December 29, 1998

Mr. Myron Melovidov, Director of Public Works
The City of Saint Paul
P.O. Box 901
Saint Paul Island, Alaska 99660-0901

Dear Mr. Melovidov:

I am forwarding two sets of photocopies of descriptive information from a 1985 NOAA-funded, St. Paul Island Facilities Condition Survey & Value Assessment. The documents were located in our files, and have been useful in providing historical information for environmental restoration project development. I hope they will be of value to you. The original documents are located here in the Facilities and Logistics Division, Western Administrative Support Center.

The enclosure lists the facilities by parcel number. You will notice that not all facilities on St. Paul Island are listed, as not all were included in the original 1985 survey and assessment. I hope all the forwarded copies will be of benefit to you, as well as the community.

Copies will also be sent to the collections titled "NOAA Pribilof Islands Restoration Public Record" for circulation and non-circulation, at both the Pribilof Islands School District Repository and the Alaska Resources Library and Information Service (ARLIS).

If you have any questions, or need clarification, please do not hesitate to me at (206) 526-6055.

Sincerely,

A handwritten signature in cursive script that reads "D B Winandy".

David B. Winandy
Environmental Engineer
Facilities and Logistics Division
