How you can participate in one of the eight
NORA Sector Research Councils?

Construction

Agriculture, forestry, and fishing

Healthcare and social assistance

Manufacturing

Mining

Services

Transportation, warehousing, and utilities

Wholesale and retail trade

For more information about the NORA Sector
Councils please contact

Make a difference for workers in
the Construction Sector

NIOSH

NORA Research partnerships for safer healthier workplaces

What is NORA?

The National Occupational Research Agenda (NORA) is a collaborative program to stimulate innovative research in workplace safety and health. The National Institute for Occupational Safety and Health (NIOSH) unveiled NORA in 1996. Over 500 diverse individuals and organizations contributed to the first agenda. Your participation is needed to continue this legacy of collaboration.

NORA is a partnership process to guide occupational safety and health research for improving the safety and health of workers and workplaces.

Why Construction?

Over 9 million construction workers build and maintain roads, houses, workplaces and physical infrastructure. This work includes many inherently hazardous tasks and conditions such as work at height, excavations, noise, dust, power tools and equipment, confined spaces, and electricity. Construction has about 6% of U.S. workers, but 20% of the fatalities — the largest number of fatalities reported for any of the industry sectors. Injuries and illnesses also represent important challenges.

Visit the NORA Web page and submit your comments electronically at www.cdc.gov/niosh/nora.

Share Your Ideas.

What do you think are the top problems facing the construction sector? What are the types of research and approaches needed? How many workers are at risk? How serious is the occupational safety and health issue? What is the probability that new information and approaches will make a difference? Which partners are needed to work on the problem? We want your feedback.

Attend a Town Hall Meeting

The public meeting for the construction sector will occur on December 19, 2005 in Chicago, IL. There you can make a brief presentation describing the top research needs for the construction sector. Visit the NORA Web page for more information www.cdc.gov/niosh/nora.
