BOOK REPORT FORM

IMPORTANT: You are required to use this form, not any other. Please read it carefully before you write your report. Your instructor has given you a book list or bibliography of recommended books, and you may write your report on any book (not article or edited collection) on the list. If the book you want to report on is not on the list, please ask your instructor whether it is appropriate. The book must not be a collection of essays by various authors.

Please word process in double space and include word count.

I. Heading. Give your name, the date, and the complete standard bibliographic entry for the book (Author, Title, Place of Publication, Publisher, Year of Publication).

II. Summary. Write a short summary of what the author(s) said, giving the major ideas or points presented in the book. What is the argument of the author(s); what case is the author (or authors) making? The length of this summary should be about 600-700 words.

III. Comments. Make three or four distinct comments about the ideas raised or subjects discussed by the author(s). These must be written with complete sentences and paragraphs, and must be *numbered and titled*. The comments may be critical or appreciative; they may involve comparison with other works you have read or knowledge gained from sources other than the book being reviewed. Please do *not* comment on whether you liked the book or found it boring, and do not comment on purely literary points such as an author's style of writing. Comment and give your opinions on what the author(s) actually said; deal with the substance of the ideas. Each comment should average about 300-400 words.

Please note: The average length of the report would be 1500-2000 words. With word processing and computer printing, formats vary greatly. *Please check your word count and note it at the end of the report.*
