

Clinical Review

Accutane Quarterly Report - Last Quarter 1999

Stamp Date March 17, 2000

Review Date March 31, 2000

2381 adverse events, 313 were serious
of the 313 serious events

89 psychiatric

24 self injurious behavior

5 attempted suicide

5 completed suicide

5 reports of psychosis

93 of pregnancy unwanted

42 abortions (note that the abortions however were not included among the
"serious" events presumably because the dead fetus is not considered a patient)

One death is included under the serious labeled listing. The comment says that
the coroner's conclusion was "unexplained death from adolescence."
