws of the state in which the incorporation took place. Such businesses have the abbreviation "Inc." or "Ltd." after the company name.

Indian Assistance Program

There are a number of income-assistance programs for Native American Indians, which are administered by the Bureau of Indian Affairs. To be eligible for these programs a person must be a registered member of a tribe and live on or near an Indian reservation, and be ineligible for both state cash assistance (formerly AFDC/ADC) and SSI. There are some minor exceptions to this rule in Oklahoma and Alaska.

Inmates of Specified Institutions

Inmates of certain types of institutions at the time of interview are not household members of the sample unit. Usually, these are places that offer full custodial care and the people are expected to remain there for periods exceeding 6 months, for example, prisons or state mental health facilities. They are considered usual residents at the institution.

Instrument Design

The SPD is an automated instrument using CAI.

1) Household Roster and Demographics Section

Household relationships help determine eligibility for many assistance and transfer programs. In order to assure that the SPD data can be used for projecting the effects of changes to such programs, as well as other family-based analyses, relationships of all household members to the householder, or reference person, are collected and edited in the instrument. Information on parental and sub-family relationships within the household are also collected.

Age checks are incorporated into a number of questions, such as the Armed Forces questions, to prevent inconsistent responses (that is, 18-year-olds who served in World War II). Information on age, sex, marital status, parental relationships, Armed Forces status (for people 18 and older), educational attainment, race, origin, and Social Security number for all people in the household are collected. Information collected in the first interview is provided in subsequent interviews, and specific items such as marital status, education level and armed forces status are verified in each succeeding interview.

Finally, the instrument uses the age, sex, and other demographic information collected to determine which questions are asked of each individual in the household during the balance of the interview.

2) Employment and Earnings

Employment and earnings information is collected for up to four jobs and/or businesses by SPD for all people 15 years or older living in the household. Individuals are asked only questions that pertain to their situation. The instrument collects precise information about work experience for the reference period, such as weeks worked, looking for work or on layoff, average hours employed per week, and other job-specific characteristics. Respondents not employed during the reference period are asked to furnish data on weeks looking for work or on layoff. The survey also collects detailed information on gross wages earned and fringe benefits from those jobs and/or businesses during the interview. Questions are asked also of respondents about their current employment status.

3) General Income and Amounts Sections

General income information is collected for all people 15 years old and over and for children under 15 years old if income was received by an adult on their behalf. Data on reciprocity and amount are collected for income sources received during the reference period (the prior year).

Reciprocity alone is collected for sources received during the reference period as a way of partially correcting for seam bias. Maximum parameters are used in real time edits to help validate amounts being recorded. Demographic characteristics

of each household member are used to target questions within the instrument. Also, questions are asked about joint income receipt among household members to prevent double-counting income in the instrument. Reciprocity questions for government programs are augmented with questions to establish why reciprocity was begun or terminated as well as who in the household the program covered. In subsequent interviews, previous data are used to establish the flow of questions in the interview.

4) Eligibility and Assets Section

The SPD survey collects data on assets and liabilities necessary for measuring program eligibility. Assets include the primary residence, ownership of other property, and vehicles owned by household members. Data is also collected for expenditures critical to eligibility determination, including mortgage and rent, utilities, medical expenses, and child or other support payments. The survey asks about other financial obligations, such as those related to property tax or homeowner insurance and individual debts outstanding. In general, asset ownership and expenditure payments are collected for each household member in the survey.

5) Health Insurance Section

The SPD collects information on several different types of health insurance coverage, such as medicaid, medicare, and private health insurance. The questions determine whether the person was covered on his/her own policy, or on someone else's policy.

Additionally, the SPD asks

- how the person obtained the private health insurance,
- which months in the preceding year the person was covered by private health insurance,
- whether a person's employer or union is paying all, part or none of the person's insurance premium,
- for people not covered by insurance, why they are not covered.

The instrument uses demographic information and data reported by other household members, which determines the questions to be asked for specific household members.

6) Program Questions

The SPD collects information on specific government programs, such as subsidized housing or rent, energy assistance (including federal, state and local energy assistance), and the Federal School Lunch and School Breakfast programs. The instrument controls the conditions under which these questions are asked, for example, if there are no school-age children in the household, the questions for school lunches and breakfasts are not asked. If there are school-aged children in the household, the questions display the names of the eligible children.

7) Other Adult Questions

The adult questions on educational enrollment track the progress of adults toward receiving high school or high school equivalency degrees as well as college and graduate degrees. The work training questions focus on whether adults received any work training designed to help them look for a job or to train them for a new job. Participation in these activities is tied to eligibility for receiving welfare benefits in some states. Questions on disability, health care utilization and health insurance are condensed versions of similar series included as topical modules in the SIPP. The food security series is a shortened version of the United States Department of Agriculture-sponsored food security supplement to the CPS and is intended to measure the subjective experience of hunger. The questions are used as a scale to measure the severity of hunger in a household.

Direct changes in the food stamp program account for nearly half the total federal cost savings under the legislation. Additionally, the food stamp benefits of legal immigrants and able-bodied people ages 18-50 years old without dependents are affected almost immediately by changes in the legislation.

8) Child-related questions

School enrollment and enrichment activities questions track a child's progress through and out of school over time. As household and family conditions change, student progress may be impeded or facilitated. Questions on extracurricular enrichment activities add to the overall portrait of the child's

development. The extent to which parents have the financial resources or the time to devote to such activities may be strongly influenced by their program participation and employment in the labor market. Disability and health care utilization questions are similar to those asked about adults.

In the area of child care, a key objective of welfare reform is to encourage single mothers to enter or re-enter the labor force. If the demand of child care outstrips the supply, or if child care is too costly, there is the possibility that greater numbers of children will be left to care for themselves. Analysts want to match child care arrangements to the employment data for the previous calendar year. We will know the type of arrangement used as well as the months it was used.

Questions about child support and contact with an absent parent allow researchers to examine the nature of the awards and whether the awards are being followed or enforced. Child support payments are also a factor in determining the economic status of children living in single-parent families. Contact with absent parents measure the amount of time absent parents spend with their children.

9) Marital Relationships, Conflict and Depression

Marital and family stability questions provide indicators of marital happiness and of overall stress that can contribute to marital and family harmony or instability. These questions are asked of the respondent only.

10) Adolescent Self-Administered Questionnaire (SAQ)

The SAQ contains questions about housework and chores, family routines, parent-child relationships, participation in the labor force, parental monitoring, dating, and contact with absent parents. These questions are similar to the series administered to the mother or designated parent. The SAQ also includes questions on substance abuse, early sexual initiation, contraception, and childbearing. The behavior of adolescents is of particular interest because adolescents can engage in behavior that is intrinsically problematic and because adolescence is a time when children develop the skills and characteristics that increase or reduce the risk of intergenerational dependency. The adolescents either listened

to the questions through headphones and marked their responses on an answer sheet in order to prevent others from hearing the questions and answers; or completed the SAQ by answering questions via telephone.

Interest-Earning Checking Account

Primary checking accounts that pay interest on monthly deposits. Some other names used for interest-earning checking accounts are: money market checking, investor checking, high-interest checking or NOW II. These accounts should not be confused with money market deposit accounts, which typically pay a higher rate of interest and limit the number of free checks that can be written.

IRA

A personal retirement plan, which allows employees, self-employed individuals, and certain other individuals, to set aside an amount of money each year for retirement in a tax-deferred account. Earnings on all amounts contributed to any IRA accumulate on a tax-deferred basis. The two kinds of IRAs are the traditional IRA and the Roth IRA.

Job

A definite arrangement for regular (full or part time) work every week or month for pay. Also, definite arrangement to work a specified amount of time, but on an irregular schedule during the week or month is also considered a job.

Job Training

Job training has one of two objectives:

- (1) to teach the trainee how to look for a job, or
- (2) to teach specific skills needed for a job or career.

A person can participate in some kinds of job training at home (for example, by taking a correspondence course), while other sorts of job training require the trainee to attend classes at a training center.

Joint Custody

This may be joint physical or joint legal custody.

Joint Physical Custody : Gives each parent the right to have the child/children live with each parent part of the time.

Joint Legal Custody: Gives both parents the right to help make decisions about the child/children.

Keogh Plan

A qualified retirement plan maintained by a self-employed individual, either a sole proprietor or a partner. The self-employed individual may take a tax deduction for annual contributions to the

plan made on behalf of the individual and on behalf of any eligible employees.

Labor Force

Employment status (with or without a job, on layoff, looking for work) and weeks with a job and/or without pay are indicated for each week of the reference period as are average hours of work, including part-time status (less than 35 hours per week). Adult respondents who work less than 52 weeks or without a job are asked their main reason for not working during those weeks and whether they looked for a job.

Layoff

People are on layoff if they are waiting to be recalled to a job from which they were temporarily separated for business-related reasons, such as temporary drops in demand, business downturns, plant remodeling, material shortages, or taking inventory. Any person forced to leave a job due to slack work conditions, shortages, or other economic conditions of the business (rather than personal misconduct) is considered "on layoff."

Legal Custody

Legal custody is a child custody arrangement that gives parents the right to make decisions about the child.

Line Number of Parent

Parents must be a household member to have a parent's line number. Parents include and exclude the following:

Include:

- Natural parents.
- Adopted parents, and
- Step-parents.

Exclude:

- Foster parents.
- In-laws, and
- Grandparents.

Living Quarters Classification

The following three concepts are used to classify living quarters.

- 1) **Direct Access:** Living quarters that have direct access, that is, an occupant can either enter his/her living quarters directly from the outside of the structure or enter his/her living quarters from a common hall or lobby that is used by occupants of more than one unit. The hall or lobby must not be part of any other unit and must be clearly separate from all units in the structure.

2) **Housing Unit (HU):**

- a) House, apartment, flat - This category is for a sample unit that is a house or apartment. It includes such housing units as an apartment over a garage, in an office building, and housing units in such places as converted barns or sheds.
- b) HU in nontransient hotel, motel - This category is for separate living quarters such as in a hotel, motel or motor court that reserves 75 percent or more of its rooms for people who stay a month or longer. By definition, all separate living quarters in a nontransient hotel, motel or motor court are housing units.
- c) HU, permanent in transient hotel or motel - This category is for separate living quarters, occupied or intended for occupancy by permanent guests or resident employees, in a hotel, motel or motor court which has more than 25 percent of the rooms designated for people who stay less than a month.
- d) HU in rooming house - This category is for sample units that meet the housing unit definition in rooming houses or combination rooming and boarding houses.
- e) Mobile home or trailer with *no* permanent room added - This category is for a mobile home or trailer (even if it is on a permanent foundation). If a permanent room (or rooms) has been added, classify it as "Mobile home or trailer with one or more permanent rooms added." Open or unheated porches or sheds built onto trailers are not considered rooms.
- f) Mobile home or trailer with one or more permanent rooms added - This category is for a mobile home or trailer to which a permanent room (or rooms) has been added. Sheds and open or unheated porches built onto trailers are not considered rooms.
- g) HU not specified above - Included in this category are living quarters, which meet the housing unit definition, but cannot be described by the specific categories listed above. Tents, houseboats and railroad cars are included here if they meet the housing unit definition. If this category is marked, the instrument notes space contains a description of the unit.

3) Group Quarters Units

Group quarters units are *not* housing units. They are located in certain special places such as institutions, dormitories, and boarding houses where the residents have their own rooms, groups of rooms or beds, and also have some common facilities such as a dining hall, lobby or living rooms, or recreational areas.

- a) Group quarters, not HU in rooming or boarding house - If a unit is located in a boarding house, or is occupied by a boarder in a combination rooming and boarding house, or otherwise does not meet the housing unit definition in a rooming house or combination rooming and boarding house.
- b) Unit not permanent (for example, in transient hotel or motel) - If a unit is located in a transient hotel, motel, or motor court and is occupied or intended for occupancy by transient guests or does not meet the housing unit definition.
- c) Unoccupied tent site in a carnival or campground - If the group quarters unit is an unoccupied site for a tent.
- d) Group quarters unit not specified above - This category is for a group quarters unit not described above. Examples include rooms in student dormitories, quarters for nurses and quarters in bunkhouses. The notes space of the instrument contains a description of this type of group quarters unit.

Local Government Retirement Pension

Paid to retired people who were former employees of city, county or other local government agencies, such as police and fire departments, libraries, public schools, and hospitals, and to employees who retired early because of disability.

People with a sufficient number of years of service may retire with a pension before reaching age 65. Individuals employed in hazardous occupations, such as law enforcement, may be eligible to retire with a pension as early as age 40, if they have completed 20 or more years of service.

Most payments are made monthly by check through the mail. It is possible, however, that payments are made by direct deposit to the person's bank account. Since there are more than 2,000 state and

local government pension plans, the source and appearance of the payments made by check are varied.

Some of the state retirement systems have provisions for cost-of-living increases.

Longitudinal survey

A longitudinal survey captures changes in household and family composition over an extended period. The SPD provides data for the following types of analysis:

- What factors affect change in household and family structure and living arrangements?
- What are the interactions between changes in the structure of households and families and the distribution of income?
- What effects do changes in household composition have on economic status and program eligibility?
- What are the primary determinants of turnover in programs such as food stamps and public assistance?

Looking For Work

The person must have been conducting an active search for a job to be considered “looking for work”. An active search may include registering at employment offices, meeting prospective employers, placing or answering advertisements, and/or writing letters of application.

Low Income Home Energy Assistance Program (LIHEAP)

The Low-Income Home Energy Assistance Program (LIHEAP) provides financial assistance to eligible households to help them pay their home energy costs. Each state has great flexibility in deciding how to distribute the money to poor households. The federal government provides the funds for this program to the states and have made over \$1 billion available for the last several winters. In addition to federal funds, some states provided their own money for energy assistance.

Lump Sum Payments

Lump sum payments include lottery/bingo winnings, cash awards, bonuses and inheritances. Lump sum payments received from an estate or trust should be listed as a lump sum payment, not under "estates and trusts." Lump sums can also be received from a retirement plan and be invested in other assets.

Marital Status

This question is asked for people 15 years of age or older. The question includes the following codes/categories:

- 1) Married spouse present: both spouses live in the sample unit; includes people who state they have a common-law marriage; excludes "separated" people as defined below.
- 2) Married spouse absent: only one spouse currently resides in the sample unit; includes people who state they have a common-law marriage, but where one spouse is currently living elsewhere; excludes "separated" people as defined below. In this category spouse is not listed in the household membership.
- 3) Widowed: a person who has lost their spouse by death and has not remarried.
- 4) Divorced: a person whose marriage is legally terminated.
- 5) Separated: includes married people who have a legal separation or who have parted because of marital discord, but have not yet obtained a divorce. Those who have parted temporarily for other reasons (such as employment or Armed Forces) are classified as married-spouse absent).
- 6) Never married: includes people whose only marriage has been annulled or people living together who make no mention of a common-law marriage.

Medicaid

Medicaid is a jointly funded federal and state health insurance program for needy or low-income individuals and families. It also includes coverage for the aged, blind, and permanently or totally disabled individuals whose incomes and resources are insufficient to cover the cost of needed medical services.

Medicare

Medicare is the federal program that helps pay health care costs for people 65 and older and for people under 65 with certain types of long-term disability. Most social security recipients are covered by medicare. Medicare consists of two parts:

Part A is called the Hospital Insurance Program. It helps pay for inpatient hospital care and is available to anyone age 65 and older. People who are eligible for either social security or railroad retirement benefits are not required to pay a monthly premium. However, anyone who is age 65 or older and does not qualify for

social security or railroad retirement benefits may pay premiums directly to social security to obtain coverage for Part A.

Part B is called the Supplementary Medical Insurance Program. It is a voluntary plan, which builds upon the hospital insurance protection provided by the basic plan. It provides insurance protection covering physicians and surgeons services and a variety of medical and other health services received either in hospitals or on an ambulatory basis. It is financed through monthly premium payments by those enrolled and subsidized by federal general revenue funds.

Members of the Armed Forces

Members of the Armed Forces (either men or women) are considered as household members if they are stationed in the locality and usually sleep in the sample unit.

Merger

A merger is when a sample household containing original sample persons combines with another household containing original sample persons.

Military Disability Retirement Pay

Military disability retirement pay is received by former members of the U.S. Armed Forces, including active duty, national guard, or reserve forces, for service related disabilities. While there are no length of service or age requirements, servicemen must have a U.S. Department of Defense (DOD) disability rating of 30 percent or greater at the time of retirement to be eligible. (This rating may differ from the VA disability rating.) Payments are based on active duty basic pay and the DOD disability rating. Former servicemen are also eligible to receive VA disability pensions

Military Households

A military household is a household in which all adults are in the military or armed forces. Unlike SIPP, the military households are excluded from the SPD 1998 longitudinal panel weighting process, namely, assign their longitudinal panel final weights of zero.

Note that a military household was determined in Wave 1 of the SIPP Panels 1992 and 1993 and was not updated in later waves. Thus, if a sample person belonged to a military household in Wave 1 of the SIPP Panels 1992 and 1993, he/she is assumed to remain in the military household throughout the SIPP Panels 1992 and 1993 and SPD surveys in the weighting process.

Mobile Homes

A mobile home is a type of living quarters, originally constructed to be towed on its own chassis. It may also have permanent rooms or other structural modifications.

Mobile Home Parks

A mobile home park can consist of five or more mobile home sites under a single ownership or management; or a group of mobile homes parked on a common property that is operated under a single management or a homeowners' association.

A group of mobile homes or sites, regardless of the number, is not a mobile home park if the group does not have a single management or association, and the group does not have common properties or facilities.

Mobile Homes for Migratory Workers

A group of mobile homes with living quarters for five or more migratory workers is considered a migratory workers' camp.

Money Market Deposit Accounts

Money market deposit accounts pay a higher rate of interest than regular or passbook savings accounts. These accounts are only available at banks, savings and loans, and credit unions. The actual rate of interest is variable and is determined by the bank, savings and loans, or credit union. There is no fixed term of investment; money can be withdrawn at any time without penalty. The accounts are federally insured.

Money Market Funds

Money market funds are organized to invest in various types of short-term securities. There is no fixed rate of interest and money can be invested or withdrawn at any time. These funds are not the same as money market deposit accounts at a bank, savings and loan, or credit union.

Major money market funds are listed periodically in the financial section of major newspapers. Some of these funds are sponsored by brokerage or investment firms. The interest paid on these accounts may sometimes be called "dividends"; this should be considered as interest income.

Money Received From Relatives or Friends

Cash assistance given by relatives (by blood or marriage) or by personal acquaintances. These people do not live in the same household as the respondent. This does not include money received as a gift, such as for birthdays or weddings.

Mortgage

A mortgage is any type of loan secured by real estate. Trust deeds, mortgages, mortgage bonds, and vendors' liens are terms used in some parts of the country for type of debts that are considered mortgages or deeds of trust. There may be a security agreement or installment loan in which the lender, usually a bank, holds the title to the unit until the loan is paid. A purchaser who is buying a property with a contract to purchase may not consider himself/herself the owner, because the seller has title to the property; however, for the purpose of this survey, he/she is considered the owner.

If the house has been paid for and then used as security for a new loan, the new loan is considered a mortgage. Home equity loans are considered mortgages if the property was used as security for the loan.

Mover

All original sample people who move during the life of the panel. The SPD follows all original sample people if they move from the original housing unit (with certain exceptions). The SPD also collects data on all other people, including children under 15, who live with or move into households with any of the original sample people. These individuals, however, are not followed when they no longer live with an original sample person.

***Municipal or
Corporate Bonds***

This includes marketable securities other than stocks, such as bills, certificates, notes, bonds, or debentures, issued by state or local governments or domestic corporations.

Mutual Fund Shares

A mutual fund is a company that pools the money of many investors (its shareholders) to invest in a variety of asset types, including stocks, bonds, real estate, and gold. Such assets are professionally managed on behalf of the shareholders, and each investor holds a pro rata share of the overall fund portfolio, entitling them to any profits obtained from assets sales, but also subjecting them to any losses in value.

***National Guard or
Reserve Forces
Retirement Pay***

National Guard or Reserve Forces retirement pay is received by former members of these military organizations. In general, 20 years of qualifying service is required to be eligible, although pensions may be received by a former employee who retired early because of disability. Payments are not made until the former members reach 60 years of age. This does not include payments

from other U.S. military retirement pensions or payments from the U.S. Department of Veterans Affairs.

National Guard or Reserve Pay

Any pay received while on active or temporary duty as a member of the National Guard or the Guard Reserve of any branch of the Armed Forces.

National School Lunch or Breakfast Program

The National School Lunch Program is sponsored by the U.S. Department of Agriculture and Food and Consumer Service, which subsidizes the cost of all school lunches in the country. In addition to these standard subsidies, students whose household income falls below a certain level are eligible to receive their lunches free or at a reduced price. In order to qualify, the household must apply to the local school district. The district determines who qualifies for this additional aid.

Noninterview Household or Person

A sample household for which information is not obtained because:

- a sample household is located, but an interview was not obtained - Type A;
- a sample household moves and is not located - Type D;
- a sample household in which all original sample persons are institutionalized - Type B; or

- a sample household in which all household members are deceased, moved out of the country, armed forces members or occupied by people not eligible for interview - Type C.

No Usual Place of Residence Elsewhere

People with no usual place of residence elsewhere are considered as sample household members. They include recent migrants, people trying to find permanent living quarters, and people staying temporarily in the unit who have no other home of their own. Entire households with no usual place of residence elsewhere include people who have rented or lent their usual living quarters to others and are traveling or are temporarily staying in another unit. Often such people offer their usual living quarters for rent or sale, sometimes as furnished units, during their absence.

Origin, Ethnicity, or Descent,

National or cultural group from which a person is descended. It is determined by the nationality or lineage of a person's ancestors. There is no set rule as to how many generations are to be taken into account in determining origin. A respondent may report

origin based on the origin of a parent, grandparent, or some ancient ancestor. Ethnic origin or descent is not necessarily related to race. That is, origin or descent and race may be considered as two independent characteristics of a person. Respondents are asked to report their origin based on the following listing:

<u>European Origin</u>	<u>Hispanic Origin</u>
Canadian	Mexican
Dutch	Mexican-American
English	Chicano
French	Puerto Rican
French-Canadian	Cuban
German	Central American
Hungarian	South American
Irish	Dominican Republic
Italian	Other Hispanic
Polish	
Russian	<u>Other Origins</u>
Scandinavian	African-American
Scotch/Irish	or Afro-American
Scottish	American Indian,
Slovak	Eskimo or Aleut
Welsh	Arab
Other European	Asian
	Pacific Islander
	West Indian
	Another group not listed

If they cannot select from the list, the field representative (FR) uses the following guidelines to determine and record origin and descent.

- 1) The response is not listed, the FR assigns the code for "Another group not listed", unless the response can be considered as one of Spanish origin.

Examples of responses classified as "Other Spanish" are listed below:

Balearic Islands	Iberian
Basque	Majorcan
California	Spanish
Canary Islands	Spaniard
Catalonian	Spanish-American
Hispanic	Spanish-speaking

Central or South American Spanish countries are as follows:

Argentina	Guatemala
Bolivia	Nicaragua
Chile	Panama
Honduras	Paraguay
Columbia	Peru
Costa Rica	Uruguay
Ecuador	Venezuela
El Salvador	

A response such as "LaRaza" is classified as "Mexican" and "Boricura" is classified as "Puerto Rican."

- 2) If the respondent reports more than one origin and no parts are Spanish, the code for "Another group not listed" is assigned. We do not consider responses such as German-American or Italian-American as multiple origins. For cases such as these, their origin is considered as German or Italian.
- 3) If the respondent reports more than one origin and the respondent cannot give a single origin, the field representative asks for the origin of their mother and proceeds as follows:
 - If the person's mother is Spanish, the appropriate Spanish code is entered as the origin of that person.
 - If the origin of the person's mother is not Spanish, the mother's origin is entered as the origin of that person.
- 4) If the respondent is unable to report a single origin for the mother or the origin of the mother is unknown, the first origin originally mentioned for the person is entered.

- 5) Some respondents may not identify with the foreign birthplace of their ancestors or with their nationality group and may report the category "American." Those individuals are categorized as "Another group not listed."
- 6) A code D, "Don't Know" is used only if the respondent absolutely does not know his/her own or another person's origin or cannot understand the concept of origin or ancestry.
- 7) A code R, "Refusal" is used if the respondent refuses to answer the origin question.

***Original Sample
(100 Level) Persons***

The original sample persons of the combined SIPP Panels 1992 and 1993 or the SPD Bridge (1997) panel or the SPD 1998 panel comprise the sample persons (including children) of those that belong to the SPD longitudinal sample. Namely, an original sample person was a resident of an interviewed sample household or group quarter at the time of the Wave 1 interview of the SIPP Panel 1992 or 1993. The person number of an original sample person is in the range of 100-199. Therefore, an original sample person will be occasionally referred to as "a 100 level person."

***Other/Miscellaneous
Cash Income Not
Included Elsewhere***

This includes any cash income that does not fall into any specific category. This income type is intended only as a catch-all for any income that does not qualify for any other income types.

***Other Educational
Assistance***

Includes any other educational benefits that do not fit into any of the specific categories.

Employer Assistance - When a person holds a part-time or full-time job during the school year (excluding work-study jobs) or prior to attending school, and the employer is paying any of the person's educational expense.

Fellowship/Scholarship - Include any educational benefits (fellowships, grants, subsidies, scholarships, or stipends) provided to an individual by the school, the state, or a private organization for which no service or work was required.

Family Assistance - Help from any family members, including trusts and estates should not be counted as educational assistance or financial aid.

State Grants and Scholarships - Many state governments operate grant and scholarship programs. These vary in nature by state. Many are concentrated on state-run colleges and universities, others may allow attendance at private universities at rates comparable to public university tuition. Examples include Douglas Scholarships and State Student Incentive Grant Program (SSIGP). Loan programs should be counted as loans, not state scholarships. NOTE: The SSIGP is now called the Leveraging Educational Assistance Program (LEAP).

Other Financial Investments

Other financial investments include investments in a non-corporate business venture managed by others, investments in a corporation, and other investments not reported elsewhere (for example, part-ownership of a race horse).

Other Interest-Earning Assets

This includes all other investments from which the person receives interest income.

Other Payments for Retirement, Disability or Survivor

This category is used if the person received a retirement pension of a type other than those described in the instrument. Also included in this category is any other income received because of a disability and not marked elsewhere in the instrument.

Other Unemployment Compensation

This category includes:

- Trade Adjustment Act allowance programs, which provide financial assistance to people who lost jobs because of importation of competitive durable goods.
- Federally financed programs (administered by the states) for certain groups of people, including federal employees, former Armed Forces members, and people who lost jobs due to natural disaster.

Other Welfare

Cash public assistance that cannot be included under one of the other answer categories listed. This category excludes food, food stamps, clothing, or other nonmonetary receipts.

Note: Since welfare programs such as AFDC and ADC no longer exist each state has its own welfare program. Some states use the generic name, Temporary Assistance to Needy Families (TANF). However, most states have a unique name.

Panel

A panel is a full sample of households that are brought online in the same year. The SPD is a longitudinal survey of adults from two different SIPP panels: 1992 and 1993.

Parent Loan for Undergraduate Students (PLUS) and Supplemental Loan for Students (SLS)

See Federal Educational Assistance.

Pass-Through Child Support Payment

Pass-through or bonus child-support payments are made to the respondent through a public assistance (formerly AFDC/ADC) agency. These types of payments are independent concepts and are not considered to be child support payments in this context.

Payments From a Sickness, Accidents or Disability Policy

An individual who is sick or disabled may receive income from private disability insurance, which they purchased. These policies may cover cases where either a short-term or long-term illness has forced an individual to stop working.

Pell Grant

See Federal Educational Assistance.

Pension From Company or Union

Included here are retirement pensions from a private company, local union, or from a profit-sharing plan received by people who become disabled.

A private retirement pension is received by a retired or disabled person from a former employer or labor union, either directly or through an insurance company. The respondent may identify the pension as an annuity.

Payments are likely to be made monthly by check through the mail. However, there are so many different private pension plans that it is impossible to provide details such as the method of payment or appearance of the checks. Some private pensions have cost-of-living clauses.

Perkins National Direct Students Loans (NDSL)

See Federal Educational Assistance.

People in Vacation Homes, Tourist Cabins, and Trailers

People living in vacation homes, or tourist cabins and trailers are interviewed if they have no usual residence anywhere else.

Person Number

The person number represents the wave the person entered the sample. Person numbers such as 0101 and 0102 are assigned in Wave 1 of the SIPP. Person numbers such as 0201 and 0202 are assigned to people added to the roster in Wave 2 of the SIPP. People added to the roster in the 2000 SPD have person numbers beginning with 1401 and 1402 and following sequentially as needed. People added to the roster in the 1999 SPD have person numbers 1301 and 1302 and following sequentially as needed. People added to the roster in the 1998 SPD have person numbers 1201 and 1202 and following sequentially as needed. People added to the roster in the 1997 SPD Bridge have person numbers 1101 and 1102 and following sequentially as needed.

Person With Two Concurrent Residences

When a person has two concurrent residences, the residence in which he/she has spent the greater number of nights during the period is considered the person's usual place of residence.

For children under a shared custody arrangement, spending equal amounts of time with each parent:

- The child is listed as a household member only if living at the unit at the time of the first interview. In later interviews the child is not considered a mover while living at the other parent's address, unless the move is permanent.
- If the child is NOT living at the sample unit at the time of the first visit, they are not included as a household member. In later interview periods, if the child is living at the sample unit, they are not included as a household member, unless the child has moved in permanently.

Preschool

Preschool is defined as a center providing a *structured program of educational or school-readiness* activities for a number of children under the age of 6. It is organized to provide educational experiences for children during the years preceding kindergarten. These programs are called various things in addition to “preschool,” such as pre-kindergarten, nursery school, or Head Start. Day care is a child care arrangement with the purpose of providing adult supervision and custodial care for children. Many day care programs include school readiness activities such as

learning the letters of the alphabet, numbers and colors. If a day care arrangement includes a significant educational component, it is considered to be a preschool.

Primary Family

A primary family is the family containing the household reference person and those related to them. An unrelated subfamily is a family that does not contain the reference person nor anyone related to the reference person.

Primary Sampling Unit (PSU)

Divisions of the country, usually along county boundaries (along Minor Civil Divisions in New England). Primary Sampling Units are assigned a 5-digit code.

Principal

Principal is the amount of the mortgage(s) or home equity that is still owed, excluding any interest owed.

Private School

A private school is controlled or supported *primarily* by a church or religious organization or by private people or organizations.

Program Participation

The SPD provides information on how people participate in government programs designed to transfer portions of the national product to individuals needing assistance. These programs include Social Security, unemployment insurance, and public assistance (formerly AFDC/ADC).

Another set of programs aims mostly at eliminating poverty and its surrounding conditions. These originated during the 1960s and 1970s and included the expansion of public assistance, food stamps, subsidized school lunches, medicaid, medicare, and housing subsidies.

Private transfer programs also have a long history. Aside from company pension plans, families share resources to help support elderly and child members as well as others who are unable to work. Private charities also provide cash and noncash assistance, though on a much smaller scale than the federal government.

Property

Property includes the following: the entire structure (or other type of living quarters) such as a mobile home or trailer, which contains the sample unit, the land on which it stands, and any additional structures (or other types of living quarters) on the same plot of land owned by the person who owns the structure containing the sample unit.

For cooperative and condominium units, property includes only the structure (or other type of living quarters) in which the sample unit is located and the ground on which it stands.

Public Assistance or Welfare

Since passage of the 1996 Personal Responsibility and Work Opportunity Reconciliation Act, programs such as AFDC and ADC no longer exist. Each state has its own welfare program. Some states use the generic name for the new type of aid -- Temporary Assistance to Needy Families (TANF). Most states have a unique name for the program, which makes it difficult to identify in a national survey. In some states, public assistance is provided at the county level and each county may have their own name for the program.

Many of these programs are variations of the old AFDC/ADC program. AFDC/ADC was a means-tested program that was state or locally administered. Eligibility for AFDC (or ADC) was based upon:

- (1) income
- (2) the incapacity or death of a parent
- (3) a parent's continued absence from the home; or
- (4) the unemployment of a parent

NOTE: Reciprocity questions for bonus or pass-through child support payments are asked only if respondents receive AFDC payments.

People applying for Public Assistance (AFDC) are required to cooperate with the public agency in securing the child support award and its collection. The agency became the collector and disbursing agent of the child support which, when received through the agency, was called a *pass-through or bonus payment*. The first designated dollar amount (the amount differs by state) per month of child support collected from the non-custodial parent is "passed through" to the AFDC recipient; the balance is retained by the agency. Information on the amounts of AFDC, pass-through payments and child support collected by the agency are obtained individually in the CAI instrument.

Because of different state accounting practices, the amount of pass-through payments reported in a given month may exceed \$50. The amount collected by the agency should never be less than the amount received by the respondent.

Public Housing

Public housing implies public ownership and means that the owner is a local or state government agency. A public housing project may also be known as a housing and redevelopment authority or a housing development agency. These organizations may receive subsidies from the federal or state government, but the local agency owns the property.

Public School

A public school is controlled or supported *primarily* by a local, state, or federal government agency.

Race

The concept of race as used by the Census Bureau does not reflect clear-cut definitions of biological stock or conform to any scientific definition. Rather, it reflects self-identification by respondents. Therefore, individuals are asked to report the race with which they most closely identify.

Race is provided for four major race groups: 1) White, 2) Black, 3) American Indian, Eskimo, and Aleut, and 4) Asian and Pacific Islander.

If the respondent replies with a response such as Japanese, Chinese, Filipino, Korean, Asian Indian, Vietnamese, Hawaiian, Guamanian, Samoan, or other Asian, the field representative enters code 4 for the appropriate person. The respondent may give two or more races, such as White and American Indian, White and Black, Chinese and Hawaiian, and so forth. In instances such as these, the field representative asks the respondent to select the one single race category that they most closely identify with; if the respondent cannot do this, they use the race of the person's mother.

Railroad Retirement Benefits

Railroad retirement benefits are based on a person's long-term employment (10 years or more) in the railroad industry. They do not include payment from pensions established by railroad companies or unions to supplement Federal Railroad Retirements. Railroad Retirement checks are U.S. Treasury checks and may bear the letters "RR" in combination with other letters beneath the payment amount.

Railroad Retirement disability payments are received by severely disabled workers who worked long enough in "covered employment" before their disability to be entitled to payments. The worker's disability must have lasted for at least 6 months and be expected to last for at least an additional year for him/her to qualify for benefits. In addition, the worker's physical or mental

condition must prevent him/her from earning substantial income from working. Payments are drawn from the U.S. Treasury.

Recoding of Variables

The following information is recoded (categories collapsed) to protect against the possibility that a user might recognize the identity of a respondent on the public use microdata files:

1. Employment:
 - number of employees at all locations.
 - self-employment industry code, and
 - occupational categories.
2. Geography:
 - states with small population are collapsed together.
3. Age:
 - age is topcoded at 88
4. Family Income
5. Household Income

Reference Period for the Interview

At each interview, respondents are asked to provide information covering different reference periods. For the SPD, the reference period is last calendar year, unless otherwise noted.

Regular or Passbook Savings Account in a Bank, Savings and Loan or Credit Union

This category includes "passbook" or "statement" savings accounts, which pay interest at market value subject to a ceiling. Checks cannot be written against the savings account. Money can usually be drawn at anytime without penalty. These accounts are only available at banks, savings and loans, and credit unions. At credit unions, interest paid on balances may sometimes be called "dividends." These earnings are treated as interest income in the Amounts sections of the instrument.

Regular School

Regular schools are part of a recognized regular school system--whether public or private (including parochial). They include kindergarten, elementary school, junior or senior high school, colleges, universities, or professional school (for example, medical, law, dentistry, veterinary). Regular school advances a person toward an elementary school certificate, high school diploma, or a college, university, or professional school degree. Schools for the mentally retarded or physically disabled are regular school if they meet the above criteria. A school does not have to have class levels or be graded to be a regular school. Attendance

may be day or night, full-time or part-time.

Training can be differentiated from regular school by the nature of the credential awarded. Any award or certificate for completion of a training program is purely incidental to the purpose of training for employment. Only in rare instances would training count towards a broadly-recognized degree. If a training program does count for credit in regular school, few of those taking the program would be expected to use it in pursuit of a regular school degree.

Related Subfamily

A married couple and dependents related to the reference person, but not including him/her, such as the householder's daughter and son-in-law, or a single parent-child group where the child is under 18 and the group is related to the householder.

Rental Property

Income from residential, commercial, industrial and/or land rental property as well as equipment that is rented out, such as tractors, computers. There are three types of rental properties:

- 1) Residential property: Houses, apartments, or condominiums other than the person's own house, owned individually or jointly with someone else
- 2) Commercial/industrial property: A store, factory or warehouse other than the person's own business is owned individually or jointly with someone else, and
- 3) Land rental property: Land that is rented out to others for the farming or ranching

Retainer Pay

A military pension in which the recipient is subject to active duty recall under the Uniform Code of Military Justice. Payments begin upon the receipt of orders transferring the military member of retired/retainer status and continue until his/her death. If the recipient is recalled to active duty, the retainer pay is terminated and he/she instead receives the appropriate active duty pay.

Retirement Income

Includes U.S. government railroad retirement, pension from company or union, Federal Civil Service or other federal civilian employee pension, U.S. military retirement pay, retainer pay, National Guard or Reserve Forces retirement, state government pension, local government pension, and other types of pension other than Social Security.

Royalties Include income from oil, gas and other mineral rights, income from patents, copyrights on literary works, trademarks and formulas. Royalties can be earned primarily from a person's major occupational activity. For example, a professional self-employed writer may receive royalties as his/her primary income. In these cases, royalties are considered as self-employment income and reported in the Earnings and Employment section of the instrument.

Sample The housing units selected for interviewing. The SPD sample respondents were originally selected from 2 retired SIPP panels (1992 and 1993).

Sample Unit A sample unit is the ADDRESS selected into the sample.

Sample Unit Identification Number Was created by scrambling together the PSU, segment, and serial numbers used for Census Bureau administrative purposes. These identifiers are constructed in the same manner as the 1992 and 1993 SIPP panel files, to enable matching to these files. The sample unit identification number and address ID code uniquely identifies each household in any given wave. The sample unit identification number can link all households in subsequent waves back to the original Wave 1 household.

Scholarships See Other Educational Assistance.

School Enrollment The school enrollment codes for adults in the SPD are based on a three part question to people who say they were enrolled in school during the reference period. The codes do not match those asked of children, nor do they match the questions in the SIPP.

The question sequence is as follows:

- Was it a high school, college, vocational school or something else?
- [If in high school] In what grade are you enrolled?
- [If in vocational, technical, business school or college] At what level were you enrolled?

The answer codes start with (1) for each question.

There is a single school enrollment question for children 17 and under in the SPD:

- In what grade was ... enrolled?

Answers are (K) for kindergarten, (1) - (12) for first grade through 12th grade, and (P) for postsecondary enrollment.

College enrollment level is determined by completion of course work that counts toward the current degree goal. If the school has a set number of credits for counting a person such as a freshman or sophomore that classification scheme should be used. Otherwise, if a person has completed the course work a full time student would typically complete in one year, he or she should be counted as a sophomore, and so on for further years. If a person has completed courses at another institution, then only those that count at the current institution should be included. For instance, a person who transferred to a four-year college from a community college after attending for two years might still be considered a sophomore if some of the credits earned at the community college did not transfer.

Seamen

Crew members of a vessel. They are considered to be household members at their homes rather than on the vessel, regardless of the length of their trips and regardless of whether they are at home or on the vessel at the time of the interview (assuming they have a usual place of residence).

Section 8 Rental Assistance Program

Rental assistance payments are made to the private owners of newly constructed or existing housing units on behalf of low-income tenants who applied to the local housing authority. The local government program for assistance to tenants pays 30 percent of household income for rent, with the federal assistance payment making up the difference between the tenant's payment and a fair market rental, based on the rents for equivalent units in the area.

Section 236 Housing

The Federal Housing Administration (FHA) finances the construction or rehabilitation of rental or cooperative detached, semi-detached, row, walkup, or elevator type structures primarily for lower-income families or individuals 62 years or older or handicapped, with priority in occupancy going to those displaced by urban renewal or other governmental actions; up to 10 percent of the units may be occupied by lower-income individuals under age 62 who are not handicapped.

Assistance for mortgages insured under Section 236 is provided in the form of periodic interest-reduction payments to the mortgagee on behalf of the mortgagor, which serve to reduce interest costs on a market-rate project mortgage.

These payments enable rentals to be reduced to a basic rental charge, determined for each unit on the basis of operating the project with such payments. A tenant or cooperative member pays either the basic charge or a greater amount, which represents 35 percent of his/her income, but does not exceed the fair market rental charge. This is determined on the basis of operating the project without any interest-reduction payments.

Segment Number

All surveys use a four-digit segment number. Each segment number is unique within the survey and field PSU.

Self-Employed

Someone working for profit at his/her OWN business, shop, office, or farm. The business may be incorporated or unincorporated.

Separate Living Quarters

A separate living quarters is one in which the quarter's occupants:

- Live and eat separately from all other people on the property
- Have direct access to their living quarters from the outside or through a common hall or lobby (for example, apartment buildings)

Serial Number

The first time an address is in a current sample a two-digit serial number is assigned on the first cluster of lines designated for that sample. After the address has been listed, a serial number is assigned to units in the current sample only which have a unit that has been listed. Serial numbers are assigned consecutively within segment, within sample.

Sex

The appropriate responses are "male" or "female" for each person in the household. The answer to the question is usually determined from the name and relationship questions. However, if there is any doubt, then the question is asked as worded.

SIPP Panel Number

The SIPP panel number identifies the panel in which the respondent participated. The sample person should either have an entry of 1992 or 1993 for their panel number.

Social Security Benefits

Social security payments are received by people who have worked long enough in "covered" employment (that is, employment in which Social security deductions were made from a person's salary). Social security payments may also be made to the spouse or dependent children of covered workers.

The Social Security Administration also pays benefits to student dependents (under age 19) of eligible Social Security annuitants who

are disabled or deceased. Benefits are paid by the federal government directly to the student.

Social Security checks are U.S. Treasury checks, which bear the letters "SOC SEC" beneath the payment amount.

***Social Security
Number and
Railroad Retirement
Number***

Social security or Federal Railroad Retirement number is asked the first time an individual is interviewed. It is also collected on sequential interviews if it is not obtained during a previous interview.

Spawning

The process of creating a new household on the laptop computer, because an original sample person moved is called "spawning". Spawning allows additional cases for the newly formed mover household to be created.

***SPD Bridge
Longitudinally
Interviewed Persons***

The SPD Bridge longitudinally interviewed persons consist of the original sample persons who were a self or proxy or imputed respondent in each and every reference month in the SIPP 1992 or 1993 panel and were a self or proxy or imputed respondent in the SPD Bridge (1997) panel as well.

Unlike the SIPP survey per se, it is generally irrational to include the original sample persons who were known to have died or moved to an ineligible address (institutions or military barracks or foreign living quarters) prior to the end of the reference calendar year (December 1996) as part of the sample used for assessing the effect of the Welfare Reform. Therefore, this group of original sample persons (including children) will be judiciously classified as the SPD Bridge longitudinally non-interviewed persons (defined on page 4-54), instead.

Note that, for Rotation 1 of the SIPP Panel 1992, Wave 9 is its last interview wave, thus the total number of the reference months is 36 instead of 40. For Rotation 2, 3, and 4 of the SIPP Panel 1992, Wave 10 is the last interview wave thus the total number of the reference months is 40. For the SIPP Panel 1993, the last interview wave is Wave 9 for all the four rotations thus the total number of the reference months is 36. These total numbers of the reference months are to be used as part of the process of classifying the SPD

Bridge longitudinally interviewed persons.

By definition, the person numbers of all the SPD Bridge longitudinally interviewed persons are all 100 level.

***SPD Bridge
Longitudinally
Non-Interviewed
Persons***

The SPD Bridge longitudinally non-interviewed persons comprise two groups. The first group consists of the original sample persons including children who were not a self or proxy or imputed respondent in each and every reference month in the SIPP Panel 1992 or 1993 and/or were not a self or proxy or imputed respondent in the SPD Bridge panel. The second group consists of the original sample persons including children who were known to have died or moved to an ineligible address prior to the end of the reference calendar year (December 1996) of the SPD Bridge.

By definition, the person numbers of all the SPD Bridge longitudinally non-interviewed persons are all 100 level.

***SPD Longitudinal
Panel Sample***

The SPD longitudinal panel cohort only consists of the sample persons (including children) who, at the time of Wave 1 interview of the SIPP Panel 1992 or 1993, resided in an interviewed sample household or group quarter. Note that other sample persons that lived with those belonging to the SPD longitudinal panel cohort were included on the SPD longitudinal panel file as well.

SPD Panel Universe

The SPD panel universe consists of persons (including children) resident in the United States civilian and military households and persons living in group quarters in March 1993. (Note that persons living in military barracks and institutions, such as prisons and nursing homes, are excluded.) Namely, the effect of the Welfare Reform will be assessed based on this group of persons, and March 1993 will be referred to as the control date (reference point in time) of the SPD panel universe.

***SPD 1999
Quasi-Longitudinally
Interviewed Persons***

The SPD 1999 quasi-longitudinally interviewed persons consist of all the SPD Bridge longitudinally interviewed persons who were selected (survived the sample cut) for the SPD 1998 interview and were a self or proxy or imputed interviewed person in the SPD 1999 panel as well.

***SPD 1999
Quasi-Longitudinally
Non-Interviewed
Persons***

The SPD 1999 quasi-longitudinally non-interviewed persons consist of all the SPD Bridge longitudinally interviewed persons who were selected (survived the sample cut) for the SPD 1998 interview but were not interviewed (self or proxy or imputed) in the SPD 1999

panel or were known to have died or moved to an ineligible address during the calendar years 1997 or 1998.

***SPD 2000
Quasi-Longitudinally
Interviewed Persons***

The SPD 2000 quasi-longitudinally interviewed persons consist of all the SPD Bridge longitudinally interviewed persons who were selected (survived the sample cut) for the SPD 1998 interview and were a self or proxy or imputed interviewed person in the SPD 2000 panel as well.

***SPD 2000
Quasi-Longitudinally
Non-Interviewed
Persons***

The SPD traditional longitudinally non-interviewed persons consist of all the SPD Bridge longitudinally interviewed persons who were selected (survived the sample cut) for the SPD 1998 interview but were not interviewed (self or proxy or imputed) in the SPD 2000 panel or were known to have died or moved to an ineligible address during the calendar years 1997 through 1999.

***SPD Traditional
Longitudinally
Interviewed Persons***

The SPD traditional longitudinally interviewed persons consist of all the SPD Bridge longitudinally interviewed persons who were selected (survived the sample cut) for the SPD 1998 interview and were a self or proxy or imputed interviewed person in the SPD 1998, 1999, and 2000 panels as well.

***SPD Traditional
Longitudinally
Non-Interviewed
Persons***

The SPD traditional longitudinally non-interviewed persons consist of all the SPD Bridge longitudinally interviewed persons who were selected (survived the sample cut) for the SPD 1998 interview but were not interviewed (self or proxy or imputed) in one or more of the SPD 1998, 1999, or 2000 panels or were known to have died or moved to an ineligible address during the calendar years 1997 through 1999.

***Stafford Loan or
Guaranteed Student
Loan (GSL)***

See Federal Educational Assistance.

***State Government
Retirement Pension***

State government retirement pensions include payments by state government agencies, such as colleges, universities or state hospitals, to their retired former employees, including employees who retired early because of disability.

***State Supplemental
Security Income
(State Administered
SSI Only)***

The SSI program is administered by the Social Security Administration. Each state may add to the federal payment from its own funds. This additional money may be included in the federal payment or it may be received as a separate check. If it is combined with the federal payment, the words "STATE

PAYMENT INCLUDED" will appear on the federal check. Some states make SSI payments to individuals who do not receive a federal payment.

Respondents may have difficulty distinguishing between federal and state or local SSI payments. If the check is a U.S. Treasury check, one may assume it is a federal check. The phrase "Supplemental Security Income Payment" is printed on the federal check. Checks received directly from the state or local welfare office will vary in color and wording from state to state, or even county to county.

***State Temporary
Sickness or Disability
Benefits***

This is available in several states, and it provides benefits to people with nonwork-connected temporary sickness or disability.

***State Unemployment
Compensation***

Money received from state government unemployment insurance funds to help replace wages lost during times of layoff or unemployment.

Stocks

This includes both common and preferred stock in private corporations, generally purchased through a broker. Shares of stock in any "closely-held" corporations are not included.

Structure

A structure is a separate building that either:

- Has open space on all sides (no other building attached to it), or
- Is separated from other structures by dividing walls that extend from ground to roof

Residential buildings are considered to be separate structures if the common wall between them goes from ground to roof; for example, double houses, duplex houses, row houses, and houses attached to nonresidential structures.

Note: Sheds and private garages attached to houses are not considered separate structures because they are not intended for occupancy as separate living quarters.

***Students (Not
Student Nurses)***

Unmarried students living away from home while attending school, college, trade or commercial school in another locality, are members of the household back at their home and should not be interviewed in the locality where they are attending school.

Conversely, if the student reports having left home permanently, consider the student to be a household member at the school address. A married student who is living with a spouse and family is interviewed in the locality where he/she is attending school. Such people do not consider their parent's home their usual place of residence after they are married.

Unmarried students who are working away from their parent's home during summer school vacation are considered as household members of the sample unit if the living quarters are being held in the sample unit for them.

Students who attend school outside of the United States at the time of interview are not considered household members. However, if the student is in the household at the time of interview (for example, home on summer vacation) and has no other place of residence in the United States, they are counted as a household member.

Student Nurses

Student nurses are not students in the usual sense because they generally live year round at their place of training and the rules applicable to other students do not apply. Student nurses are considered residents of the hospital, nurse's home, or other place in which they live while receiving training, even though they may have a home elsewhere and visit it occasionally. Similarly, if the student nurse is living in a nurse's home, he/she would be interviewed as a resident there. If the student nurse is living at home while in training he/she is interviewed at home.

***Supplemental
Educational
Opportunity Grants
(SEOG's)***

See Federal Educational Assistance.

***Supplemental
Security Income
(SSI)***

A federally administered program that pays monthly benefits to aged, disabled, and blind people who have limited income and assets. SSI payments can also be paid to disabled and/or blind people regardless of age. Further, a person may be eligible for SSI payments even if they have never worked.

Even though the Social Security Administration administers the basic SSI program, income from SSI is NOT the same as Social Security. The money for these programs comes from two distinct sources, and if eligible, people can get SSI in addition to Social

Security. People in this program will receive a U.S. Treasury Check, or direct deposit.

Supplemental Unemployment Benefits (SUB)

Money received from a fund set up by private employers and negotiated by labor unions (mainly auto and steel worker unions). These benefits are paid in addition to state unemployment. SUB's are taxable, and people receiving them will receive a separate W-2 form showing the amount of SUB's paid to them.

Survey Purpose

The purposes of the survey:

- Assess the effects of welfare reform on the well being of individuals, families, and their children.
- Measure changes in program eligibility and participation, employment, income, in-kind benefits, services received from programs, and the impact of welfare reform on families and children, and
- Contribute to the development of measures of the economic and social well-being of the nation.

Survivor Benefits

These include any pensions or annuities that the respondent received as a widow(er) other than Social Security, IRAs, and Keogh accounts during the reference period.

Tips

Payments received, as supplements to wages, for services rendered to the customer. For some occupations such as waiters and waitresses, bellhops, barbers and taxicab drivers tips may constitute a large part of the person's income.

Topcoding of Variables

To protect against the possibility that a user might recognize the identity of an SPD respondent on the public use microdata files with very high income, income from every source is topcoded so that no individual income amounts above \$100,000 are revealed. This top-code amount is consistent with the topcoding for the 1992 and 1993 SIPP panels. Other economic variables are topcoded at the 97 percentile level. All variables that are topcoded have a "T" designation in the character which is the second from the right of the variable name.

Topical Module

Some topics are not asked every year for the SPD. The listing below shows when the topical modules will be included in the instrument:

- 1998-Adolescent SAQ
- 1999-Extended Child Well-Being
- 2000-Children's Residential History
- 2001-Adolescent SAQ
- 2002-Extended Child Well-Being

Tricare

A health care program for members of the uniformed services and their families, and survivors and retired members and their families. It offers three choices to eligible beneficiaries:

- **Tricare Standard** - a fee-for-service option that is also known as CHAMPUS.
- **Tricare Extra** - similar to Tricare Standard, but offers discounts to patients when they use Tricare network providers (in other words, a PPO provider.)
- **Tricare Prime** - the primary health care option offered by military hospitals and clinics, supported by contracted civilian health care companies (Generally civilian HMOs). For this option, an enrollment process is necessary. Enrollees choose a primary care manager (PCM) to provide or arrange for their health care needs. Prime offers wellness and preventive care services, but enrollees must get their care through Prime only. Active duty members are automatically enrolled in Prime. Beneficiaries choose to enroll in Prime.

Type A Noninterview

Households occupied by people eligible for interview, but an interview is not obtained.

Type B Noninterview

Type B noninterviews for the SPD are households or people who are temporarily ineligible for interview (for example, institutionalized people). We continue to follow up on Type B noninterviews.

Type C Noninterview

Units or people that are permanently ineligible for interview. These are households or people who can no longer participate in sample because they are deceased, moved out of the country or the entire household is in the military or the household dropped because of sample adjustments.

Type D Noninterview

Households or people who have moved to an unknown address or who have moved more than 100 miles from the nearest SPD PSU and a telephone interview could not be conducted.

<i>Type Z Noninterview</i>	An eligible person in an interviewed household who the field representative could not interview or for whom the field representative could not conduct a proxy interview.
<i>Unemployment Compensation</i>	Money received from state government unemployment insurance funds to help replace wages lost during times of layoff or unemployment.
<i>Unrelated Subfamily</i>	An unrelated subfamily is a family that does not contain the reference person or anyone related to the reference person.
<i>U.S. Government Railroad Retirement Benefits/Pensions</i>	Federal Railroad Retirement Benefits are based on a person's long-term employment (10 years or more) in the railroad industry. Payment from pensions established by railroad companies or unions to supplement Federal Railroad Retirement are not included as railroad retirement.
<i>U.S. Government Securities</i>	Includes U.S. Treasury bills, Treasury notes and Treasury bonds. It also includes Series H and HH U.S. Savings Bonds, which are bought at full value and interest payments are received semi-annually. Further, it includes credit instruments of agencies such as the Federal National Mortgage Association (Fannie Mae).
<i>U. S. Military Retirement Disability</i>	Received by previous members of the Armed Forces who have a disability of at least 30 percent (under a standard schedule of rating disability by the VA) and either: <ul style="list-style-type: none"> • the member has 8 years of service • the disability results from active duty, or • the disability occurred in the line of duty during a time of war or national emergency or certain other time periods
<i>U.S. Military Retirement Pay</i>	Military retirement pay is received by people as former career members of the U.S. Armed Forces. Payments are based on a percentage of the active duty basic pay, which is adjusted by semiannual cost of living changes. Payments from the U.S. Department of Veterans Affairs for disabled or aged veterans are not included. The key to avoiding this mistake is knowing that 20 years of service are generally required to receive retirement pay. Draftees and other former members of the Armed Forces with relatively short periods of service are not eligible for military retirement pay.

Since career military people are eligible for retirement pay after only 20 years of service, it is not uncommon for people receiving military retirement pay to be in their forties and fifties. Furthermore, they may be reemployed full time as civilian employees of the federal, state or local governments, or in the private sector.

***U.S. Savings Bonds
(E, EE)***

Series E and EE U.S. Savings Bonds are purchased at 50 to 75 percent of the bond's face value, and can be cashed in from 6 months after purchase until the bond's maturity. When the holder cashes in the bond, he/she will receive the amount paid for the bond, plus the interest calculated for the time the bond was held.

Uses of the SPD Data

The SPD core data can be used to create statistics to evaluate the survey, profile the participants in various government programs, examine the characteristics of the low income population, and examine how the economy is changing.

These statistics would include average monthly estimates of:

- Median household income.
- Number of workers and their median earnings.
- People with labor force activities.
- People who spent time looking for work or on layoff.
- Participants in government programs, such as:
 - 1) Public assistance payments (formerly known as AFDC).
 - 2) Social Security and SSI.
 - 3) Food stamps.
 - 4) Medicare and medicaid.
 - 5) Public or subsidized housing.
 - 6) Unemployment and workers' compensation.

These statistics (crossed by race, age, and other characteristics) are the basis for reports (or fact sheets) on the economic situation of Americans and their families.

***Usual Place of
Residence***

The place where a person usually lives and sleeps. A usual place of residence must be specific living quarters held by the person to which he/she is free to return at any time. Living quarters that a person rents or lends to someone else cannot be considered her/his usual place of residence during the time these quarters are occupied by someone else. Likewise, vacant living quarters that a

person offers for rent or sale during his/her absence should not be considered her/his usual place of residence while he/she is away.

A mailing address does not constitute a usual place of residence. Usual residents not only include members of the family, but may also include lodgers, servants, farm hands, and other employees who live in the unit and consider it their usual place of residence. In addition, a usual resident includes a person who lives in the sample unit but is temporarily absent, such as an unmarried child away at school (provided he/she has not left home permanently), a person traveling on business, a railroad worker, bus driver, and someone away visiting, on vacation, or temporarily in general hospitals (non-institutional).

***Veterans
Compensation/
Pension***

There are two types of veterans disability pensions:

- 1) Compensation payments for service-connected disability:
These payments are made to veterans with a disability that was caused or aggravated by military service. Payment amounts are related to the extent of the disability, which may range from 0 to 100 percent. Veterans with ratings of 50 percent or more may receive additional compensation for dependent wives, children under age 18, or under 22 if attending school full time, and dependent parents; and
- 2) Nonservice-connected disability pensions: The second type are VA pensions made to veterans whose disability is not service-connected, but who served on active duty in wartime and are in financial need. Veterans who are under age 65 must be permanently and totally disabled. Veterans who are 65 and over and not working are also eligible for VA pensions.

Payments vary depending on such factors as income, number of dependents, and need for regular aid and attendance of another person, whether the veteran is permanently housebound, and whether or not time is spent in a VA medical facility. When the pension is originally awarded, and in January during each year that the pension is received, the veteran receives a letter from the U.S. Department of Veterans Affairs indicating the amount of the monthly payment and which people in his immediate family besides himself are covered. In certain instances, the dollar amount for each person is also indicated in the letter.

In either case, payments are made monthly from the U.S. Treasury. Recipients may have their payment deposited directly in their own bank account.

***Veterans'
Educational
Assistance***

Veterans' financial aid programs consist of aid to veterans, the dependents and survivors of deceased or disabled military personnel, or military personnel participating in an educational assistance plan sponsored by the federal government. These programs include the Armed Forces Vocational Rehabilitation Program, and the following programs:

Dependents' and Survivors Educational Assistance Program -

This program serves dependents and survivors of veterans who died from service-connected causes, or whose service-connected disability is rated permanent and total, or who died while a disability so evaluated was in existence. Spouses and children of service personnel who are missing in action or interned by a hostile foreign government for more than 90 days are also eligible under this program. Up to 45 months of full-time training is provided in approved schools and on-the-job training programs.

G.I. Bill/VEAP Education Benefits - Also known as the Veterans Educational Assistance Program (VEAP), provides educational or vocational opportunities to veterans whose education may have been impeded by service in the Armed Forces since January 31, 1955. An honorable-discharge veteran with at least 180 days of active service is eligible for up to 45 months of full-time schooling, on-the-job training toward obtaining a regular undergraduate degree or any post-secondary education. These benefit payments are made directly to the veteran for any post secondary educational, vocational, or professional objective.

Post-Vietnam Era Veterans Educational Assistance Program -

Provides educational assistance to those people who entered the U.S. Armed Forces after December 31, 1976. Its goal is to assist young men and women in obtaining an education they might not otherwise be able to afford, and to promote and assist the all-volunteer military program of the United States by attracting qualified people to serve in the Armed Forces. To be eligible for training under this program, the person must:

- have served more than 180 days.
- have been released under conditions other than dishonorable, and

- have participated in a payroll deduction plan whereby the participant sets aside from \$25 to \$100 a month to a maximum of \$2,700, which the government will match on a 2 for 1 basis when the person elects to enter training. Individuals may make a lump sum contribution if they wish.

Veterans' Financial Aid Programs

Provides aid to veterans, the dependents and survivors of deceased or disabled military personnel, or military personnel participating in an educational assistance plan sponsored by the federal government. These programs include:

- GI Bill, Montgomery Bill.
- Post-Vietnam Vocational Educational Assistance (or Veterans' Educational Assistance Programs).
- Survivors' and Dependents' Educational Assistance, and
- the Armed Forces Vocational Rehabilitation Program.

Weighting

A calculation procedure designed to minimize the biases resulting from differences between the sample units (households and persons) that do respond and those that do not respond. As a result of the weighting, a set of final weights is produced for use in computing estimates of the characteristics of the survey universe (the universe of the population that the survey sample represents). For a panel survey such as SPD, two types of weighting are generally produced, namely, cross-sectional weighting and longitudinal weighting which are defined below.

- **Cross-sectional weighting** - A calculation procedure designed to minimize the biases resulting from differences between the respondent and nonrespondent sample units (households and persons) at a point in time, for examples, August 1997, Year 1998 etc. By definition, a cross-sectional weighting procedure produces a set of final weights for using in computing estimates of characteristics of the survey universe at a given point in time; for example, an estimate of the total number of low income households in 1997.
- **Longitudinal weighting** - A calculation procedure designed to minimize the biases resulting from differences between the respondent and nonrespondent sample units (persons) at a period spanning between two points in time, for example, a period between 1994 and 1999. By

definition, a longitudinal-sectional weighting procedure produces a set of final weights for using in computing estimates of characteristics of the survey universe at a period between two points in time. For example, an estimate of the total number of adults who continuously received any kinds of welfare assistance between 1993 and 1999.

A description of the longitudinal weighting procedure for the calculation of the longitudinal weights for use in computing estimates of characteristics at any time periods within 1992 and 1999 of the SPD survey universe represented by the original (one hundred level) sample persons is included in the File Information (see pages 3-3 through 3-8).

WIC

The Special Supplemental Nutrition Program for Women, Infants and Children (WIC) provides supplemental food either in the form of food or, more commonly, as vouchers valid for specific prescribed food items in stores. These supplemental foods include milk, cheese, eggs, instant formula, cereals, fruit and vegetable juices. Lower-income mothers, infants, and children judged to be at "nutritional risk" are eligible for WIC benefits. These include infants up to age one, children up to five years old, pregnant women, non-nursing mothers up to six months after childbirth, and nursing mothers up to one year after childbirth.

In addition to meeting the nutritional risk criterion, WIC enrollees must have annual family income below state-established limits, and public assistance recipients may be judged to be automatically eligible because of income.

Work

Work includes any activity for wages or salaries, for profit or fees, or for payment in-kind. One hour or more of such activity constitutes work. Work also includes unpaid activity of at least 15 hours a week on a family farm or business.

Workers' Compensation

Workers' Compensation payments are generally made under state laws set up to compensate workers for loss of pay because of accidents or illnesses caused by or happening on the job. Employees of the federal government, longshoremen, and harbor workers are also covered under special federal programs. Payments

may be one-time compensation awards or may be made for longer periods for long-term disability. In cases of permanent and total disability, about three out of four states make payments for life. The great majority of cases involve cash payments in situations where a worker is unable to work for a temporary period after which the employee will be able to return to work. Payment amounts are calculated as a fraction of the workers' usual wage – most commonly about two-thirds. One-third of the states provide additional benefits for dependents.

Administration of workers' compensation payments is not uniform across states or even within each state. Payments may come directly from the employer, from an insurance company retained by the employer or from a state workers' compensation fund.

HOW TO USE THE DATA DICTIONARY

The Data Dictionary describes the file contents and record layout of the public-use computer tape (or compact disc-readable) file.

The first line of each data item description gives the name of the variable (also referred to as data item, item name, or data field name). The variable name will be no longer than 8 characters. The first 6 characters provide a descriptive name, character 7 (or 2nd from right if the variable name is less than 8 characters) is the variable type code [unedited (U), edited (E), recoded (R), weights (W), imputation flag (I), or topcoded (T)]; and character 8 (or the last character if the variable name is less than 8 characters) will reflect the year in which the question was asked (for example, 2000 = 0).

The variable name uses alphabetic characters, numeric characters, and the special character (_). No other special characters are used. It may be a mnemonic such as "SAMPLE00" or "PP_ID", or a sequential identifier such as "VETTY1E0" or "SURSC2E0". Variable names are unique throughout the entire file. Following the variable name on the first line is information on the size of the data field, and the begin position of the field. This information can be used with software packages in order to read data values.

Below is an example of a variable in the 2nd Longitudinal file, and a description of the information that follows the variable name.

```
D WCYNE0 1 10096
T IS: Workers' compens payment rec'd 99
    During 1999 did (you) receive workers'
    compensation payments?
U All people age 15+ reported receiving
  workers compensation income. (HINCWCE0 = 1
  and AGET0 = 15+)
V 0 .Not in Universe
V 1 .Yes
V 2 .No
```

D The first line contains the variable name (WCYNE0), the variable length (1), and its position on the file (10096).

T The second line of each data item description begins with the character "T". The "T" flag indicates lines in the data dictionary containing the category code and a short description of the variable.

The next lines contain the long description and where possible, the screen variable name. Usually the long description directly quotes the question from the instrument. For recoded variables a fuller description of the variables is given in this location since there is no question in the instrument.

U The line beginning with the character "U" describes the universe for that item (for example, the conditions under which a question should have been asked).

V Line(s) containing categorical value codes and labels.

SOURCE AND ACCURACY STATEMENT FOR THE SURVEY OF PROGRAM DYNAMICS SECOND LONGITUDINAL FILE

DATA COLLECTION AND ESTIMATION

Source of Data

The Survey of Program Dynamics (SPD) universe is the noninstitutionalized resident population living in the United States. This population includes people (including children) living in group quarters, such as dormitories, rooming houses, and religious group dwellings. Crew members of merchant vessels, Armed Forces personnel living in military barracks, and institutionalized people, such as correctional facility inmates and nursing home residents, were not eligible to be in the survey. In addition, United States citizens residing abroad were not eligible to be in the survey. Foreign visitors who work or attend school in this country and their families were eligible; all others were not eligible to be in the survey. With the exceptions noted above, people who were at least 15 years of age at the time of the interview were eligible to be asked questions regarding income and job experience.

The calendar year data for 1996 were collected during April, May, and June of 1997 as part of the SPD Bridge Survey. Likewise, the calendar year data for 1997 to 1999 were collected during May, June, and July of 1998 to 2000 as part of the SPD 1998 to 2000 Surveys, respectively. The SPD Bridge calendar and SPD 1998 calendar year files consist principally of the calendar year data for 1996 and 1997, respectively. The SPD second longitudinal file longitudinally combines the data from the SIPP Panels 1992 and 1993, and the SPD Bridge file and SPD 1998 to 2000 calendar year files.

The goal of the SPD program is to provide policy makers a survey to assess the effects of the recent welfare reforms and how these reforms interact with each other, and with employment, income, and family circumstances. The SPD program eventually spans from the pre-reform through the post-reform period, 1992-2002. In order to obtain information about past economic history, employment, income, and program participation, two retired SIPP panels 1992 and 1993 were chosen as the SPD sample. A full potential of the SPD data is generally achieved when using the SPD second longitudinal file until the release of other subsequent SPD longitudinal files.

The SPD Bridge Survey data was collected in 1997 and intended to be a connection run between the SIPP and SPD data. Data that was merged from the previous SIPP surveys, the SPD Bridge survey, and the subsequent SPD survey (for example, SPD 1998) should give us the necessary pre-reform and post-reform information for sampled households.

Background of SIPP 1992 and 1993 Panels and SPD Bridge Survey

The 1992 and 1993 SIPP panel samples were located in 284 Primary Sampling Units (PSUs), each consisting of a county or a group of contiguous counties. Within these PSUs, expected clusters of two or four living quarters (LQs) were systematically selected from lists of addresses prepared for the 1980 decennial census to form the bulk of the sample. To account for LQs built within each of the sample areas after the 1980 census, a sample was drawn of permits issued for construction of residential LQs up until shortly before the beginning of the panel. In jurisdictions that do not issue building permits, small land areas were sampled and the LQs within were listed by field personnel and then sub-sampled. In addition, sample LQs were selected from supplemental frames that included LQs identified as missed in the 1980 census and group quarters (GQs).

At the time of the initial visit of the SIPP panels, the occupants of about 19,600 living quarters were interviewed for the 1992 panel and 19,900 were interviewed for the 1993 panel. This accounts for approximately 72% (1992) and 73% (1993) of the LQs originally designated for the SIPP samples. Approximately 21% (1992) and 20% (1993) of the designated LQs were found to be vacant, demolished, converted to nonresidential use, or otherwise ineligible for the survey. The remainder, approximately 2000 LQs, were not interviewed because the occupants refused to be interviewed, could not be found at home, were temporarily absent, or otherwise unavailable. Thus, occupants of about 91% of all eligible LQs participated in the first interview of the 1992 and 1993 SIPP panels.

For the remaining nine interviews, only original sample people (those in Wave 1 sample households and interviewed in Wave 1) and people living with them were eligible to be interviewed. With certain restrictions, original sample people were to be followed even if they moved to a new address. When original sample people moved without leaving a forwarding address or moved to extremely remote parts of the country and no telephone number was available, additional non-interviews resulted.

The 1992 10-Wave Longitudinal File consists of data collected from February 1992 to April 1995. Data for up to 39 reference months are available for people on this file. The 1993 Nine-Wave Longitudinal File consists of data collected from February 1993 to January 1996. Data for up to 36 reference months are available for people on this file.

Tables 1a-1c indicate the interview and reference months for the collection of data from the 1992 Ten-Wave Longitudinal File, 1993 Nine-Wave Longitudinal File, and the SPD 1998 to 2000 Files. For the SIPP, a person was classified as interviewed or non-interviewed based on the following definitions. (Note: A person may be classified differently for calculating different weights). Interviewed sample people (including children) were defined to be: *those for whom self, proxy, or imputed responses were obtained for each month of the appropriated longitudinal period.*

The months for which people were deceased or residing in an ineligible address were identified on the file. Non-interviewed people were defined to be those for whom neither self nor proxy responses were obtained for one or more months of the appropriate longitudinal period (excluding imputed people and people who died or moved to an ineligible address).

It is estimated that roughly 56,300 (1992) and 57,200 (1993) people were initially designated in the sample for the SIPP. Approximately 51,100 (1992) and 51,900 (1993) people were interviewed in Wave 1; while the balance, residing in the 4,000 (1992 and 1993 combined) living quarters not interviewed at Wave 1 remained anonymous and became the initial source of the person non-response in the weighting procedures. For panel weighting, the eligible sample is considered to be all people initially classified as interviewed with a person non-response rate of 25 percent (1992) and 24 percent (1993). The longitudinal file contains approximately 59,700 (1992) and 62,700 (1993) people in all. This includes the Wave 1 interviewed people and about 8,600 (1992) and 10,600 (1993) people who entered survey households during the panel through births, marriages, and other reasons. Some respondents did not respond to some of the questions; therefore, item non-response rates, especially for sensitive income and money related items, are higher than the person non-response rates given above.

We define the SPD Bridge sample cohort as people in the 1992 and 1993 SIPP panels that were in an interviewed household in the last wave. However, only people considered interviewed (self or proxy or imputed response) longitudinally in SIPP *and* considered interviewed in SPD Bridge were eligible to go on further for the SPD 1998 Survey, since the SPD 1998 Survey was carried out only as a part of a long-term *longitudinal* data collection effort for the SPD. In addition, due to budget constraint, the SPD 1998 Survey was also subject to a sample cut based on the sub-sampling procedure described in the section below.

1998 SPD Sub-sampling for SPD 1998 Survey

Due to budget constraints, the SPD 1998 Survey did not visit all 35,000 Bridge households. The budget only allowed for SPD to visit 21,000 households. Roughly 19,100 cases were sampled in this operation, since we needed to account for an expected 12.5 percent non-response and a growth of 10 percent of the total sample size due to household spawning.

In the sub-sampling (sample cut), the SPD Bridge sample households were demographically divided into six strata as shown in the table at the end of this section. The stratification was performed using the household information collected from the SPD Bridge. In each stratum, the households were sampled independently with the sampling rate as provided in the table below. As indicated among sampling rates in this table, the low income sample households were generally not subjected to the sample cut at all.

As a result of the sample cut, the actual number of the households selected for interview was 19,288. Among the 19,288 households selected for interview and their spawned households, 16,395 households were interviewed.

Strata	Description	Sampling Rate	Designated Number	Projected Interviews
1	Households where the primary family or the primary individual has a total family income below 150% of the poverty threshold	1-in-1	6,182	5,950
2	Households where the primary family or the primary individual has a total family income between 150% and 200% of the poverty threshold and there are children under 18	1-in-1	1,075	1,035
3	Households where the primary family or the primary individual has a total family income above 200% of the poverty threshold and there are children under 18	1-in-1.11	6,623	6,375
4	Households where the primary family or the primary individual has a total family income between 150% and 200% of the poverty threshold and there are no children under 18	1-in-1.22	1,461	1,406
5	Households in the balance	1-in-3.70	3,707	3,568
6	Households entirely institutionalized (Outcome code = 228)	1-in-3.70	81	DK
Total			19,129	18,334

SPD 1999 Survey

The sample for the SPD 1999 survey is simply a direct continuation of the SPD 1998 sample. Namely, there is no additional sample cut or no bringing back of any addition sample households from either the SPD Bridge non-respondents or the SIPP Panel 1992/1993 non-respondents. In this survey, there are 19,551 sample households (including the spawned households) eligible for interview, and 16,654 sample households were interviewed.

SPD 2000 Survey

The sample for the SPD 2000 survey consists of two parts. Part 1 of the SPD 2000 sample is simply a direct continuation of the SPD 1999 sample which will be hereinafter referred to as *the SPD core part*. Part 2 is composed of a sub-sample of the SPD Bridge Type A (direct and indirect refusal) and Type D (unlocated movers) non-interviewed households which will be hereinafter referred to as *the SPD Bridge non-interview part*.

The SPD Bridge non-interview part of the sample was selected by classifying the Type A and Type D SPD Bridge non-interviewed households into six strata in the same manner as those prescribed for the 1998 SPD sample cut as shown in the table below. The non-interviewed households in each stratum were then randomly selected at the sample rate specified in the table

below (which is the same sampling rate for the 1998 SPD sample cut.)

Strata	Description ¹	Number of Households	Percent	Sample Selection Factor	Subsample Size
1	Households where the primary family or the primary individual has a total family income below 150% of the poverty threshold	1,444	22.5	1.00	1,444
2	Households where the primary family or the primary individual has a total family income between 150% and 200% of the poverty threshold and there are children under 18	156	2.4	1.00	156
3	Households where the primary family or the primary individual has a total family income above 200% of the poverty threshold and there are children under 18	736	11.5	1.11	663
4	Households where the primary family or the primary individual has a total family income between 150% and 200% of the poverty threshold and there are no children under 18	476	7.4	1.22	390
5	Households in the balance	3,605	56.2	3.70	974
6	Households institutionalized (outcome code = 228)	0	0.0	3.70	0
Total		6,417	100.0		3,627

¹ The characteristics of these households were determined based on Reference Month 4 of Wave 1 of either the SIPP Panel 1992 or 1993, depending on which panel they were originated from.

In the SPD core part of the sample, there are 19,890 sample households (including the spawned households) eligible for interview, and 16,845 sample households were interviewed. In the SPD Bridge non-interview part of the sample, there are 3,584 sample households (including the spawned households) eligible for interview, and 1,871 sample households were interviewed.

However, the SPD second longitudinal file includes only the SPD core part of the sample. The SPD Bridge non-interview part of the sample will be included in the SPD third longitudinal file. Therefore, the current source and accuracy statement is prepared with the consideration that the SPD Bridge non-interview part of the sample is not included on the SPD second longitudinal file.

ESTIMATION

For estimation of the characteristics of the population in the SPD universe, six weights are provided on the SPD second longitudinal file as listed below.

1. Traditional longitudinal panel weight (SPDLNWGT)
2. 1999 quasi-longitudinal panel weight (SPDQLW99)
3. 2000 quasi-longitudinal panel weight (SPDQLW00)
4. Longitudinal annual weight (SPDAWTRD) associated with the traditional longitudinal panel weight (SPDLNWGT)
5. Longitudinal annual weight (SPDAWQ99) associated with the traditional longitudinal panel weight (SPDQLW99)
6. Longitudinal annual weight (SPDAWQ00) associated with the traditional longitudinal panel weight (SPDQLW00)

The procedure for calculating each of the above six weights is described earlier in the Weighting section.

For the traditional longitudinal panel weight, all sample persons classified as a traditional longitudinal panel interviewed person were assigned a positive final traditional longitudinal panel weight ($SPDLNWGT > 0$), while all those classified otherwise were assigned a zero final traditional longitudinal panel weight ($SPDLNWGT = 0$.) The traditional longitudinal panel interviewed persons are those who were classified as interviewed (self, proxy, or imputed) in the entire SIPP (all the reference months) and the SPD Bridge, then survived the 1998 sample cut, and were classified as interviewed in the SPD 1998 to SPD 2000.

For the 1999 quasi-longitudinal panel weight, all sample persons classified as a 1999 quasi-longitudinal panel interviewed person were assigned a positive final 1999 quasi-longitudinal panel weight ($SPDQLW99 > 0$), while all those classified otherwise were assigned a zero final 1999 quasi-longitudinal panel weight ($SPDQLW99 = 0$.) The 1999 quasi-longitudinal panel interviewed persons are those who were classified as interviewed (self, proxy, or imputed) in the entire SIPP (all the reference months) and the SPD Bridge, then survived the 1998 sample cut, and were classified as interviewed in the SPD 1999 but were or were not classified as interviewed in the SPD 1998 and/or SPD 2000.

For the 2000 quasi-longitudinal panel weight, all sample persons classified as a 2000 quasi-longitudinal panel interviewed person were assigned a positive final 2000 quasi-longitudinal panel weight ($SPDQLW00 > 0$), while all those classified otherwise were assigned a zero final 2000 quasi-longitudinal panel weight ($SPDQLW00 = 0$.) The 2000 quasi-longitudinal panel interviewed persons are those who were classified as interviewed (self, proxy, or imputed) in the entire SIPP (all the reference months) and the SPD Bridge, then survived the 1998 sample cut, and were classified as interviewed in the SPD 2000 but were or were not classified as interviewed in the SPD 1998 and/or SPD 1999.

For the longitudinal annual weight (SPDAWTRD) associated with the traditional longitudinal panel weight (SPDLNWGT), only the following sample people were assigned a positive SPDAWTRD: the original sample persons who were classified as interviewed (self, proxy, or imputed) in the entire SIPP (all the reference months) and the SPD Bridge, then survived the 1998 sample cut, and were classified as interviewed in the SPD 1998 to SPD 2000; and the non-original (200+ level) sample children born after Wave 1 of the SIPP Panel 1992 or 1993 whose designated parents in 2000 have a positive SPDLNWGT. All other sample persons were assigned a zero SPDAWTRD.

For the longitudinal annual weight (SPDAWQ99) associated with the 1999 quasi-longitudinal panel weight (SPDQLW99), only the following sample people were assigned a positive SPDAWQ99: the original sample persons who were classified as interviewed (self, proxy, or imputed) in the entire SIPP (all the reference months) and the SPD Bridge, then survived the 1998 sample cut, and were classified as interviewed in the SPD 1999 but were or were not classified as interviewed in the SPD 1998 and/or SPD 2000; and the non-original (200+ level) sample children born after Wave 1 of the SIPP Panel 1992 or 1993 whose designated parents in 2000 have a positive SPDQLW99. All other sample persons were assigned a zero SPDAWQ99.

For the longitudinal annual weight (SPDAWQ00) associated with the 2000 quasi-longitudinal panel weight (SPDQLW00), only the following sample people were assigned a positive SPDAWQ00: the original sample persons who were classified as interviewed (self, proxy, or imputed) in the entire SIPP (all the reference months) and the SPD Bridge, then survived the 1998 sample cut, and were classified as interviewed in the SPD 2000 but were or were not classified as interviewed in the SPD 1998 and/or SPD 1999; and the non-original (200+ level) sample children born after Wave 1 of the SIPP Panel 1992 or 1993 whose designated parents in 2000 have a positive SPDQLW00. All other sample persons were assigned a zero SPDAWQ00.

The traditional longitudinal panel weight (SPDLNWGT), 1999 quasi-longitudinal panel weight (SPDQLW99), and 2000 quasi-longitudinal panel weight (SPDQLW00) are provided for the estimation of characteristics of the population of the SPD panel universe over the whole or part of the time span between 1992 to 2000. The advantage of using SPDLNWGT for analyses and estimates is that all the original sample people with positive SPDLNWGT have the more data across time from 1992 to 2000 than other cohorts of original sample people. However, any analyses and estimates using SPDLNWGT will automatically be limited to using only the data collected from the original sample people who were interviewed in each and every wave of either the SIPP Panel 1992 or 1993, and in the SPD 1997 through 2000. Therefore, this limitation precludes us from taking the advantage of the data collected from the original sample people who were interviewed in every wave in the SIPP Panel 1992 or 1993, and in the SPD Bridge, survived the SPD 1998 sample cut (reference 2) *but were not interviewed in all of the SPD 1998, 1999, or 2000*. The data from these original sample people is particularly important for evaluating the effectiveness of the money incentive having been offered to Type A (interview refusal) or potential Type A sample households in the SPD 1999 and 2000. Consequently, the 1999 quasi-longitudinal panel weight (SPDQLW99) and the 2000 quasi-longitudinal panel weight (SPDQLW00) are derived to take advantage of the data from these original sample people.

On the SPD second longitudinal file (or any other SPD longitudinal files), 1992 calendar year data is only available for the sample persons that originate from the SIPP Panel 1992. Therefore, for any 1992 estimates created using any one of the traditional longitudinal panel weight (SPDLNWGT), 1999 quasi-longitudinal panel weight (SPDQLW99), and 2000 quasi-longitudinal panel weight (SPDQLW00), the effective panel weight can be approximately taken as two times the panel weight (SPDLNWGT or SPDQLW99 or SPDQLW00) provided on the SPD second longitudinal file. The factor of two is consistent with the combined panel factor of 0.5 used in the weighting as described in the Weighting section. The variances of the 1992 estimates must be consistently approximated by inflating them by two as well.

When calculating annual estimates using any one of the three longitudinal annual weights (SPDAWTRD, SPDAWQ99, and SPDAWQ00), include only the weighted non-original sample children born during or in prior calendar years. The non-original sample children weights, for those aged eight or less, are intended only to approximate growth in the universe of the non-institutionalized residents in the United States since 1993. Some caution should be given when interpreting results for children aged 8 or less. The annual estimates of the characteristics of these children for a calendar year closer to 2000 are likely to be more accurate than those for a calendar year further away from 2000. This is because all three types of annual weights for these children were adjusted to improve the population coverages for June 2000 (as described earlier in the Weighting section).

Estimation of Person Characteristics

For the estimation of the person characteristics in the SPD panel universe using the SPD second longitudinal file, one must first determine which one of the three panel weights (traditional longitudinal panel weight (SPDLNTRD), 1999 quasi-longitudinal panel weight (SPDQLW99), and 2000 quasi-longitudinal panel weight (SPDQLW00)) to be used based on the advantage and disadvantage discussion provided earlier in the Estimation section. Hereinafter, a panel weight (SPDLNTRD or SPDQLW99 or SPDQLW00) chosen for estimating a characteristic or characteristics of a cohort of people (persons) in the SPD panel universe, it will be generically referred to as “*the longitudinal person weight*” for further discussion. Some basic types of longitudinal estimates (using the SPD second longitudinal file) can be constructed using the longitudinal person weights are described below in terms of estimated numbers.

1. The number of people who have ever experienced a characteristic or situation during a given period of time (for example, the number of people who experience unemployment during 1999). To construct such an estimate, sum the weights over all people who possessed the characteristic of interest at some point during the time period of interest.
2. The amount of a characteristic accumulated by people during a given time period (for example, the amount of unemployment compensation received by unemployed people during 1999). To construct such an estimate, compute the product of the weight times the amount of the characteristic and sum this product over all appropriate people.

3. The average number of consecutive months or years of possession of a characteristic (i.e., the spell length for a characteristic.) For example, one could estimate the average spell of unemployment that elapsed before a person found a new job. (*Note that, similar to the SPD first longitudinal file, the SPD second longitudinal file provides the employment data only in terms of week numbers with and without employment in a given year. Thus, for calculation the average unemployment spell length in a time period of interest, the data user needs to match the sample person's record back to the one on the SIPP longitudinal file to determine the number of spells in the time period and/or needs to make some justifiable approximation on the number of unemployment spells within the time period of interest.*) To construct such an estimate, first identify the sample persons possessing the characteristic at some point during the time period of interest. Then, create two sums of these (longitudinal person) weights: Sum 1 is the sum of the products of the weights times the number of months (or years) the spell lasted, and Sum 2 is the sum of the weights only. The average spell length in months (or years) is given by Sum 1 divided by Sum 2. A person who experienced two spells during the time period of interest would be treated as two persons and appear twice in Sum 1 and Sum 2. An alternate method of calculating the average can be found in the section "Standard Error of a Mean or an Aggregate."

Note that spells extending before or after the time period of interest are cut off (censored) at the boundaries of the time period. If they are used in estimating average spell length, a downward bias will result.

4. The number of year-to-year changes in the status of a characteristic (i.e., number of transitions) summed over every set of two consecutive years during the time of interest. To construct such estimate, sum the longitudinal person weights each time a change is reported between two consecutive years during the time period of interest. For example, to estimate the number of persons who changed from receiving any public assistance in 1998 to not receiving in 1999 add together the longitudinal person weights of each person who had such a change.
5. Yearly estimates of a characteristic average over a number of consecutive years. For example, we could estimate the yearly average number of food stamp recipients over 1996 through 1999. To construct such an estimate, first form an estimate for each year in the time period of interest by summing up the longitudinal person weights of those possessed the characteristic of interest. Then sum the yearly estimates and divide by the number of years in the time period of interest.

ACCURACY OF ESTIMATES

SPD estimates are based on a sample; they may differ somewhat from the figures that would have been obtained if a complete census had been taken using the same questionnaire, instructions, and enumerators. There are two types of errors possible in an estimate based on a sample survey:

non-sampling and sampling. We are able to provide estimates of the magnitude of SPD sampling error, but this is not true of non-sampling error. The next sections describe sources of SPD non-sampling error, followed by a discussion of sampling error, its estimation, and its use in data analysis.

Note that estimates from this sample for individual states are subject to very high sampling errors and are not recommended. The state codes on the file are primarily of use for linking respondent characteristics with appropriate contextual variables (e.g., state-specific welfare criteria) and for tabulating data by user-defined groupings of states.

Non-sampling Errors

Non-sampling errors can be attributed to many sources, for examples, inability to obtain information about all cases in the sample, difficulties in precisely stating some definitions, differences in the interpretation of questions, inability or unwillingness on the part of the respondents to provide correct information, inability to recall information, and the following errors made. These errors generally include collection such as in recording or coding the data, processing the data, estimating values for missing data, biases resulting from the differing recall periods caused by the rotation pattern used, and under coverage. Quality control and edit procedures were used to reduce errors made by respondents, coders and interviewers.

Under-coverage in SPD results from missed living quarters and missed people within sample households. It is known that under coverage varies with age, race, and gender. Generally, under coverage is larger for males than for females and larger for Blacks than for non-Blacks. Ratio estimation to independent age-race-gender population controls (benchmark estimates) partially corrects for the bias due to survey under-coverage. However, biases exist in the estimates to the extent that people in missed households or missed people in interviewed households have characteristics different from those of interviewed people in the same age-race-gender group. In addition, the independent population controls used have not been adjusted for under-coverage in the decennial census. The Census Bureau has used complex techniques to adjust the weights for non-response. For an explanation of the techniques used, see the "Non-response Adjustment Methods for Demographic Surveys at the U.S. Bureau of the Census," November 1988, Working Paper 8823, by R. Singh and R. Petroni. An example of successfully avoiding bias can be found in "Current Non-response Research for the Survey of Income and Program Participation" (paper by Petroni, presented at the Second International Workshop on Household Survey Non-response, October 1991). The procedure for calculating the longitudinal person weights on the SPD second longitudinal file was derived based on such complex techniques.

Unlike SIPP data that can be analyzed from a cross-sectional or longitudinal view point, the SPD data are solely longitudinal and must be used as such. Thus, the income and poverty estimates in a given single year may not be comparable with those from other surveys such as the Current Population Survey (CPS) and the SIPP. This is principally attributable to the fact that the sample per se and the longitudinal person weights on the SPD second longitudinal file essentially represents just the cohort of people around March 1993. As the SPD sample aged more, it will

become less adequate to represent the more current population (say, the 1998 population). In addition, the high non-response rate (roughly 50 percent) in the SPD may reduce the degree of the effectiveness of the non-interview adjustment process to fully compensate for differential attrition. Note that the non-response rate has three components: 27 percent sample loss inherited from the SIPP, 14 percent occurred from the SPD Bridge interview, and an additional 9 percent occurred at the SPD 1998 interview.

Comparability with Other Estimates

Caution should be exercised when comparing data from this file with data from SIPP publications or with data from other surveys, such as Current Population Survey (CPS). The comparability problems are caused by such sources as the seasonal patterns for many characteristics, different non-sampling errors, and different concepts and procedures. Refer to the *SIPP Quality Profile* for known differences with data from other sources and further discussion.

Sampling Variability

Standard errors indicate the magnitude of the sampling error. They also partially measure the effect of some non-sampling errors in response and enumeration, but do not measure any systematic biases in the data. The standard errors for the most part measure the variations that occurred by chance because a sample rather than the entire population was surveyed.

USES AND COMPUTATION OF STANDARD ERRORS

Confidence Intervals

The sample estimate and its standard error enable one to construct confidence intervals (ranges that would include the average result of all possible samples with a known probability). For example, if all possible samples were selected, each of these being surveyed under essentially the same conditions and

using the same sample design, and if an estimate and its standard error were calculated from each sample, then:

1. Approximately 90 percent of the intervals from 1.645 standard errors below the estimate to 1.645 standard errors above the estimate would include the average result of all possible samples.
2. Approximately 95 percent of the intervals from 1.960 standard errors below the estimate to 1.960 standard errors above the estimate would include the average result of all possible samples.

The average estimate derived from all possible samples is or is not contained in any particular computed interval. However, for a particular sample, one can say with a specified confidence that the average estimate derived from all possible samples is included in the confidence interval.

Hypothesis Testing

Standard errors may also be used for hypothesis testing, a procedure for distinguishing between population characteristics using sample estimates. The most common types of hypotheses tested are the population characteristics are identical versus they are different. Tests may be performed at various levels of significance, where a level of significance is the probability of concluding that the characteristics are different when, in fact, they are identical.

To perform the most common test, compute the difference $X_A - X_B$, where X_A and X_B are sample estimates of the characteristics of interest. A later section explains how to derive an estimate of the standard error of the difference $X_A - X_B$. Let that standard error be s_{DIFF} . If $X_A - X_B$ is between -1.645 times s_{DIFF} and $+1.645$ times s_{DIFF} , no conclusion about the characteristics is justified at the 10 percent significance level. If, on the other hand, $X_A - X_B$ is smaller than -1.645 times s_{DIFF} or larger than $+1.645$ times s_{DIFF} , the observed difference is significant at the 10 percent level. In this event, it is commonly accepted practice to say that the characteristics are different. We recommend that users report only those differences that are significant at the 10 percent level or better. Of course, sometimes this conclusion will be wrong. When the characteristics are, in fact, the same, there is a 10 percent chance of concluding that they are different.

Note that as more tests are performed, more erroneous significant differences will occur. For example, at the 10 percent significance level, if 100 independent hypothesis tests are performed in which there are no real differences, it is likely that about 10 erroneous differences will occur. Therefore, the significance of any single test should be interpreted cautiously.

Caution Concerning Small Estimates and Small Differences

Because of the large standard errors involved, there is little chance that estimates will reveal useful information when computed on a base smaller than 200,000. Also, non-sampling error in one or more of the small number of cases providing the estimate can cause large relative error in that particular estimate. Therefore, care must be taken in the interpretation of small differences since even a small amount of non-sampling error can cause a borderline difference to appear significant or not, thus distorting a seemingly valid hypothesis test.

Standard Error Parameters

Most SPD estimates have greater standard errors than those obtained through a simple random sample because clusters of living quarters are sampled for the SIPP, SPD Bridge, and SPD 1998 to SPD 2000. To derive standard errors that would be applicable to a wide variety of estimates

and could be prepared at a moderate cost, a number of approximations were required. Estimates with similar standard error behavior were grouped together and two parameters (denoted a and b) were developed to approximate the standard error behavior of each group of estimates. Because the actual standard error behavior was not identical for all estimates within a group, the standard errors computed from these parameters provide an indication of the order of magnitude of the standard error for any specific estimate. These a and b parameters vary by characteristic and by demographic subgroup to which the estimate applies. The a and b parameters are also known as “generalized variance parameters.”

For the SPD second longitudinal file, the a and b parameters for various groups of the populations and the six types of weights described below are provided in Tables 3 to 5. Hereinafter, *the a and b parameters in Tables 3 to 5* will be referred to as *the base a and b parameters*.

As described earlier in the Weighting section, there are six types of weights on the SPD second longitudinal file as listed below.

1. Traditional longitudinal panel weight (SPDLNWGT)
2. Longitudinal annual weight (SPDAWTRD) associated with the traditional longitudinal panel weight
3. 1999 Quasi-longitudinal panel weight (SPDQLW99)
4. Longitudinal annual weight (SPDAWQ99) associated with the 1999 quasi-longitudinal panel weight
5. 2000 Quasi-longitudinal panel weight (SPDQLW00)
6. Longitudinal annual weight (SPDAWQ00) associated with the 2000 quasi-longitudinal panel weight

The applications for each of the six weights are described earlier in the Estimation section and the Longitudinal Annual Weight with Non-original Sample Children section.

The generalized variance parameters (a and b) for the traditional longitudinal panel weight (SPDLNWGT) and the associated longitudinal annual weight (SPDAWTRD) are the same as provided in Table 3. Similarly, the generalized variance parameters (a and b) for the 1999 quasi-longitudinal panel weight (SPDQLW99) and the associated longitudinal annual weight (SPDAWQ99) are the same as provided in Table 4, and the generalized variance parameters (a and b) for the 2000 quasi-longitudinal panel weight (SPDQLW00) and the associated longitudinal annual weight (SPDAWQ00) are the same as provided in Table 5. The sample sizes associated with longitudinal annual weights, SPDAWTRD, SPDAWQ99, and SPDAWQ00 are slightly larger than the sample sizes associated with the longitudinal or quasi-longitudinal panel weights, SPDLNWGT, SPDQLW99, and SPDQLW00, respectively because some of the non-

original sample children were included as part of the longitudinal annual sample as described earlier in the Weighting section. Therefore, the generalized variances parameters provided in Tables 3 to 5 will produce slightly more conservative variance estimates (associated with children aged ≤ 8 in 2000) using the longitudinal annual weights (SPDAWTRD, SPDAWQ99, and SPDAWQ00)

Computation of Standard Error Parameters

In this section we discuss the adjustment of base a and b parameters (Tables 3 to 5) to provide a and b parameters appropriate for each type of longitudinal described in the section "Estimation of Person Characteristics." Later sections will discuss the use of the adjusted parameters in various formulas to compute standard errors of estimated numbers, percents, averages, etc. Tables 3 to 5 provides the base a and b parameters needed to compute the approximate standard errors for estimates.

The creation of appropriate a and b parameters for the types of estimates discussed in the section "Estimation of Person Characteristics" is described below. It is assumed that the full sample is used for the estimation.

1. The number of people who have ever experienced a characteristic during a given time period. The appropriate a and b parameters are taken directly from Tables 3 to 5 (the base a and b parameters). The choice of parameter depends on the characteristic of interest and the demographic subgroup of interest.
2. Amount of a characteristic accumulated by people during a given time period. The appropriate a and b parameters are also taken directly from Tables 3 to 5.
3. The average number of consecutive months or years of possession of a characteristic per spell (i.e., the average spell length for a characteristic) during a given time period. Start with the appropriate base a and b parameters from Tables 3 to 5. The parameters are then inflated by an additional factor, g to account for persons who experience multiple spells during the time period of interest. The g factor is computed by Formula 1 below.

$$g = \frac{\sum_{i=1}^n m_i^2}{\sum_{i=1}^n m_i} \quad (1)$$

where there are n persons with at least one spell and m_i is the number of spells experienced by person i during the time period of interest.

4. The number of year-to-year changes in the status of a characteristic (i.e., number of transitions) summed over every set of two consecutive years during the time period of interest. Obtain a set of adjusted a and b parameters exactly as just described in 3, then multiply these parameters by an additional factor of 2.0. The factor of 2.0 is based on the assumption that each spell produces two transitions within the time period of interest.
5. Yearly estimates of characteristic averaged over a number of consecutive years. Appropriate base a and b parameters are taken directly from Tables 3 to 5.

Standard Errors of Estimated Numbers

The approximate standard error s_x of an estimated number x of people, families and so forth, can be obtained by using Formula 2 provided below.

$$s_x = \sqrt{ax^2 + bx} \quad (2)$$

Here a and b are the standard error parameters associated with the particular type of characteristic for the appropriate longitudinal time period. For the analysis using the SPD data on the SPD second file, the a and b parameters are provided in Tables 3 to 5.

An illustration would be to suppose that using the SPD second longitudinal file data, the estimate of the number of people ever receiving Social Security since 1993 and continuing to 1999 is 34,122,000 which was derived using the traditional longitudinal panel weight. The appropriate a and b parameters to use in calculating a standard error for the estimate are obtained from Table 3. They are $a = -0.0000987$, $b = 16,837$. Using Formula (2), the approximate standard error s_x is

$$s_x = \sqrt{(-0.0000987)(34,122,000)^2 + (16,837)(34,122,000)} = 677,934 \text{ people}$$

The 90-percent confidence interval as shown by the data is from 33,006,799 to 35,237,201. Therefore, a conclusion that the average estimate derived from all possible samples lies within a range computed in this way would be correct for roughly 90 percent of all samples. Similarly, the 95-percent confidence interval as shown by the data is from 32,793,249 to 35,450,751 and we could conclude that the average estimate derived from all possible samples lies within this interval.

Standard Error of a Mean or an Aggregate

A mean \bar{x} is defined here to be the average quantity of some characteristic (other than the number of people, families, or households) per person, family, or household. An aggregate k is defined to be the total quantity of some characteristic summed over all units in a sub-population.

For example, a mean could be the average annual income of females age 25 to 34. The standard error $s_{\bar{x}}$ of a mean can be approximated by Formula 3 and the standard error s_k of an aggregate can be approximated by Formula 4. Because of the approximations used in developing Formulas 3 and 4, an estimate of the standard error of the mean or aggregate obtained from these formulas will generally underestimate the true standard error. The formula used to estimate the standard error $s_{\bar{x}}$ of a mean \bar{x} is

$$s_{\bar{x}} = \sqrt{\left(\frac{b}{y}\right) s^2} \quad (3)$$

where y is the base s^2 is the estimated population variance of the characteristic and b is the standard error parameter associated with the type of the characteristic. The standard error s_k of an aggregate k is

$$s_k = \sqrt{b y s^2} \quad (4)$$

The population variance s^2 may be estimated by one of two methods: the first method uses data that has been grouped into intervals, the second method uses ungrouped data. The second method is recommended because it is more precise. However, the first method will be easier to implement if grouped data are already being used as part of the analysis. In both methods, let x_i denote the value of the characteristic for the i^{th} person.

To use the first method, the range of values for the characteristic is divided into c intervals, where the lower and upper boundaries of interval j are Z_{j-1} and Z_j , respectively. Each person is placed into one of the c groups such that the value of the characteristic, x_i is between Z_{j-1} and Z_j . The estimated population variance, s^2 is then given by Formula 5 below.

$$s^2 = \sum_{j=1}^c p_j m_j^2 - \bar{x}^2 \quad (5)$$

where p_j is the estimated proportion of people in group j (based on weighted data), and m_j is given by the equation below.

$$m_j = \frac{Z_{j-1} + Z_j}{2}, \text{ for } j = 1, 2, \dots, c$$

The most representative value of the characteristic in group j is assumed to be m_j . If group c is open-ended, that is, no upper interval boundary exists, then an approximate value for m_c is by the equation below.

$$m_c = \left(\frac{3}{2}\right) Z_{c-1}$$

The mean \bar{x} can be obtained using Formula 6 below.

$$\bar{x} = \sum_{j=1}^c p_j m_j \tag{6}$$

In the second method, the estimated population variance s^2 is given Formula 7 below.

$$s^2 = \frac{\sum_{i=1}^n w_i x_i^2}{\sum_{i=1}^n w_i} - \bar{x}^2 \tag{7}$$

where there are n sample people with the characteristic of interest and w_i is the final weight for person i . The mean \bar{x} can be obtained from Formula 8 below.

$$\bar{x} = \frac{\sum_{i=1}^n w_i x_i}{\sum_{i=1}^n w_i} \tag{8}$$

Note that, by definition, y (the size of the base) in Formulas 3 and 4 can be obtained from the equation below.

$$y = \sum_{i=1}^n w_i$$

An illustration of Method 1 would be to suppose that, based on the traditional longitudinal panel weight, the 1999 distribution of annual incomes is given in Table 2 for people aged 25 to 34 who were employed for all 12 months of 1999. The mean annual cash income from Formula 8 is

$$\bar{x} = \frac{1,371}{39,851}(2,500) + \frac{1,651}{39,851}(6,250) + \dots + \frac{1,493}{39,851}(105,000) = \$26,717$$

Using Formula 7 and the mean annual cash income of \$26,717 the estimated population variance, s^2 is

$$s^2 = \frac{1,371}{39,851}(2,500)^2 + \frac{1,651}{39,851}(6,250)^2 + \dots + \frac{1,493}{39,851}(105,000)^2 = 468,331,633$$

The appropriate b parameter from Table 3 is 9,193. Now, using Formula 3, the estimated standard error of the mean is

$$s_{\bar{x}} = \sqrt{\frac{9,193}{39,851,000}(468,331,633)} = \$329$$

An illustration of Method 2 would be to suppose that we are interested in estimating the average length of spell of receiving public assistance during 1992-1994 (just prior to the Welfare Reform) for a given sub-population using the traditional longitudinal panel weight. Also, suppose there are only 10 sample persons in the sub-population who were public assistance recipients. (This example is for illustrative purpose only; in reality, 10 sample units or cases would be too few for a reliable estimate.) The number of consecutive years of receiving public assistance during 1992-1994 are given for each sample person in the table below. (Caveat - In reality, only the total number of months of receiving public assistance in a given year is available in the SPD second longitudinal file. Thus, the actual number of spells in a time period of interest is not known or equivalently the actual spell length is not known. Consequently, to use such data in the SPD second longitudinal file for assessing average spell length in a time period of interest, it is the responsibility of the data user to match back the sample person record to the one in the SIPP longitudinal file to determine the number of spells in the time period of interest and/or make his/her own justifiable assumption on what should be the number of spells in the time period of interest given the total number of months in a year that a sample person possessed a spell characteristic, e.g., receiving public assistance.)

Sample Person Number	Number of Spells During 1992-1994	Spell Lengths in Months	Final Longitudinal Weight
1	2	12, 6	5300
2	1	2	7100
3	1	5	4900
4	2	3, 6	6500
5	1	13	4700
6	1	14	5500
7	2	3, 6	4100
8	1	24	4200
9	1	6	4500
10	1	4	6100

Using Formula 8, the average spell \bar{x} of receiving public assistance is estimated to be

$$\bar{x} = \frac{5300 \times 12 + 5300 \times 6 + 7100 \times 2 + \dots + 6100 \times 4}{5300 + 5300 + 7100 + \dots + 6100} = \frac{472800}{68800} = 6.872 \text{ months}$$

The standard error $s_{\bar{x}}$ will be computed by Formula 3. First, estimate the population variance s^2 by Formula 7

$$s^2 = \frac{5300 \times 12^2 + 5300 \times 6^2 + 7100 \times 2^2 + \dots + 6100 \times 4^2}{5300 + 5300 + 7100 + \dots + 6100} - 6.872^2 = 41.92 \text{ months}^2$$

Next, the base b parameter from Table 3 is 17,740. To account for the multiple number of spells during 1992-1994 of three sample persons (two spells for Sample Persons 1, 4, and 7), multiply the base b parameter by a factor g computed from Formula 1 as shown below.

$$g = \frac{2^2 + 1 + 1 + 2^2 + 1 + 1 + 2^2 + 1 + 1 + 1}{2 + 1 + 1 + 2 + 1 + 1 + 2 + 1 + 1 + 1} = 1.462$$

Therefore, the adjusted b parameter is $17740 \times 1.462 = 25936$ and the standard error $s_{\bar{x}}$ of the mean is

$$s_{\bar{x}} = \sqrt{\frac{25936}{68800} \times 41.92} = 3.975 \text{ months}$$

Standard Errors of Estimated Percentages

This section refers to the percentages of a group of people, families, or households possessing a particular attribute and to percentages of money or related concepts. The reliability of an estimated percentage, computed using sample data for both numerator and denominator, depends upon both the size of the percentage and the size of the total upon which the percentage is based. Estimated percentages are relatively more reliable than the corresponding estimates of the numerators of the percentages, particularly if the percentages are more than 50 percent. For example, the percent estimate of employed people is more reliable than the estimated number of employed people. When the numerator and denominator of the percentage have different parameters, use the parameter of the numerator. If proportions are presented instead of percentages, note that the standard error of a proportion is equal to the standard error of the corresponding percentage divided by 100.

There are two types of percentages commonly estimated. The first type is the percentage of people sharing a particular characteristic such as the percentage of people owning their own home or the percentage of 1998 food stamp recipients who were also receiving food stamps in 1999. The second type is the percentage of money or some similar concept held by a particular group of people or held in a particular form. Examples are the percentage of wealth held by people with high income and the percentage of annual income received by females.

For the percentage of people, the approximate standard error, $s_{x,p}$, of the estimated percentage, p , can be obtained by Formula 9 below.

$$s_{x,p} = \sqrt{\frac{b}{x} p(100 - p)} \quad (9)$$

Here, x is the base of the percentage p is the percentage ($0 < p < 100$), and b is parameter for the numerator of the percentage calculation. For the analysis using the SPD data and the SPD second longitudinal file, the b parameters are provided in Tables 3 to 5.

An illustration would be to suppose that, based on the traditional longitudinal panel weight, in 1999, an estimate of number of male aged 22 to 55 was 46,023,000. Among all the males in this age group, an estimate of 2.4 percent was unemployed. The b parameter associated with the numerator (the number of unemployed male) is 9,193 (from Table 3). Using Formula 9, the approximate standard error $s_{x,p}$ is

$$s_{x,p} = \sqrt{\frac{9,193}{46,023,000} (2.4)(1 - 2.4)} = 0.22\%$$

Consequently, the 90-percent confidence interval for the unemployment estimate is 2.0% to 2.8%.

To calculate the percentages of money, the formula is more complicated. A percentage of money will usually be estimated in one of two ways. It may be the ratio, p_M of two aggregates as defined in Formula 10 below.

$$p_M = 100 \left(\frac{X_A}{X_N} \right) \quad (10)$$

or it may be the ratio, p_M of two means with an adjustment, \hat{p}_A for different bases as defined in Formula 11 below.

$$p_M = 100 \left(\frac{\bar{X}_A}{\bar{X}_N} \right) \hat{p}_A \quad (11)$$

where X_A and X_N in Formula 10 are aggregate money figures, \bar{X}_A and \bar{X}_N in Formula 11 are mean money figures, and \hat{p}_A is the estimated number in Group A divided by the estimated number in Group

N . In either way of estimating p_M (Formula 10 or 11), we estimate the standard error s_{p_M} of p_M using Formula 12 provided below.

$$s_{p_M} = \sqrt{\left(\frac{\hat{p}_A \bar{X}_A}{\bar{X}_N}\right)^2 \left[\left(\frac{s_{\hat{p}_A}}{\hat{p}_A}\right)^2 + \left(\frac{s_{\bar{X}_A}}{\bar{X}_A}\right)^2 + \left(\frac{s_{\bar{X}_N}}{\bar{X}_N}\right)^2 \right]} \quad (12)$$

where $s_{\hat{p}_A}$ is the standard error of \hat{p}_A , $s_{\bar{X}_A}$ is the standard error of \bar{X}_A and $s_{\bar{X}_N}$ is the standard error of \bar{X}_N . To calculate $s_{\hat{p}_A}$, use Formula 9. The standard errors $s_{\bar{X}_A}$ and $s_{\bar{X}_N}$ are calculated using Formula 3.

Note that there is frequently some correlation among the characteristics estimated by \hat{p}_A , \bar{X}_A , and \bar{X}_N . These correlations, if present, will cause a tendency toward overestimates or underestimates, depending on the relative sizes of the correlations and whether they are positive or negative.

An illustration would be to suppose that, based on the traditional longitudinal weight, in 2000, an estimated 8.8% of males aged 16 and over was Black, the mean annual earning of these Black males was \$15,456, the mean annual earning of all males aged 16 and over was \$22,932, and the corresponding standard errors are 0.37 percent, \$432, and \$324, respectively. Then, the percent (p_M) of male earnings made by Blacks in 1998 per Formula 11 is

$$p_M = 100 \left(\frac{15,456}{22,932} \right) (0.088) = 5.9\%$$

Using Formula 12, the approximate standard error, s_{p_M} is

$$s_{p_M} = \sqrt{\left(\frac{(0.088)(15,456)}{22,932}\right)^2 \left[\left(\frac{0.0037}{0.088}\right)^2 + \left(\frac{432}{15,456}\right)^2 + \left(\frac{324}{22,932}\right)^2 \right]} = 0.31\%$$

Standard Error of a Difference

The standard error s_{x-y} of a difference between two sample estimates x and y is equal to

$$s_{x-y} = \sqrt{s_x^2 + s_y^2 - 2rs_x s_y} \quad (13)$$

where s_x and s_y are the standard errors of the estimates x and y . The estimates can be numbers, averages, percents, ratios, etc. The correlation between x and y is represented by r ($0 \leq r \leq 1$). If r is assumed to be zero and the true correlation is really positive (negative), then this assumption will result in a tendency toward overestimates (underestimates) of the true standard error.

An illustration would be to suppose that we are interested in the difference in the average annual number of adult males (aged 16 and above) versus adult females with annual cash income above \$9,000 in 1998. An estimate of the number of adult people in this income bracket has been obtained for both males and females. For females, the estimate is 1,619,000. A similar estimate for males is 2,198,000. The difference in estimates is 579,000.

The standard error of the adult female estimate is computed next. The a and b parameters from Table 3 for females are -0.0001027 and 9,193, respectively. Based on Formula 2, the standard error, s_x of the female estimate is

$$s_x = \sqrt{(-0.0001027)(1,619,000)^2 + (9,193)(1,619,000)} = 120,890$$

Similarly, the a and b parameters from Table 3 for males are -0.0001137 and 9,193, respectively. Based on Formula 2, the standard error, s_y of the male estimate is

$$s_y = \sqrt{(-0.0001137)(2,198,000)^2 + (9,193)(2,198,000)} = 140,203$$

Now, the standard error of the difference is computed using the above two standard errors. The correlation r for this example is assumed to be zero. The standard error, s_{x-y} of the difference is computed by Formula 13 as shown below.

$$s_{x-y} = \sqrt{(120,890)^2 + (140,203)^2} = 185,125$$

Suppose that it is desired to test at the 10 percent significance level whether the number of adult males and females with monthly cash income above \$9,000 were different in 1998, one can compare the difference of 579,000 to the product $1.645 \times 185,125 = 304,531$. Since the difference is larger than 1.645 times the standard error (s_{x-y}) of the difference, the data allow us to conclude that, in 1998, the number of adult males with annual cash income above \$90,000 is significantly higher than the number of the adult females at the 10 percent confidence level.

Standard Error of a Median

The median quantity, X_{med} of some item (characteristic), X such as income for a given group of people, families, or households is that quantity such that at least half the group has as much or more and at least half the group has as much or less. The sampling variability of an estimated median \hat{X}_{med} depends upon the form of the distribution of the item as well as the size of the group. To estimate the median (X_{med}) and the standard error of the median $s_{X_{med}}$ the procedure described below may be used.

The median (X_{med}) like the mean, can be estimated using either data which has been grouped into intervals (e.g., income intervals) or ungrouped data. If grouped data are used, the median (X_{med}) is estimated using either Formula 15 or 16 with $p = 0.5$. If ungrouped data are used, the data records are ordered based on the value of the item (e.g., income level), then the estimated median is the value of the item such that the weighted estimate of 50 percent of the sub-population falls at or below that value and 50 percent is at or above that value. The method of standard error computation presented here requires the use of grouped data, because it is deemed easier to compute the median by grouping the data and then using Formula 15 or 16.

An approximate method for measuring the reliability of an estimated median (\hat{X}_{med}) is to determine a confidence interval about it. (See the section on "Confidence Intervals.") The following procedure (four steps) may be used to estimate the 68-percent confidence limits (i.e., approximately \pm one standard error from the median) and hence the standard error (of a median) based on sample data.

Step 1 - Determine, using Formula 9, the standard error ($s_{x,p=50}$) of an estimate of 50 percent of the group (sub-population).

Step 2 - Subtract from and add to 50 percent the standard error determined in Step 1 to obtain the percentages associated with the lower and upper limits of the 68-percent confidence interval of the item. Namely, the smaller percentage is $50 - s_{x,p=50}$ percent, and the larger percentage is $50 + s_{x,p=50}$ percent.

Step 3 - Using the distribution of the item within the group, calculate the quantity, X_{UCL} of the item such that the percent of the group owning more of the item is equal to the smaller percentage ($50 - s_{x,p=50}$) found in Step 2. This quantity (X_{UCL}) will be the upper limit for the 68-percent confidence interval (assuming that the interval with higher item value is ranked at lower percentile as illustrated in Table 2.) In a similar fashion, calculate the quantity, X_{LCL} of the item such that the percent of the group owning more of the item is equal to the larger percentage ($50 + s_{x,p=50}$) found in Step 2. This quantity (X_{LCL}) will be the lower limit for the 68-percent confidence interval. (Note that a median computed from ungrouped data may or may not fall in this confidence interval).

Step 4 - Divide the difference between the two quantities (X_{UCL} and X_{LCL}) determined in Step 3 by two to obtain the standard error estimate ($s_{\hat{X}_{med}}$) of the median estimate (\hat{X}_{med}).

Namely,

$$\hat{s}_{\hat{X}_{med}} = \frac{X_{UCL} - X_{LCL}}{2} \quad (14)$$

To perform Step 3, it will be necessary to interpolate, which may be done using different methods. The most common is simple linear interpolation (Formula 15) and Pareto interpolation (Formula 16). The appropriateness of the method depends on the form of the distribution around the median. We recommend Pareto interpolation in most instances. Interpolation is used as follows. The quantity of the item, X_{pN} such that p percent own more of the item is

$$X_{pN} = A_1 \exp \left[\frac{\ln \left(\frac{pN}{N_1} \right)}{\ln \left(\frac{N_2}{N_1} \right)} \ln \left(\frac{A_2}{A_1} \right) \right] \quad (15)$$

if Pareto Interpolation is indicated and

$$X_{pN} = \left[\frac{pN - N_1}{N_2 - N_1} (A_2 - A_1) + A_1 \right] \quad (16)$$

if linear interpolation is indicated, where N is the size of the group; A_1 and A_2 are the lower and upper bounds, respectively, of the interval in which X_{pN} falls; N_1 and N_2 are the estimated numbers of group members owning more than A_1 and A_2 , respectively; exp refers to the exponential function; and Ln refers to the natural logarithm function. One should note that a mathematically equivalent result is obtained by using common logarithms (base 10) and antilogarithms.

An illustration would be in order to calculate the standard error of a median, we return to the first example used to illustrate the standard error of a mean. As indicated in Table 2, the size (N) of the group is 39,851,000 and the median annual income estimate (\hat{X}_{med}) for the group falls in between \$17,500 and \$19,999. With $p = 0.5$, $A_1 = \$17,500$, $A_2 = \$19,999$; $N_1 = 5,799,000 + 4,730,000 + \dots + 1,493,000 = 22,106,000$, and $N_2 = 4,730,000 + 3,723,000 + \dots + 1,493 = 16,307,000$; the median annual income estimate, \hat{X}_{med} for this group is computed using Formula 16 (with $p = 0.5$) to be \$18,316. The standard error estimate ($s_{\hat{X}_{med}}$) of the median annual income

estimate is calculated using the above four step procedure as follows.

Step 1 - Using Formula 9 and the appropriate b parameter of 9,193, the standard error estimate of 50 percent on a base of 39,851,000 is about 0.8 percentage points, (i.e., $s_{x,p=50} = 0.8\%$).

Step 2 - Obtain the two percentages associated with the lower and upper limits of the 68-percent confidence: the smaller percentage = $50 - s_{x,p=50} = 49.2$ and the larger percentage = $50 + s_{x,p=50} = 50.8$.

Step 3 - By examining Table 2, we see that the percentage 49.2 falls in the income interval from \$17,500 to \$19,999. Thus as determined previously, $A_1 = \$17,500$, $A_2 = \$19,999$, $N_1 = 22,106,000$, $N_2 = 16,307,000$, and $N = 39,851,000$ and $p = 49.2$. Based on Formula 15, the upper bound (X_{UCL}) of a 68-percent confidence interval for the median estimate (\hat{X}_{med}) is

$$X_{UCL} = 17,500 \exp \left[\frac{\ln \left(\frac{0.492 \times 39,851,000}{22,106,000} \right)}{\ln \left(\frac{16,307,000}{22,106,000} \right)} \ln \left(\frac{19,999}{17,500} \right) \right] = \$18,446$$

Also by examining Table 2, the 50.8 percent fall in the same income interval. Thus, $A_1, A_2, N_1,$ and N_2 are the same as above, but $p = 0.508$. The lower bound (X_{LCL}) of a 68-percent confidence interval for the median (\hat{X}_{med}) is

$$X_{LCL} = 17,500 \exp \left[\frac{\ln \left(\frac{0.508 \times 39,851,000}{22,106,000} \right)}{\ln \left(\frac{16,307,000}{22,106,000} \right)} \ln \left(\frac{19,999}{17,500} \right) \right] = \$18,189$$

Step 4 - Based on Formula 14, the standard error estimate ($s_{\hat{X}_{med}}$) of the median annual income estimate (\hat{X}_{med}) is

$$s_{\hat{X}_{med}} = \frac{\$18,446 - \$18,189}{2} = \$129$$

If the linear interpolation is used, the median is then estimated using Formula 16 to be \$18,440 and the 68-percent confidence interval of the estimated median is from \$18,302 to \$18,577. The standard error estimate is \$138.

Standard Error of Ratio of Means or Medians

The standard error for a ratio of means or medians is approximated by Formula 17 provided below.

$$s_{\frac{X}{Y}} = \sqrt{\left(\frac{X}{Y}\right)^2 \left[\left(\frac{s_X}{X}\right)^2 + \left(\frac{s_Y}{Y}\right)^2 \right]} \quad (17)$$

where X and Y are the means or medians, and s_X and s_Y are their associated standard errors. Formula 17 assumes that the means or medians are not correlated. If the correlation between the population means or medians estimated by X and Y are actually positive (negative), then this procedure will tend to produce overestimates (underestimates) of the true standard error for the ratio of means or medians.

Table 1a - Reference months for each interview month of the SIPP 1992 Panel, SIPP 1993 Panel, SPD Bridge (1997), and SPD 1998 Surveys.

Survey	Months of Interview	Reference Months
SIPP Panel 1992	February 1992 - April 1995	October 1991 - March 1995

APPENDIX A

Industry Classification Codes for Detailed Industry (3-digit)

There are 236 categories for the employed, with one additional category for the experienced unemployed. To assist you in your coding the categories listed below are aggregated into 15 major self-employment recodes (see page A-10). (Numbers in parentheses are the 1987 SIC code equivalent; see Executive Office of the President, Office of Management and Budget, Standard Industrial Classification Manual, 1987. "Pt" means part, "n.e.c." means not elsewhere classified.)

Code	Industry
000-009	Not used
010-030	AGRICULTURE
010	Agricultural production, crops (01)
011	Agricultural production, livestock (02)
012	Veterinary services (074)
013-019	Not used
020	Landscape and horticultural services (078)
021-029	Not used
030	Agricultural services, n.e.c. (071, 072, 075, 076)
031-032	FORESTRY AND FISHERIES
031	Forestry (08)
032	Fishing, hunting, and trapping (09)
033-039	Not used
040-050	MINING
040	Metal mining (10)
041	Coal mining (12)
042	Oil and gas extraction (13)
043-049	Not used
050	Nonmetallic mining and quarrying, except fuel (14)
051-059	Not used
060	CONSTRUCTION (15, 16, 17)
061-099	Not used
100-392	MANUFACTURING
100-222	NONDURABLE GOODS

Code	Industry
100-122	Food and kindred products
100	Meat products (201)
101	Dairy products (202)
102	Canned, frozen and preserved fruits and vegetables (203)
103-109	Not used
110	Grain mill products (204)
111	Bakery products (205)
112	Sugar and confectionery products (206)
113-119	Not used
120	Beverage industries (208)
121	Miscellaneous food preparations and kindred products (207, 209)
122	Not specified food industries
123-129	Not used
130	Tobacco manufactures (21)
131	Not used
132-150	Textile mill products
132	Knitting mills (225)
133-139	Not used
140	Dyeing and finishing textiles, except wool and knit goods (226)
141	Carpets and rugs (227)
142	Yarn, thread, and fabric mills (221-224, 228)
143-149	Not used
150	Miscellaneous textile mill products (229)
151-152	Apparel and other finished textile products
151	Apparel and accessories, except knit (231-238)
152	Miscellaneous fabricated textile products (239)
153-159	Not used
160-162	Paper and allied products
160	Pulp, paper, and paperboard mills (261-263)
161	Miscellaneous paper and pulp products (267)
162	Paperboard containers and boxes (265)
163-170	Not used
171-172	Printing, publishing, and allied industries
171	Newspaper publishing and printing (271)
172	Printing, publishing, and allied industries, except newspapers (272-279)
173-179	Not used
180-192	Chemicals and allied products
180	Plastics, synthetics, and resins (282)
181	Drugs (283)
182	Soaps and cosmetics (284)
183-189	Not used
190	Paints, varnishes, and related products (285)

Code	Industry
191	Agricultural chemicals (287)
192	Industrial and miscellaneous chemicals (281, 286, 289)
193-199	Not used
200-201	Petroleum and coal products
200	Petroleum refining (291)
201	Miscellaneous petroleum and coal products (295, 299)
202-209	Not used
210-212	Rubber and miscellaneous plastics products
210	Tires and inner tubes (301)
211	Other rubber products, and plastics footwear and belting (302-306)
212	Miscellaneous plastics products (308)
213-219	Not used
220-222	Leather and leather products
220	Leather tanning and finishing (311)
221	Footwear, except rubber and plastic (313, 314)
222	Leather products, except footwear (315-317, 319)
223-229	Not used
230-392	DURABLE GOODS
230-241	Lumber and wood products, except furniture
230	Logging (241)
231	Sawmills, planing mills, and millwork (242, 243)
232	Wood buildings and mobile homes (245)
233-240	Not used
241	Miscellaneous wood products (244, 249)
242	Furniture and fixtures (25)
243-249	Not used
250-262	Stone, clay, glass, and concrete products
250	Glass and glass products (321-323)
251	Cement, concrete, gypsum, and plaster products (324, 327)
252	Structural clay products (325)
253-260	Not used
261	Pottery and related products (326)
262	Miscellaneous nonmetallic mineral and stone products (328, 329)
263-269	Not used
270-301	Metal industries
270	Blast furnaces, steelworks, rolling and finishing mills (331)
271	Iron and steel foundries (332)
272	Primary aluminum industries (3334, part 334, 3353-3355, 3363, 3365)
273-279	Not used
280	Other primary metal industries (3331, 3339, part 334, 3351, 3356, 3357, 3364, 3366, 3369, 339)

Code	Industry
281	Cutlery, hand tools, and general hardware (342)
282	Fabricated structural metal products (344)
283-289	Not used
290	Screw machine products (345)
291	Metal forgings and stampings (346)
292	Ordnance (348)
293-299	Not used
300	Miscellaneous fabricated metal products (341, 343, 347, 349)
301	Not specified metal industries
302-309	Not used
310-332	Machinery and computing equipment
310	Engines and turbines (351)
311	Farm machinery and equipment (352)
312	Construction and material handling machines (353)
313-319	Not used
320	Metalworking machinery (354)
321	Office and accounting machines (3578, 3579)
322	Computers and related equipment (3571-3577)
323-330	Not used
331	Machinery, except electrical, n.e.c. (355, 356, 358, 359)
332	Not specified machinery
333-339	Not used
340-350	Electrical machinery, equipment, and supplies
340	Household appliances (363)
341	Radio, TV, and communication equipment (365, 366)
342	Electrical machinery, equipment, and supplies, n.e.c. (361, 362, 364, 367, 369)
343-349	Not used
350	Not specified electrical machinery, equipment, and supplies
351-370	Transportation equipment
351	Motor vehicles and motor vehicle equipment (371)
352	Aircraft and parts (372)
353-359	Not used
360	Ship and boat building and repairing (373)
361	Railroad locomotives and equipment (374)
362	Guided missiles, space vehicles, and parts (376)
363-369	Not used
370	Cycles and miscellaneous transportation equipment (375, 379)
371-381	Professional and photographic equipment, and watches
371	Scientific and controlling instruments (381, 382 except 3827)
372	Medical, dental, and optical instruments and supplies (3827, 384, 385)
373-379	Not used
380	Photographic equipment and supplies (386)

Code	Industry
381	Watches, clocks, and clockwork operated devices (387)
382-389	Not used
390	Toys, amusement, and sporting goods (394)
391	Miscellaneous manufacturing industries (39 except 394)
392	Not specified manufacturing industries
393-399	Not used
400-472	TRANSPORTATION, COMMUNICATIONS, AND OTHER PUBLIC UTILITIES
400-432	TRANSPORTATION
400	Railroads (40)
401	Bus service and urban transit (41, except 412)
402	Taxicab service (412)
403-409	Not used
410	Trucking service (421, 423)
411	Warehousing and storage (422)
412	U.S. Postal Service (43)
413-419	Not used
420	Water transportation (44)
421	Air transportation (45)
422	Pipe lines, except natural gas (46)
423-431	Not used
432	Services incidental to transportation (47)
433-439	Not used
440-442	COMMUNICATIONS
440	Radio and television broadcasting and cable (483, 484)
441	Telephone communications (481)
442	Telegraph and miscellaneous communications services (482, 489)
443-449	Not used
450-472	UTILITIES AND SANITARY SERVICES
450	Electric light and power (491)
451	Gas and steam supply systems (492, 496)
452	Electric and gas, and other combinations (493)
453-469	Not used
470	Water supply and irrigation (494, 497)
471	Sanitary services (495)
472	Not specified utilities
473-499	Not used

Code	Industry
500-571	WHOLESALE TRADE
500-532	Durable Goods
500	Motor vehicles and equipment (501)
501	Furniture and home furnishings (502)
502	Lumber and construction materials (503)
503-509	Not used
510	Professional and commercial equipment and supplies (504)
511	Metals and minerals, except petroleum (505)
512	Electrical goods (506)
513-520	Not used
521	Hardware, plumbing and heating supplies (507)
522-529	Not used
530	Machinery, equipment, and supplies (508)
531	Scrap and waste materials (5093)
532	Miscellaneous wholesale, durable goods (509 except 5093)
533-539	Not used
540-571	Nondurable Goods
540	Paper and paper products (511)
541	Drugs, chemicals and allied products (512, 516)
542	Apparel, fabrics, and notions (513)
543-549	Not used
550	Groceries and related products (514)
551	Farm-product raw materials (515)
552	Petroleum products (517)
553-559	Not used
560	Alcoholic beverages (518)
561	Farm supplies (5191)
562	Miscellaneous wholesale, nondurable goods (5192-5199)
563-570	Not used
571	Not specified wholesale trade
572-579	Not used
580-691	RETAIL TRADE
580	Lumber and building material retailing (521, 523)
581	Hardware stores (525)
582	Retail nurseries and garden stores (526)
583-589	Not used
590	Mobile home dealers (527)
591	Department stores (531)
592	Variety stores (533)
593-599	Not used
600	Miscellaneous general merchandise stores (539)

Code	Industry
601	Grocery stores (541)
602	Dairy products stores (545)
603-609	Not used
610	Retail bakeries (546)
611	Food stores, n.e.c. (542, 543, 544, 549)
612	Motor vehicle dealers (551, 552)
613-619	Not used
620	Auto and home supply stores (553)
621	Gasoline service stations (554)
622	Miscellaneous vehicle dealers (555, 556, 557, 559)
623	Apparel and accessory stores, except shoe (56, except 566)
624-629	Not used
630	Shoe stores (566)
631	Furniture and home furnishings stores (571)
632	Household appliance stores (572)
633	Radio, TV, and computer stores (5731, 5734)
634-639	Not used
640	Music stores (5735, 5736)
641	Eating and drinking places (58)
642	Drug stores (591)
643-649	Not used
650	Liquor stores (592)
651	Sporting goods, bicycles, and hobby stores (5941, 5945, 5946)
652	Book and stationery stores (5942, 5943)
653-659	Not used
660	Jewelry stores (5944)
661	Gift, novelty, and souvenir shops (5947)
662	Sewing, needlework and piece goods stores (5949)
663	Catalog and mail order houses (5961)
664-669	Not used
670	Vending machine operators (5962)
671	Direct selling establishments (5963)
672	Fuel dealers (598)
673-680	Not used
681	Retail florists (5992)
682	Miscellaneous retail stores (593, 5948, 5993-5995, 5999)
683-690	Not used
691	Not specified retail trade
692-699	Not used

Code	Industry
700-712	FINANCE, INSURANCE, AND REAL ESTATE
700	Banking (60 except 603 and 606)
701	Savings institutions, including credit unions (603, 606)
702	Credit agencies, n.e.c. (61)
703-709	Not used
710	Security, commodity brokerage, and investment companies (62, 67)

APPENDIX B

OCCUPATIONAL CLASSIFICATION

Occupational Classification Codes for Detailed Occupational Categories (3-digit)

There are 500 categories for the employed with 1 additional category for the experienced unemployed. The classification is developed from the 1980 Standard Occupational Classification. “n.e.c.” is the abbreviation for not elsewhere classified.

Code	Occupation
000-199	MANAGERIAL AND PROFESSIONAL SPECIALTY OCCUPATIONS
000-037	EXECUTIVE, ADMINISTRATIVE, AND MANAGERIAL OCCUPATIONS
000-003	Not used
004	Chief executives and general administrators, public administration (112)
005	Administrators and officials, public administration (1132-1139)
006	Administrators, protective services (1131)
007	Financial managers (122)
008	Personnel and labor relations managers (123)
009	Purchasing managers (124)
010-012	Not used
013	Managers, marketing, advertising, and public relations (125)
014	Administrators, education and related fields (128)
015	Managers, medicine and health (131)
016	Not used
017	Managers, food serving and lodging establishments (1351)
018	Managers, properties and real estate (1353)
019	Funeral directors (part 1359)
020	Not used
021	Managers, service organizations, n.e.c. (127, 1352, 1354, part 1359)
022	Managers and administrators, n.e.c. (121, 126, 132-1343, 136-139)
023-037	Management Related Occupations
023	Accountants and auditors (1412)
024	Underwriters (1414)
025	Other financial officers (1415, 1419)
026	Management analysts (142)
027	Personnel, training, and labor relations specialists (143)
028	Purchasing agents and buyers, farm products (1443)
029	Buyers, wholesale and retail trade except farm products (1442)
030-032	Not used

Code	Occupation
033	Purchasing agents and buyers, n.e.c. (1449)
034	Business and promotion agents (145)
035	Construction inspectors (1472)
036	Inspectors and compliance officers, except construction (1473)
037	Management related occupations, n.e.c. (149)
038-042	Not used
043-199	PROFESSIONAL SPECIALTY OCCUPATIONS
043-063	Engineers, Architects, and Surveyors
043	Architects (161)
044-059	Engineers
044	Aerospace (1622)
045	Metallurgical and materials (1623)
046	Mining (1624)
047	Petroleum (1625)
048	Chemical (1626)
049	Nuclear (1627)
050-052	Not used
053	Civil (1628)
054	Agricultural (1632)
055	Electrical and electronic (1633, 1636)
056	Industrial (1634)
057	Mechanical (1635)
058	Marine and naval architects (1637)
059	Engineers, n.e.c. (1639)
060-062	Not used
063	Surveyors and mapping scientists (164)
064-068	Mathematical and Computer Scientists
064	Computer systems analysts and scientists (171)
065	Operations and systems researchers and analysts (172)
066	Actuaries (1732)
067	Statisticians (1733)
068	Mathematical scientists, n.e.c. (1739)
069-083	Natural Scientists
069	Physicists and astronomers (1842, 1843)
070-072	Not used
073	Chemists, except biochemists (1845)
074	Atmospheric and space scientists (1846)
075	Geologists and geodesists (1847)
076	Physical scientists, n.e.c. (1849)
077	Agricultural and food scientists (1853)
078	Biological and life scientists (1854)

Code	Occupation
079	Forestry and conservation scientists (1852)
080-082	Not used
083	Medical scientists (1855)
084-089	Health Diagnosing Occupations
084	Physicians (261)
085	Dentists (262)
086	Veterinarians (27)
087	Optometrists (281)
088	Podiatrists (283)
089	Health diagnosing practitioners, n.e.c. (289)
090-094	Not used
095-106	Health Assessment and Treating Occupations
095	Registered nurses (29)
096	Pharmacists (301)
097	Dietitians (302)
098-105	Therapists
098	Respiratory therapists (3031)
099	Occupational therapists (3032)
100-102	Not used
103	Physical therapists (3033)
104	Speech therapists (3034)
105	Therapists, n.e.c. (3039)
106	Physicians' assistants (304)
107-112	Not used
113-154	Teachers, Postsecondary
113	Earth, environmental, and marine science teachers (2212)
114	Biological science teachers (2213)
115	Chemistry teachers (2214)
116	Physics teachers (2215)
117	Natural science teachers, n.e.c. (2216)
118	Psychology teachers (2217)
119	Economics teachers (2218)
120-122	Not used
123	History teachers (2222)
124	Political science teachers (2223)
125	Sociology teachers (2224)
126	Social science teachers, n.e.c. (2225)
127	Engineering teachers (2226)
128	Mathematical science teachers (2227)
129	Computer science teachers (2228)
130-132	Not used
133	Medical science teachers (2231)

Code	Occupation
134	Health specialties teachers (2232)
135	Business, commerce, and marketing teachers (2233)
136	Agriculture and forestry teachers (2234)
137	Art, drama, and music teachers (2235)
138	Physical education teachers (2236)
139	Education teachers (2237)
140-142	Not used
143	English teachers (2238)
144	Foreign language teachers (2242)
145	Law teachers (2243)
146	Social work teachers (2244)
147	Theology teachers (2245)
148	Trade and industrial teachers (2246)
149	Home economics teachers (2247)
150-152	Not used
153	Teachers, postsecondary, n.e.c. (2249)
154	Postsecondary teachers, subject not specified
155-159	Teachers, Except Postsecondary
155	Teachers, prekindergarten and kindergarten (231)
156	Teachers, elementary school (232)
157	Teachers, secondary school (233)
158	Teachers, special education (235)
159	Teachers, n.e.c. (236, 239)
160-162	Not used
163	Counselors, Educational and Vocational (24)
164-165	Librarians, Archivists, and Curators
164	Librarians (251)
165	Archivists and curators (252)
166-173	Social Scientists and Urban Planners
166	Economists (1912)
167	Psychologists (1915)
168	Sociologists (1916)
169	Social scientists, n.e.c. (1913, 1914, 1919)
170-172	Not used
173	Urban planners (192)
174-177	Social, Recreation, and Religious Workers
174	Social workers (2032)
175	Recreation workers (2033)
176	Clergy (2042)
177	Religious workers, n.e.c. (2049)
178	Lawyers and Judges (211-212)
178-182	Not used

Code	Occupation
183-199	Writers, Artists, Entertainers, and Athletes
183	Authors (321)
184	Technical writers (398)
185	Designers (322)
186	Musicians and composers (323)
187	Actors and directors (324)
188	Painters, sculptors, craft-artists, and artist printmakers (325)
189	Photographers (326)
190-192	Not used
193	Dancers (327)
194	Artists, performers, and related workers, n.e.c. (328, 329)
195	Editors and reporters (331)
196	Not used
197	Public relations specialists (332)
198	Announcers (333)
199	Athletes (34)
200-202	Not used
203-389	TECHNICAL, SALES, AND ADMINISTRATIVE SUPPORT OCCUPATIONS
203-235	TECHNICIANS AND RELATED SUPPORT OCCUPATIONS
203-208	Health Technologists and Technicians
203	Clinical laboratory technologists and technicians (362)
204	Dental hygienists (363)
205	Health record technologists and technicians (364)
206	Radiologic technicians (365)
207	Licensed practical nurses (366)
208	Health technologists and technicians, n.e.c. (369)
209-212	Not used
213-235	Technologists and Technicians, Except Health
213-218	Engineering and Related Technologists and Technicians
213	Electrical and electronic technicians (3711)
214	Industrial engineering technicians (3712)
215	Mechanical engineering technicians (3713)
216	Engineering technicians, n.e.c. (3719)
217	Drafting occupations (372)
218	Surveying and mapping technicians (373)
219-222	Not used
223-225	Science Technicians
223	Biological technicians (382)
224	Chemical technicians (3831)
225	Science technicians, n.e.c. (3832, 3833, 384, 389)
226-235	Technicians, Except Health, Engineering, and Science

Code	Occupation
226	Airplane pilots and navigators (825)
227	Air traffic controllers (392)
228	Broadcast equipment operators (393)
229	Computer programmers (3971, 3972)
230-232	Not used
233	Tool programmers, numerical control (3974)
234	Legal assistants (396)
235	Technicians, n.e.c. (399)
236-242	Not used
243-285	SALES OCCUPATIONS
243	Supervisors and Proprietors, Sales Occupations (40)
244-252	Not used
253-257	Sales Representatives, Finance and Business Services
253	Insurance sales occupations (4122)
254	Real estate sales occupations (4123)
255	Securities and financial services sales occupations (4124)
256	Advertising and related sales occupations (4153)
257	Sales occupations, other business services (4152)
258-259	Sales Representatives, Commodities, Except Retail
258	Sales engineers (421)
259	Sales representatives, mining, manufacturing, and wholesale (423, 424)
260-262	Not used
263-278	Sales Workers, Retail and Personal Services
263	Sales workers, motor vehicles and boats (4342, 4344)
264	Sales workers, apparel (4346)
265	Sales workers, shoes (4351)
266	Sales workers, furniture and home furnishings (4348)
267	Sales workers, radio, TV, hi-fi, and appliances (4343, 4352)
268	Sales workers, hardware and building supplies (4353)
269	Sales workers, parts (4367)
270-273	Not used
274	Sales workers, other commodities (4345, 4347, 4354, 4356, 4359, 4362, 4369)
275	Sales counter clerks (4363)
276	Cashiers (4364)
277	Street and door-to-door sales workers (4366)
278	News vendors (4365)
279-282	Not used
283-285	Sales Related Occupations
283	Demonstrators, promoters and models, sales (445)
284	Auctioneers (447)

Code	Occupation
285	Sales support occupations, n.e.c. (444, 446, 449)
286-302	Not used
303-389	ADMINISTRATIVE SUPPORT OCCUPATIONS, INCLUDING CLERICAL
303-307	Supervisors, Administrative Support Occupations
303	Supervisors, general office (4511, 4513, 4514, 4516, 4519, 4529)
304	Supervisors, computer equipment operators (4512)
305	Supervisors, financial records processing (4521)
306	Chief communications operators (4523)
307	Supervisors, distribution, scheduling, and adjusting clerks (4522, 4524-4528)
308-309	Computer Equipment Operators
308	Computer operators (4612)
309	Peripheral equipment operators (4613)
310-312	Not used
313-315	Secretaries, Stenographers, and Typists
313	Secretaries (4622)
314	Stenographers (4623)
315	Typists (4624)
316-323	Information Clerks
316	Interviewers (4642)
317	Hotel clerks (4643)
318	Transportation ticket and reservation agents (4644)
319	Receptionists (4645)
320-322	Not used
323	Information clerks, n.e.c. (4649)
324	Not used
325-336	Records Processing Occupations, Except Financial
325	Classified-ad clerks (4662)
326	Correspondence clerks (4663)
327	Order clerks (4664)
328	Personnel clerks, except payroll and timekeeping (4692)
329	Library clerks (4694)
330-334	Not used
335	File clerks (4696)
336	Records clerks (4699)
337-344	Financial Records Processing Occupations
337	Bookkeepers, accounting, and auditing clerks (4712)
338	Payroll and timekeeping clerks (4713)
339	Billing clerks (4715)
340-342	Not used
343	Cost and rate clerks (4716)

Code	Occupation
344	Billing, posting, and calculating machine operators (4718)
345-347	Duplicating, Mail and Other Office Machine Operators
345	Duplicating machine operators (4722)
346	Mail preparing and paper handling machine operators (4723)
347	Office machine operators, n.e.c. (4729)
348-353	Communications Equipment Operators
348	Telephone operators (4732)
350-352	Not used
353	Communications equipment operators, n.e.c. (4733, 4739)
354-357	Mail and Message Distributing Occupations
354	Postal clerks, except mail carriers (4742)
355	Mail carriers, postal service (4743)
356	Mail clerks, except postal service (4744)
357	Messengers (4745)
358	Not used
359-374	Material Recording, Scheduling, and Distributing Clerks
359	Dispatchers (4751)
360-362	Not used
363	Production coordinators (4752)
364	Traffic, shipping, and receiving clerks (4753)
365	Stock and inventory clerks (4754)
366	Meter readers (4755)
367	Not used
368	Weighers, measurers, checkers, and samplers (4756, 4757)
369-372	Not used
373	Expeditors (4758)
374	Material recording, scheduling, and distributing clerks, n.e.c. (4759)
375-378	Adjusters and Investigators
375	Insurance adjusters, examiners, and investigators (4782)
376	Investigators and adjusters, except insurance (4783)
377	Eligibility clerks, social welfare (4784)
378	Bill and account collectors (4786)
379-389	Miscellaneous Administrative Support Occupations
379	General office clerks (463)
380-382	Not used
383	Bank tellers (4791)
384	Proofreaders (4792)
385	Data-entry keyers (4793)
386	Statistical clerks (4794)
387	Teachers' aides (4795)
388	Not used
389	Administrative support occupations, n.e.c. (4787, 4799)

Code	Occupation
390-402	Not used
403-469	SERVICE OCCUPATIONS
403-407	PRIVATE HOUSEHOLD OCCUPATIONS
403	Launderers and ironers (503)
404	Cooks, private household (504)
405	Housekeepers and butlers (505)
406	Child care workers, private household (506)
407	Private household cleaners and servants (502, 507, 509)
408-412	Not used
413-427	PROTECTIVE SERVICE OCCUPATIONS
413-415	Supervisors, Protective Service Occupations
413	Supervisors, firefighting and fire prevention occupations (5111)
414	Supervisors, police and detectives (5112)
415	Supervisors, guards (5113)
416-417	Firefighting and Fire Prevention Occupations
416	Fire inspection and fire prevention occupations (5122)
417	Firefighting occupations (5123)
418-424	Police and Detectives
418	Police and detectives, public service (5132)
419-422	Not used
423	Sheriffs, bailiffs, and other law enforcement officers (5134)
424	Correctional institution officers (5133)
425-432	Guards
425	Crossing guards (5142)
426	Guards and police, except public service (5144)
427	Protective service occupations, n.e.c. (5149)
428-432	Not used
433-469	SERVICE OCCUPATIONS, EXCEPT PROTECTIVE AND HOUSEHOLD
433-444	Food Preparation and Service Occupations
433	Supervisors, food preparation and service occupations (5211)
434	Bartenders (5212)
435	Waiters and waitresses (5213)
436	Cooks (5214, 5215)
437	Not used
438	Food counter, fountain and related occupations (5216)
439	Kitchen workers, food preparation (5217)
440-442	Not used
443	Waiters'/waitresses' assistants (5218)
444	Miscellaneous food preparation occupations (5219)
445-447	Health Service Occupations

Code	Occupation
445	Dental assistants (5232)
446	Health aides, except nursing (5233)
447	Nursing aides, orderlies, and attendants (5236)
448-455	Cleaning and Building Service Occupations, Except Household
448	Supervisors, cleaning and building service workers (5241)
449	Maids and housemen (5242, 5249)
450-452	Not used
453	Janitors and cleaners (5244)
454	Elevator operators (5245)
455	Pest control occupations (5246)
456-469	Personal Service Occupations
456	Supervisors, personal service occupations (5251)
457	Barbers (5252)
458	Hairdressers and cosmetologists (5253)
459	Attendants, amusement and recreation facilities (5254)
460	Not used
461	Guides (5255)
462	Ushers (5256)
463	Public transportation attendants (5257)
464	Baggage porters and bellhops (5262)
465	Welfare service aides (5263)
466	Family child care providers (part 5264)
467	Early childhood teacher's assistants (part 5264)
468	Child care workers, n.e.c. (part 5264)
469	Personal service occupations, n.e.c. (5258, 5269)
470-472	Not used
473-499	FARMING, FORESTRY, AND FISHING OCCUPATIONS
473-476	Farm Operators and Managers
473	Farmers, except horticultural (5512-5514)
474	Horticultural specialty farmers (5515)
475	Managers, farms, except horticultural (5522-5524)
476	Managers, horticultural specialty farms (5525)
477-489	Other Agricultural and Related Occupations
477-484	Farm Occupations, Except Managerial
477	Supervisors, farm workers (5611)
478	Not used
479	Farm workers (5612-5617)
480-482	Not used
483	Marine life cultivation workers (5618)
484	Nursery workers (5619)
485-489	Related Agricultural Occupations

Code	Occupation
485	Supervisors, related agricultural occupations (5621)
486	Grounds keepers and gardeners, except farm (5622)
487	Animal caretakers, except farm (5624)
488	Graders and sorters, agricultural products (5625)
489	Inspectors, agricultural products (5627)
490-493	Not used
494-496	Forestry and Logging Occupations
494	Supervisors, forestry and logging workers (571)
495	Forestry workers, except logging (572)
496	Timber cutting and logging occupations (573, 579)
497-499	Fishers, Hunters, and Trappers
497	Captains and other officers, fishing vessels (part 8241)
498	Fishers (583)
499	Hunters and trappers (584)
500-502	Not used
503-699	PRECISION PRODUCTION, CRAFT, AND REPAIR OCCUPATIONS
503-552	Mechanics and Repairers
503	Supervisors, mechanics and repairers (60)
504	Not used
505-549	Mechanics and Repairers, Except Supervisors
505-517	Vehicle and Mobile Equipment Mechanics and Repairers
505	Automobile mechanics (part 6111)
506	Automobile mechanic apprentices (part 6111)
507	Bus, truck, and stationary engine mechanics (6112)
508	Aircraft engine mechanics (6113)
509	Small engine repairers (6114)
510-513	Not used
514	Automobile body and related repairers (6115)
515	Aircraft mechanics, except engine (6116)
516	Heavy equipment mechanics (6117)
517	Farm equipment mechanics (6118)
518	Industrial machinery repairers (613)
519	Machinery maintenance occupations (614)
520-522	Not used
523-533	Electrical and Electronic Equipment Repairers
523	Electronic repairers, communications and industrial equipment (6151, 6153, 6155)
524	Not used
525	Data processing equipment repairers (6154)
526	Household appliance and power tool repairers (6156)
527	Telephone line installers and repairers (6157)

Code	Occupation
528	Not used
529	Telephone installers and repairers (6158)
530-532	Not used
533	Miscellaneous electrical and electronic equipment repairers (6152, 6159)
534	Heating, air conditioning, and refrigeration mechanics (616)
535-549	Miscellaneous Mechanics and Repairers
535	Camera, watch, and musical instrument repairers (6171, 6172)
536	Locksmiths and safe repairers (6173)
537	Not used
538	Office machine repairers (6174)
539	Mechanical controls and valve repairers (6175)
540-542	Not used
543	Elevator installers and repairers (6176)
544	Millwrights (6178)
545-546	Not used
547	Specified mechanics and repairers, n.e.c. (6177, 6179)
548	Not used
549	Not specified mechanics and repairers
550-552	Not used
553-599	Construction Trades
553-558	Supervisors, Construction Occupations
553	Supervisors, brick masons, stonemasons, and tile setters (6312)
554	Supervisors, carpenters and related workers (6313)
555	Supervisors, electricians and power transmission installers (6314)
556	Supervisors, painters, paperhangers, and plasterers (6315)
557	Supervisors, plumbers, pipefitters, and steam fitters (6316)
558	Supervisors, construction, n.e.c. (6311, 6318)
559-562	Not used
563-599	Construction Trades, Except Supervisors
563	Brickmasons and stonemasons (part 6412, part 6413)
564	Brick mason and stonemason apprentices (part 6412, part 6413)
565	Tile setters, hard and soft (part 6414, part 6462)
566	Carpet installers (part 6462)
567	Carpenters (part 6422)
568	Not used
569	Carpenter apprentices (part 6422)
570-572	Not used
573	Drywall installers (6424)
574	Not used
575	Electricians (part 6432)
576	Electrician apprentices (part 6432)
577	Electrical power installers and repairers (6433)

Code	Occupation
578	Not used
579	Painters, construction and maintenance (6442)
582	Not used
583	Paperhangers (6443)
584	Plasterers (6444)
585	Plumbers, pipefitters, and steamfitters (part 645)
586	Not used
587	Plumber, pipefitter, and steam fitter apprentices (part 645)
588	Concrete and terrazzo finishers (6463)
589	Glaziers (6464)
590-592	Not used
593	Insulation workers (6465)
594	Paving, surfacing, and tamping equipment operators (6466)
595	Roofers (6468)
596	Sheetmetal duct installers (6472)
597	Structural metal workers (6473)
598	Drillers, earth (6474)
599	Construction trades, n.e.c. (6467, 6475, 6476, 6479)
600-612	Not used
613-617	Extractive Occupations
613	Supervisors, extractive occupations (632)
614	Drillers, oil well (652)
615	Explosives workers (653)
616	Mining machine operators (654)
617	Mining occupations, n.e.c. (656)
618-627	Not used
628-699	Precision Production Occupations
628	Supervisors, production occupations (67, 71)
629-633	Not used
634-655	Precision Metal Working Occupations
634	Tool and die makers (part 6811)
635	Tool and die maker apprentices (part 6811)
636	Precision assemblers, metal (6812)
637	Machinists (part 6813)
638	Not used
639	Machinist apprentices (part 6813)
640-642	Not used
643	Boilermakers (6814)
644	Precision grinders, filers, and tool sharpeners (6816)
645	Pattern makers and model makers, metal (6817)
646	Lay-out workers (6821)
647	Precious stones and metals workers (Jewelers) (6822, 6866)

Code	Occupation
648	Not used
649	Engravers, metal (6823)
650-652	Not used
653	Sheet metal workers (part 6824)
654	Sheet metal worker apprentices (part 6824)
655	Miscellaneous precision metal workers (6829)
656-659	Precision Woodworking Occupations
656	Patternmakers and model makers, wood (6831)
657	Cabinet makers and bench carpenters (6832)
658	Furniture and wood finishers (6835)
659	Miscellaneous precision woodworkers (6839)
660-665	Not used
666-674	Precision Textile, Apparel, and Furnishings Machine Workers
666	Dressmakers (part 6852, part 7752)
667	Tailors (part 6852)
668	Upholsterers (6853)
669	Shoe repairers (6854)
670-673	Not used
674	Miscellaneous precision apparel and fabric workers (6856, 6859, part 7752)
675-684	Precision Workers, Assorted Materials
675	Hand molders and shapers, except jewelers (6861)
676	Patternmakers, lay-out workers, and cutters (6862)
677	Optical goods workers (6864, part 7477, part 7677)
678	Dental laboratory and medical appliance technicians (6865)
679	Bookbinders (6844)
680-682	Not used
683	Electrical and electronic equipment assemblers (6867)
684	Miscellaneous precision workers, n.e.c. (6869)
685	Not used
686-688	Precision Food Production Occupations
686	Butchers and meat cutters (6871)
687	Bakers (6872)
688	Food batch makers (6873, 6879)
689-693	Precision Inspectors, Testers, and Related Workers
689	Inspectors, testers, and graders (6881, 828)
690-692	Not used
693	Adjusters and calibrators (6882)
694-699	Plant and System Operators
694	Water and sewage treatment plant operators (691)
695	Power plant operators (part 693)
696	Stationary engineers (part 693, 7668)

Code	Occupation
697-698	Not used
699	Miscellaneous plant and system operators (692, 694, 695, 696)
700-702	Not used
703-889	OPERATORS, FABRICATORS, AND LABORERS
703-799	MACHINE OPERATORS, ASSEMBLERS, AND INSPECTORS
703-779	Machine Operators and Tenders, Except Precision
703-715	Metal Working and Plastic Working Machine Operators
703	Lathe and turning machine set-up operators (7312)
704	Lathe and turning machine operators (7512)
705	Milling and planing machine operators (7313, 7513)
706	Punching and stamping press machine operators (7314, 7317, 7514, 7517)
707	Rolling machine operators (7316, 7516)
708	Drilling and boring machine operators (7318, 7518)
709	Grinding, abrading, buffing, and polishing machine operators (7322, 7324, 7522)
710-712	Not used
713	Forging machine operators (7319, 7519)
714	Numerical control machine operators (7326)
715	Miscellaneous metal, plastic, stone, and glass working machine operators (7329, 7529)
716	Not used
717	Fabricating machine operators, n.e.c. (7339, 7539)
718	Not used
719-725	Metal and Plastic Processing Machine Operators
719	Molding and casting machine operators (7315, 7342, 7515, 7542)
720-722	Not used
723	Metal plating machine operators (7343, 7543)
724	Heat treating equipment operators (7344, 7544)
725	Miscellaneous metal and plastic processing machine operators (7349, 7549)
726-733	Woodworking Machine Operators
726	Wood lathe, routing, and planing machine operators (7431, 7432, 7631, 7632)
727	Sawing machine operators (7433, 7633)
728	Shaping and joining machine operators (7435, 7635)
729	Nailing and tacking machine operators (7636)
730-732	Not used
733	Miscellaneous woodworking machine operators (7434, 7439, 7634, 7639)
734-737	Printing Machine Operators
734	Printing press operators (7443, 7643)
735	Photoengravers and lithographers (6842, 7444, 7644)

Code	Occupation
736	Typesetters and compositors (6841, 7642)
737	Miscellaneous printing machine operators (6849, 7449, 7649)
738-749	Textile, Apparel, and Furnishings Machine Operators
738	Winding and twisting machine operators (7451, 7651)
739	Knitting, looping, taping, and weaving machine operators (7452, 7652)
740-742	Not used
743	Textile cutting machine operators (7654)
744	Textile sewing machine operators (7655)
745	Shoe machine operators (7656)
746	Not used
747	Pressing machine operators (7657)
748	Laundering and dry cleaning machine operators (6855, 7658)
749	Miscellaneous textile machine operators (7459, 7659)
750-752	Not used
753-779	Machine Operators, Assorted Materials
753	Cementing and gluing machine operators (7661)
754	Packaging and filling machine operators (7462, 7662)
755	Extruding and forming machine operators (7463, 7663)
756	Mixing and blending machine operators (7664)
757	Separating, filtering, and clarifying machine operators (7476, 7666, 7676)
758	Compressing and compacting machine operators (7467, 7667)
759	Painting and paint spraying machine operators (7669)
760-762	Not used
763	Roasting and baking machine operators, food (7472, 7672)
764	Washing, cleaning, and pickling machine operators (7673)
765	Folding machine operators (7474, 7674)
766	Furnace, kiln, and oven operators, except food (7675)
767	Not used
768	Crushing and grinding machine operators (part 7477, part 7677)
769	Slicing and cutting machine operators (7478, 7678)
770-772	Not used
773	Motion picture projectionists (part 7479)
774	Photographic process machine operators (6863, 6868, 7671)
775-776	Not used
777	Miscellaneous machine operators, n.e.c. (part 7479, 7665, 7679)
778	Not used
779	Machine operators, not specified
780-782	Not used
783-795	Fabricators, Assemblers, and Hand Working Occupations
783	Welders and cutters (7332, 7532, 7714)
784	Solderers and brazers (7333, 7533, 7717)
785	Assemblers (772, 774)

Code	Occupation
786	Hand cutting and trimming occupations (7753)
787	Hand molding, casting, and forming occupations (7754, 7755)
788	Not used
789	Hand painting, coating, and decorating occupations (7756)
790-792	Not used
793	Hand engraving and printing occupations (7757)
794	Not used
795	Miscellaneous hand working occupations (7758, 7759)
796-799	Production Inspectors, Testers, Samplers, and Weighers
796	Production inspectors, checkers, and examiners (782, 787)
797	Production testers (783)
798	Production samplers and weighers (784)
799	Graders and sorters, except agricultural (785)
800-802	Not used
803-859	TRANSPORTATION AND MATERIAL MOVING OCCUPATIONS
803-814	Motor Vehicle Operators
803	Supervisors, motor vehicle operators (8111)
804	Truck drivers (8212-8214)
805	Not used
806	Driver-sales workers (8218)
807	Not used
808	Bus drivers (8215)
809	Taxicab drivers and chauffeurs (8216)
810-812	Not used
813	Parking lot attendants (874)
814	Motor transportation occupations, n.e.c. (8219)
815-822	Not used
823-834	Transportation Occupations, Except Motor Vehicles
823-826	Rail Transportation Occupations
823	Railroad conductors and yardmasters (8113)
824	Locomotive operating occupations (8232)
825	Railroad brake, signal, and switch operators (8233)
826	Rail vehicle operators, n.e.c. (8239)
827	Not used
828-834	Water Transportation Occupations
828	Ship captains and mates, except fishing boats (part 8241, 8242)
829	Sailors and deckhands (8243)
830-832	Not used
833	Marine engineers (8244)
834	Bridge, lock, and lighthouse tenders (8245)
835-842	Not used

Code	Occupation
843-859	Material Moving Equipment Operators
843	Supervisors, material moving equipment operators (812)
844	Operating engineers (8312)
845	Long shore equipment operators (8313)
846-847	Not used
848	Hoist and winch operators (8314)
849	Crane and tower operators (8315)
850-852	Not used
853	Excavating and loading machine operators (8316)
854	Not used
855	Grader, dozer, and scraper operators (8317)
856	Industrial truck and tractor equipment operators (8318)
857-858	Not used
859	Miscellaneous material moving equipment operators (8319)
860-863	Not used
864-889	HANDLERS, EQUIPMENT CLEANERS, HELPERS, AND LABORERS
864	Supervisors, handlers, equipment cleaners, and laborers, n.e.c. (85)
865	Helpers, mechanics, and repairers (863)
866-868	Helpers, Construction, and Extractive Occupations
866	Helpers, construction trades (8641-8645, 8648)
867	Helpers, surveyor (8646)
868	Helpers, extractive occupations (865)
869	Construction laborers (871)
870-873	Not used
874	Production helpers (861, 862)
875-883	Freight, Stock, and Material Handlers
875	Garbage collectors (8722)
876	Stevedores (8723)
877	Stock handlers and baggers (8724)
878	Machine feeders and off bearers (8725)
879-882	Not used
883	Freight, stock, and material handlers, n.e.c. (8726)
884	Not used
885	Garage and service station related occupations (873)
886	Not used
887	Vehicle washers and equipment cleaners (875)
888	Hand packers and packagers (8761)
889	Laborers, except construction (8769)
890-904	Not used

Code

Occupation

905

Assigned to people whose current labor force status is unemployed and whose last job was Armed Forces.

APPENDIX C

Selected Tables (Total Personal Income Recode, Total Personal Income, Total
Income Recode and Participation in Public Assistance Programs) from the
Survey of Program Dynamics, Second Longitudinal File

Unweighted Counts, Full Sample by Year
for Total Personal Income Recode By Race

SIPP to CPS Cross-Reference Map

Introduction

The following cross-reference map accounts for all variables on the 1994 March CPS. For CPS fields that can be coded from SIPP data, column 2 indicates the SIPP source, and column 3 shows the coding scheme used and, in some instances, contains comments regarding the coding.

In column 2, which lists SIPP source fields, parentheses following the name of the field reference the column number on the 1992 SIPP Tenwave file of the beginning of the field, the field length, and a letter that indicates field frequency. A field frequency of M indicates that the field has values for each of the 40 months in the survey, W indicates that the field has values for each of the 10 waves, and P indicates that the field has a single value for the entire panel. If the SIPP data field is from a wave file, then the parentheses following the field name contains the word "Wave."

The comments column contains coding details, notes regarding mapping deficiencies, and other pertinent information relating to the mapping of fields. If coding details are provided that reference another CPS variable, parentheses following the variable name indicate the variable location; e.g., P32 means the variable is located on person records at column position 32. "H" and "F" reference household and family records. Both the CPS codebook and this cross-reference map are ordered by CPS column number within the household, family, and person sections.

Determining Annual Values From Monthly Data

In the SIPP, family and household units evolve from month to month. Persons may leave a family by going away to school, joining the armed forces, establishing a new household, or dying. Others may join a family through birth of a child, marriage, or some other reason. There are no static family and household structures that exist for the duration of the survey, or even for a year. The monthly family and household information collected by the SIPP apply to the units that exist as of the month the data are collected. However, the CPS family and household sample units are defined as of a point in time--March of the survey year--and annual data for the preceding year, the data year, are collected for units in existence as of the time of survey.

In order to construct annual information such as is contained on a CPS file from information that varies by month, as is provided by SIPP, it is necessary to determine a fixed reference point for the construction of family and household units and the determination of demographic characteristics. December of the reference year has been chosen as that point on the SIPP file.

Thus, the coding of all household and family relationship codes and demographic fields such as race, sex, marital status, and age and any other fields requiring a fixed reference point will be based on December values for the reference year.

The necessity of defining annual units from units that exist as of a given point in time (December of the reference year) also means that many of the household and family fields must be constructed from person fields, rather than the reverse coding scheme which would follow the coding logic of the CPS. For instance, on the CPS, if a household has any person who received social security benefits, the household field HSS-YN is coded with a 1 to indicate “Yes.” Only then are questions asked that enable coding of person fields that refer to receipt of social security benefits. Thus, the universe for the person fields is HSS-YN = 1. However, a reverse process must be used for the CPS look-alike file. The CPS person fields are first coded from SIPP data. Then, the household and family fields are coded by cycling through persons in the family or household units that existed as of December. Thus, some of the universes on the SIPP to CPS look-alike file must differ from those on a CPS file. For example, DSS-YN, a CPS person field, has a universe of HSS-YN = 1. On the look-alike file, DSS-YN has a universe of all persons. This difference in universe is regarded as insignificant, but it is one that should be noted when frequencies on the SIPP to CPS look-alike file are compared with those from other CPS files.

Since longitudinal units are not identified for the SIPP, monthly data that pertain to monthly family and household units have little meaning for a longitudinal file, and, for the most part, such data are omitted from the longitudinal file. However, the CPS collects annual data that apply to family and household units that are identified as of the time of survey. To reproduce some of the family and household data from the SIPP that are provided by the CPS, it is necessary not only to define the family and household units as of a point in time (December of the reference year), it is also necessary to obtain information from the monthly data provided by SIPP wave files. SIPP data that are obtained from a wave file are identified as wave data in parentheses following the name of the field in the SIPP source column. Household information is taken from the record of the household reference person (identified by SIPP variable RRP) for December of the reference year; and family information is taken from the record of the family reference person (identified by SIPP variables FAMREL and RRP).

Identification of Longest Job or Business

Many CPS labor force codes refer to one’s longest job during the reference year (“last year”), and the CPS universe for the longest job codes is WORKYN = 1. WORKYN is coded 1 (yes) if a person spent any time working during the reference year at a job or business, even time without pay in a family business. Thus, one of the initial coding steps of the SAS processing routine that codes person fields is to identify a person’s longest job or business by examining the monthly values for JOB-ID1, JOB-ID2, WKS-EMP1, WKS-EMP2, BUS-ID1,

BUS-ID2, SE-WWB1, and SE-WWB2. Once longest job or business is identified, then industry, occupation, and class of worker codes associated with that job or business is used for the CPS codes that refer to a person's longest job last year.

The following procedure was used to identify a person's longest job or business. Cycle through all months of the reference year, setting up an array of unique job ID's (from JOB-ID1 and JOB-ID2) and another array of unique business ID's (from BUS-ID1 and BUS-ID2) and associate with each the sum of weeks worked from either WKS-EMP1 and WKS-EMP2 or SE-WWB1 and SE-WWB2. Identify as the longest job or business during the year the job or business having the greatest number of weeks worked. If more than one job and/or business tie for most weeks worked, then also examine earnings associated with each (from ERN-AMT1, ERN-AMT2, SE-AMT1, and SE-AMT2) to determine "primary" job or business. Identify the longest job or business as either a job or business, and also identify the associated industry and occupation, using the last industry and occupation codes available during the reference year for the longest job or business. At the same time, also determine total wage and salary earnings (sum of ERN-AMT1 and ERN-AMT2 for all jobs and all months), total farm and non-farm self-employment earnings (sum of SE-AMT1 and SE-AMT2 for all business and all months, including negative amounts), and total earnings for the year (sum of wage and salary earnings and self-employment earnings). [Analysts rejected a more complex coding scheme that would also use the occupational codes OCC1, OCC2, SE-OCC1, and SE-OCC2 to identify individual jobs.]

SIPP to CPS Cross-Reference Map

HOUSEHOLD RECORD		
Note that on the look-alike file, household income fields have no upper limit beyond that imposed by field width.		
CPS	SIPP Source	Coding/Comments
D HRECORD 1 1 (1:1) U All households V 1 .Household record		Created by SAS processing routine. Coded with "1" to identify household records.

Fields Unique to the SIPP-to-CPS Look-Alike File		
PP-ID 9 745	PP-ID (9, 9, P) Scrambled identifier	
PP-ENTRY 3 754	PP-ENTRY (17, 3, P) Edited entry address ID	
PP-PNUM 4 757	PP-PNUM (20, 4, P) Edited person number	
SIPP_AID 3 761 (011:109) SIPP address ID of person's household during the interview month.	HH-ADDID (120, 3, M) Address ID of person's household during the month.	
PANEL 4 764 (1992:1993)		Coded with "1992" or "1993" to indicate the SIPP panel from which data have been taken.

APPENDIX E

Countries and Areas of the World Variable NATVTY

List A -- Alphabetical List of Areas of the World and Countries

If the specific country reported was not on the interviewer's list, or if the respondent did not know the specific country, the following codes for broad areas of the world were available for coding:

Code	Name
468	Africa: North
462	Africa: Other
245	Asia
353	Caribbean
318	Central America
148	Europe
252	Middle East
304	North America
527	Pacific Islands
389	South America
555	Elsewhere (includes country not known)

The countries (or areas) shown below were coded separately, if reported.

Code	Name	Code	Name
200	Afghanistan	213	Iraq
60	American Samoa	119	Ireland/Eire
375	Argentina	214	Israel
185	Armenia	120	Italy
501	Australia	343	Jamaica
102	Austria	215	Japan
130	Azores	216	Jordan
333	Bahamas	427	Kenya
202	Bangladesh	217/218	Korea/South Korea
334	Barbados	221	Laos
103	Belgium	183	Latvia
310	Belize	222	Lebanon
300	Bermuda	184	Lithuania
376	Bolivia	224	Malaysia
377	Brazil	315	Mexico
205	Burma	436	Morocco
206	Cambodia	126	Netherlands

Code	Name	Code	Name
301	Canada	514	New Zealand
378	Chile	316	Nicaragua
207	China	440	Nigeria
379	Colombia	142	Northern Ireland
311	Costa Rica	127	Norway
337	Cuba	229	Pakistan
155	Czech Republic	253	Palestine
105	Czechoslovakia	317	Panama
106	Denmark	385	Peru
339	Dominican Republic	231	Philippines
338	Dominica	128	Poland
380	Ecuador	129	Portugal
415	Egypt	72	Puerto Rico
312	El Salvador	132	Romania
139	England	192	Russia
417	Ethiopia	233	Saudi Arabia
507	Fiji	140	Scotland
108	Finland	234	Singapore
109	France	156	Slovakia/Slovak Republic
110	Germany	449	South Africa
421	Ghana	134	Spain
138	Great Britain	136	Sweden
116	Greece	137	Switzerland
340	Grenada	237	Syria
66	Guam	238	Taiwan
313	Guatemala	239	Thailand
383	Guyana	351	Trinidad & Tobago
342	Haiti	240	Turkey
126	Holland	57	United States
314	Honduras	78	U.S. Virgin Islands
209	Hong Kong	180	USSR
117	Hungary	195	Ukraine
210	India	387	Uruguay
211	Indonesia	388	Venezuela
212	Iran	242	Vietnam
		147	Yugoslavia

List B. Numeric List of Countries and Areas of the World

The following list of countries/areas is in numeric order by code.

Code	Name	Code	Name
57	United States	231	Philippines
60	American Samoa	233	Saudi Arabia
66	Guam	234	Singapore
72	Puerto Rico	237	Syria
78	U.S. Virgin Islands	238	Taiwan
102	Austria	239	Thailand
103	Belgium	240	Turkey
105	Czechoslovakia	242	Vietnam
106	Denmark	245	Asia
108	Finland	252	Middle East
109	France	253	Palestine
110	Germany	300	Bermuda
116	Greece	301	Canada
117	Hungary	304	North America
119	Ireland/Eire	310	Belize
120	Italy	311	Costa Rica
126	Holland	312	El Salvador
126	Netherlands	313	Guatemala
127	Norway	314	Honduras
128	Poland	315	Mexico
129	Portugal	316	Nicaragua
130	Azores	317	Panama
132	Romania	318	Central America
134	Spain	333	Bahamas
136	Sweden	334	Barbados
137	Switzerland	337	Cuba
138	Great Britain	338	Dominica
139	England	339	Dominican Republic
140	Scotland	340	Grenada
142	Northern Ireland	342	Haiti
147	Yugoslavia	343	Jamaica
148	Europe	351	Trinidad & Tobago
155	Czech Republic	353	Caribbean
156	Slovakia/Slovak Republic	375	Argentina
180	USSR	376	Bolivia
183	Latvia	377	Brazil
184	Lithuania	378	Chile
185	Armenia	379	Colombia

Code	Name	Code	Name
192	Russia	380	Ecuador
195	Ukraine	383	Guyana
200	Afghanistan	385	Peru
202	Bangladesh	387	Uruguay
205	Burma	388	Venezuela
206	Cambodia	389	South America
207	China	415	Egypt
209	Hong Kong	417	Ethiopia
210	India	421	Ghana
211	Indonesia	427	Kenya
212	Iran	436	Morocco
213	Iraq	440	Nigeria

APPENDIX F

Working Papers

SPD Working Papers

The SPD working papers are available on the SPD Internet site <<http://www.sipp.census.gov/spd>>.

- SPD97-1: Kominski, R and D. Weinberg. 1997. "Tracking Devolution: The Survey of Program Dynamics." Paper presented at the Population Association of America Annual Meeting, Washington, D.C., March 1997.
- SPD97-2: Weinberg, D., P. Johnson, and the SPD Team HHES. 1997. "What Are the Issues in Implementing the Survey of Program Dynamics?" Prepared for the Census Advisory Committee of Professional Associations, May 1997.
- SPD97-3: Hess, J. and J. Rothgeb. 1997. "Measuring the Impact of Welfare Reform: Issues in Designing the Survey of Program Dynamics Questionnaire." Invited paper presented at Symposium 97: New Directions in Surveys and Censuses, Statistics Canada.
- SPD97-4: Hess, J., J. Rothgeb, and A. Zukerberg. 1997. "Survey of Program Dynamics Pretest Evaluation Report." Unpublished report (U.S. Census Bureau.)
- SPD98-1: Hess, J., J. Rothgeb, A. Zukerberg, K. Richter, S. Menestrel, K. Moore, and E. Terry. 1998. "Teens Talk: Are Adolescents Willing and Able to Answer Survey Questions?" Paper presented at the Annual Conference of the American Association for Public Opinion Research, St. Louis, MO, May 1998.
- SPD98-2: Hess, J., J. Rothgeb, and E. Nichols. 1998. "Report on Cognitive Interview Results for the 1999 Survey of Program Dynamics." Unpublished report (U.S. Census Bureau), June 1998.
- SPD98-3: Kominski, R. and L. Bass. 1998. "Developing Children's Data for the Survey of Program Dynamics." Paper presented at the Association for Public Policy Analysis and Management (APPAM) annual meetings, New York NY, August 1998.
- SPD98-4: Hess, J. and J. Rothgeb. 1998. "Summary Report - 1998 SPD Taped Interviews", September 1998.

- SPD98-5: Weinberg, D., P. Doyle, A. Jones Jr, and S. Shipp. 1998. "Measuring the Impact of Welfare Reform With The Survey of Program Dynamics." Presented at the Joint Statistical Meetings, Dallas Texas, and the 1998 Association for Public Policy Analysis and Management (APPAM) annual meetings, New York NY. (U. S. Census Bureau), October 1998.
- SPD99-1: Karen King, 1999, "Proposal for Incentives in the 1999 Survey of Program Dynamics", January 1999.
- SPD99-2: Donald J. Hernandez, 1999, "Comparing Response Rates for SPD, PSID, and NLSY," memorandum to Daniel H. Weinberg, January 1999.
- SPD99-3: Alan R. Tupek, 1999, "SPD99: Proposal to Provide Incentives in the Upcoming 1999 Survey of Program Dynamics - Revised," memorandum to Dr. Nancy Kirkendall, February 1999.
- SPD99-4: Bass, L. and B. Downs. 1999. "What Can the SPD Adolescent SAQ Tell Us About the Well-being of Adolescents in the Aftermath of the 1996 Welfare Reform Act?" Paper presented at the Annual Meeting of the Population Association of America, New York, NY, March 1999.
- SPD99-5: Hess, J. and B. Belli. 1999. "Results of cognitive testing on the Residential History Module for Survey of Program Dynamics 2000," memorandum to SPD Steering Committee, April 1999.
- SPD99-6: Fant, G., K. Bryson, L. Bass, and B. Downs. 1999. "Survey of Program Dynamics 1997 Bridge Survey and Current Population Survey 1997 March supplement: Evaluating selected demographic data." Paper presented at the American Statistical Association Joint Statistical Meeting, Baltimore, MD, August 1999.
- SPD99-7: Downs, B. and L. Bass. 1999. "The Survey of Program Dynamics: A New Source of Data to Explore the Effects of the 1996 Welfare Reform Act on Adolescents." Paper presented at the American Sociological Association Annual meetings, Chicago, IL, August 1999.
- SPD99-8: Galvin, L., K. King, and S. Sae-Ung. 1999. "Evaluation of the Survey of Program Dynamics (SPD) Exploratory Attrition Study", November 1999.
- SPD99-9: Jones Jr., A., B. Downs, and S. Shipp. 2000. "Measuring Welfare Reform, Preliminary Results from the Survey of Program Dynamics", August 1999.

- SPD99-10: Weinberg, D. and S. Shipp. 2000. "The Survey of Program Dynamics - A Mid-Term Status Report", October 1999.
- SPD2000-1: Nusser, S., C. Fletcher, and D. Anderson. 2000. "The Iowa Survey of Program Dynamics Feasibility Study", March 2000.
- SPD2000-2: Hess, J., P. Doyle, and E. Welniak. 2000. "Measuring Welfare Reform: Questions from Four Census Bureau Surveys." Presented at the Midwest Welfare Peer Assistance Network (WELPAN) Meeting, Washington, D.C., February 2000.
- SPD2001-1: Moore, Hair, Bronte-Tinkew, Kinukawa, Halle & LeMenestrel. 2001. "Documentation of Child and Family Well-Being Measures in the 1998 Wave of the Survey of Program Dynamics." Contractor report prepared by Child Trends, Inc., August 1, 2001.
- SPD2002-1: Sandra L. Hofferth, 2002, "Use of the Survey of Program Dynamics for Studying the Implications of Welfare Reform for Families and Children." Contractor report prepared by Child Trends, Inc., April 16, 2002.

SIPP Working Papers

The SIPP working papers are available on the Census Bureau's Internet site <<http://www.census.gov>>. A subset of the SIPP working papers can also be found on the SIPP Internet site <<http://www.sipp.census.gov/sipp>>.

APPENDIX G

User Notes for the SPD Longitudinal File

This section contains information relevant to the *Survey of Program Dynamics Longitudinal File*. For an updated list of user notes always refer to the U.S. Census Bureau's SPD Internet site at <http://www.sipp.census.gov/spd>. The user notes are found under "Publications and Analyses". The Internet site will be updated as additional user notes become available.

User Notes for the SPD Longitudinal File

1. General Cautionary Notes

The original SPD sample is five to six years old and has undergone a substantial amount of attrition (sample loss) from 1992 (or 1993) through 1998. As a result, estimates from this file are not as representative of the U.S. population as a cross-sectional survey or a longitudinal survey with less sample attrition would be. Therefore, results should be viewed with caution.

In addition, it should be noted that this file contains data collected using three different survey collection vehicles: the 1992/93 SIPP paper instruments that were used to produce data for calendar years (CY) 1992, 1993, and 1994, a modified March CPS CAPI instrument that was used to collect data for calendar year 1996, and the 1998 CAPI instrument that was used to collect data for calendar year 1997. Therefore, the different questions and modes of interview used to produce the estimates should be considered when analyzing changes over time. These effects are explained more fully in later notes.

a. 1992 Data

The SPD Longitudinal file does not contain a complete set of CY1992 data for 1993 SIPP Panel households because interviewing did not begin until 1993. Using weighted counts for 1992 data is not meaningful unless the necessary adjustments to the longitudinal weight are made. See the user note below titled *1992 Estimates* for further instructions.

b. 1995 Data

The SPD Longitudinal file does not contain any data for CY1995. The 1992 SIPP Panel did not collect any data for 1995 and the 1993 SIPP Panel did not collect data for the entire 1995 calendar year.

c. 1992, 1993, and 1994 Calendar Year Data - Recodes

Analysts interested in variable by variable mapping of SIPP to CPS need to review the SIPP and CPS Cross-Reference map on the SPD Website or Appendix D in the Technical Documentation.

The CY1992, CY1993, and CY1994 data were created by recoding the data collected in the SIPP 92/93 Panels to similar variables collected in the March 1994 CPS. Not all of the 1994 March CPS variables are recoded from the 1992/1993 SIPP data and no imputation flags were carried from the component SIPP data onto the 1992 - 1994 calendar year files. This recoding operation was done by the Urban Institute under contract with the Census Bureau, the Social Security Administration, the

Office of the Assistant Secretary for Planning and Evaluation, and the Department of Health and Human Services. Collectively, the 1992, 1993, and 1994 data are referred to as the “CPS Look-Alike” file.

d. Creating Family and Household Structures

In the SIPP, family and household units evolve from month to month. Persons may leave a family by going away to school, joining the armed forces, establishing a new household, or dying. Others may join a family through birth of a child, marriage, or some other reason. There are no static family and household structures that exist for the duration of the survey, or even for a year. The monthly family and household information collected by the SIPP apply to the units that exist as of the month the data are collected. However, the CPS family and household sample units are defined as of a point in time--March of the survey year--and annual data for the preceding year, the reference year, are collected for units in existence as of the time of the survey.

In order to construct annual information such as is contained on a CPS file from information that varies by month, as is provided by SIPP, it is necessary to determine a fixed reference point for the construction of family and household units and the determination of demographic characteristics. December of the reference year has been chosen as that point on the SIPP file. Thus, the coding of all household and family relationship codes and demographic fields such as race, sex, marital status, and age and any other fields requiring a fixed reference point will be based on December values for the reference year.

The necessity of defining annual units from units that exist as of a given point in time (December of the reference year) also means that many of the household and family fields must be constructed from person fields, rather than the reverse coding scheme which would follow the coding logic of the CPS. For instance, on the CPS, if a household has any person who received social security benefits, the household field HSS-YN is coded with a 1 to indicate “Yes.” Only then are questions asked that enable coding of person fields that refer to receipt of social security benefits. Thus, the universe for the person fields is $HSS-YN = 1$. However, a reverse process must be used for the CPS look-alike file. The CPS person fields are first coded from SIPP data. Then, the household and family fields are coded by cycling through persons in the family or household units that existed as of December. Thus, some of the universes on the SIPP to CPS look-alike file must differ from those on a CPS file. For example, DSS-YN, a CPS person field, has a universe of $HSS-YN = 1$. On the “look-alike” file, DSS-YN has a universe of all persons. This difference in universe is regarded as insignificant, but it is one that should be noted when frequencies on the SIPP to CPS look-alike file are compared with those from other CPS files.

Since longitudinal units are not identified for the SIPP, monthly data that pertain to monthly family and household units have little meaning for a longitudinal file, and, for the most part, such data are omitted from the longitudinal file. However, the CPS collects annual data that apply to family and household units that are identified as of the time of survey. To reproduce some of the family and household data from the SIPP that are provided by the CPS, it is necessary not only to define the family and household units as of a point in time (December of the reference year), it is also necessary to obtain information from the monthly data provided by SIPP wave files. Household information is taken from the record of the household reference person (identified by SIPP variable RRP) for December of the reference year; and family information is taken from the record of the family reference person (identified by SIPP variables FAMREL and RRP).

e. Modes of Data Collection and Data Creation

This SPD file covers a variety of subject areas which may be differentially affected by the mode of collection. For example, more frequent interviews (and the collection of contemporaneous data) may result in more reports of part time work, one-time income sources, or part-year health insurance

coverage. Be aware that observed changes over time may be the result of the different modes of collection over the lifetime of this survey.

The 1992 and 1993 SIPP Panels (CY1992- CY1994 data) collected data using a paper questionnaire. The data was collected three times per year and used a four-month recall. The 1992 and 1993 SIPP data was converted to a calendar year format to resemble the CPS March data. Users of the 1992 through 1994 data need to review Appendix D, “SIPP to CPS Cross-Reference Map,” to understand the conversion of SIPP variables to CPS variables.

The 1997 SPD collected data using a slightly modified 1997 CPS March automated instrument. The data was collected between May and June 1997 and used a “last year” (1996) recall for most questions.

The 1998 SPD collected data using an automated instrument specifically designed for the SPD. The data were collected between May and June 1998 and used a “last year” (1997) recall for most questions.

f. Variable Naming Convention

The variable name (also referred to as data item, item name, or data field name) is no longer than 8 characters, for example WORKYNE8, AGET8 or MARITLE8. The first 6 characters provide a descriptive name. Character 7 (or 2nd from right if the variable name is less than 8 characters) is the variable type code [unedited (U), edited (E), recoded (R), weights (W), imputation flag (I), or topcoded (T)]. The final character, character 8 (or the last character if the variable name is less than 8 characters) reflects the interview year, that is the year in which the data was collected (for example, 1998 = 8). In the case of 1992 through 1994, the interview year and the data year are the same. The 1997 and 1998 interview (data collection) years are not the same as the data year for most variables. For example WORKYNE8 refers to working during 1997 while MARITLE8 refers to marital status as of the interview date in 1998. Most variables collected during the 1997 interview refer to 1996 data year, while most variables collected in 1998 refer to 1997 data year. However, there are variables in 1997 and 1998 that refer to the interview year as shown above. The short descriptions of a variable specifies the year to which the variable refers.

g. Families

Like households, families are also defined each year. In order to look at everyone who is in the same family for a given year, concatenate the IHHKEY variable for that year with the variable indicating family number. For example, to look at families in 1993, concatenate IHHKEY93 with FAMNUM3 (e.g.,B1200107406901101).

h. Matching to the SIPP Data

When matching to the SIPP 1992 or 1993 panel, core, or topical module files note the field lengths differences in the following variables:

Field Length Differences

Short Variable Description	SIPP 1992 Panel Files			SIPP 1993 Panel Files			SPD First Longitudinal File
	Panel	Wave	Topical Modules	Panel	Wave	Topical Modules	
Person Number	4	3	3	3	3	3	4
Entry Address ID	3	2	2	2	2	2	3
Address ID	3	2	2	2	2	2	3

2. Weighting and Estimation - Technical Notes

The records on the First SPD Longitudinal File were weighted to the March 1993 population. Therefore, you should compare the population characteristics from this file with those from the CPS March 1993 survey universe.

The weights on this file (SPDLNWGT and ANNUALWT) are longitudinal; therefore, they are only valid for estimates of the characteristics of the cohorts of people who were represented by the original sample persons from the SIPP 1992 and 1993 panels. The variable SPDLNWGT is nonzero for only original sample people who were a self or proxy or imputed respondent in each and every reference month for SIPP, SPD 1997 Bridge, and SPD 1998. It should be used to calculate estimates covering multiple calendar years.

An original sample person is a sample person who was a self or proxy respondent in Wave 1 of the SIPP 1992 or 1993 panel. Sample children born after the first interview (Wave 1) of the SIPP 1992 or 1993 panel and having an original sample person as their designated parent (blood-related or adopted) also receive longitudinal weights (ANNUALWT) so that their annual characteristics can be estimated.

a. Household weight

There is no weight for household analysis in the SPD Longitudinal file. Instead it has become acceptable in the research community to assign sample people the characteristics of their household or family. The analytic estimate then becomes the number of people in households (or families) with a particular characteristic.

b. Longitudinal weight with non-original sample children

SPD Longitudinal Annual Weight (ANNUALWT) - This weight is for calculating annual or calendar year estimates. This variable is nonzero for original sample people who provided a self or proxy, or

whose data were imputed in each and every reference month for SIPP, SPD 1997 Bridge, and SPD 1998 and for non-original sample children (age six or less) born of or adopted by original sample people after the first interview. When calculating annual estimates, include only weighted non-original sample children born during or in prior calendar years. The non-original sample children weights, for those age six or less, are derived by assigning the weight of child's designated parent (blood-related or adopted) to the child and is intended only to approximate growth in the universe. Some caution should be given when interpreting results for children 6 or less because this strategy has resulted in general overestimate of 2.2 percent based on 1998 benchmarks. By race, the results are a 3.6 percent overestimate for non-Black and a 5.4 underestimate for Black children six or less by 1998.

c. 1992 Estimates

To estimate for calendar year 1992 using the SPD longitudinal weight, analysts should multiply the weight of people present in 1992 by 2. This covers all situations, but gives only an approximation. Variance parameters will also need to be inflated by 2 for analysis of 1992 estimates. For more accurate 1992 calendar year estimates, use the 1992 SIPP Longitudinal file with its 1992 calendar year weight, FNLWGT92.

3. Demographic Variables - Technical Notes

The specific notes below address standards for editing relationship to reference person and cases that switch values in the unedited data for sex, vet, and race status. Note that in 1997, using the CPS instrument, Field Representatives could change demographic data that was input since the data provided was from SIPP paper control cards. If the information was incorrect during SIPP, they got a chance to change it in 1997, yet because demographic variables are edited forward from 1994, the edits force the responses to be consistent with the original SIPP data. That is why there is a higher number of imputations for 1997 than for other years.

a. Relationship to Reference Person (RRP)

An adult must be at least 12 years older than a child who points to them as their designated biological parent.

Same sex partners who report they are married are made unmarried partners if they report being spouses.

Parent pointers for adults age 18 and over were blanked out during the editing process for 1998 data.

People less than 15 years old must be 'never married.'

A person to whom a child points as their designated parent must be at least 15 years old.

A person under 18 years of age cannot be the reference person if their parent is present in the household.

Checks run on the data for 1999 and 2000 were the same as in 1998, except that in 1999, we decided to edit and output the designated parent pointer for people of all ages, so checks for the age gap between parents and children were done for people of all ages. For 1999, we also used the TYPMOM and TYPDAD variables which indicate whether a parent is a biological, step or adoptive parent. If the parent was identified as a step or adoptive parent, we allowed an otherwise illogical age gap between parent and child since remarriage sometimes creates situations where step parents are not old enough to be the biological parent of their spouse's biological children. Users should note that the edit for RRP, MARITL, SPOUSE, and DESPAR is not truly longitudinal, but checks for consistency in

each year cross sectionally. So the RRP values of two people shift over time, even though they are the same people. This happens at times when a later interview gives us more information and we are able to specify the relationship in greater detail—for example, making someone a grandchild rather than other relative.

b. Age

Some people who were recorded as children in 1992, 1993 or 1994 are recorded as adults in 1997 or 1998 in the unedited data, or vice versa. Since we are only editing forward, some of these people end up on the longitudinal file with information for variables like income and labor force status when they may no longer fit the universe for those variables. For example, if an individual reports being age 7 in 1992, 8 in 1993 and 9 in 1994, but in 1997 reports being 32 in the unedited data, they will appear as age 12 in the edited longitudinal file, even though they may have edited labor force information in 1997 which shows they work 40 hours a week and have an annual personal income of \$25,000. In the same way, the family structure variables which were edited in the cross sectional files for 1992, 1993, 1994 and 1997 may now be incorrect in some cases where age or sex switched over time.

b.1. AGE User Notes for the Second Longitudinal File

We have not filled in DOBYRT for all cases, although users could easily create it using the year and the age. At this point it is filled in for interviews in 1998 and 1999 and 2000.

c. Sex

Demographic variables are edited forward in the SPD. This means if the sex recorded in the unedited data in 1997 or 1998 differs from the sex recorded in the 1992-1994 Urban file, the 1994 value is considered to be correct. The final value for sex in the longitudinal file is set to match the 1992-1994 value. The imputation variable SEXI will let you know which cases contained contradictory reports in the unedited 1997 or 1998 data. The numbers of cases affected are as follows:

Cases do not switch sex within 1992-1994.

1994 value different from 1997 value: 510 cases

1997 value different from 1998 value: 122 cases

1994 value different from 1997 and 1997 different from 1998: 44 cases

d. Veterans' Status

There are 101 cases which have an illogical change in VET status in the 1992, 1993, or 1994 data. We are not changing the 1992, 1993, or 1994 data, but are only editing forward.

- There are 28 cases that have a value of yes for vet for 1992 and not a vet in 1993.
- There are 72 cases that have a value of yes for vet for 1993 and not a vet in 1994.
- The remaining case has a value of yes for vet for 1992 and not a vet for 1994. The value is missing for 1993—they were probably not interviewed in that year.

Note that in 1993, two cases are marked as vets in the unedited data, and are then recoded to non-vets because they are outside the age universe, since they are 15 and 16 years old.

e. Race

Through 1998, there were 114 cases in which RACE was imputed. Nine of these are imputed using the hot deck, and the remaining 105 are assigned logically based on the person's mother, father, or household reference person.

Of the 114 cases imputed, 18 cases were imputed where there is no valid value for RACE in any of the years. The other 96 cases imputed have a value of "other" for 1998.

Of the total 407 cases who reported their race as "other" in 1998, 238 had one valid value for an earlier year which was used, 7 were imputed using the hot deck, 89 were imputed logically based on family members, and 73 switch their reported race over the years they are in the survey.

Overall, 692 cases switch their race from one year to another. Of these, 37 percent have a first valid value of American Indian and 40.2 percent have a first valid value of Asian and Pacific Islander.

The total 806 cases which are imputed or switch over time are 0.87 percent of the 92,158 cases, or 1.7 percent of the interviews in 1998 (47,587).

f. NATVTY

We have added a value of 4 for the imputation flag so that we can indicate cases whose value on the first longitudinal file differs from the value they report in 1999 or in 2000, if they entered in these years.

g. Educational Attainment Variables

To create the educational attainment variables for 1992, 1993 and 1994 (HGAR2, HGAR3, HGAR4) the response categories from the SIPP were edited to match those from the CPS. Unfortunately, the SIPP codes do not contain sufficient detail to exactly re-create the CPS field. In particular, coding of college attainment is deficient. The assumption is made that SIPP HIGRADE codes 21-24 refer to undergraduate study, 25 to master's level work, and 26 to the doctorate level. There is no information to determine associate or professional school degrees.

The variables that measure individual, family, and household receipt of educational assistance are not strictly comparable across time. The educational aid variables for 1992 (ED_YNE2), 1993 (ED_YNE3), and 1994 (ED_YNE4) depict higher levels of aid receipt than the variables for 1997 (ED_YNE7) and 1998 (ED_AIDE8). Some of this difference is likely attributable to differences in variable universes, question wording, and reference periods. The 1992-1994 variables were constructed from the 1992 and 1993 SIPP panels. The SIPP asked a very detailed question about receipt of financial aid during the last 4 months of all individuals age 15 and over. Data from multiple waves were then combined to construct the variable for financial aid receipt in the last year (because the reference months differ for the four SIPP rotation groups the reference period for the financial assistance variable is not the same for all sample members). In 1997 a much less detailed question was asked of all individuals age 15 and older regarding financial aid receipt in the last calendar year. The 1998 question was similar to the 1997 question but was asked only of individuals age 18 and over who were enrolled in either high school or college and collected information on financial aid receipt during the last 9-month academic year, September to May, rather than the prior calendar year. For more detailed information on financial aid receipt in 1992, 1993, and 1994 users should go directly to the 1992 and 1993 SIPP panels.

4. Poverty Variables - Technical Notes

Data users should be aware that SPD income and poverty data are affected by the different survey instruments implemented in different years. For example, poverty rates have historically been lower when using the SIPP survey instrument, where there are detailed income questions every four months, than in the Current Population Survey (CPS) instrument, where income questions are asked once annually. The 1992-94 SPD data come from the SIPP instrument, while the 1996-97 income and poverty data come from annual, retrospective questions such as in the CPS. Data users should therefore use caution when examining temporal trends in poverty.

5. Income Variables - Technical Notes

Be aware that the dollar amount reported for the variable “other income received in 1997” (OIVALT8) is not comparable to the dollar amounts reported in the prior years, 1992 (OIVALT2), 1993 (OIVALT3), 1994 (OIVALT4) and 1996 (OIVALT7). For these prior years the dollar amounts reported reflect the summation of, at most, two sources of other income received. Starting with the 1997 data (OIVALT8), the dollar amount reported for OIVAL reflects the summation of income reported from the following sources: other income; income from National Guard duty; income from casual earnings, such as hobbies; farm income; charitable assistance; and foster child care payments. This holds true, as well, across the years for both household (HOIVAL) and family (FOIVAL) amounts.

a. Energy Assistance Variables

Starting with data collecting in 1998, the reference time frame for HENGASE (Energy assistance received Y/N) and HENGVL (Value of energy assistance received) was “in the past 12 months”. For 1992, 1993, 1994, and 1997, the reference period was the six month time frame of October 1 through March 31 prior to the survey.

b. Public Assistance

Be aware of the following discrepancy in the longitudinal file variables (PAWMONE7 and PAWMONE8) that record the number of months that an individual received public assistance, AFDC, and TANF. The discrepancy occurs when an individual has a response of “yes” to having received public assistance in the prior year (PAWYNE7=1 and PAWYNE8=1), but the reported value for the number of months in receipt of public assistance is coded as zero (PAWMONE7=0 and PAWMONE8=0). This limited situation is the result of editing the data for consistency in the dollar amount of public assistance, AFDC, or TANF that an individual received. In the interview, respondents are given the opportunity at the end of the interview to list any other sources of income that they might have received, in addition to those already reported. For those limited number of cases where other income sources are reported, the cases are manually reviewed by a subject matter analyst to see if the reported source can be included into an existing income source. While reviewing the data several analysts reported income sources which fit into the category of public assistance. This amount reported was then added to the public assistance amount and the PAWYNE7 and/or PAWYNE8 was changed from “no” to “yes”. The other income source reported, however, did not provide information on the number of months having received this income source, so the value for this limited number of cases will still contain a value of “0” for PAWMONE7 and/or PAWMONE8.

c. Dividends Variables

The universe for the variables which identify receipt of dividend income, DIVYNE7=1 and/or DIVYNE8=1, include individuals who reported owning stocks, mutual funds or other financial instruments that could pay a dividend, but reported not being paid dividends on these assets,

DIVNONE7=1 and/or DIVNONE8=1. In the prior years, individuals that were not paid dividends on the potential dividend bearing assets they owned, DIVNONE2=1, DIVNONE3=1 and DIVNONE4=1, were not included as part of the universe for those variables concerning receipt of dividend income; DIVYNE2=1, DIVYNE3=1 and DIVYNE4=1. A similar situation exists for the variables HDIVYNE2, HDIVYNE3 and HDIVYNE4 because these household variables are aggregates of the person level variables.

c.1. Dividends Variables User Notes for the Second Longitudinal File

For 1999 and 2000, the imputation procedure to estimate a dollar value for dividends. DIVVAL, was modified to take into account if information was collected on the average value of all investments held by the household. A review of the relevant research indicated that on average, the dividend return to an average investment portfolio was approximately 4.5% over the past fifty years. This average return value was then used to estimate a value for missing dividends if an average value for investments was reported and the imputation flag for the variable was set to a value of three indicating that a statistical imputation was performed. Otherwise, if it was not possible to statistically impute the missing dividend value, a suitable donor was used to impute the missing dividend value and the imputation flag was set to one.

d. Free Lunch Variables

Users need to be aware that comparisons over time for the reported values in the variables HFLUNC and HFLUNN are not appropriate. In particular, the universe of children for these questions changed between the 1997 and 1998 data collections. For calendar year 1996 (HFLUNCE7), approximately 33% of households reported having one child receiving a free or reduced price meal at school, and for calendar year 1997 (HFLUNCE8), nearly 95% of respondents indicated that they had one child receiving a free or reduced price meal at school.

d.1. Free Lunch Variables User Notes for the Second Longitudinal File

For 1998, 1999 and 2000, the edited variable, FLUNC that determines whether a household has children that participate in the free or reduced price lunch and breakfast program at their school was modified to reflect the income tests required by this program. Specifically, households where the income to poverty threshold was greater than 185% should not be reporting children participating in this program.

e. Earnings Variables

There are 1,250 observations where the data reported in '92, '93 and '94 are a positive number of weeks worked (WKSWRK > 0), but there was no reported earning source from the longest job (ERNSRCE = 0) and no wage and salary data reported as well (WSVAL = 0). However, for these cases there is a reported value for longest job class of worker (CLSWKR > 0). Using this information, if the value of CLSWKR > 0, the value of ERNSRCE = 0 and the value of WKSWRK > 0, then the value of ERNSRCE was set to reflect the value of CLSWKR. Be aware that for these cases there will still be no wage and salary data (WSVAL = 0).

6. Employment Variables - Technical Notes

a. Number of Weeks Nonworker on Layoff

Use caution when using data for the number of weeks nonworker on layoff, ELAYWKE8, ELAYWKE9, and ELAYWKE0, as the weighted data is based on a very small number of observations. Data for this variable has been included for completeness.

b. Number of Stretches Looking for Work or on Layoff

The 1998, 1999, and 2000 SPD do not specifically ask the respondent whether the weeks looking for work or on layoff were in one stretch. Instead, LKSTRHE8, LKSTRHE9, and LKSTRHE0, the number of stretches looking for work, are constructed from the respondent's answers to questions 25 and 27 in the 'Employment and Earnings' section of the SPD questionnaire. In the 1998, 1999, and 2000 SPD, a stretch of looking for work or on layoff is considered to be interrupted when the respondent found employment or ceased looking for work for at least a one week period. For LKSTRHE7 (which is based on the CPS question design), a stretch of looking for work or on layoff is considered to be interrupted when the respondent found employment or ceased looking for work for at least a two week period. Hence, LKSTRHE7 is not perfectly comparable to LKSTRHE8, LKSTRHE9, and LKSTRHE0.

c. Weeks Looking for Work or On Layoff from a Job - Nonworker

The values for the variable NWLKWK, weeks looking for work or on layoff from a job (nonworker), vary considerably between the survey years 1994, 1997 and 1998. This is primarily due to the different survey designs associated with these years. Because information on the weeks spent looking for work or on layoff for the years 1992-1994 was collected monthly concerning current time spent looking for work or on layoff, while the 1997 information was collected from a fixed reference point about activities during the past year, the variables NWLKWKE4, NWLKWKE7 and NWLKWKE8 have considerable variation. To create annual information for the years 1992-1994, the time spent looking for work or on layoff was aggregated from data collected for the previous 4 months and then expanded to create an annual measure.

d. Industry of Longest Job by Major Industry Group

Individuals with a three-digit industry group code of 991 "Active Duty Armed Forces" are given a major industry group code 15 ("Never Worked") for the 'Bridge' data (WEMINDR7) and a major industry group code of '14' ("Public Administration") for the 1998, 1999, and 2000 SPD data (WEMINDR8, WEMINDR9, and WEMINDR0).

e. Number of Weeks Worked

These variables are a composite variable, composed of the number of weeks worked and the number of weeks on paid leave, such as vacation and sick leave. While most respondents reported their weeks worked, very few provided a response for weeks spent on paid leave (for example, there are 309 unweighted responses for the survey year 1998). Consequently, this led to a high imputation rate for these variables (WKSWRKE8, WKSWRKE9, and WKSWRKE0). However, for the majority of respondents, this high imputation rate reflects missing paid leave information, not missing weeks worked information. Note that for the years 1992, 1993 and 1994, WKSWRK (weeks worked and on paid leave) is an aggregate of monthly values, whereas for the survey years 1997, 1998, 1999, and 2000, the information was collected from a fixed reference point about the previous year's activities. Fluctuations between the survey years 1992 – 1994 and 1997 – 2000 may be due to these different reference periods.

NOTE: For further questions concerning variables comparability between survey years (particularly when comparing 1992 - 1994 variables to 1997 variables), please consult the "SIPP to CPS Cross-Reference Map" (Urban Institute, 1998) in Appendix D.

7. Health Insurance Variables

Several health insurance variables have inconsistent definitions over time, despite being named with the same base characters. Please read the data dictionary closely when using these variables, including MCAREE2-MCAREE8 and CH_MCE2-CH_MCE8.

a. HLOWNE2 - HLOWNE8: Did adult covered by private health insurance plan have policy in own name?

The universe for this variable is adults with a private health insurance plan (HI_YNE_x=1). For 1992, 1993, and 1994, adults who had no private health insurance plan (HI_YNE_x=2) were assigned a value of 2 (no) to the HLOWNE_x. In 1997 and 1998 people without a private plan were assigned a 0, the correct code for "not in universe". One way to correct the problem is to use HI_YNE_x. If HI_YNE_x=2 then HLOWNE_x=0.

b. Household Variables On Children's Health Insurance Coverage

The household variables reflecting health insurance coverage of children include some inconsistencies in 1994 and 1997. CMCAREE_x and CHIE_x have as their universes households with children under 15 years old. In 1994, there is some random noise with a handful of cases where people should be in universe but are not and vice versa. Double check the universe variable (UNDR15R_x) before completing your analysis. In 1997, most people living in households without children have a 2 meaning no children in the household have that coverage type. These people should instead have a 0 for "not in universe".

c. Notes as a result of 1999 Instrument Changes. These notes apply to the 1999 and 2000 instruments only.

MCAID - Was person covered by Medicaid at any time between January and December [of previous calendar year]?

NOTE(S): This variable also includes 1999 survey instrument items Q950_8 (Stateplan) and Q950_9 (Another government program). The 1999 survey instrument item Q950_9 is not capturing the same data as in the 1998 instrument (definition is not the same as OTYP_5E8). The 1999 instrument question is a measurement of Medicaid. For consistency in the longitudinal file, MCAID combines these three categories (Q950_4, Q950_8, and Q950_9).

MON - Number of months covered by Medicaid [in previous calendar year] (values are 1-12)

NOTE(S): This variable counts months of coverage for either Medicaid or (Stateplan) or "another government program" (since all three are capturing Medicaid coverage). Since the three were combined in the MCAID variable, starting with the 1999 Instrument, it does not make sense to record occurrences (and sums) of each variable separately.

OTYP_5 - Was person covered by other (state plan) health plan at any time during [previous calendar year]?

NOTE(S): Based on inputs from 1998 Instrument variable (OTYP_5E8), it has been determined that this variable is NOT equivalent to Q950_9 in the 1999 instrument. The question was previously combined with CHAMP in the 1998 instrument, but when broken down as a separate question in the 1999 instrument, it lost its original intent, which was to collect "other types of military coverage." The 1999 Instrument variable, Q950_9, will be included in the MCAID variable.

OTH - Excluding Medicare and Medicaid, was person covered by CHAMPUS, CHAMPVA, VA, military health, or Indian Health Services?

NOTE(S): The edit for OTHE9 is significantly changed from previous year (OTHE8), and only captures military types of coverage and Indian Health Services (CHAMP AND OTYP_4).

Imputation flags for this variable are carried over from the imputations done on the corresponding coverage variables.

HI - Was adult household member a policyholder of a group health plan?

NOTE(S): There are new questions in the 1999 instrument that ask up front whether the respondent is the policy holder or dependent of the plan they recorded being covered by in Q950. This variable is created from the new questions (Q951A and Q951C). Previously in the 1998 instrument employer-provided and union provided were asked in the same question. The 1999 instrument separates them. To retain comparability over time, responses to Q951A and Q951C are combined in HI. Minimal changes to edit were made to accommodate for this change.

DEPHI - Was person a dependent on a household group health plan?

NOTE(S): This is the companion variable to HI and is derived from the same question (Q951A and Q951C). Those respondents less than 15 years of age (if they checked that they were covered by an employer or union-provided plan) auto-default to dependents (they skip question Q951A or Q951C and go right to the questions that ask about line number of policy holder – Q951B or Q951D). (See HI for changes to instrument that affected this variable.)

COV_GH - Was person covered by a group health insurance plan during [previous calendar year]?

NOTE(S): This variable is created from HI and DEPHI (if you were a dependent or a policyholder and marked employer-provided or union provided in Q950 (Q950_1 or Q950_2), you're considered covered by a group health plan). (See HI for changes to instrument that affected this variable.)

PAID - What part of health insurance premium did employer/union pay?

NOTE(S): As a result of changes to the 1999 Instrument, this variable combines data asked of those covered by either an employer-provided or union-provided plan (given that employer-provided coverage and union-provided coverage were asked independently of each other).

PRIV - Was adult household member a policyholder of a direct-purchase health insurance plan?

NOTE(S): Previously this variable had a universe of GE 15 years of age. The 1999 instrument, however, allowed for those under 15 years of age to answer as policyholders for a direct-purchase health plan. The unedited data file contains 29 occurrences of policyholders under age fifteen. 23 of these cases reported a dollar amount when asked how much they paid last year for this plan. Given that the longitudinal file does not contain any occurrences of a policyholder under the age of 15, it was decided to maintain consistency and edit those under-age-15 policyholders, placing them in the category of dependent. It is possible that a proxy (i.e., the child's parent) responded that their child was the policyholder of the plan, because the parent bought the policy, put it in the child's name, and paid for it. This is why a dollar amount could also be recorded when asked.

DEPRIV - Was person a dependent on a direct purchase private health plan?

NOTE(S): (see PRIV for policyholders under 15)

CH_HI - What is the child's private health insurance status? (Values are: Private coverage through someone in household, someone outside household, or not covered by private health plan.)

NOTE(S): Group health insurance (COV_GH) and dependent of a direct purchase (DEPRIV) are used for this variable. Universe is those people less than age 15.

CURR - Was person covered by any health plan last week?

NOTE(S): This variable is constructed from responses to a variety of questions in the health insurance section. As a result, the universe of the variable CURR (created from the 1999 instrument), takes into account responses to questions throughout the instrument that ask respondents about current coverage by the same plan as last year:

(q955 = '1' or q959 = '1' or q962 = '1' or q964 = '1' or q966 = '1' or q968 = '1' or q970 = '1' or q971C = '1' or q972 = '1' or q974 = '1')

So, if a respondent said "yes" to Q977 or they said "yes" to (Q955, Q959, Q962, Q964, Q966, Q968, Q970, Q971C, Q972, or Q974), then they were coded as "being covered by a health plan last week."

CTYP_(1-5) - What type of health plan was person covered by last week? (allow up to five types to be selected.)

NOTE(S): The 1999 instrument does not necessarily capture every type of "current coverage." If respondents had one type of coverage last year and they were "currently covered" by that same plan at the time of interview, the instrument is not designed to capture new types of coverage that the respondent might have picked up between the reference period of "last year" and the time the survey questions were asked. Also, if respondents had more than one type of coverage and they were "currently covered" by one plan but not the other (lost a type of coverage), the instrument is not designed to capture any new types of coverage that the respondent might have picked up between the reference period of "last year" and the time the survey questions were asked.

This variable was created from the "current coverage" questions asked after responses were gathered for each type of health insurance. It also includes the current coverage question at the end of the section (Q978). Values for the edited variable were changed due to a change in the instrument from 1998 to 1999. All types of military health are included in one value. There is no dependent or policyholder separation. "Other government health care" was dropped.

APPENDIX H

Control Counts

The control counts are a set of frequency distributions for each variable which is included in the documentation.

SPD - SECOND LONGITUDINAL FILE COUNTS - EXCEPT DOLLAR AMOUNTS

92:HCV: Tenure

TENUREE2	Frequency	Percent	Cumulative Frequency	Cumulative Percent
1	25910	72.1	25910	72.1
2	9115	25.4	35025	97.4
3	921	2.6	35946	100.0

Frequency Missing = 61731

92:HHI:Any child cvrd Medicare/Medicaid

CMCAREE2	Frequency	Percent	Cumulative Frequency	Cumulative Percent
0	17109	47.6	17109	47.6
1	4300	12.0	21409	59.6
2	14537	40.4	35946	100.0

Frequency Missing = 61731

92:HHI: Any child cvrd by other health

CHIE2	Frequency	Percent	Cumulative Frequency	Cumulative Percent
0	17109	47.6	17109	47.6
1	4819	13.4	21928	61.0
