**NCHS Instruction Manual  
Part 8A, Vital Records  
Geographic Classification, 2004**

**Preface**

**VITAL RECORDS GEOGRAPHIC CLASSIFICATION, 2004**

This manual contains geographic codes, based on the Federal Information Processing Standards (FIPS), FIPS 55-3, issued by the National Institute of Standards and Technology (NIST) after approval by the Secretary of Commerce. These codes are used by the National Center for Health Statistics (NCHS) in processing information from birth, death, and fetal death records. Included are (1) incorporated places identified by the U.S. Bureau of the Census in the 2000 Census of Population and Housing; (2) census designated places, formerly called unincorporated places, identified by the U.S. Bureau of the Census; (3) certain towns and townships; and (4) military installations identified by the Department of Defense and the U.S. Bureau of the Census.

The manual is divided into three sections:

- I. Introduction, Coding Rules, and Class Code Definitions
- II States, U. S. Territories, and Canadian Provinces
- III. Countries.

Geographic Classification, 2004**

## **I. Introduction, Coding Rules, and Class Code Definitions**

### **2004 Implementation of FIPS Coding for Vital Statistics**

The rules given in this document describe how to use the Instruction Manual Part 8A (IMP8A) FIPS Code Lists to code Occurrence, Birthplace, Residence, and Linked File State of Birth Geographic variables on all NCHS Vital Statistics files. The assumption is that for most Registration Areas, the geographic values reported on the certificate will be looked up in the IMP8A manual, in order to provide codes for the geographic elements. While most records will have simple, exact matches, the following rules were developed to handle problematic cases. These include situations where one or more variables are missing or inconsistent with those provided in IMP8A. In some cases, the record needs to be flagged for follow-up manual review. In these cases, one or more variables have been coded as unknown. These records should be transmitted to NCHS, but it is expected that additional information (queries, ZIP Code lookup, local maps, GIS) will be used to correct or clarify the original reporting. These updated records would then be submitted as updates to NCHS for processing. For publication purposes, NCHS plans to impute on the assumption that there will be few incomplete records left unresolved at the end of the data collection cycle.

#### Occurrence

NCHS will continue to collect State and County of Occurrence on all Vital Statistics Files. A code of Not Classifiable will now be allowed for County of Occurrence.

#### Birthplace

In addition to state, NCHS will now require the collection of Country of Birth.

#### Residence

NCHS will now require four elements for Residence: Country, State, County, and Place of Residence. Codes for Place of Residence must exist within the County of Residence as reported. Balance of County codes will still be required for Place codes to identify areas outside of any Place.

#### Linked File State of Birth

NCHS will continue to collect State of Birth for Infant Death linkages.

### **Basic Principles for Place and County of Residence Coding**

The City Limits Indicator (CLI) is the primary key for deciding how to proceed with coding Place of Residence. The concept of a CLI does not apply to some Registration Areas, as all land area within those states or territories are located within a meaningful sub-county division, such as a township or borough, or other Minor Civil Division. If a Registration Area does not include the CLI on their certificate, the same principles and rules are applied as if the CLI is present on the

**NCHS Instruction Manual**  
**Part 8A, Vital Records**  
**Geographic Classification, 2004**

certificate, and 'Yes' is indicated. The new Certificate Revision, however, does include the CLI as a standard variable on the revised standard Birth, Death and Fetal Death Certificates.

Census Designated Places (CDP) are communities that resemble incorporated places, but may or may not have any legally-recognized boundaries. Because of this, when a CDP is reported for Place of Residence, the coding rules are written to ignore the CLI, if reported, and to code the record as if the CLI is indicated as 'Yes'. Section II of IMP8A contains a column of FIPS Class Codes, which indicates whether the entry is a CDP or an Incorporated Place. At the end of this document, a list of the most common FIPS Class Code definitions is provided for your reference.

### **Basic Principles for Coding Residence for Non-US Residents**

Until Registration Areas implement the new revised Standard Certificates, they are likely not to have a box for Country of Residence on their certificates, although they may collect that data using the State of Residence entry.

In these cases, if a non-US state or territory is entered on a certificate as the State of Residence, the list of Canadian provinces is first consulted to determine if the reported state refers to a Canadian Resident. If so, the country is assigned to Canada, and the appropriate two-letter Province code is assigned as State of Residence, when possible.

If the entry refers to neither a US state/territory nor a Canadian province, the list of Country Codes is referred to. If a matching entry is located, the appropriate two-letter code is assigned for Country of Residence; If no entry can be found, all four Residence codes are set to unknown.

**NCHS Instruction Manual**  
**Part 8A, Vital Records**  
**Geographic Classification, 2004**

**Coding Rules for FIPS Entities**

For each item, begin with Rule 1, and if the statement is true, follow the instructions listed. If not, follow the instructions listed after the word "Otherwise". Continue until you reach a Coding Complete statement, whereupon the coding process for the current record is complete.

In IMP8A Section II [FIPS Place Listing], any entry containing a Class Code of M2, U1, U2, U3, or U9 is considered a Census Designated Place (CDP).

If separate boxes for Country are not available for Birthplace or Residence items, it is assumed that entries relating to foreign countries may be reported within the entries for State, and modifications to these rules are included for those cases. Regardless, if a Registration Area does not have the capability to report all Foreign Country codes, a special Country Code of YY may be used, as an equivalent to the former State Code of 59 (Remainder of World). These Registration Areas would still be expected to provide Country Code detail for Canada (CA), Cuba (CU), Mexico (MX), and United States (US).

**OCCURRENCE**

For use in Natality, Mortality, and Fetal Death files

- 1 If the entry for State of Occurrence corresponds to the Registration Area that is submitting the record:**

Enter the two-letter State Code from IMP8A [including YC for New York City] for the Registration Area, and  
Continue to Rule 2

**Otherwise,**

***Stop—This record should be submitted by the Registration Area where the event occurred***

Coding Complete

- 2 If there is an entry for reported County of Occurrence in IMP8A Section II [FIPS County Listing] for the State of Occurrence, as coded in Rule 1:**

Enter three-digit County Code from IMP8A  
Coding Complete

**Otherwise,**

Enter 999 for County Code  
Coding Complete

**BIRTHPLACE**

For use in Natality, Mortality, and Fetal Death files (Birthplace of Mother on the Natality and Fetal Death files, and Birthplace of Decedent on the Mortality file)

**NCHS Instruction Manual**  
**Part 8A, Vital Records**  
**Geographic Classification, 2004**

- 1 If the entry for Country of Birth is United States (or if not available, and an entry for State of Birth is present and is a US State or Territory, as shown in IMP8A Section II [States, US Territory, and Canadian Provinces]):**

Enter US for Country Code, and

Continue to Rule 2

**Otherwise,**

Continue to Rule 3

- 2 If there is an entry for reported State of Birth in IMP8A Section II [States, US Territory, and Canadian Provinces] that is a US State or Territory:**

Enter the two-letter State Code from IMP8A

Coding Complete

**Otherwise,**

Enter ZZ for State Code

Coding Complete

- 3 If the entry for Country of Birth is Canada (or if not available, and an entry for State of Birth is present and is a Canadian Province or Territory, as shown in IMP8A Section II [States, US Territory, and Canadian Provinces]):**

Enter CA for Country Code, and

Continue to Rule 4

**Otherwise,**

Continue to Rule 5

- 4 If there is an entry for reported State of Birth in IMP8A Section II [States, US Territory, and Canadian Provinces] that is listed as a Canadian Province:**

Enter the two-letter State Code from IMP8A

Coding Complete

**Otherwise,**

Enter ZZ for State Code

Coding Complete

- 5 If the entry for Country of Birth is present, and can be found in IMP8A Section III [Countries]:**

Enter the two-letter Country Code from IMP8A (or YY if Registration Area is not reporting expanded country codes), and

Enter XX for State Code

Coding Complete

**Otherwise,**

Enter ZZ for Country Code, and

Enter ZZ for State Code

Coding Complete

**NCHS Instruction Manual  
Part 8A, Vital Records  
Geographic Classification, 2004**

**RESIDENCE**

For use in Natality, Mortality and Fetal Death files

- 1 If the entry for Country of Residence is United States (or if not available, and an entry for State of Residence is present and is a US State or Territory, as shown in IMP8A Section II [States, US Territory, and Canadian Provinces]):**

Enter US for Country Code, and

Continue to Rule 2

**Otherwise,**

Continue to Rule 9

- 2 If there is an entry for reported State of Residence in IMP8A Section II [States, US Territory, and Canadian Provinces] that is a US State or Territory:**

Enter the two-letter State Code from IMP8A, and

Continue to Rule 3

**Otherwise,**

Enter ZZ for State Code, and

Enter 999 for County Code, and

Enter 99999 for Place Code

Coding Complete

- 3 If there is an entry for reported County of Residence in IMP8A Section II [FIPS County Listing] for the appropriate state, as coded in Rule 2:**

Enter three-digit County Code from IMP8A, and

Continue to Rule 4

**Otherwise,**

Enter 999 for County Code, and

Enter 99999 for Place Code

Coding Complete

- 4 If there are any entries for reported Place of Residence in IMP8A Section II [FIPS Place Listing] for the appropriate state, as coded in Rule 2:**

Continue to Rule 5

**Otherwise,**

Continue to Rule 8

**NCHS Instruction Manual  
Part 8A, Vital Records  
Geographic Classification, 2004**

- 5 If the City Limits Indicator is 'Yes', or if there is no City Limits Indicator on the certificate, or if all of the entries from Rule 4 are denoted as CDPs (records with a class code of M2, U1, U2, U3, or U9):**

Continue to Rule 6

**Otherwise,**

Continue to Rule 7

- 6 If there is a single matching entry for reported Place and County of Residence in IMP8A Section II [FIPS Place Listing] for the appropriate state, as coded in Rule 2:**

Enter five-digit Place Code from IMP8A

Coding Complete

**Otherwise,**

Enter 99999 for Place Code

Coding Complete

- 7 If the City Limits Indicator is 'No':**

Enter 00000 for Place Code

Coding Complete

**Otherwise,**

Enter 99999 for Place Code

Coding Complete

- 8 If the City Limits Indicator is 'Yes', or if there is no City Limits Indicator on the certificate:**

Enter 99999 for Place Code

Coding Complete

**Otherwise,**

Enter 00000 for Place Code

Coding Complete

- 9 If the entry for Country of Residence is Canada (or if not available, and an entry for State of Residence is present and is a Canadian Province or Territory, as shown in IMP8A Section II [States, US Territory, and Canadian Provinces]):**

Enter CA for Country Code, and

Continue to Rule 10

**Otherwise,**

Continue to Rule 11

**NCHS Instruction Manual**  
**Part 8A, Vital Records**  
**Geographic Classification, 2004**

**10 If there is an entry for reported State of Residence in IMP8A Section II [States, US Territory, and Canadian Provinces] that is a Canadian Province:**

Enter two-letter Canadian Province Code for State Code, and

Enter 000 for County Code, and

Enter 00000 for Place Code

Coding Complete

**Otherwise,**

Enter ZZ for State Code, and

Enter 000 for County Code, and

Enter 00000 for Place Code

Coding Complete

**11 If the entry for Country of Residence is any other known entry (or if not available, and an entry for State of Residence is present and is not a US State, US Territory or Canadian Province), and the reported entry can be found in IMP8A Section III [Countries], and is not indicated with an asterisk as an historic country:**

Enter two-letter Country Code from IMP8A (or YY if Registration Area is not reporting expanded country codes), and

Enter XX for State Code, and

Enter 000 for County Code, and

Enter 00000 for Place Code

Coding Complete

**Otherwise,**

Enter ZZ for Country, and

Enter ZZ for State Code, and

Enter 999 for County Code, and

Enter 99999 for Place Code

Coding Complete

**LINKED FILE STATE OF BIRTH**

For use in Mortality files

This item is generally not coded from the certificate, but is appended to records at a later time. Registration Areas should use US State and Territory codes from IMP8A Section II [States, US Territories, and Canadian Provinces] to indicate the Registration Area where the birth of the infant decedent occurred.

If the birth occurred within New York City's jurisdiction, a code of YC should be reported, instead of NY.

If the birth occurred in another country (including Canada), a code of XX should be reported.

**NCHS Instruction Manual**  
**Part 8A, Vital Records**  
**Geographic Classification, 2004**

If the location of the birth is unknown, a code of ZZ should be reported.

No additional linkage detail (Linked File Year of Birth, Linked File Birth Certificate Number) should be reported if the Linked File State of Birth is not one of the 57 US Registration Areas.

**NCHS Instruction Manual  
Part 8A, Vital Records  
Geographic Classification, 2004**

**FIPS Class Code Definitions:**

The following selected definitions are taken from the official FIPS website; the entire document can be located at <[www.itl.nist.gov/fipspubs/55new/class76.htm](http://www.itl.nist.gov/fipspubs/55new/class76.htm)>.

**Class C: Incorporated Places**

Names appearing in this class are those recognized by the U.S. Bureau of the Census based on information provided by State, county, and local governments. Alternate authoritative common names recognized by the U.S. Board on Geographic Names are recorded in subclass C4.

**C1:** Identifies an active incorporated place that is not also recognized as an Alaska Native Village statistical area, and does not also serve as a primary county division; that is, it is included in and is part of a primary county division. For example, the city of Hammond, Indiana is within and part of North township; the city of Austin, Texas is within and part of several census county divisions in several counties; Hammond and Austin are coded C1.

**C2:** Identifies an incorporated place that also serves as a primary county division because, although the place is coextensive with a minor civil division (MCD), the Census Bureau, in agreement with State officials, does not recognize the MCD for presenting census data because the MCD is a nonfunctioning entity; applies to Iowa and Ohio only. For example, the city of Dubuque, Iowa is coextensive with Julien township, which does not function as a governmental unit and may not be well-known even to local residents; the city is assigned code C2, and the township, Z8. This subclass is new for FIPS 55-3. Also see subclass C5.

**C4:** Identifies an alternate authoritative common name of any member of the other subclasses of Class C. The entity code of the legal name is referenced in the "Other Name Code" of the record, and in the entry for the legal name, the Other Name Code references the alternate. For example, the entity in California whose legal name is San Buenaventura (subclass C1) is commonly known as Ventura, which is coded C4.

**C5:** Identifies an incorporated place that also serves as a primary county division; that is, it is not included in any adjacent primary county division of class T or Z. For example, Boston, MA, is legally a primary division of the county and recognized as an incorporated place and, therefore, is coded C5. Also see subclass C2.

**C6:** Identifies an incorporated place that is coincident with or approximates an Alaska Native Village statistical area. The Other Name Code references the Alaska Native Village statistical area; see subclass E6.

**C7:** Identifies an independent city. At the time of publication, independent cities exist in only four States: Maryland (Baltimore City), Nevada (Carson City), Missouri (St Louis City), and

**NCHS Instruction Manual**  
**Part 8A, Vital Records**  
**Geographic Classification, 2004**

Virginia (41 cities). These cities also serve as county equivalents, and all but Carson City also serve as primary county divisions.

**C8:** Identifies the portion of a consolidated city that is not within another incorporated place; see subclass C3. The Census Bureau identifies these nonfunctioning entities by taking the name of the consolidated city and appending in parentheses the word remainder. For example, Columbus (remainder) identifies the portion of the Columbus, Georgia consolidated city that is not also in Bibb City. This subclass is new for FIPS 55-3.

Class M: Federal Facilities

**M2:** Identifies an installation (or part of an installation) that qualifies under subclass M1 and has been reported by the Census Bureau as a CDP.

Class T: Active Minor Civil Divisions

**T1:** Identifies an active minor civil division (MCD) that is not coextensive with an incorporated place.

**T5:** Identifies an active MCD that is coextensive with an incorporated place. (The incorporated place usually has the same name as the MCD, and usually the officials of the incorporated place administer the governmental functions of the MCD.)

Class U: Populated (Community) Places (Except Those Associated with Facilities)

**U1:** Identifies a census designated place (CDP) with a name identical to the authoritative common name that describes essentially the same population. Also see subclass M2.

**U2:** Identifies a CDP with a name not identical to an authoritative common name of essentially the same area. If there is an alternate authoritative common name, it is referenced in the Other Name Code field. For example, Suitland-Silver Hill, Maryland is the name of a locally delineated CDP recognized by the Census Bureau which is a combination of two communities (Suitland and Silver Hill) and, therefore, because it is not the authoritative name of the area, is coded U2; Sierra Vista Southeast, Arizona is a CDP that includes the built-up area adjoining the city of Sierra Vista on the southeast, but is not an authoritative name for that area and, therefore, is coded U2. Also see subclass M2.

**U3:** Identifies (a) an alternate, authoritative common name of a population essentially described by a specific CDP with a different name (the Other Name Code references the CDP), or (b) a community wholly or substantially within the boundaries of a CDP with a different name (the Part of Code references the CDP). For example, Silver Hill and Suitland are coded U3 and cross-referenced to the CDP of Suitland-Silver Hill (see subclass U2).

**NCHS Instruction Manual**  
**Part 8A, Vital Records**  
**Geographic Classification, 2004**

**U4:** Identifies a populated place wholly or substantially within the boundaries of an incorporated place with a different name; the Part of Code identifies the incorporated place. For example, Harlem and Greenwich Village, which are part of New York city, and Hollywood, which is part of Los Angeles, California, are coded U4.

**U9:** Identifies a CDP that is coincident with or approximates the area of an Alaska Native Village statistical area. The Other Name Code references the Alaska Native Village statistical area; see subclass E2. This subclass is new for FIPS 55-3.

Geographic Classification, 2004**

### III. Countries.

Codes marked with an “\*” indicate historic political entities that no longer exist. Some of the historic political entities appear multiple times in the list: alphabetically and indented following the related active political entities. When active and historic political entities have the same name, dates have been provided to help select the most appropriate code. A few codes appear more than once in the list alphabetized under commonly use variants of the official name. Italics are used to indicate all codes appearing more than once, whether because of a name variation or because a historic code has been grouped with the current active country.

**NOTE: Codes are not available for countries that ceased to exist prior to June 15, 1970. To code an event for a country for which a code is not available, use the code for the closest contemporary country (i.e. a code that is not italicized).**
