Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

- - - Data not available. No original tables for the time period 1900-13 and 1917 included all of the following variables at the same time: age, race, sex, and cause.

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

- - - Data not available. No original tables for the time period 1900-13 and 1917 included all of the following variables at the same time: age, race, sex, and cause.

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

- - - Data not available. No original tables for the time period 1900-13 and 1917 included all of the following variables at the same time: age, race, sex, and cause.

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

- - - Data not available. No original tables for the time period 1900-13 and 1917 included all of the following variables at the same time: age, race, sex, and cause.

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

Cause of death:
DISEASES OF CARDIOVASCULAR SYSTEM

NOTES:

For 1932-34, deaths of Mexicans are included with total deaths for the white population in other publications reflecting later practices; but by age, are included with deaths for the ALL OTHER population. These tables reflected the original practice of including Mexican totals in the ALL OTHER total. Figures for deaths of Mexicans are not available separately by cause and age; total deaths of Mexicans from this cause are:

	1932	1933	1934
Both sexes	724	1,112	1,194

NOTES:

For 1932-34, deaths of Mexicans are included with total deaths for the white population; but by age, are included with deaths for the ALL OTHER population. Figures for deaths of Mexicans are not available separately by cause and age; total deaths of Mexicans from this cause are:

	1932	1933	1934
Both sexes ...	536	785	825
Male.....	301	443	478
Female...	235	342	347

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

- - - Data not available. No original tables for the time period 1900-13 and 1917 included all of the following variables at the same time: age, race, sex, and cause.

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

- - - Data not available. No original tables for the time period 1900-13 and 1917 included all of the following variables at the same time: age, race, sex, and cause.

Notes: 1) Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).
 2) For 1932-34, deaths of Mexicans are included with total deaths for the white population in other publications reflecting later practices; but by age, are included with deaths for the ALL OTHER population. These tables reflected the original practice of including Mexican totals in the ALL OTHER total. Figures for deaths of Mexicans are not available separately by cause and age; total deaths of Mexicans from this cause are:

	1932	1933	1934
Both sexes ..	133	235	280
Male.....	65	104	127
Female...	68	131	153

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

- - - Data not available. No original tables for the time period 1900-13 and 1917 included all of the following variables at the same time: age, race, sex, and cause.

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

- - - Data not available. No original tables for the time period 1900-13 and 1917 included all of the following variables at the same time: age, race, sex, and cause.
 - Quantity zero.

Note: 1) Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

2) For 1932-34, deaths of Mexicans are included with total deaths for the white population in other publications reflecting later practices; but by age, are included with deaths for the ALL OTHER population. These tables reflected the original practice of including Mexican totals in the ALL OTHER total. Figures for deaths of Mexicans are not available separately by cause and age; total deaths of Mexicans from this cause are:

- - - Data not available. No original tables for the time period 1900-13 and 1917 included all of the following variables at the same time: age, race, sex, and cause.

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

- - - Data not available. No original tables for the time period 1900-13 and 1917 included all of the following variables at the same time: age, race, sex, and cause.

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

- - - Data not available. No original tables for the time period 1900-13 and 1917 included all of the following variables at the same time: age, race, sex, and cause.

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

- - - Data not available. No original tables for the time period 1900-13 and 1917 included all of the following variables at the same time: age, race, sex, and cause.

Note: 1) Values shown differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

2) For 1932-34, deaths of Mexicans are included with total deaths for the white population in other publications reflecting later practices; but by age, are included with deaths for the ALL OTHER population. These tables reflected the original practice of including Mexican totals in the ALL OTHER total. Figures for deaths of Mexicans are not available separately by cause and age; total deaths of Mexicans from this cause are:

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

- - - Data not available. No original tables for the time period 1900-13 and 1917 included all of the following variables at the same time: age, race, sex, and cause.

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

- - - Data not available. No original tables for the time period 1900-13 and 1917 included all of the following variables at the same time: age, race, sex, and cause.

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

- - - Data not available. No original tables for the time period 1900-13 and 1917 included all of the following variables at the same time: age, race, sex, and cause.

Notes: 1) Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

2) For 1932-34, deaths of Mexicans are included with total deaths for the white population in other publications reflecting later practices; but by age, are included with deaths for the ALL OTHER population. These tables reflected the original practice of including Mexican totals in the ALL OTHER total. Figures for deaths of Mexicans are not available separately by cause and age; total deaths of Mexicans from this cause are:

	1932	1933	1934
Both sexes....	1271	1943	1950
Male	683	1053	1068
Female	588	890	882

Notes: Additional data for Diseases of heart can be obtained from Vital Statistics of the United States for these years.

- Quantity zero.

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

- - - Data not available. No original tables for the time period 1900-13 and 1917 included all of the following variables at the same time: age, race, sex, and cause.
 - Quantity zero.

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

- - - Data not available. No original tables for the time period 1900-13 and 1917 included all of the following variables at the same time: age, race, sex, and cause.
 - Quantity zero.

NOTES:

1) Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

2) For 1932-34, deaths of Mexicans are included with total deaths for the white population in other publications reflecting later practices; but by age, are included with deaths for the ALL OTHER population. These tables reflected the original practice of including Mexican totals in the ALL OTHER total. Figures for deaths of Mexicans are not available separately by cause and age; total deaths of Mexicans from this cause are:

	1932	1933	1934
Both sexes ...	536	785	825
Male.....	301	443	478
Female...	235	342	347

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

- - - Data not available. No original tables for the time period 1900-13 and 1917 included all of the following variables at the same time: age, race, sex, and cause.

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

- - - Data not available. No original tables for the time period 1900-13 and 1917 included all of the following variables at the same time: age, race, sex, and cause.

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

- - - Data not available. No original tables for the time period 1900-13 and 1917 included all of the following variables at the same time: age, race, sex, and cause.

Notes: 1) Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

2) For 1932-34, deaths of Mexicans are included with total deaths for the white population in other publications reflecting later practices; but by age, are included with deaths for the ALL OTHER population. These tables reflected the original practice of including Mexican totals in the ALL OTHER total. Figures for deaths of Mexicans are not available separately by cause and age; total deaths of Mexicans from this cause are:

	1932	1933	1934
Both sexes ...	484	728	791
Male.....	365	553	604
Female...	119	175	187

3) 1922-1929 total excludes deaths from legal executions.

4) 1909 total includes auto collisions with motor cycle.

5) 1926 total excludes food poisoning.

- - - Data not available.

- Quantity zero.

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

- - - Data not available. No original tables for the time period 1906-13 and 1917 included all of the following variables at the same time: age, race, sex, and cause.
 - Quantity zero.

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

- - - Data not available. No original tables for the time period 1906-13 and 1917 included all of the following variables at the same time: age, race, sex, and cause.
 - Quantity zero.

Notes: 1) Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

2) For 1932-34, deaths of Mexicans are included with total deaths for the white population in other publications reflecting later practices; but by age, are included with deaths for the ALL OTHER population. These tables reflected the original practice of including Mexican totals in the ALL OTHER total. Figures for deaths of Mexicans are not available separately by cause and age; total deaths of Mexicans from this cause are:

	1932	1933	1934
Both sexes ...	196	266	309
Male.....	164	226	259
Female...	32	40	50

3) For 1926, deaths from automobile collisions with motorcycles included in total but not distributed by age.

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

- - - Data not available. No original tables for the time period 1900-13 and 1917 included all of the following variables at the same time: age, race, sex, and cause.

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

- - - Data not available. No original tables for the time period 1900-13 and 1917 included all of the following variables at the same time: age, race, sex, and cause.

Notes: 1) Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

2) For 1932-34, deaths of Mexicans are included with total deaths for the white population in other publications reflecting later practices; but by age, are included with deaths for the ALL OTHER population. These tables reflected the original practice of including Mexican totals in the ALL OTHER total. Figures for deaths of Mexicans are not available separately by cause and age; total deaths of Mexicans from this cause are:

	1932	1933	1934
Both sexes ...	288	462	482
Male.....	201	327	345
Female...	87	135	137

3) For 1909 total excludes deaths from food poisoning, they are included in age distribution

4) For 1922-29 total excludes deaths from legal executions, they are included in age distribution

5) Not tabulated separately by age

- Quantity zero.

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

- - - Data not available. No original tables for the time period 1900-13 and 1917 included all of the following variables at the same time: age, race, sex, and cause.
 - Quantity zero.

Note: Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

- - - Data not available. No original tables for the time period 1900-13 and 1917 included all of the following variables at the same time: age, race, sex, and cause.
 - Quantity zero.

Note: 1) Values shown here differ from those published in the annual volumes of 1910-1915 because North Carolina is not included in these tables. The values are greater than those shown in the annual volumes of 1917-1918 because this includes military deaths (in registration states) occurring after the declaration of war (4/6/1917).

2) For 1932-34, deaths of Mexicans are included with total deaths for the white population in other publications reflecting later practices; but by age, are included with deaths for the ALL OTHER population. These tables reflected the original practice of including Mexican totals in the ALL OTHER total. Figures for deaths of Mexicans are not available separately by cause and age; total deaths of Mexicans from this cause are:

	1932	1933	1934
Both Sexes.....	39	62	47
Male.	14	21	18
Female	25	41	29

3) Year in which each state was admitted to the death-registration area:

Year	Year	Year
1880 Massachusetts	1908 Washington	1919 Florida
New Jersey	Wisconsin	Mississippi
District of Columbia /1	1909 Ohio	1920 Nebraska
1890 Connecticut	1910 Minnesota	1922 Georgia /4
Delaware /2	Montana	Idaho
New Hampshire	Utah	Wyoming
New York	1911 Kentucky	1923 Iowa
Rhode Island	Missouri	1924 North Dakota

Vermont	1913 Virginia	1925 Alabama
1900 Maine	1914 Kansas	West Virginia
Michigan	1916 South Carolina	1926 Arizona
Indiana	North Carolina	1927 Arkansas
1906 California	1917 Tennessee	1928 Oklahoma
Colorado	1918 Illinois	1929 Nevada
Maryland	Louisiana	New Mexico
Pennsylvania	Oregon	1933 Texas
South Dakota /3		

/1 Included in States.

/2 Dropped from the registration area in 1900; readmitted in 1919.

/3 Dropped from the registration area in 1910; readmitted in 1930.

/4 Dropped from the registration area in 1925; readmitted in 1928.
