

What Campers Need To Know!

Invasive species are taking over parks and natural areas throughout Pennsylvania, making camping difficult and damaging valuable habitat. Luckily campers can play a critical role in slowing the spread of invasives.

“Invasive species” are non-native plants and animals that can cause harm to the economy, environment, and/or human health.

Invasive plants tend to grow quickly and thickly, potentially blocking trails. This makes it

more difficult for people to camp and enjoy the outdoors.

Mile-a-minute, for example, is a vine that can grow up to a foot per day! It can quickly make trails impassable with its painful spines (*see photo below*).

Invasive species are also a concern to campers because they can ruin the beauty of Pennsylvania landscapes and lower biodiversity (the variety of living things in an area).

We need biodiversity to maintain healthy habitats.

Plus it's simply more interesting and exciting to camp in a landscape full of different shrubs, trees, flowers, and grasses, rather than in a boring field of the same invasive plant. But that is exactly what could happen if an invasive species appears... all other species, including wildlife, may be chased out or killed!

Mile-a-minute vine

- Know how to identify some of the more common invasive species in your area, so you can avoid camping near them. Visit www.dcnr.state.pa.us/forestry/invasivetutorial/index.htm to learn more.
- Stick to designated trails and campsites instead of creating your own.

Make A Difference!

Now that you know why invasive species are a concern, what can you do to help minimize their spread? Luckily there are many small, easy steps you can take to keep invasives in check.

- Clean clothing, shoes, vehicles, pets, tents and other equipment before entering a new area to remove hitch-hiking seeds and plant parts (bag the dirt and seeds and throw that in the trash).
- Do not move firewood! Buy it locally. This will keep dangerous pest insects like emerald ash borer from spreading.
- Volunteer to help prevent and control invasive species. Contact your local state park/forest office, conservation district, watershed group, or campground to get involved.
