MS_CD — *CWF Beneficiary Medicare Status Code*

The CWF-derived reason for a beneficiary's entitlement to Medicare benefits, as of the reference date (CLM_THRU_DT).

COBOL ALIAS: MSC
COMMON ALIAS: MSC
DB2 ALIAS: BENE_MDCR_STUS_CD
SAS ALIAS: MS_CD
STANDARD ALIAS: CWF_BENE_MDCR_STUS_CD
SYSTEM ALIAS: LTMSC
TITLE ALIAS: MSC

DERIVATION:
CWF derives MSC from the following:
1. Date of Birth
2. Claim Through Date
3. Original/Current Reasons for entitlement
4. ESRD Indicator
5. Beneficiary Claim Number

Items 1,3,4,5 come from the CWF Beneficiary Master Record; item 2 comes from the FI/Carrier claim record. MSC is assigned as follows:

MSC	OASI	DIB	ESRD	AGE	BIC
10	YES	N/A	NO	65 and over	N/A
11	YES	N/A	YES	65 and over	N/A
20	NO	YES	NO	under 65	N/A
21	NO	YES	YES	under 65	N/A
31	NO	NO	YES	any age	T.

CODES:
10 = Aged without ESRD
11 = Aged with ESRD
20 = Disabled without ESRD
21 = Disabled with ESRD
31 = ESRD only

COMMENT:
Prior to Version H this field was named:

TRTMT_CD	*Claim Excepted/Nonexcepted Medical Treatment Code*

Variable Name	*Label*
	Effective with Version I, the code used to identify whether or not the medical care or treatment received by a beneficiary, who has elected care from a Religious Nonmedical Health Care Institution (RNHCI), is excepted or nonexcepted. Excepted is medical care or treatment that is received involuntarily or is required under Federal, State or local law. Nonexcepted is defined as medical care or treatment other than excepted. DB2 ALIAS: EXCPTD_NEXCPTD_CD SAS ALIAS: TRTMT_CD STANDARD ALIAS: TITLE ALIAS: EXCPTD_NEXCPTD_CD CODES: 0 = No Entry 1 = Excepted 2 = Nonexcepted SOURCE: CWF
PMT_AMT	*Claim Payment Amount* Amount of payment made from the Medicare trust fund for the services covered by the claim record. Generally, the amount is calculated by the FI or carrier; and represents what was paid to the institutional provider, physician, or supplier, with the exceptions noted below. **NOTE: In some situations, a negative claim payment amount may be sent; e.g., (1) when a beneficiary is charged the full deductible during a short stay and the deductible the amount Medicare pays; or (2) when a beneficiary is charged a coinsurance amount during a long stay and the coinsurance amount exceeds the amount Medicare pays (most prevalent situation involves psych hospitals who are paid daily per diem rate no matter what the charges are.) Under IP PPS, inpatient hospital services are paid based a predetermined rate per discharge, using the DRG classification system and the PRICER program. On the PPS claim, the payment amount includes the DRG approved payment amount, disproportionate share 5/1/86), indirect medical education (since 10/1/88), total PPS capital (since 10/1/91). It does NOT include the pass thru amounts (i.e., capital-related costs, direct medical education costs, kidney acquisition costs, bad debts); or any beneficiary-paid amounts (i.e., deductibles and coinsurance); or any other payer reimbursement. Under SNF PPS, SNFs will classify beneficiaries using the patient classification system known as RUGS III. For the

Variable Name	*Label*
	SNF PPS claim, the SNF PRICER will calculate/return the rate for each revenue center line item with revenue center '0022'; multiply the rate times the units count; and then sum the amount payable for all lines with revenue center code '0022' to determine the total claim payment amount. Under Outpatient PPS, the national ambulatory payment classification (APC) rate that is calculated for each APC group is the basis for determining the total payment. The Medicare payment amount takes into account the wage adjustment and the beneficiary deductible and amounts. NOTE: There is no CWF edit check to validate the revenue center Medicare payment amount equals the claim level Medicare payment amount. Under Home Health PPS, beneficiaries will be classified an appropriate case mix category known as the Home Resource Group. A HIPPS code is then generated corresponding to the case mix category (HHRG). For the RAP, the PRICER will determine the payment appropriate to the HIPPS code by computing 60% (for first episode) or 50% (for subsequent episodes) of the case episode payment. The payment is then wage index For the final claim, PRICER calculates 100% of the due, because the final claim is processed as an to the RAP, reversing the RAP payment in full. Although final claim will show 100% payment amount, the provider actually receive the 40% or 50% payment. Exceptions: For claims involving demos and BBA data, the amount reported in this field may not just represent the actual provider payment. For demo Ids '01','02','03','04' -- claims contain amount paid to the provider, except that special 'differentials' paid outside the normal payment system are not included. For demo Ids '05','15' -- encounter data 'claims' contain amount Medicare would have paid under FFS, instead of the actual payment to the MCO. For demo Ids '06','07','08' -- claims contain actual provider payment but represent a special negotiated bundled payment for both Part A and Part B services. To identify what the conventional provider Part A payment would have been, check value code = 'Y4'. The related noninstitutional (physician/supplier) claims contain what would have been paid had there been no demo.

Variable Name	Label

For BBA encounter data (non-demo) -- 'claims' contain amount Medicare would have paid under FFS, instead of the actual payment to the BBA plan.

DB2 ALIAS: CLM_PMT_AMT
SAS ALIAS: PMT_AMT
STANDARD ALIAS: CLM_PMT_AMT
TITLE ALIAS: REIMBURSEMENT

EDIT-RULES:
+9(9).99

COMMENT:
Prior to Version H the size of this field was S9(7)V99. Also the noninstitutional claim records carried this field as a line item. Effective with Version H, this element is a claim level field across all claim types (and the line item field has been renamed.)

SOURCE:
CWF

LIMITATIONS:
Prior to 4/6/93, on inpatient, outpatient, and physician/supplier claims containing a CLM_DISP_CD of '02', the amount shown as the Medicare reimbursement does not take into consideration any CWF automatic adjustments (involving erroneous deductibles in most cases). In as many as 30% of the claims (30% IP, 15% OP, 5% PART B), the reimbursement reported on the claims may be over or under the actual Medicare payment amount.

PRPAYAMT	NCH Primary Payer Claim Paid Amount

The amount of a payment made on behalf of a Medicare beneficiary by a primary payer other than Medicare, that theprovider is applying to covered Medicare charges on an institutional, carrier, or DMERC claim.

Effective with Version H, the ending date of the beneficiary's qualifying stay (used for internal CWFMQA editing purposes.) For inpatient claims, the date relates to the PPS portion of the inlier for which there is no utilization to benefits. For SNF claims, the date relates to a qualifying stay from a hospital that is at least two days in a row if the source of admission is an 'A', or at least three days in a row if the source of admission is other than 'A'.

For the Limited Data Set Standard View of the Inpatient/SNF files, the beneficiary's qualifying stay through date is coded as the quarter of calendar year when the stay through date occurred.

NOTE: During the Version H, conversion this field was populated with data throughout history (back to service year 1991).

Variable Name	*Label*
HCPSCD{x}	*Revenue Center HCFA Common Procedure Coding*

where { x } ranges from 1 to 58

If segment count > 1 then revenue center trailer elements 46–58 are missing and trailers above 45 are in subsequent records.

HCFA's Common Procedure Coding System (HCPCS) is a collection of codes that represent procedures, supplies, products and services which may be provided to Medicare beneficiaries and to individuals enrolled in private health insurance programs. The codes are divided into three levels, or groups, as described below:

DB2 ALIAS: REV_CNTR_HCPCS_CD
SAS ALIAS: HCPCS_CD
STANDARD ALIAS: REV_CNTR_HCPCS_CD
SYSTEM ALIAS: LTHIPPS
TITLE ALIAS: HCPCS_CD

CODES:
REFER TO: CLM_HIPPS_TB
IN THE CODES APPENDIX

COMMENT:
Prior to Version H this field was named: HCPCS_CD. With Version H, a prefix was added to denote the location of this field on each claim type (institutional: REV_CNTR and non-institutional: LINE).

NOTE: When revenue center code = '0022' (SNF PPS) or '0023' (HH PPS), this field contains the Health Insurance PPS (HIPPS) code. The HIPPS code for SNF PPS contains the rate code/assessment type that identifies (1) RUG-III group the beneficiary was classified into as of the RAI MDS assessment reference date and (2) the type of assessment for payment purposes.

The HIPPS code for Home Health PPS identifies (1) the three case-mix dimensions of the HHRG system, clinical, functional and utilization, from which a beneficiary is assigned to one of the 80 HHRG categories and (2) it identifies whether or not the elements of the code were computed or derived. The HHRGs, represented bythe HIPPS coding, will be the basis of payment for each episode.

For both SNF PPS & HH PPS HIPPS values see CLM_HIPPS_TB.

Level I

Variable Name	Label
	Medical Association's Current Procedural Terminology, Fourth Edition (CPT-4). These are 5 position numeric codes representing physician and nonphysician services. **** Note: **** CPT-4 codes including both long and short descriptions shall be used in accordance with the HCFA/AMA agreement. Any other use violates the AMA copyright. Level II Includes codes and descriptors copyrighted by the American Dental Association's Current Dental Terminology, Second Edition (CDT-2). These are 5 position alpha-numeric codes comprising the D series. All other level II codes and descriptors are approved and maintained jointly by the alpha-numeric editorial panel (consisting of HCFA, the Health Insurance Association of America, and the Blue Cross and Blue Shield Association). These are 5 position alpha-numeric codes representing primarily items and nonphysician services that are not represented in the level I codes. Level III Codes and descriptors developed by Medicare carriers for use at the local (carrier) level. These are 5 position alpha-numeric codes in the W, X, Y or Z series representing physician and nonphysician services that are not represented in the level I or level II codes.

Variable Name	*Label*
	SOURCE: CWF
IDENDC{x}	*Revenue Center IDE, NDC, UPC Number*
where { x } ranges from 1 to 58	
	If segment count > 1 then revenue center trailer elements 46–58 are missing and trailers above 45 are in subsequent records. Effective with Version H, the exemption number assigned by the Food and Drug Administration (FDA) to an investigational device after a manufacturer has been approved by FDA to conduct a clinical trial on that device. CMS established a new policy of covering certain IDE's which was implemented in claims processing on 10/1/96 (which is NCH weekly process 10/4/96) for service dates beginning 10/1/95. IDE's are always associated with revenue center code '0624'. NOTE1: Prior to Version H a 'dummy' revenue center code '0624' trailer was created to store IDE's. The IDE number was housed in two fields: HCPCS code and HCPCS initial modifier; the second modifier contained the value 'ID'. There can be up to 7 distinct IDE numbers associated with an '0624' dummy trailer. During the Version H conversion IDE's were moved from the dummy '0624' trailer to this dedicated field. NOTE2: Effective with Version 'I', this field was renamed to eventually accommodate the National Drug (NDC) and the Universal Product Code (UPC). This field could contain either of these 3 fields (there would never be an instance where more than one would come in on a claim). The size of this field was expanded to X(24) to accommodate either of the new fields (under Version 'H' it was X(7). DATA ANAMOLY/LIMITATION: During an CWFMQA review an edit revealed the IDE was missing. The problem occurs in claim with an NCH weekly process dates of 6/9/00 through 9/8/00. During processing of the new format the program receives the IDE but then blanked out the data. DB2 ALIAS: IDE_NDC_UPC_NUM SAS ALIAS: IDENDC STANDARD ALIAS: REV_CNTR_IDE_NDC_UPC_NUM TITLE ALIAS: IDE_NDC_UPC SOURCE: CWF

Variable Name	*Label*
RVUNT{x}	*Revenue Center Unit Count*

where { x } ranges from 1 to 58

If segment count > 1 then revenue center trailer elements 46–58 are missing and trailers above 45 are in subsequent records.

A quantitative measure (unit) of the number of times the service or procedure being reported was performed to the revenue center/HCPCS code definition as an institutional claim.

Depending on type of service, units are measured by of covered days in a particular accommodation, pints of

blood, emergency room visits, clinic visits, dialysis treatments (sessions or days), outpatient therapy visits, and outpatient clinical diagnostic laboratory tests.

NOTE1: When revenue center code = '0022' (SNF PPS) the unit
count will reflect the number of covered days for each code and, if applicable, the number of visits for each rehab therapy code.

CWF

RVRT{x}	*Revenue Center Rate Amount*

where { x } ranges from 1 to 58

If segment count > 1 then revenue center trailer elements 46–58 are missing and trailers above 45 are in subsequent records.

Charges relating to unit cost associated with the revenue center code. Exception (encounter
data only): If plan (e.g. MCO) does not know the actual rate for the accommodations, $1 will be reported in the field.

NOTE1: For SNF PPS claims (when revenue center code equals '0022'), HCFA has developed a SNF PRICER to compute the rate based on the provider supplied coding for the MDS RUGS III group and assessment type (HIPPS code, stored in revenue center HCPCS code field).

Variable Name	*Label*
	NOTE2: For OP PPS claims, HCFA has developed a PRICER to compute the rate based on the Ambulatory Payment Classification (APC), discount factor, units of service and the wage index. NOTE3: Under HH PPS (when revenue center code equals '0023'), HCFA has developed a HHA PRICER to compute the rate. On the RAP, the rate is determined using the case mix weight associated with the HIPPS code, adjusting it for the wage index for the beneficiary's site of service, then multiplying the result by 60% or 50%, depending on whether or not the RAP is for a first episode. On the final claim, the HIPPS code could change the payment if the therapy threshold is not met, or partial episode payment (PEP) adjustment or a significant change in condition (SCIC) adjustment. In cases of SCICs, there will be more than one '0023' revenue center line, each representing the payment made at each case-mix level. 9.2 DIGITS SIGNED DB2 ALIAS: REV_CNTR_RATE_AMT SAS ALIAS: REV_RATE STANDARD ALIAS: REV_CNTR_RATE_AMT TITLE ALIAS: CHARGE_PER_UNIT EDIT-RULES: +9(9).99 EFFECTIVE-DATE: 10/01/1993 COMMENT: Prior to Version H the size of this field was: S9(7)V99. RVCHRG{x} *where { x } ranges from 1 to 58*	*Revenue Center Total Charge Amount*	If segment count > 1 then revenue center trailer elements 46–58 are missing and trailers above 45 are in subsequent records. The total charges (covered and non-covered) for all accommodations and services (related to the revenue code) for a billing period before reduction for the coinsurance amounts and before an adjustment for the cost of services provided. NOTE: For accommodation revenue center total charges must equal the rate times units (days). EXCEPTIONS: (1) For SNF RUGS demo claims only (9000 series center codes), this field contains SNF customary accommodation charge, (ie., charges related to the accommodation revenue center code that would have applicable if the provider had not been participating in the demo). (2) For SNF PPS (non demo claims), when revenue center code = '0022', the total charges will be zero. (3) For Home Health PPS (RAPs), when revenue center code = '0023', the total charges will equal the dollar amount for the '0023' line. (4) For Home Health PPS (final claim), when revenue code = '0023', the total charges will be the sum of the revenue center code lines (other than '0023'). (5) For encounter data, if the plan (e.g. MCO) does not know the actual charges for the accommodations the charges will be $1 (rate) times units (days). 9.2 DIGITS SIGNED DB2 ALIAS: REV_TOT_CHRG_AMT SAS ALIAS: REV_CHRG
