#### Draft Regulatory Guide; Issuance, Availability

The Nuclear Regulatory Commission (NRC) has issued for public comment a proposed revision of a guide in its Regulatory Guide Series. Regulatory Guides are developed to describe and make available to the public such information as methods acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques used by the staff in evaluating specific problems or postulated accidents, and data needed by the staff in its review of applications for permits and licenses.

The draft guide is temporarily identified by its task number, DG-1079, which should be mentioned in all correspondence concerning this draft guide. Draft Regulatory Guide DG-1079, "Criteria for Power Systems for Nuclear Power Plants," is being developed to describe a method that is acceptable to the NRC staff for complying with the NRC's regulations for the design, operation, and testing of electric power
