**Subject:** BPA-Public comment

Dear Dr. Shane, As a scientist, I rarely jump on any alarmist bandwagon; however [redacted] "some concern" about BPA in baby bottles and other infant care products translates into me running to Babies-R-Us to purchase all new BPA-free baby bottles and pacifiers. [redacted] Can we really afford to apply a "wait and see what future research shows" rationale in this case when it is our most vulnerable citizens who are bearing the brunt of the BPA burden? PLEASE help get this stuff off the market and do it now!  
Sincerely, Marianna Rothbard, PhD
