Re: Construction Storm Water Pollution
Brother Francis Shelter Replacement Project

Dear Mr. Brock:

The National Marine Fisheries Service (NMFS) has reviewed your request for information regarding support for a Construction Storm Water Pollution Prevention Plan as required by the Environmental Protection Agency for the proposed Brother Francis Shelter Replacement Project. The project is located on east Third Avenue in Anchorage, Alaska.

The information you provided does not describe the impacts associated with the proposed project. However, based on the map provided depicting the general project area NMFS offers the following information under the Endangered Species Act (ESA), and the Essential Fish Habitat (EFH) provisions of the Magnuson-Stevens Fishery Conservation Management Act (Magnuson-Stevens Act).

Threatened and Endangered Species

Section 7(a)(2) of the ESA directs interagency cooperation “to insure that any action authorized, funded, or carried out by such agency is not likely to jeopardize the continued existence of any endangered species or threatened species” or result in the destruction or adverse modification of critical habitat. NMFS Alaska Region is responsible for the administration of the ESA as it applies to certain cetaceans, pinnipeds, and marine fish. These include species of whales, Pacific salmon, and the Steller sea lion.

The information you provided indicates that work would occur inland. Due to the inland location of your project, threatened and endangered species under our jurisdiction will not occur in the vicinity of the project site, and critical habitat for those listed species would not be affected. Additional information regarding the ESA is available on our website at <http://www.fakr.noaa.gov/protectedresources/default.htm>.

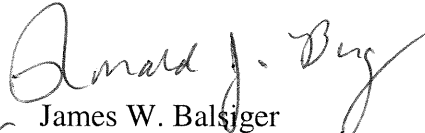

Magnuson-Stevens Fishery Conservation and Management Act

Section 305(b)(2) of the Magnuson-Stevens Act requires interagency consultation for any federal action that may adversely affect EFH. The North Pacific Fishery Management Council has not identified EFH in the vicinity of the proposed project. Additional information regarding EFH is available on our website at <http://www.fakr.noaa.gov/habitat/efh.htm>.

If you have questions concerning endangered species issues please contact Mr. Brad Smith at (907) 271-3023. Questions regarding EFH should be addressed to Ms. Jeanne Hanson at (907) 271-3029.

Sincerely,

For  James W. Balsiger
Administrator, Alaska Region
