

determined that the proposed action, approval of the license amendment request as submitted, is the appropriate alternative for selection. Based on an evaluation of the environmental impacts of the amendment request, the NRC has determined that the proper action is to issue a FONSI in the **Federal Register**, and grant the amendment.

4.0 Agencies and Persons Contacted

During a September 10, 2003, telephone call with the Virginia Department of Environmental Quality (VDEQ), NRC staff confirmed that the proposed action would not affect the regulation in 10 CFR 70.42 requiring BWXT to verify that waste disposal facilities are authorized to receive their shipments. VDEQ had no comments or concerns with the proposed action.

Because the proposed action is entirely within existing facilities and established roadways, the NRC has concluded that there is no potential to affect endangered species or historic resources, and therefore consultation with the State Historic Preservation Society and the U.S. Fish and Wildlife Service was not necessary.

III. Finding of No Significant Impact

The Commission has prepared the above Environmental Assessment related to the amendment of Special Nuclear Material License SNM-42. On the basis of the assessment, the Commission has concluded that environmental impacts associated with the proposed action would not be significant and, therefore, do not warrant the preparation of an Environmental Impact Statement. It has been determined that a Finding of No Significant Impact is appropriate.

IV. Further Information

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," the Environmental Assessment and the documents related to this proposed action will be available electronically for public inspection from the Publicly

Available Records (PARS) component of NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

SUPPLEMENTARY INFORMATION: As a normal course of activities, agencies periodically re-visit their strategic plans. The NRC is developing a new strategic plan for FY 2004-2009 to replace the agency's existing strategic plan.

The NRC is seeking comments on its draft FY 2004-2009 Strategic Plan (ADAMS Accession No. ML033140570). The draft Strategic Plan establishes the agency's long-term strategic direction and outcomes. It provides a foundation to guide NRC's work and to allocate NRC's resources.

The NRC's draft Strategic Plan does not represent a fundamental change in the agency's mission. However, it better aligns the agency's goals with its mission and strategic objective to

“enable the use and management of radioactive materials and nuclear fuels for beneficial purposes in a manner that (1) protects the public health and safety and the environment, (2) promotes the security of our nation, and (3) provides for regulatory actions that are effective, efficient, and open.” Additionally, the draft Strategic Plan has been restructured to improve its focus and readability. The restructuring significantly reduced the redundancy that exists in the agency’s current strategic plan.

The NRC’s draft Strategic Plan now includes a vision statement for NRC. The NRC’s vision in fulfilling its responsibilities is: “Excellence in regulating the safe and secure use and management of radioactive materials for the public good.” The draft plan also focuses on five general goals: Safety, security, openness, effectiveness, and management excellence. These goals support our ability to maintain the public health, safety, and trust. The overarching goal of ensuring the safe use of radioactive materials and of enhancing safety, as appropriate, remains unchanged. The general goal on security has been added to reflect recent changes in our environment, while the general goal on openness emphasizes those actions we can directly control and states that public confidence should be an outcome of openness.

The NRC encourages all interested parties to comment on the draft Strategic Plan. The comment period will close on December 31, 2003. Comments on the draft plan may be submitted by any of the methods outlined under the **ADDRESSES** heading. Stakeholder feedback will be valuable in helping the Commission develop a final plan that has the benefit of the many views in the regulated civilian nuclear industry.

The final version of NUREG-1614, Volume 3, is expected to be released on or about March 30, 2004.

Dated at Rockville, Maryland, this 18th day of November, 2003.
