

New 300 mg Reyataz capsule approved

On October 16, 2006, the Food and Drug Administration approved a new 300 mg capsule form of Reyataz (atazanavir).

Reyataz is now available as 100mg, 150 mg, 200 mg, and the new 300 mg capsules.

The new 300 mg capsules give treatment-experienced patients the option to take either one 300 mg capsule, or two 150 mg capsules of Reyataz, once daily plus ritonavir 100 mg once daily, with food.

The recommended dose for treatment-naïve patients remains unchanged and is Reyataz 400 mg (two 200mg capsules) once daily with food.

Reyataz is a product of Bristol-Myers Squibb.
