

Memorandum

Date February 6, 2008

From Division Director, DHAC (MS F59)

Subject Evaluating Vapor Intrusion Pathways

To All DHAC Staff

The attached document, "Evaluating Vapor Intrusion Pathways at Hazardous Waste Sites," provides information to health assessors on how to evaluate the movement of volatile chemicals and gases from soil and groundwater into indoor air.

This information is for use by DHAC staff and ATSDR's State Cooperative Agreement Partners in preparing Health Consultations and Public Health Assessments.

A handwritten signature in cursive script that reads "William Cibulas Jr." is positioned above the typed name.

William Cibulas Jr., Ph.D.
