

Medicare Benefits and Controlling Your Diabetes

For use anytime
Live-read scripts

:30 seconds

Announcer: If you receive Medicare and have diabetes, Medicare will now help pay for the equipment and supplies you need to test your blood sugar... like glucose monitors, test strips and lancets.

Watching what you eat, getting regular physical activity, checking your blood sugar and taking your prescribed medication can help you control your diabetes and live a longer, healthier life.

For more information about controlling your diabetes and the new Medicare benefits... Call 1-800-438-5383. That's 1-800-438-5383 or visit the Medicare Web site at www.medicare.gov.
