Department of Defense Base Structure Report (BSR)

I. INTRODUCTION

Since 1999, the Department of Defense has used its real property inventory as the basis for the annual publication of the Base Structure Report. This report contains a comprehensive listing of installations and sites used by the Department, summarizes the current facilities inventory, and provides other basic information concerning the locations.

The Department's physical plant is huge by any standard, consisting of more than 600,000 individual buildings and structures, at more than 6,000 locations, on more than 30 million acres. Sites range from small, unoccupied locations supporting a single navigational aid on less than one-half acre, to the Navy's complex of installations at Norfolk, Virginia with more than 71,000 employees, and to the Army's White Sands Missile Range in New Mexico, that includes over 3.6 million acres. Capturing this large set of assets in a single, manageable document requires some summarization. Please see the display criteria paragraph below.

This year we have added summary matrices of installation size where installation size is measured by the Plant Replacement Value (PRV) of the facilities at a particular location. Please note that PRV is not a perfect measure of "size".

II. CONTENT AND ORGANIZATION

Please be aware of the following important parameters for the content of this report:

- **Timeliness.** While the base structure is changing continuously, the BSR is a "snapshot" of the DoD's physical plant, as reported on October 1, 2002. The bases listed may be in various circumstances, including unused or awaiting disposal. Due to the legalities involved in transferring deeded property, individual Service inventories may include a property record long after the decision has been made to transfer that asset to another organization. Likewise, ongoing additions to the base structure, including in-transfers, are often not officially recorded until well after the decision. Any forecasts of requirements based on this BSR must take these time lages into consideration.

- **Mode of View.** For the purpose of this report, each entry is defined as a site at a specific location with a name and real property assets (see definition of a "site" in the next section). There are other ways to look at base structure. A summary of bases by installation commander, for example, would be different and may include disparate inter-state locations under one base name. As an exception, Air Force strategic missile sites were rolled up to the appropriate one of seven parent installations. In the case of F. E. Warren AFB, those missile sites located in Nebraska and Colorado were counted as part of the parent installation total for the state of Wyoming.

Department of Defense Base Structure Report (BSR)

- **Display Criteria.** For practicality of use, this report includes specific information on sites meeting predetermined size and value criteria. If located in the United States, the site must be larger than 10 acres **AND** have a Plant Replacement Value (PRV) greater than \$10 million to be listed. If the site is located in a foreign country, a site must be larger than 10 acres **OR** have a Plant Replacement Value (PRV) greater than \$10 million to be listed. To preserve comprehensiveness of the report, sites that do not meet these criteria are aggregated as an “Other” location within each state or country.

- **Personnel Data.** Personnel data at the level of detail shown in this report was not readily available from a single source, so data were collected from multiple sources including the Defense Manpower Data Center and the individual Services manpower or personnel databases. Since personnel totals reflected in this report are shown as they relate to individual sites or locations and attempt to show all personnel regardless of Service affiliation, totals should not be confused and viewed as representing only individual Service total strength. Detailed personnel questions should be addressed to the appropriate Service manpower or personnel offices.

The report is organized by State within DoD and each Military Service. Each record includes the site name, the component (Active, Guard, or Reserves), the name of the nearest city, zip code, primary phone number (where possible), the number of buildings owned and leased, total acres owned by the Services and the total acres used, the PRV (in \$ millions) and the authorized number of military, civilian, and other personnel. The PRV represents the reported cost of replacing the facility and its supporting infrastructure using today's construction cost (labor and material) and standards (methodologies and codes). Other personnel include any non-appropriated employees, government contractors (if identified) or foreign nationals performing work at the site.

III. DATA SOURCES AND DEFINITIONS

The facilities data included in this report were extracted directly from the native Services' real property inventories; i.e., Army - HQ Army Integrated Facilities System (IFS), Navy – Navy Facilities Assets Database (NFADB), and the Air Force's Real Property Asset (RPA) database. This report does not attempt to replicate all the details included the Services' databases. Instead, this report provides a summary view of the Department's installations using common elements that should answer most questions. An explanation of criteria used for each column in the BSR is shown below:

– **SITE:** Indicates the installation or site name as used in the Services' databases. This is based on the Services' Installation Number (Army and Air Force) or Unit Identification Code (Navy and Marine Corps). The notation “multi-sites” shown after a site name indicates the parent unit is located in another state, so the data shown only reflects those facilities in the listed state.

Department of Defense Base Structure Report (BSR)

- **COMPONENT:** Designates the primary component owner/reporter of a site or installation, either Active, Guard, or Reserve. For the Navy, this column is also used to designate those sites in caretaker status pending some type of further action. This action may be a pending closure or realignment, or the site could remain in caretaker status.

- **NAME NEAREST CITY:** Identifies the name of the nearest city of reasonable size.

- **ZIP CODE:** Identifies primary ZIP Code (postal delivery area code) associated with the site or installation. Many large installations may have several ZIP codes; however, only one ZIP code is shown in this report.

- **PHONE NUMBER:** Identifies a local phone number when available. In some cases, a central locator number was used or, for others, the Public Affairs office number was listed.

- **BLDGS OWNED:** Represents the number of facilities owned by the Service at that particular site or installation. This column includes only those facilities designated as “buildings” and does not include “structures” (which could be anything from tent pad sites to carports) or "utilities" (which also generate records in the facilities table). It does not include licensed or permitted facilities, State-owned National Guard facilities, or facilities provided by other nations at foreign locations.

- **BLDGS OWNED SQFT:** Reflects the building square footage for the facilities identified as owned in the Services’ databases.

- **BLDGS LEASED:** Identifies the number of facilities leased by the Services. This number includes only facilities designated as “buildings” and does not include “structures,” which could be anything from tent pad sites to carports.

- **BLDGS LEASED SQFT:** Reflects the building square footage for the facilities identified as leased in the Services’ databases.

- **TOTAL ACRES:** Identifies the total number of acres owned, used by, or leased to the DoD. It includes public land, state land, land owned by other federal agencies, and acreage of foreign soil used by DoD sites.

- **PRV (\$M):** Total Plant Replacement Value (PRV) for all facilities records (buildings, structures and utilities) used by the DoD, to include those facilities that are not owned by DoD, such as state, NATO or foreign-owned, which show a PRV in the database. This reported value is the cost to replace the current physical plant (facilities and supporting infrastructure) using today’s construction costs (labor and materials) and standards (methodologies and codes).

Department of Defense Base Structure Report (BSR)

- **MIL**: Identifies all known military personnel authorized for the site or installation. Includes Active Duty, Guard, and Reserve personnel, regardless of Service affiliation.
- **CIV**: Identifies all known DoD civilian personnel authorized for the site or installation, regardless of Service affiliation. Note: civilian numbers for the Navy represent assigned personnel not authorized.
- **OTHER**: Identifies all known other civilian personnel authorized for the site or installation, including personnel paid from Non-appropriated Funds (NAF), Foreign Nationals (direct hire) at foreign locations, and, if available, any full-time contractor personnel, regardless of Service affiliation.
- **TOTAL**: Sum of MIL, CIV, and OTHER personnel columns.

IV. CONCLUSION

The Base Structure Report presents the framework upon which America's military readiness is built. A major pillar of our Defense Facilities Strategic Plan is to develop and field the "Right Tools and Metrics" for understanding and managing the vast Department of Defense base structure. This document, which provides the ability to view the basic elements of our installations and facilities quickly and concisely, is a valuable tool.

**Department of Defense
Base Structure Report (BSR)**

V. QUESTIONS ON THE BASE STRUCTURE REPORT

OSD is anxious to respond to your questions on anything in the BSR. Please send your inquiries by e-mail to BSR@osd.mil. We will respond as quickly as possible.

VI. INSTALLATION SIZE SUMMARIES

Summary of Installations/Locations - FY 2003 Baseline Data

Location	No. of Large Installations	No. of Medium Installations	No. of Small Installations/Locations	Total Locations
United States	95	95	5,714	5,904
US Territories	5	1	90	96
Foreign	15	19	668	702
Total	115	115	6,472	6,702

Location	Service	No. of Large Installations	No. of Medium Installations	No. of Small Installations/Locations	Total Locations
