

Reclamation Manual

Directives and Standards

1. CONTRACTS INVOLVING TRANSMISSION

Contracts for electric service, where transmission is involved, shall conform as nearly as practicable to the phraseology of approved contract articles for wholesale firm power service, modified as set out in the following articles.

ELECTRIC SERVICES TO BE FURNISHED

(a) (Use the following section)

_____. (a) The United States, under the terms and conditions stipulated herein, will furnish electric services to the Contractor, from and after the date of initial service as hereinafter defined, at the point at which the _____ volt circuit of the _____ is attached to the _____ of the _____ at or near _____. Said electric service will be furnished over facilities of _____ under the terms and conditions provided in Contract No. _____ between the United States and _____ (copies of which are on file in the _____, office of the Bureau of Reclamation at _____) or under said contract, as it may be amended or extended from time to time, or under the terms and conditions of any contract that may supersede or succeed said contract.

_____. (b) Use the appropriate alternative section (b) but, footnote 4 thereof is not applicable when wheeling is involved.

SCHEDULE OF RATES

(Use the appropriate alternative Schedule of Rates section.)

(b) (Use the following section)

_____. In addition to the charges payable under the rate schedule provided herein or as amended from time to time, when the United States utilizes transmission facilities other than its own in providing service under this contract, and costs are incurred by the United States for the use of such facilities, the Contractor:

(1) shall pay that portion of such costs, including transmission losses, which are in excess of _____ transmission charge and _____ percent transmission losses incurred in the delivery of:

(i) all power up to the number of kilowatts on which the demand or capacity charge applies; and

Reclamation Manual

Directives and Standards

- (ii) all energy up to the amount equal to the number of kilowatts on which the demand or capacity charge applies multiplied by the number of hours in the billing period times the Contractor's system load factor for the billing period; and
- (2) shall pay all such costs, including transmission energy losses, incurred in the delivery of all energy (including secondary and surplus energy) in excess of the amount stated in subsection (b)(1)(ii) of this article.

The transmission losses chargeable to the Contractor shall, for billing purposes, be added to the meter readings of the power and energy delivered to the Contractor. If increases in the rate of charge for transmission service and for transmission losses, either or both, are made during the term of this contract, or the United States notifies the Contractor that an increase will be made, the Contractor at any time not later than one hundred eighty (180) days after the effective date of any such increase may terminate this contract by written notice to the United States, said termination to be effective as of such subsequent date as the Contractor and Contracting Officer shall mutually agree upon.
