This is really good for us. [REDACTED] was an excellent economic office in [REDACTED] and did a lot to help us with the USG when he was posted and the [REDACTED] govt. He is smart and honest. I find it a huge compliment that he is "tipping" us off about this. He certainly doesn't have to. I suggest we set a call with Ken and David and [REDACTED] and me to get everything he has in between his ears on this thing. This is a lucky break.

Yup I'm down in Basra, Iraq. Maybe I could call country director. Meanwhile I will dig out the info I have. I have brochure of the company, and extra one or I could scan and email some relevant pages

Hello Jeanne,

I hope you are doing well and I sure hope that things are going ok for the [REDACTED] LNG project! Anything I can do from here to give info or whatever, let me know.

I read and heard about with interest your deal with the regional Kurdish government. I was at the Iraq Oil, Gas etc. Summit in Dubai and I was trying to find the Hunt reps but never could find them.

I don't know if you are aware of another opportunity - I met with a Dubai Company that has plans to develop a whole new port at the very tip of Iraq (something sorely needed in my opinion). They have plans for a site for a LNG plant. They mentioned Shell was interested, they had talked to them. This seems like it would be a good opportunity for Hunt. Almost all the gas is being flared off here now, and there is a big push to make use of it. If you all are not aware of this and would like some more information or contact in for the firm developing the port, please let me know.

Yours, [REDACTED]
