STATISTICS

OF

WEALTH, TAXATION, AND PUBLIC INDEBTEDNESS.

I—III

REMARKS

ON THE

STATISTICS OF WEALTH AND PUBLIC INDEBTEDNESS.

VALUATION.

The schedule commonly known as the Social Statistics Schedule, annexed to the act of 1850, proposes ten distinct subjects of inquiry, viz: Valuation; Taxation; Churches; Schools; Libraries; Newspapers; Wages; Crops; Pauperism; and Crime. Of these ten heads, one, viz, Crops, was, as explained in the remarks which preface the Population volume of this census, stricken out of the schedule, as its proposed scope is more fully covered by the investigations of another office, viz, the Department of Agriculture. The place which it formerly occupied upon the schedule was devoted to an inquiry into State, county, and municipal Indebtedness.

The results of the inquiries in respect to churches, libraries, schools, newspapers, pauperism, and crime, as bearing on the moral, social, and intellectual condition of the people, will be found in connection with the Statistics of Population. The Tables of Valuation, Taxation, and Indebtedness, constituting a part of the Industrial Statistics of the census, have been grouped with the Statistics of Production, and will be found in the pages immediately following.

That part of the Social Statistics schedule of 1850 which is devoted to the subject of Valuation has always been understood to require—

First. A positive statement of the value of Real Property as *assessed* for purposes of State or local taxation.

Second. A positive statement of the value of Personal Property as *assessed* for purposes of State or local taxation.

Third. An *estimate*, by the officer making the return, of the True Value of both species of property combined. The phraseology of the schedule in this matter is most unfortunate, but it has always been understood (interpreted is hardly the word) to mean what is given above.

Inasmuch as the laws of some States exempt large amounts of personal property from taxation, while in others large classes of real property are so exempted; inasmuch, moreover, as the customs of assessment vary greatly in different States, and oftentimes in the several counties of the same State—in some the taxable value of the property not exempted by law being fixed at no more than a third of its recognized selling-price; in others, at fifty, sixty, seventy, eighty, or ninety per cent.—it will be seen that the result of the first two inquiries is not to obtain the wealth of the several States and Territories, but to present merely the actual basis of State or local taxation: the amount, namely, in each State, county, or town, upon which a tax of five, ten, or fifteen dollars in the thousand might be levied. The utter want of uniformity in this matter of assessment for purposes of taxation cannot be too strongly insisted on. Without a knowledge of the laws of each community in respect to exemptions, as well as a knowledge of the customs of assessment in each, assessed values must always bear a very uncertain relation to real wealth.

That, then, which the first two inquiries under this head do not attempt to obtain, namely, the Real Wealth of the several States and Territories, it is sought to reach by means of estimates to be made by the officer immediately charged with the collection of the Social Statistics of the district or subdivision; and the results of this effort will be found in the proper column of the tables following.

As estimates on no subject can have any authority excepting such as is derived from confidence in the persons making them, or, if such estimates are put forth impersonally, then from confidence in the methods pursued, it is but right that it should be stated by what class of officers this part of the census work has been performed, and under what instructions from the central office they have acted. At the best, these figures represent but the opinion of one man, or of a body of men, in each State, acting under advice in the collection of material and in the calculation of the several elements of the public wealth.

From the following States and judicial districts the return of Social Statistics was made by a single deputy marshal specially commissioned for that duty, viz: California, Connecticut, Delaware, Indiana, Iowa, Kansas, Ken-

tucky, Louisiana, Massachusetts, Michigan, Mississippi, Nebraska, Nevada, New Jersey, Eastern New York, Southern New York, North Carolina, Ohio, Oregon, Western Pennsylvania, South Carolina, Texas, Vermont, Wisconsin, Wyoming, and District of Columbia.

From each of the following States and judicial districts the returns of the Social Statistics were made by two or more deputy marshals specially commissioned for the service, viz: Alabama, Illinois, Missouri, Northern New York, and Eastern Pennsylvania.

In the following States and judicial districts the collection of the Social Statistics was, by the United States marshal, in his discretion, intrusted chiefly to the regular assistant marshals, each in his own subdivision, viz: Arkansas, Florida, Georgia, Maine, Maryland, Minnesota, New Hampshire, Rhode Island, Virginia, West Virginia, Arizona, Colorado, Dakota, Idaho, Montana, New Mexico, Utah, and Washington.

Where the duty of making these estimates of the true value of all species of property was charged upon assistant marshals, the merit of such estimates will, of course, depend upon the character of the marshal's general line of appointments. Where assistant marshals were selected from among the best citizens of the district, their estimates, based on a more intimate local knowledge than was otherwise attainable, and with the advantage of a thorough personal canvass of the immediate region concerned, may be assumed to be reasonably just and close to all the facts and conditions of the case. The advantage of committing this duty to one or two officers in a State was found in the considerations—first, that this plan secured a greater uniformity of treatment; second, that, with the smaller number of persons engaged, it was practicable for the Census Office to confer more frequently and minutely with them in respect to difficulties encountered, and to communicate information or suggestions bearing on the subject; third, that it was possible by this method to secure officers of a distinctly higher grade for the performance of this duty.

The latter consideration was of prime importance for the purposes of a true valuation of the realized wealth of the country. Some of the gentlemen who consented to act in this capacity are of national reputation, while nearly all the appointees of this class brought to the work special qualifications and exceptional opportunities for the investigation.

The two points particularly dwelt upon in instructions from the Census Office in this matter of valuation were, first, the undervaluation of real estate in assessments for taxation; second, the large classes of personal property which,

- (a) By State or Federal laws are exempt from taxation; or,
- (b) By the habits of assessment are disregarded, (notably furniture, apparel, and equipage, and small amounts of money in hand or in bank;) or,
- (c) By evasion or fraud escape assessment.

The investigations under the first head, as they have become known to the Census Office, have been searching and comprehensive. It is a great mistake to suppose that a uniform per cent. can be taken by which to advance the assessed values of real property throughout the country, or even throughout any one State, to reach the true selling price. Not only are the variations to be calculated very great in every State, even after the nominal equalization which, in a few States, is effected by State boards constituted for the purpose, but the variations as between States are such as to deprive random statements as to the amount of undervaluation of all authority whatever. There are States in which the assessed value of the whole body of real estate does not fall short of its selling price in a favorable market by more than ten per cent. In others the true value exceeds the assessed value by two hundred per cent., and even more; while between these extremes States are ranged without any perceptible order, certainly without any means of determining *a priori* their place in the scale. Hence, to say generally, as is so often done in discussions of the realized wealth of the country, "Add 30 per cent. for undervaluation," is the merest trifling. It is possible, however, so to conduct investigations in regard to each important section, by turn, as to reach results of real value, even though they take no more authoritative form than that of estimates. But that this should be so, it is necessary that they should be the estimates of judicious and well-informed men, known to have canvassed the whole field, with access to all official data existing, and acting in constant conference with each other and with a central office.

In a few States, notably several of the former slave States, both property and industry are in such a condition of uncertainty that it has only been possible to deal with the question roughly and approximately; but speaking generally for the majority of the States, and for the vast majority of the property of the country, the additions to be made to assessed values, on account of the undervaluation of real estate, have been calculated with great nicety by competent investigators.

No such accurate methods could, of course, be applied to the determination of the question how much should be added to the assessed valuation of the country on account of the exemption or escape of personal property from

taxation. The result reached must, at best, be characterized rather as an *impression* than an *opinion*; but so long as this work was to be done at all, it was highly desirable that the impression should come from a study of the subject, and not from guessing at elements which had never been seriously considered.

One remark more will be appropriate before submitting these tables to criticism. No attempt has been made to eliminate that portion of the personal property of the country which is based on the value of real estate. To that extent, therefore, there is a duplication of wealth. The reasons why it was not deemed expedient to undertake the work of reducing the aggregate valuation of real and personal property by the amount of the latter which merely represents the former, were as follows:

First. This duplication follows the general rule of State and municipal taxation. In nearly all the States of the Union land and buildings are taxed to their full (assumed) value, without deduction on account of mortgages, while the mortgages are also taxed at their full value. To obtain the aggregate value of both species of property, this duplication being admitted, is, therefore, to obtain the basis of possible taxation on prevailing methods of taxation, better than by excluding such duplicated values.

Second. This personal property representing real property is not always, perhaps not generally, owned in the immediate community where the real property is situated. Its exclusion, therefore, while it would more accurately present the realized wealth of the country as a whole, would lead to the grossest misrepresentation as between sections and States. Hundreds of millions are owned in the East in the form of mortgages on the real estate of the West. If these gigantic amounts are to be excluded from such tables as the following, they must be excluded *as personal property* from the valuations of the Eastern States. But to do so would be in the highest degree unjust. The wealth of these States consists in the value of their own real estate, their manufacturing, commercial, and banking capital, their furniture, apparel, and equipage, *plus* the claims they have upon the lands, buildings, and railways of the newer States.

Third. Even were it desirable, in view of the two considerations here presented, to eliminate the element of duplicated valuations, it will appear, on reflection, clear that the difficulties in the way of anything approaching an accurate determination of the amount to be excluded would be almost insuperable.

On all these accounts it was believed that it would be far more satisfactory to aggregate the totals of real and of personal property as separately obtained, without any inquiry how far the value of one merely represents the value of the other.

PUBLIC INDEBTEDNESS.

It is, of course, impossible to introduce into such statements of public indebtedness as are contained in the last division of the following tables anything like uniformity in the treatment of contingent liabilities.

In some States the treasury is contingently liable, in an amount far exceeding the proper debt of the State, for the payment (in some cases of the principal and in others of the interest) of bonds issued by, or in aid of, railroad and other companies; the security given for the payment of such obligations at maturity, by the companies themselves, varying in quality from the highest to the lowest. It is hardly necessary to say that the same difficulty attends the statement of the debt of the United States, by reason of the aid extended by the Government in the construction of certain railroads.

A second obstacle to uniformity in such statements as the following is found in the fact that in many States the bonds of the State are held in trust, in large amounts, by officers representing various special interests of the State itself. For example, the securities of the educational funds in one-half the States consist largely, if not principally, of State bonds. To determine in which of these States, at any future time, or under all reasonable contingencies, provision would be made for the payment of the interest or principal, and in which of the States, in times of financial embarrassment or under possible political conditions, the interests of education would be left to suffer, would be invidious even if it were practicable, but will be seen at a glance to be wholly impracticable and hopeless.

In view of the difficulties thus briefly stated, (and others might be cited,) it has been thought best to express the debt of each State in the following tables at the amount recognized by the proper officers and authorities of the State as constituting its debt, and to accompany the statement by such explanations and such additional information as may be necessary to enable any person so disposed to work out the statement of indebtedness upon a uniform rule, either inclusive or exclusive of all contingent liabilities, (without reference to the quality of the security;) or, again, either inclusive or exclusive of all sums owing from the treasury to some department of the State itself. It is true that this plan may involve considerable differences in the treatment of the subject of State liability, due not so much to differences in the character of the security in the several cases, as to the somber or sanguine disposition of the officers immediately in charge, or to temporary embarrassments, or to the traditions of

an auditor's or a comptroller's office. But it is believed that any other plan would be liable to more of objection and of odium:

THE UNITED STATES.—The statement of funded debt is exclusive of bonds issued in aid of the several Pacific railroad companies to the amount of \$64,457,320.

ALABAMA.—The statement of funded debt is exclusive of State indorsement of railroad bonds to the amount of \$8,480,000, on which no default in payment of interest by the companies has occurred. The statement of unfunded debt includes \$2,126,124 due to the educational fund, and \$669,086 of "surplus revenue," interest on which, by law, must be paid from the treasury to the educational fund.

ARKANSAS.—The statement of funded debt is exclusive of bonds to the amount of \$2,150,000 issued in aid of railroad companies, on which no default in payment of interest by the companies has occurred; and of bonds to the amount of \$2,391,072 issued to banks.

CALIFORNIA.—The statement of funded debt is inclusive of bonds to the amount of \$1,191,000 held by the school and university funds.

CONNECTICUT.—The treasurer reports about \$700,000 in the treasury applicable to the reduction of the funded debt. The statement of funded debt is made without reference to such assets.

DELAWARE.—The statement of funded debt is inclusive of bonds to the amount of \$352,000, issued in aid of internal improvements.

FLORIDA.—The statement of funded debt is exclusive of a large amount in bonds issued to railroad companies, of which the comptroller states that he has no account; and inclusive of bonds to the amount of \$262,045 held by educational funds, and \$45,000 held by the internal improvement fund.

GEORGIA.—The statement of funded debt is exclusive of bonds issued since 1868, and is stated by the comptroller to be that furnished him "by the treasury." The comptroller reports having approved bonds issued under certain laws of 1870 to the amount of \$3,200,000. He estimates the assets of the State in bank and railroad shares at a cash value of \$318,600.

ILLINOIS.—The statement of funded debt is exclusive of \$1,165,407 due educational funds, on which the State pays interest annually. The auditor reports about \$3,000,000 in the treasury applicable to the reduction of the funded debt. Since the date of this report, (April, 1871,) the auditor informed this office that such application had been made.

INDIANA.—The statement of funded debt is exclusive of internal improvement bonds, to the amount of \$191,000, for the redemption of which the governor deems it probable the State may be obliged to make provision; and inclusive of bonds to the amount of \$3,734,268 held by educational funds.

IOWA.—The statement of funded debt is inclusive of bonds to the amount of \$234,498 held by the school fund.

KANSAS.—The statement of funded debt is inclusive of bonds to the amount of \$66,900 held by the sinking-fund, and \$207,325 by educational funds.

KENTUCKY.—The statement of funded debt is inclusive of bonds to the amount of \$1,652,087 held by the board of education. The entire unfunded debt is due to the sinking-fund. The resources of the sinking-fund amount to \$4,943,723, including stock in internal improvements of the nominal value of \$2,544,359, together with the unfunded debt of the State above mentioned.

LOUISIANA.—The statement of funded debt is exclusive of bonds to the amount of \$15,395,000 yet to be issued by virtue of existing acts to railroad and canal companies; and inclusive of bonds to the amount of \$993,500 held by educational funds; \$198,000 by the redemption fund; \$1,992,000 issued in payment of State subscription to railroad stock; \$1,146,000 issued in aid of railroads and canals; \$4,838,933 loaned to banks. The statement of unfunded debt includes \$200,000 due the educational fund. The auditor states the resources of the redemption fund at \$231,000.

MAINE.—The treasurer reports the credit balance of the trust funds held by the State at \$2,018,308, of which \$1,270,726 belongs to the sinking-fund, and \$426,254 to various educational funds.

MARYLAND.—The statement of funded debt is inclusive of liabilities incurred in aid of railroads, canals, &c., in which institutions the State owns productive stocks to the amount of \$5,552,970, and unproductive stocks nominally valued at \$20,115,708. In addition to the foregoing the comptroller reports productive stocks held by the sinking-fund to the amount of \$1,764,450.

MASSACHUSETTS.—The auditor reports resources in the sinking-fund, applicable to the reduction of the funded debt, to the amount of \$15,030,642; also, trust funds (school, &c.) to the amount of \$2,957,096.

MICHIGAN.—The statement of funded debt is inclusive of canal bonds, guaranteed by the State, to the amount of \$83,000. The auditor reports the credit balance of the various trust funds at \$2,292,356.

MINNESOTA.—The statement of funded debt is exclusive of \$4,026,750, which is the principal and unpaid interest to January 1, 1870, of certain State railroad bonds, for the payment of which no provision has yet been made by law. The school fund holds the entire funded debt. The auditor reports the resources of the sinking fund at \$64,497.

MISSISSIPPI.—The statement of funded debt is exclusive of bonds to the amount of \$7,000,000, of which the principal and interest have remained unpaid since 1842. The statement of unfunded debt includes \$1,138,494 due to the educational funds. The auditor reports bonds and stocks held by the State, to the amount of \$966,674, as security for loans to railroads, &c.

MISSOURI.—The statement of funded debt is exclusive of bonds to the amount of \$3,000,000 issued to the Hannibal and St. Joseph Railroad, for which the State is, in the opinion of the auditor, amply secured, and inclusive of all bonds issued to other railroads. The State debt proper is stated by the auditor at \$438,000.

NEBRASKA.—The school fund holds the entire funded debt.

NEVADA.—The statement of funded debt is inclusive of bonds to the amount of \$58,000 held by the "irreducible school-fund." The comptroller reports a balance of \$86,121 in the "State interest and sinking fund."

NEW HAMPSHIRE.—The statement of unfunded debt includes \$45,019 due to the various trust funds.

NEW JERSEY.—The statement of funded debt is inclusive of bonds to the amount of \$183,000 held by the educational fund. The treasurer reports \$283,000 in the sinking-fund, and that the State owns stocks and securities to the amount of \$1,587,370.

NEW YORK.—The statement of funded debt is that reported by the comptroller after the application of balances in the sinking-fund, and is inclusive of bonds to the amount of \$2,845,307 held by the various trust funds.

NORTH CAROLINA.—The statement of funded debt is inclusive of ante-war bonds to the amount of \$8,387,200; *non-marketable* bonds issued to railroad companies in 1861-'62-'63, to the amount of \$1,128,000; and "special tax bonds," issued since the rebellion, in aid of internal improvements, to the amount of \$11,407,000.

OHIO.—The statement of funded debt is exclusive of "irreducible State debt," (school and trust funds,) to the amount of \$3,935,290. The auditor states the amount in sinking-fund at \$270,225.

OREGON.—The secretary of state reports the amount in the treasury, applicable to the redemption of bonds, at \$19,917.

PENNSYLVANIA.—The auditor general reports the amount of stocks, bonds, &c., held by the State, at \$11,254,322.

RHODE ISLAND.—The statement of funded debt is inclusive of bonds held by the school fund to the amount of \$3,940.

SOUTH CAROLINA.—The statement of funded debt is inclusive of bonds to the amount of \$970,000 issued in aid of railroads, and \$484,445, "fire loan of 1838," for the last of which the State is, in the opinion of the comptroller general, fully secured by the assets of the "State Bank." The comptroller general reports that the State owns shares in railroads, &c., to the amount of \$2,290,700.

TENNESSEE.—The statement of funded debt is inclusive of bonds, to the amount of \$27,546,961, loaned to railroad and turnpike companies, and interest thereon; and exclusive of bonds of railroad companies, indorsed by the State, to the amount of \$2,172,000. The comptroller reports the State debt proper, including its funded interest, at \$4,818,544, and that the State is secured on account of the loans and indorsements above mentioned, to the nominal amount of \$27,061,681, estimated by him at a cash value of \$22,032,844.

TEXAS.—The statement of debt is the estimate given by the comptroller November 30, 1870, and, according to his statement, does not include bonds for frontier protection, to the amount of \$750,000, yet to be issued; or any liabilities that may have been contracted by the State in granting aid to railroad companies; or the amount due to the United States on account of the "direct tax;" or the amount which may be decided to be due the common-school fund on account of "bogus" payments made thereto during the rebellion.

VERMONT.—The treasurer reports \$196,194 in the sinking-fund.

VIRGINIA.—The statement of funded debt is exclusive of stocks and bonds of the State, to the amount of \$1,543,670, held by the board of the literary fund.

WEST VIRGINIA.—The debt is included in that of Virginia, no division having yet been made.

WISCONSIN.—The statement of the unfunded debt includes \$2,183,800 due the school and other trust funds.

NOTE 1.—The great reduction in the assessed values of personal property in the Southern States since 1860 is, in the main, due to the emancipation of the human chattels which, at the Eight Census, formed so large a portion of the wealth of those States.

NOTE 2.—It needs to be stated that the fiscal years of the several States fail to coincide, and the figures in the tables of Wealth, Taxation, and Indebtedness, following, are not, therefore, all taken at precisely the same date. In each case, however, the last fiscal returns accessible have been used in the compilation. These tables have been prepared with the utmost care, and have, in every case, been submitted to the criticism of the proper State officers.

NOTA BENE.—The following tables were furnished in advance sheets to the public press in April, 1871. The comments of certain journals thereon have seemed to call for a caution from the Superintendent as to the use to be made of these figures for purposes of comparison between 1860 and 1870. The difference between the published "True Valuation" at the two censuses (fourteen thousand five hundred millions, excluding the value of the slaves in 1860, thirty thousand millions in 1870) has been by some treated as measuring the growth of the actual wealth of the country in the decade. It will easily be gathered, from the remarks already submitted, that it is the belief of the Superintendent that the estimates of the value of property at the census of 1860 were made generally without any appreciation of the principles which should govern in the treatment of the subject, and that the results were, for nearly all the States, defective, while, in some, the statements of value were so far below the fact as to be unworthy of publication. Undoubtedly, of the apparent gain of 107 per cent. in the valuation of the United States, between 1860 and 1870, 20 to 30 per cent. is due simply to heedless and ignorant understatement in 1860. The Superintendent, however, while holding this opinion decidedly, had not proposed to himself to state it so strongly; but the newspaper comments referred to have shown the necessity of a distinct explanation on this point.

Besides this, allowance must be made for the general advance in prices due to the condition of the currency. While this tendency to the exaggeration of prices has affected those classes of property which constitute what is popularly known as fixed capital far less than it has those classes of property which make up the "floating capital" of the country, and very much less still than it has affected the portions of such floating capital which consist of articles immediately merchantable,* the valuation of 1870 cannot have been increased by less than 30 to 40 per cent. through the effects of currency inflation since 1860.

What remains of the nominal increase in valuation between 1860 and 1870, after these two deductions are made, measures the substantial growth of the country in realized and husbanded wealth.

*The price of labor—wages—probably falls in this respect between this class and the one just preceding. The order in which these several subjects receive the impulse to a rise in price, proceeding out of currency inflation, may, on these assumptions, be stated as follows:

- 1st. "Commodities," *i. e.*, articles immediately merchantable.
- 2d. Labor.
- 3d. Floating capital not included in No. 1.
- 4th. Fixed capital in its various forms.

TABLE I.

WEALTH, TAXATION, AND PUBLIC INDEBTEDNESS

IN

THE UNITED STATES,

(BY STATES AND TERRITORIES,)

AT THE CENSUSES OF 1870, 1860, AND 1850.

WEALTH, TAXATION, AND PUBLIC INDEBTEDNESS.

TABLE I.—THE UNITED STATES.

NOTE.—It has not been thought advisable to attempt a valuation of the property of the General Government. The total of receipts into the National Treasury for the Treasury, on the 1st day of June, 1870, as appears in the statement of the Secretary of the Treasury, was \$2,406,562,372. Adding these amounts to the proper

TABLE I.—THE UNITED STATES.

fiscal year ended the 30th day of June, 1870, as appears in the report of the Secretary of the Treasury, was \$411,255,479. The national debt, less the amount in the columns of this table, the aggregate public income of the country becomes \$688,520,435, and the aggregate public indebtedness \$3,271,874,768.

The total receipts into the State treasury during the fiscal year were \$1,090,950; of which \$360,000 were from taxes on real and personal estate; \$429,950 from corporations, (express and insurance;) \$200,849 from interest; \$21,076 from licenses, &c.; \$51,400 from loans, (refunded;) \$25,030 from war claim paid by United States; and \$2,645 from miscellaneous sources.

The total disbursements from the State treasury during the fiscal year were \$1,055,477; of which \$31,843 were for the executive department; \$56,980 for the legislative department; \$44,931 for the judicial department; \$138,029 for State prison; \$20,051 for reform school; \$60,958 for charitable purposes; \$136,284 for education and schools; \$53,949 for printing; \$283,000 for sinking-fund; \$82,389 for war-fund, (extraordinary;) \$60,000 for special loan, (extraordinary;) and \$87,063 for miscellaneous purposes.

For the purpose of State taxation the assessed valuation of real estate above given is reduced by deducting the amount of mortgages thereon, thus making the above total of assessed value of real estate \$91,607,710 in excess of the amount on which a State tax is levied. It is not practicable, however, to distribute this deduction among the various counties.
