§ 1645.5 Basis for allocation of earnings.

(a) *Individual account basis.* Except for the amounts described in paragraph (b) of this section, the individual account basis on the earnings allocation date for each source of contributions in each investment fund equals:

(3) One-half of all loan repayments posted to the individual account during the current valuation period.

§ 1645.6 Earnings allocation for individual accounts.

(a) *Computation of earnings for each individual account.* Earnings for each source of contributions for each investment fund will be allocated to each individual account separately. The total net earnings for each investment fund (as computed under §1645.3) will be divided by the total fund basis for that investment fund (as computed under §1645.5(c)). The resulting number (the "allocation factor") will be multiplied by the individual account basis for the respective source of contributions in that investment fund (as computed under §1645.5(a)), to determine the individual account earnings for the valuation period attributable to that source of contributions in that investment fund. The earnings of the individual account for each source of contributions in each investment fund, when added together, will constitute the earnings for that individual account during the valuation period.

(b) *Residual net earnings.* Amounts allocated to individual accounts may not exceed the total amount of earnings available to be allocated. To avoid allocating excessive amounts, computation of earnings for individual accounts described in paragraph (a) of this section will not include fractions of a cent. Residual net earnings attributable to unallocated fractions of a cent will be allocated with the earnings for the following valuation period.
