**SUPPLEMENTARY INFORMATION:** A Settlement Agreement dated October 17, 1995, among the DOE, the U.S. Navy, and the State of Idaho requires, among other things, the transfer and dry storage of SNF until it can be removed from Idaho. As part of its efforts to meet the Settlement Agreement, the DOE has contracted with FWENC to design, license, construct, and operate the proposed Idaho Spent Fuel Facility for portions of the SNF currently in storage at the INEEL. If approved, FWENC will be issued an NRC license, under the provisions of 10 CFR part 72, to receive, transfer, and store SNF. The proposed facility would store SNF and associated radioactive material from the Peach Bottom Unit 1 High-Temperature Gas-Cooled Reactor, the Shippingport Atomic Power Station, and various Training, Research, and Isotope reactors built by General Atomics (TRIGA reactors). The majority of this SNF is currently in storage at the Idaho Nuclear Technology Center located on the INEEL immediately adjacent to the proposed facility. DOE plans to transfer the SNF to the proposed facility using existing INEEL and DOE procedures. The transfers to the proposed facility would take place completely within the boundaries of the INEEL. Upon arrival at the proposed facility, the SNF would be (1) remotely removed from the containers in which it is currently stored, (2) visually inspected, (3) inventoried, (4) placed into new storage canisters, and (5) placed into interim dry storage.

The DEIS for the proposed Idaho Spent Fuel Facility was prepared by the staff of the NRC and its contractor, Center for Nuclear Waste Regulatory Analyses, in compliance with the National Environmental Policy Act (NEPA), and the NRC's regulations for implementing NEPA (10 CFR part 51). The proposed action involves a decision by NRC of whether to issue a license under the provisions of 10 CFR part 72 that would authorize FWENC to receive,

transfer, and store SNF and associated radioactive materials at the proposed facility.

NRC published a Notice of Intent to prepare an EIS for the proposed Idaho Spent Fuel Facility and to conduct a scoping process in the **Federal Register** on July 26, 2002, (67 FR 48953). The NRC accepted scoping comments through September 16, 2002, and subsequently issued a Scoping Summary Report on December 2, 2002.

The DEIS describes the proposed action and alternatives to the proposed action, including the no-action alternative. The DEIS assesses the impacts of the proposed action and its alternatives on human health, air quality, water resources, waste management, geology, noise, ecology, land use, cultural resources, socioeconomic, accident impacts, and environmental justice. Additionally, the DEIS analyzes and compares the costs and benefits of the proposed action.

Based on the preliminary evaluation in the DEIS, the NRC environmental review staff have concluded that the proposed action will have small effects on the public and existing environment and should be approved. The DEIS is a preliminary analysis of the environmental impacts of the proposed action and its alternatives. The Final EIS and any decision documentation regarding the proposed action will not be issued until public comments on the DEIS have been received and evaluated. Notice of the availability of the Final EIS will be published in the **Federal Register**.
