RE: St. Mary's Crosswind Runway
Project Number 61438

Dear Ms. Wightman:

The National Marine Fisheries Service (NMFS) has reviewed your letter requesting comments on the proposed upgrade of the existing aviation facilities at St. Mary's, Alaska. The Alaska Department of Transportation and Public Facilities (ADOT&PF) and the Federal Aviation Administration (FAA) propose upgrading the north-south runway extension, construction of a new and longer crosswind runway, and relocation of roads to accommodate ~~for~~ the runway extensions.

ADOT & PF plans to remove the hillside beside the main runway and the apron infield area because they are obstructions to the airspace, and use that material in construction of the upgrades. Supplemental material would come from the existing borrow sites in St. Mary's or from contractor furnished sources. Based on the information you have provided, we offer the following comments specific to the Endangered Species Act (ESA) and the Essential Fish Habitat (EFH) provisions of the Magnuson-Stevens Fishery Conservation Management Act (Magnuson-Stevens Act).

Endangered Species Act

Section 7(a)(2) of the ESA directs interagency cooperation "to insure that any action authorized, funded, or carried out by such agency is not likely to jeopardize the continued existence of any endangered species or threatened species" or result in the destruction or adverse modification of critical habitat. NMFS Alaska Region is responsible for the administration of the ESA as it applies to certain cetaceans, pinnipeds, and marine fish. These include several species of whales, Pacific salmon, and Steller sea lions.

The information you provided indicates that work would occur inland. Due to the inland location of your project, endangered marine mammals will not occur in the vicinity of the project site, and critical habitat for the above listed species would not be affected.

Essential Fish Habitat

Section 305(b)(2) of the Magnuson-Stevens Act requires interagency consultation for any federal

action that may adversely affect EFH. The North Pacific Fishery Management Council has not identified EFH in the vicinity of the proposed project.

We hope this information is useful in fulfilling your requirements under the ESA and the Magnuson-Stevens Act. Please direct any questions regarding ESA to Mr. Brad Smith at (907) 271-3023 and questions regarding EFH to Mr. John Olson at 271-1508.

Sincerely,

For James W. Balsiger
Administrator, Alaska Region
