BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION**[Docket No. 52-007]****Exelon Generation Company, LLC; Notice of Acceptance of Application for Early Site Permit for the Clinton ESP Site**

On September 25, 2003, the Nuclear Regulatory Commission (NRC, the Commission) received an application from Exelon Generation Company, LLC (Exelon) filed pursuant to Section 103 of the Atomic Energy Act and 10 CFR Part 52, for an early site permit (ESP) for property co-located with the existing Clinton Power Station facility near Clinton, Illinois, hereafter identified as the Clinton ESP site. A notice of receipt and availability of this application was previously published in the **Federal Register** (68 FR 61020; October 24, 2003).

An applicant may seek an ESP in accordance with Subpart A of 10 CFR Part 52 separate from the filing of an application for a construction permit (CP) or combined license (COL) for a nuclear power facility. The ESP process allows resolution of issues relating to siting. At any time during the period of an ESP (up to 20 years), the permit holder may reference the permit in a CP or COL application.

The NRC staff has determined that Exelon has submitted information in accordance with 10 CFR Part 52 that is sufficiently complete and acceptable for docketing. The Docket Number established for this application is 52-007. The NRC staff will perform a detailed technical review of the application, and docketing of the ESP application does not preclude the NRC from requesting additional information from the applicant as the review proceeds, nor does it predict whether the Commission will grant or deny the application. The Commission will

conduct a hearing in accordance with 10 CFR 52.21 and will receive a report on the application from the Advisory Committee on Reactor Safeguards in accordance with 10 CFR 52.23. If the Commission then finds that the application meets the applicable standards of the Atomic Energy Act and the Commission's regulations, and that required notifications to other agencies and bodies have been made, the Commission will issue an ESP, in the form and containing conditions and limitations that the Commission finds appropriate and necessary.

In accordance with 10 CFR Part 51, the Commission will also prepare an environmental impact statement for the proposed action. Pursuant to 10 CFR 51.26, and as part of the environmental scoping process, the staff intends to hold a public scoping meeting. Detailed information regarding this meeting will be included in a future **Federal Register** notice.

Finally, the Commission will announce, in a future **Federal Register** notice, the opportunity to petition for leave to intervene in the hearing required for this application by 10 CFR 52.21.

A copy of the Exelon ESP application is available for public inspection at the Commission's Public Document Room (PDR), located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland. It is also accessible electronically from the Agencywide Documents Access and Management System (ADAMS) Public Electronic Reading Room on the Internet at the NRC Web site, <http://www.nrc.gov/reading-rm/adams.html>. The accession number for the application is ML032721596. Persons who do not have access to ADAMS, or who encounter problems in accessing the documents located in ADAMS, should contact the NRC Public Document Room staff by telephone at 1-800-397-4209, 301-415-4737, or by e-mail to pdr@nrc.gov. The application is also available to local residents at the Vespasian Warner Public Library in Clinton, Illinois.

Dated at Rockville, Maryland this 27th day of October 2003.

For the Nuclear Regulatory Commission.

James E. Lyons,

Program Director, New, Research and Test Reactors Program, Division of Regulatory Improvement Programs, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION**[Docket Nos. 50-348 and 50-364]****Southern Nuclear Operating Company (SNC), Joseph M. Farley Nuclear Plant, Units 1 and 2; Notice of Acceptance for Docketing of the Application Regarding Renewal of Facility Operating License Nos. NPF-2 and NPF-8 for an Additional 20-Year Period**

The U.S. Nuclear Regulatory Commission (NRC or the Commission) is considering an application for the renewal of Operating License Nos. NPF-2 and NPF-8, which authorize the Southern Nuclear Operating Company (SNC) to operate Joseph M. Farley Nuclear Plant, Units 1 and 2, at 2775 megawatts thermal. The renewed licenses would authorize the applicant to operate Farley Nuclear Plant, Units 1 and 2, for an additional 20-years beyond the period specified in the current licenses. The current operating licenses for Joseph M. Farley Nuclear Plant, Units 1 and 2, will expire on June 25, 2017, and March 31, 2021, respectively.

On September 15, 2003, the Commission's staff received an application from the SNC, filed pursuant to 10 CFR Part 54, to renew the Operating License Nos. NPF-2 and NPF-8 for Joseph M. Farley Nuclear Plant, Units 1 and 2. A Notice of Receipt and Availability of the license renewal application, "Southern Nuclear Operating Company, Joseph M. Farley Nuclear Plant; Notice of Receipt and Availability of Application for Renewal of Facility Operating License Nos. NPF-2 and NPF-8 for an Additional 20-Year Period," was published in the **Federal Register** on October 6, 2003 (68 FR 57715).

The Commission's staff has determined that SNC has submitted information in accordance with 10 CFR 54.19, 54.21, 54.22, 54.23, and 51.53(c) that is sufficiently complete and acceptable for docketing. The current Docket Nos. 50-348 and 50-364 for Operating License Nos. NPF-2 and NPF-8, respectively, will be retained. The Commission's staff will perform a detailed technical review of the application. The docketing of the renewal application does not preclude requesting additional information as the review proceeds, nor does it predict whether the Commission will grant or deny the application.

Before issuance of each requested renewed license, the NRC will have made the findings required by the Atomic Energy Act of 1954, as amended (the Act), and the NRC's rules and regulations. In accordance with 10 CFR
