BILLING CODE 7537-01-P

NUCLEAR REGULATORY COMMISSION

[Project 0741]

Notice of Receipt and Availability of Application for a Combined License Dominion Virginia Power—North Anna Unit 3

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Notice of Receipt of Combined License Application.

FOR FURTHER INFORMATION CONTACT:

Thomas Kevern, Senior Project Manager, ESBWR/ABWR Projects Branch 1, Division of New Reactor Licensing, Office of New Reactors, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001. Telephone: (301) 415-0224; fax: (301) 415-5199; e-mail: tak@nrc.gov.

SUPPLEMENTARY INFORMATION: On November 26, 2007, Dominion Virginia Power (Dominion, or the applicant) filed with the U.S. Nuclear Regulatory Commission (NRC, or the Commission) pursuant to section 103 of the Atomic Energy Act of 1954, as amended, and 10 CFR Part 52, Subpart C, an application for a combined license (COL) for an economic simplified boiling water reactor (ESBWR) to be located at the North Anna Power Station (NAPS) site in Louisa County, Virginia, and designated as North Anna Unit 3. The information submitted by the applicant includes certain administrative information such as financial qualifications submitted pursuant to 10

CFR 50.33, and an agreement to limit access to sensitive information submitted pursuant to 10 CFR 50.37.

Subsequent **Federal Register** notices will address the acceptability of the tendered COL application for docketing and provisions for participation of the public in the COL review process.

A copy of the application is available for public inspection at the Commission's Public Document Room (PDR), located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland, and via the Agencywide Document Access and Management System (ADAMS) Public Electronic Reading Room on the Internet at the NRC Web site, <http://www.nrc.gov/reading-rm/adams.html>. The accession number for the application is ML073320913. Future publicly available documents related to the application will also be posted in ADAMS. Persons who do not have access to ADAMS, or who encounter problems in accessing the documents located in ADAMS, should contact the NRC Public Document Room staff by telephone at 1-800-397-4209 or 301-415-4737, or by e-mail to pdrc@nrc.gov. The application is also available at <http://www.nrc.gov/reactors/new-licensing/col.html>.

Dated at Rockville, Maryland, this 6th day of December, 2007.

For the Nuclear Regulatory Commission.

Thomas A. Kevern,

*Senior Project Manager, ESBWR/ABWR
Projects Branch 1, Division of New Reactor
Licensing, Office of New Reactors.*

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-341]

Detroit Edison Company; FERMI 2; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of an exemption from Title 10 of the *Code of Federal Regulations* (10 CFR) Part 74, section 74.19(c), for Facility Operating License No. NPF-43, issued to Detroit Edison Company (the licensee), for operation of Fermi 2, located in Monroe County, Michigan. Therefore, as required by 10 CFR 51.21, the NRC is issuing this environmental assessment and finding of no significant impact.

Environmental Assessment

Identification of the Proposed ACTION:

The proposed action would exempt the licensee from the requirement in 10 CFR 74.19(c) to conduct a physical inventory of all special nuclear material (SNM) at intervals not to exceed 12 months. Specifically, the request is for exemption from the physical inventory requirements for those fuel assemblies that are stored under the Holtec Overhead Platforms (HOPs) when the HOPs are installed in the spent fuel racks.

The proposed action is in accordance with the licensee's application dated April 27, 2007, as supplemented by letter dated November 9, 2007.

The Need for the Proposed Action

The proposed action would allow the licensee to not have to perform physical inventory of fuel assemblies below the HOPs when the HOPs are installed. Therefore, the licensee would not have to empty and remove the HOPs to perform the annual SNM physical inventory.

Environmental Impacts of the Proposed Action

The NRC has completed its safety evaluation of the proposed action and concludes that exempting the licensee from performing a physical inventory of fuel assemblies under the HOPs when the HOPs are installed is acceptable.

The details of the staff's safety evaluation will be provided in the exemption that will be issued as part of the letter to the licensee approving the exemption to the regulation.

The proposed action will not significantly increase the probability or consequences of accidents. No changes are being made in the types of effluents that may be released off site. There is no significant increase in the amount of any effluent released off site. There is no significant increase in occupational or public radiation exposure. Therefore, there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential non-radiological impacts, the proposed action does not have a potential to affect any historic sites. It does not affect non-radiological plant effluents and has no other environmental impact. Therefore, there are no significant non-radiological environmental impacts associated with the proposed action.

Accordingly, the NRC concludes that there are no significant environmental impacts associated with the proposed action.
