

# 2005 Inventory of VHA Organizational Characteristics

# Profile of Medical Centers in VISN 1 March 2006

# **Medical Center Profile:**

The Inventory of VHA Organizational Characteristics was conducted in late summer and fall of 2005 by the Center for Organization, Leadership & Management Research and its Collaborating Partners Council. The Inventory was designed to collect data on a range of structural and process characteristics, both administrative and clinical, that are expected to affect clinical practice and care to veterans. Data were collected by means of a web-based survey sent to VISN and medical center directors. All VISNs and 136 medical centers completed the Inventory. One Inventory was submitted per organization.

This summary profile presents the *Inventory* results for the medical centers in your VISN. Most but not all information provided by medical centers is included in these reports; information such as organization charts is not easily presented in this format.

Results for each facility are presented by survey item or variable, and organized under four content categories. Frequency distributions are shown for the VISN and nationally. Distributions are based on the number of facilities who responded to that question, unless otherwise noted on the report.

# **Contents:**

- I. Organizational Structures
- II. Organizational Structures: Integrated VA Health Care Systems Only
- III. Decision-Making and Leadership Activities
- IV. Performance and Quality

# Additional Information:

A sample of the original web-based *Inventory* instrument is available on our website at <u>http://www.colmr.research.med.va.gov/publications/reports/</u>. Additional questions for COLMR regarding the 2005 *Inventory* may be directed to Zoë LeVan at <u>zoe.levan@va.org</u>.
