

2. *Environmental*—primarily concerns issues relating to matters discussed or referenced in the Environmental Report for the proposed action.

3. *Emergency Planning*—primarily concerns issues relating to matters discussed or referenced in the Emergency Plan as it relates to the proposed action.

4. *Physical Security*—primarily concerns issues relating to matters discussed or referenced in the Physical Security Plan as it relates to the proposed action.

5. *Miscellaneous*—does not fall into one of the categories outlined above.

If the requester/petitioner believes a contention raises issues that cannot be classified as primarily falling into one of these categories, the requester/petitioner must set forth the contention and supporting bases, in full, separately for each category into which the requester/petitioner asserts the contention belongs with a separate designation for that category.

Requesters/petitioners should, when possible, consult with each other in preparing contentions and combine similar subject matter concerns into a joint contention, for which one of the co-sponsoring requesters/petitioners is designated the lead representative. Further, in accordance with 10 CFR 2.309(f)(3), any requester/petitioner that wishes to adopt a contention proposed by another requester/petitioner must do so, in accordance with the E-Filing rule, within ten days of the date the contention is filed, and designate a representative who shall have the authority to act for the requester/petitioner.

In accordance with 10 CFR 2.309(g), a request for hearing and/or petition for leave to intervene may also address the selection of the hearing procedures, taking into account the provisions of 10 CFR 2.310.

III. Further Information

NUCLEAR REGULATORY COMMISSION

AREVA NP Inc.; Notice of Receipt of Application for Design Certification of the U.S. EPR

Notice is hereby given that the Nuclear Regulatory Commission (NRC, the Commission) has received an application from AREVA NP Inc. (AREVA) dated December 11, 2007, filed pursuant to section 103 of the Atomic Energy Act and Title 10 of the *Code of Federal Regulations* (10 CFR) Part 52, for standard design certification of the U.S. EPR Standard Plant Design.

The U.S. EPR design is an approximately 1600 megawatts electric evolutionary pressurized water reactor (PWR). The primary system design, loop configuration, and main components design are similar to those of currently operating PWRs. The U.S. EPR contains unique design features, such as four redundant trains of emergency core cooling; Containment and Shield Building, and a core melt retention system for severe accident mitigation. The U.S. EPR application includes the entire power generation complex,
