

# West LA

VISN 22 – West Los Angeles – Comprehensive Capital & Reuse Plan

## Secretary's CARES Decision Document

- Spread across 387 acres in an urban neighborhood, the West LA campus is a unique resource and it is important that VA preserve the integrity of the land originally granted for use as an Old Soldiers home.
- To ensure that VA has a clear framework for managing the vacant and underused property at the West LA campus, VA will develop a Master Plan for the campus in collaboration with stakeholders who will have input into the plan's development.

# Specific Considerations/Requirements

- The purpose of the comprehensive Capital and Reuse Plan is to redesign the West Los Angeles campus to maximize the reuse potential of part of the campus, and ensure modern healthcare facilities.
- Another contractor in coordination with this Contractor shall develop the Reuse Plan and as a part of the site options presented the most likely potential reuse for available property identified in the capital planning process is to be included. The contractors will coordinate their work and exchange information on the capital planning process and stakeholder communications.
