# Fruit and Tree Nuts Situation and Outlook Yearbook

Susan Pollack and Agnes Perez

## Abstract

Total fruit and tree nut production, at 31.4 million tons, was down 10 percent in 2005 from 2004 and the lowest in 13 years. Smaller citrus and tree nut crops offset a 9-percent bigger noncitrus crop. The value of the 2005 fruit and tree nuts crops reached a record \$16.2 billion, 8 percent above 2004. The citrus crop was valued at \$2.3 billion, noncitrus at \$10 billion, and tree nuts at \$4 billion. Although returns were down for citrus despite generally higher grower prices, tree nut and noncitrus returns were record highs. U.S. fruit consumption averaged 281.8 pounds per person (fresh-weight equivalent) in 2005, down 2 percent from 2004. Americans consumed more noncitrus fruit products in 2005, but reduced their consumption of all citrus fruit. Consumption decreased for fruit juice as well as for fresh, canned, and dried fruit, but rose for frozen fruit. Tree nut consumption fell 22 percent to 2.7 pounds per person (shelled basis) in 2005/06, the lowest since 2000/01. Americans ate fewer almonds, walnuts, pistachio nuts, macadamia nuts, hazelnuts, and other nuts--mostly imports such as cashews, Brazil nuts, and pine nuts. Only pecan consumption rose.

**Keywords:** fruit, tree nuts, noncitrus, citrus, utilized production, crop value, imports, exports, stocks, pack, price, consumption, fresh, frozen, canned, juice, dried.

## **Summary**

### ***Fruit and Tree Nut Production At 13-Year Low in 2005***

Total fruit and tree nut production, at 31.4 million tons, was down 10 percent in 2005 from 2004 and the lowest in 13 years. Smaller citrus and tree nut crops offset a 9-percent increase in the noncitrus crop. In 2005, the orange crop was down 28 percent and grapefruit crop was down 53 percent from the previous year. Apple, peach, and pear crops were also smaller in 2005 than 2004. At the same time, grape and strawberry crops set record highs.

Tree nut production has been growing rapidly throughout the new century, but slowed in 2005. While the total crop was down 3 percent from 2004, it was still bigger than any crop prior to 2002/03. A 9-percent drop in the 2005 almond crop due to adverse weather conditions contributed strongly to the overall decline. The almond crop typically accounts for about two-thirds of total tree nut production in a given year. Hazelnut and pistachio production was also down from the previous year. On the other hand, the walnut crop set a record high in 2005 with 316 million pounds produced, and the pecan crop was about one-and-a-half times the size of the previous crop.

The value of the 2005 fruit and tree nuts crops reached a record \$16.2 billion, 8 percent above 2004. The citrus crop was valued at \$2.3 billion, noncitrus at \$10 billion, and tree nuts at \$4 billion. Although returns were down for citrus despite generally higher grower prices, tree nut and noncitrus returns were record highs. In 2005, the noncitrus crop accounted for 61 percent of the total value, citrus for 14 percent, and tree nuts for the remaining 24 percent. The citrus crop's share of the total returns continued to decline since the start of the new century. At the same time, the tree nut crops share of the total continued to grow, jumping from just about 12 percent in the late 1990s and early 2000s to almost a quarter of the returns in 2004 and 2005.

### ***Bearing Acreage Continues To Decline for Citrus and Noncitrus Crops, but Not for Tree Nuts***

The number of bearing acres planted to citrus and noncitrus trees declined in 2005, as they have throughout the 2000s. In 2005, there were 945,700 acres with commercially productive citrus trees, the lowest since 1992 and down 4 percent from 2004. Grapefruit acreage fell 10 percent to 103,000 acres, the eighth consecutive year of decline. Orange acreage fell 3 percent to 737,600 acres, and lemon acreage fell 2 percent to 58,500 acres. Tangerine acreage, however, increased 3 percent to 37,300 acres and is expected to increase in the coming years in California as recent plantings of various varieties of tangerine and tangelo trees come into production.

Noncitrus acreage declined less than 1 percent between 2004 and 2005 to 2,094,950 acres. Increased acreage in 2005 for grapes, sweet and tart cherries, strawberries, Hawaiian pineapples and papayas, and nectarines offset declining acreage for apples, peaches, pears, plums and prunes, apricots, cranberries, Hawaiian bananas,

and California figs, avocados, and dates. Acreage remained the same between the 2 years for California kiwifruit and olives.

Tree nut acreage continued to increase, as it has since 1996. Between 2004 and 2005, bearing acreage was up 3 percent for all tree nuts. Almond acreage increased 2 percent to a record 580,000 acres, 61 percent of all reported tree nut acreage (acreage data are not available for pecans). Pistachio acreage increased 13 percent to 105,000, the highest ever. Macadamia nut and walnut acreage each increased about 1 percent between 2004 and 2005, and hazelnut acreage declined fractionally.

### ***Growers' Cash Receipts Hit All-Time High in 2005***

Total cash receipts by fruit and tree nut growers reached \$16.8 billion in 2005, 6 percent above 2004 and the third consecutive year of record highs. Most growers received higher returns except for oranges, apples, avocados, plums and prunes, strawberries, and Hawaiian pineapples.

At the retail level, the Consumer Price Index (CPI) for fresh fruit was up 4 percent in 2005 to 297.4 (1982-84=100). Consumers paid higher prices for all fresh citrus—grapefruit, lemons, navel oranges, and Valencia oranges, as well as Thompson seedless grapes and peaches. Among the fresh fruits surveyed by the Department of Labor's Bureau of Labor Statistics for the CPI data, fresh banana, Red delicious apple, and fresh strawberry prices declined in 2005. Anjou pear price data were not available in 2004 to make a comparison.

### ***Fruit Consumption Down in 2005***

U.S. fruit consumption averaged 281.8 pounds per person (fresh-weight equivalent) in 2005, down 2 percent from 2004. Americans consumed more noncitrus fruit products in 2005, but reduced their consumption of citrus fruit. Noncitrus fruit accounted for 63 percent of all fruit and nut consumption and showed the strongest increase, rising 2 percent to 179.4 pounds per person. At the same time, citrus fruit consumption declined 7 percent to 99.7 pounds per person. (Data for this analysis are based on the 2004/05 marketing year for citrus fruit and the 2005/06 marketing year for noncitrus fruit.)

**Fresh fruit:** Fresh fruit consumption fell 4 percent in 2005 to 99.6 pounds per person, the lowest since 2002. Increased consumption of fresh oranges, limes, apricots, avocados, table grapes, kiwifruit, pineapples, and strawberries were not enough to offset decreased consumption of fresh bananas, apples, grapefruit, lemons, tangerines and tangelos, blueberries, cranberries, cherries, mangos, peaches and nectarines, pears, papayas, and plums and prunes.

Americans still consume more bananas than any other fresh fruit. Banana consumption, however, declined for the third consecutive year, dropping to 25.14 pounds per person in 2005, down 2 percent from 2004. Even with the decline, banana consumption accounts for about one-third of all fresh fruit consumed by the average American.

Fresh apples remained America's second favorite fresh fruit. Apple consumption declined 10 percent between 2004 and 2005, but at 16.92 pounds per person it still

held its second place ranking among fresh fruit consumed in the 2000s. Apples accounted for almost a quarter of all fresh noncitrus fruit consumption, and 17 percent of all fresh fruit consumption.

Fresh oranges still are the third most consumed fresh fruit, and are the number one fresh citrus. Orange consumption increased between 2003/04 and 2004/05 by 6 percent. A 28-percent bigger orange crop in California in 2004/05, where most of the fresh-market oranges are produced, drove up the amount of fruit available for consumption.

**Canned fruit:** Canned fruit consumption averaged 14.46 pounds per person in 2005 (product-weight equivalent). Since there are no stock data for canned fruit, consumption data is best analyzed on a 2-year basis. Consumption for 2004-05 averaged 14.65 pounds per person, down 2 percent from 2002-2003 and the lowest consumption in at least the past 25 years.

Based on the 2-year average, the overall decline in canned fruit consumption can be attributed to lower use of canned peaches, pineapples, and pears, three of the top four canned fruit consumed in the United States. Canned apples, mostly in the form of apple sauce or apple slices for pie filling increased 6 percent to 3.62 pounds per person in 2004-05. Canned olive consumption also increased during this time to an average of 1.44 pounds per person, the highest in 14 years.

**Frozen fruit:** Per capita frozen fruit consumption rose 17 percent in 2005 from the previous year, averaging 4.25 pounds (processed weight). Consumption of all frozen fruit except apricots and peaches increased compared with the previous year. Frozen peach consumption remained unchanged and apricot consumption fell 20 percent. Berries accounted for 67 percent of all the frozen fruit consumed in 2005. Consumption of frozen strawberries, the major frozen berry category, increased 20 percent to a record 2.07 pounds per person. Consumption rose for all other frozen berries as well.

**Dried fruit:** In 2005/06, dried fruit consumption declined to 2.23 pounds per person (processed weight), 5 percent less than in 2004/05. On a 2-year basis to account for a lack of stock data for many of the dried fruit, consumption declined 6 percent between 2002/03-2003/04 and 2004/05-2005/06. Consumption increased 2 percent for raisins (which typically account for about two-thirds of all dried fruit consumed), 14 percent for dried apricots, and 60 percent for dried peaches. These increases, however, were not sufficient to offset the declines in prune, fig, and date consumption during this time period.

**Fruit juice:** Americans drank 8 percent less fruit juice in 2005/06 than in 2004/05, consuming 7.6 gallons per person, the lowest quantity since 1989/90. Consumption fell for all fruit juices except grape and lime. While orange juice continues to be the number one fruit juice consumed in the United States, consumption has been declining in recent years. In 2005/06, low beginning stocks, a decline in production of orange juice due to a hurricane-shortened Florida orange crop, and strong export demand reduced consumption by 11 percent to an average of 4.3 gallons per person. Grape juice consumption, on the other hand, increased 36 percent to 0.53 gallon per person. A 56-percent increase in the production of grapes for juice, along with strong imports, increased supplies in 2005/06 to set record consumption.

**Tree nuts:** Tree nut consumption fell 22 percent to 2.7 pounds per person (shelled basis) in 2005/06, the lowest since 2000/01. Americans ate fewer almonds, walnuts, pistachio nuts, macadamia nuts, hazelnuts, and other nuts--mostly imports such as cashews, Brazil nuts, and pine nuts. Only pecan consumption rose due to larger supplies from the on-cycle of the trees' alternate-bearing nature and near-record imports. Adverse weather conditions in California in 2005 reduced the almond crop to its lowest amount since 2001/02. At the same time, export demand was very strong, further reducing the availability of almonds for domestic consumption. As a result, U.S. almond consumption fell 40 percent between 2004/05 and 2005/06 to 0.53 pound per person. Pistachio consumption fell 18 percent between the two seasons to 0.23 pounds per person, mostly due to the smaller crop during the nut trees' off cycle. On the other hand, while the walnut crop in 2005/06 was the biggest on record, very strong demand from Europe (due to crop shortages there) drove up exports 51 percent and drew down domestic supplies by 20 percent, leaving 126 million pounds available for the domestic market, the smallest quantity since 2001/02.

## ***GLOSSARY OF TERMS***

**Brix:** The concentration of soluble solids in juice, mostly sugar, but also includes salts, protein, and acid content. The denser the juice the higher the degrees Brix. For example: frozen concentrated orange juice is stored and often shipped at 66° Brix, reconstituted with water to 42° Brix and canned for retail sale in the popular 8- to 16-ounce cans found in freezers at retail level, and further reconstituted to 11.8° Brix for consumption. Juice in its natural state, not-from concentrate orange juice, is at 11.8° Brix.

**Cash receipts:** The value of commodity marketings during the calendar year, irrespective of the year of production. For program crops, also includes net Commodity Credit Corporation loans (there are none for fruit and tree nuts).

**C.I.F. value:** (Cost, insurance, and freight). Terms of sale whereby the seller's (exporter) price includes the cost of the goods being sold and all transportation charges, including insurance expenses, to the destination point (importer).

**Constant 1996 dollars:** Expression of value in terms of 1996 purchasing power. Frequently referred to as deflated or real dollars.

**Cwt:** Abbreviation for hundredweight, a unit of measure equal to 100 pounds.

**Dumping:** The sale of a commodity in a foreign market at less than fair market value.

**Equivalent on-tree returns:** Citrus price calculated at the on-tree level by deducting the costs of hauling, picking, sorting, grading, packing, cooling, marketing, and other costs from the base price growers receive at the processing plant or packinghouse door. In some cases, this results in negative returns.

**Farm weight:** The raw or unprocessed weight of a product in fresh form prior to any processing; also called fresh weight, field run, or orchard run.

**F.A.S. value:** (free alongside ship). A price quotation that includes all costs of transportation and delivery of the goods to the dock alongside the ship (within reach of the ship's tackle).

**F.o.b. (free on board) shipping-point price:** The average, unweighted unit price received by the shipper or grower-shipper primarily for sales in carload or truckload quantities, but also including mixed loads.

**Fresh-market fruit:** Sold primarily as fresh.

**Grower price:** The average price received by producers from the first level of sales for the commodity, also called returns to grower. The grower price includes all grades and qualities. For citrus fruit, the grower price is the equivalent on-tree price or return.

**Hectoliter:** A liquid unit of measure equal to 26.41721 gallons (single-strength equivalent). A hectoliter equals 100 liters.

**Loss and exempt:** The difference between total production and marketable production. Production not used for human consumption due to poor quality or use of the product for industrial purposes, such as crushing nuts for oil, or for animal feed.

**Liter:** A liquid unit of measure equal to 0.2641721 gallons (single-strength equivalent).

**Marketing spread:** The difference between the retail price and the grower return.

**Marketing year:** A 12-month period beginning the month when harvesting of a crop normally begins. Marketing years vary by commodity.

**Metric ton:** A unit of measure equal to 2,204.623 pounds or 1.102311 short tons. A metric ton of orange juice is stored at 65° Brix. To convert to single-strength equivalent, the number of tons is multiplied by 1,405.88.

**Pack:** The quantity of fresh or processed product placed in containers (e.g., cans). Generally referred to as the output of a processing industry (e.g., frozen pack of concentrated orange juice).

**Packinghouse door price:** The price growers receive for their fruit when delivered to the packinghouse (the price before costs are deducted).

**Per capita use (consumption):** A measure of commodity disappearance on a per person basis. Equal to total supply (production plus imports, plus beginning stocks) less use (exports, shrink and loss, and ending stocks) divided by total U.S. population (including military).

**Processing fruit:** Commodities sold primarily to processors; including (but not limited to) oranges, grapefruit, lemons, grapes, apples, apricots, cherries, peaches, plums, pears, pineapple, blueberries, strawberries, raspberries, cranberries, and olives.

**Product weight:** The weight of a product in its final packaged form. For example, the weight of the contents of a can of peaches.

**Pounds solids:** The total dissolved solids in oranges, usually measured as pounds solids per box. In Florida, payments for oranges sold for juice are based on the pounds solids per box, calculated by multiplying the amount of juice per box of oranges by the Brix level of the juice.

**Retail price:** The average price consumers pay for a product at the retail level—grocery stores, supermarkets, convenience stores.

**Season-average price:** Average price received by the grower, weighted by quantity marketed.

**Shipments:** Quantity of produce marketed from major production areas.

**Single-strength equivalent:** A measure for juice in its consumable form. Juice at 11.8° Brix.

**Short ton:** A unit of measure equal to 2,000 pounds.

**Tree nuts:** Hard shelled dried fruit or seed with separable rind or shell and edible kernels that grow on trees. Tree nut varieties grown for commercial production in the United States include: almonds, hazelnuts, macadamia nuts, pecans, pistachio nuts, and walnuts.

**Tropical fruit:** Fruit grown in tropical climates, limited in the United States to southern Florida, California, and Hawaii; includes bananas, pineapple, guavas, papayas, mangoes.

**Value of production:** The value of commodities produced during the crop year. Calculated as production times the marketing year average price. May be equal to cash receipts when the crop year for the fruit runs from January through December.

## CONVERSION FACTORS

1 metric ton = 1.102311 short tons

1 metric ton = 2,204.623 pounds

1 metric ton = 1,000 kilograms

1 kilogram = 2.204623 pounds

1 single-strength equivalent (sse) gallon = 11.8° Brix

1 liter = 0.2641721 sse gallons

1 hectoliter = 26.41721 sse gallons

1 hectoliter = 100 liters

Frozen concentrated orange juice:

1 gallon at 42° Brix = 4.0389 sse gallons

1 metric ton at 65° Brix = 1,405.88 sse gallons

Frozen concentrated grapefruit juice:

1 gallon 40° Brix = 3.81341 sse gallons

## CITRUS FRUIT BOX SIZES

### Oranges:

Arizona--75 pounds

California--75 pounds

Florida--90 pounds

Texas--85 pounds

### Grapefruit:

Arizona--67 pounds

California--67 pounds

Florida--85 pounds

Texas--80 pounds

### Lemons:

Arizona--76 pounds

California--76 pounds

### Tangelos:

Florida--90 pounds

### Tangerines:

Arizona--75 pounds

California--75 pounds

Florida--95 pounds

### Temples:

Florida--90 pounds

<b>Plums and prunes:</b>		
B-30.	Plums: Acreage, production, season-average grower price, and value, California, 1980 to date.....	72
B-31.	Prunes (dried basis): Acreage, production, season-average grower price, and value, California, 1980 to date.....	73
B-32.	Prunes and plums: Production, utilization, and season-average grower price, four States, 1980 to date.....	74

### CITRUS FRUIT

#### **Grapefruit:**

C-1.	Grapefruit: Bearing acreage and yield per acre, by State, 1980/81 to date.....	75
C-2.	Grapefruit: Production, by State, 1980/81 to date.....	76
C-3.	Grapefruit: Utilization of production, by State, 1980/81 to date.....	77
C-4.	Grapefruit: Equivalent-on-tree returns, by State, 1980/81 to date.....	78
C-5.	All grapefruit: Monthly equivalent-on-tree returns received by growers, Arizona, 1980/81 to date.....	79
C-6.	All grapefruit: Monthly equivalent-on-tree returns received by growers, California, 1980/81 to date.....	80
C-7.	All grapefruit: Monthly equivalent-on-tree returns received by growers, Florida, 1980/81 to date.....	81
C-8.	All grapefruit: Monthly equivalent-on-tree returns received by growers, Texas, 1980/81 to date.....	82
C-9.	All grapefruit: Monthly equivalent-on-tree returns received by growers, United States, 1980/81 to date.....	83
C-10.	Processed grapefruit: Florida, 1980/81 to date.....	84
C-11.	Frozen concentrated grapefruit juice: Processors' stocks, pack supplies, and movement, Florida, 1980/81 to date.....	85
C-12.	Chilled grapefruit juice: Processors' stocks, pack supplies, and movement, Florida, 1985/86 to date.....	86

#### **Lemons:**

C-13.	Lemons: Acreage, yield per acre, and production, by State, 1980/81 to date.....	87
C-14.	Lemons: Utilization of production, by State, 1980/81 to date.....	88
C-15.	All lemons: Equivalent-on-tree returns, by State, 1980/81 to date.....	89
C-16.	All lemons: Monthly equivalent-on-tree returns received by growers, Arizona, 1980/81 to date.....	90
C-17.	All lemons: Monthly equivalent-on-tree returns received by growers, California, 1980/81 to date.....	91
C-18.	All lemons: Monthly equivalent-on-tree returns received by growers, United States, 1980/81 to date.....	92

**Oranges:**

C-19.	Oranges: Bearing acreage and yield per acre, by State, 1980/81 to date .....	93
C-20.	Oranges: Production, by State, 1980/81 to date .....	94
C-21.	Oranges: Utilization of production, by State, 1980/81 to date .....	95
C-22.	All oranges: Equivalent-on-tree returns, by State, 1980/81 to date .....	96
C-23.	All oranges: Monthly equivalent-on-tree returns received by growers, Arizona, 1980/81 to date.....	97
C-24.	All oranges: Monthly equivalent-on-tree returns received by growers, California, 1980/81 to date .....	98
C-25.	All oranges: Monthly equivalent-on-tree returns received by growers, Florida, 1980/81 to date .....	99
C-26.	All oranges: Monthly equivalent-on-tree returns received by growers, Texas, 1980/81 to date.....	100
C-27.	All oranges: Monthly equivalent-on-tree returns received by growers, United States, 1980/81 to date .....	101
C-28.	Processed oranges: Florida, 1980/81 to date .....	102
C-29.	Frozen concentrated orange juice: Canners' stocks, pack, supplies, and movement, Florida, 1980/81 to date.....	103
C-30.	Chilled orange juice: Processors' stocks, pack, supplies, and movement, Florida, 1985/86 to date .....	104

**BERRIES****Blackberries:**

D-1.	Blackberries: Commercial acreage, yield per acre, production, and season-average grower price, Oregon and Washington, various years to date .....	105
------	---	-----

**Blueberries:**

D-2.	Blueberries: Commercial acreage, yield per acre, production, and season-average grower price, by State, various years to date .....	106
------	---	-----

**Boysenberries and loganberries:**

D-3.	Boysenberries and loganberries: Commercial acreage, yield per acre, production, and season-average grower price, California and Oregon, various years to date .....	110
------	---	-----

**Black raspberries:**

D-4.	Black raspberries: Commercial acreage, yield per acre, production, and season-average grower price, Oregon and Washington, 1980 to date .....	112
------	---	-----

**Red raspberries:**

D-5.	Red raspberries: Commercial acreage, yield per acre, production, and season-average grower price, Oregon and Washington, 1980 to date .....	113
------	---	-----

**Raspberries:**

D-6.	Raspberries: Acreage harvested, yield per acre, utilized production, grower price, and value, California, 1992 to date .....	114
------	--	-----

**Cranberries:**

D-7.	Cranberries: Acreage harvested, yield per acre, production, utilization, season-average grower price, and value, United States, 1980 to date.....	115
------	---	-----

**Strawberries:**

D-8.	Strawberries: Acreage, production, season-average grower price, and value, United States, 1980 to date .....	116
D-9.	Strawberries, fresh market and processing: Production, season-average grower price, and value, United States, 1980 to date .....	117
D-10.	Strawberries, fresh: Monthly prices received by growers, United States, 1980 to date.....	118

**TREE NUTS****General:**

E-1.	All tree nuts: Bearing acreage, United States, 1980/81 to date .....	119
E-2.	All tree nuts: Gross return per bearing acre, United States, 1980/81 to date .....	120
E-3.	All tree nuts: Utilized production (shelled basis), United States, 1980/81 to date.....	121
E-4.	All tree nuts: Season-average grower prices received, United States, 1980/81 to date.....	122
E-5.	All tree nuts: Value of production, United States, 1980/81 to date.....	123
E-6.	All tree nuts (shelled basis): Supply and utilization, United States, 1980/81 to date.....	124

**Almonds:**

E-7.	Almonds: Acreage, yield per acre, production (shelled basis), season-average grower price, and value, California 1980 to date .....	125
E-8.	Almonds: Supply and utilization (shelled basis), 1980/81 to date .....	126

**Hazelnuts (filberts):**

E-9.	Hazelnuts (filberts): Bearing acreage and yield per acre (in-shell), by State, 1980 to date.....	127
E-10.	Hazelnuts (filberts): Production (in-shell), season-average grower price, and value, by State, 1980 to date.....	128
E-11.	Hazelnuts (filberts): Supply and utilization (shelled basis), 1980/81 to date .....	129

**Macadamia nuts:**

E-12.	Macadamia nuts: Acreage, yield per acre, production (in-shell), season-average grower price, and value, Hawaii, 1980 to date.....	130
-------	---	-----

**Pecans:**

E-13.	Pecans: Production (in-shell), season-average grower price, and value, United States, 1980 to date.....	131
E-14.	Pecans: Supply and utilization (shelled basis), 1980/81 to date.....	132

**Pistachios:**

E-15.	Pistachios: Production (in-shell), season-average grower price, and value, California, 1980 to date.....	133
E-16.	Pistachios: Supply and utilization (shelled basis), 1980/81 to date.....	134

**Walnuts:**

E-17.	Walnuts (English): Production (in-shell), season-average grower price, and value, California, 1980 to date.....	135
-------	---	-----

E-18.	Walnuts (English): Supply and utilization (shelled basis), 1980/81 to date .....	136
-------	---	-----

### PER CAPITA CONSUMPTION

F-1.	Fresh apples: Supply and utilization, 1980/81 to date .....	137
F-2.	Fresh apricots: Supply and utilization, 1980/81 to date .....	138
F-3.	Fresh avocados: Supply and utilization, 1980/81 to date .....	139
F-4.	Fresh bananas: Supply and utilization, 1980 to date .....	140
F-5.	Fresh blueberries: Supply and utilization, 1980 to date .....	141
F-6.	Fresh grapes: Supply and utilization, 1980/81 to date .....	142
F-7.	Fresh kiwifruit: Supply and utilization, 1988 to date .....	143
F-8.	Fresh mangos: Supply and utilization, 1980 to date .....	144
F-9.	Fresh papayas: Supply and utilization, 1980 to date .....	145
F-10.	Fresh peaches and nectarines: Supply and utilization, 1980 to date .....	146
F-11.	Fresh pears: Supply and utilization, 1980/81 to date .....	147
F-12.	Fresh raspberries: Supply and utilization, 1980 to date .....	148
F-13.	Fresh strawberries: Supply and utilization, 1980 to date .....	149
F-14.	Fresh grapefruit: Supply and utilization, 1980/81 to date .....	150
F-15.	Fresh lemons: Supply and utilization, 1980/81 to date .....	151
F-16.	Fresh limes: Supply and utilization, 1980/81 to date .....	152
F-17.	Fresh oranges: Supply and utilization, 1980/81 to date .....	153
F-18.	Fresh tangerines and tangelos: Supply and utilization, 1980/81 to date .....	154
F-19.	Canned apples: Supply and utilization, 1980/81 to date .....	155
F-20.	Canned apricots: Supply and utilization, 1980/81 to date .....	156
F-21.	Canned cherries, sweet: Supply and utilization, 1980/81 to date .....	157
F-22.	Canned cherries, tart: Supply and utilization, 1980/81 to date .....	158
F-23.	Canned olives: Supply and utilization, 1980/81 to date .....	159
F-24.	Canned peaches: Supply and utilization, 1980/81 to date .....	160
F-25.	Canned pears: Supply and utilization, 1980/81 to date .....	161
F-26.	Canned pineapples: Supply and utilization, processed- weight basis, 1980 to date .....	162
F-27.	Canned plums: Supply and utilization, 1980/81 to date .....	163
F-28.	Apple juice and cider: Supply and utilization, 1980/81 to date .....	164
F-29.	Grape juice: Supply and utilization, 1980/81 to date .....	165
F-30.	Grapefruit juice: Supply and utilization, 1980/81 to date .....	166
F-31.	Orange juice: Supply and utilization, 1985/86 to date .....	167
F-32.	Pineapple juice: Supply and utilization, 1980 to date .....	168
F-33.	Dried plums (prunes): Supply and utilization, 1980/81 to date .....	169
F-34.	Raisins: Supply and utilization, 1980/81 to date .....	170
F-35.	Fresh fruit: Per capita consumption, 1980 to date .....	171
F-36.	Canned fruit: Per capita consumption, product-weight basis, 1980/81 to date .....	172
F-37.	Frozen fruit: Per capita consumption, product-weight basis, 1980 to date .....	173
F-38.	Dried fruit: Per capita consumption, product-weight basis, 1980/81 to date .....	174
F-39.	Selected fruit juices: Per capita consumption, 1980/81 to date .....	175
F-40.	Total U.S. population .....	176

F-41.	Per capita consumption of selected noncitrus fruit, fresh-weight equivalent, 1980/81 to date.....	177
F-42.	Per capita consumption of citrus fruit, fresh-weight equivalent, 1980/81 to date.....	178
F-43.	Selected fruit: Per capita consumption, fresh-weight equivalent, 1980 to date.....	179
F-44.	Tree nuts (shelled basis): Per capita consumption, 1980/81 to date .....	180

## TRADE

### General:

G-1.	Volume of U.S. imports of selected commodities from top countries, 1995-2005 .....	181
G-2.	Volume of U.S. exports of selected commodities to top countries, 1995-2005 .....	186

### Fruit:

G-3.	U.S. fresh-market fruit imports, monthly, 2005 .....	190
G-4.	U.S. fresh-market fruit imports, monthly, 2004 .....	191
G-5.	U.S. fresh-market fruit imports, monthly, 2003 .....	192
G-6.	U.S. fresh-market fruit exports, monthly, 2005.....	193
G-7.	U.S. fresh-market fruit exports, monthly, 2004.....	194
G-8.	U.S. fresh-market fruit exports, monthly, 2003.....	195

### Fruit juice:

G-9.	U.S. fruit juice trade, monthly, 2005 .....	196
G-10.	U.S. fruit juice trade, monthly, 2004 .....	197
G-11.	U.S. fruit juice trade, monthly, 2003 .....	198

Table A-1--U.S. per capita use of selected, commercially produced, fresh, and processing fruits and tree nuts, 1976-2005 1/

Crop	1976	1977	1978	1979	1980	1981	1982	1983	1984	1985

1/ Data may not match other tables due to rounding. Year reflects end of harvest for citrus and beginning year of harvest for noncitrus. 2/ Method for calculating orange juice changed in 1987. 3/ Includes tangerines, tangelos, other mandarins, and limes. 4/ Includes nectarines. 5/ Does not include small quantities of dried and other processed products. 6/ Includes apricots, blueberries, cranberries, kiwifruit, mangoes, papayas, and plums and prunes. 7/ Includes apricots and plums and prunes. 8/ Includes blackberries, blueberries, raspberries, boysenberries, loganberries and apricot. 9/ Includes prunes and cranberries. Estimates for cranberries begin in 1989. 10/ Includes apricots, dates, figs, peaches, pears, and plums and prunes. 11/ Shelled basis. 12/ Includes hazelnuts, macadamias, pistachios, Brazil nuts, cashews, and mixed nuts.

1/ National Agricultural Statistics Service (NASS) began reporting "limited" and "undersized" as separate categories in 1990 and made estimates for 1988 and 1989. All data since 1988 are as reported by NASS. 2/ Mostly canned, except for 1980 when use of limited-size fruit in canned ripe olives was not permitted. Reported by California Olive Committee for 1976 to 1987. 3/ "Limited and undersized" reported by NASS, minus "limited size" reported by California Olive Committee for 1976 to 1987. Includes undersized and culls.

N.A.= Not available. 1/ Small quantities of processed blueberries are included in fresh to avoid disclosure of individual operations. 2/ Estimates began in 2005.  
3/ Maine produces wild blueberries, other States cultivated. Beginning in 1988, data for wild blueberries are from the New England Agricultural Statistics Service.  
Data prior to 1988 are from the North American Blueberry Council. 4/ Includes small amounts from Indiana prior to 1992.  
Sources: National Agricultural Statistics Service, New England, Oregon, and Washington Field Offices, USDA; North American Blueberry Council.

N.A.=Not available. 1/ Cranberries paid for by processors and lost because of dehydration and berry breakdown after delivery.

2/ 1980-86 prices represent equivalent returns at first delivery point, screened basis of utilized production. Beginning 1987, prices are a weighted average of co-op and independent sales. Co-op prices represent pool proceeds less returns for processing non-cranberry products, capital stock dividends, capital stock retains, and other retains. 3/ 1 barrel = 100 pounds.

1/ Conversion factors from in-shell to shelled basis varies year to year for production, stocks, and exports, and were 0.41 in 1996/97, 1997/98, and 1998/99, 0.42 in 1999/2000, 0.43 in 2000/01, 0.42 in 2001/02, and 0.43 in 2002/03, 2003/04, and 2004/05. For imports, the conversion factor was a constant 0.35.

2/ Season begins August 1. 3/ Inedibles and noncommercial usage. 4/ Utilized production minus loss and exempt. 5/ Bureau of Census, U.S. Department of Commerce. 6/ Walnut Marketing Board. 7/ Marketable production plus imports and beginning stocks. 8/ Preliminary estimates.

N.A.= Not available. 1/ Totals in this table may vary from table A-1 due to rounding.

2/ All noncitrus fruit data are on calendar-year basis, except for apples (year begins in August of the year shown), grapes (since 1990, year begins in May; prior to 1990, year begun in July), and pears (year begins in July). For oranges, Temples, tangerines, and tangelos, years begin in November, grapefruit in September, and lemons in August of the prior year. Lime year begins in April of the year shown. 3/ Some figures may not add due to rounding. 4/ Preliminary.
