

**Wait too long to talk about kidney disease
and you could be waiting for a kidney.**

If you have diabetes, high blood pressure or a family history of kidney failure, you're at high risk for developing kidney disease. There may be no early symptoms, so talk to your family about their medical history and to your doctor about getting tested. It could save your life. For a free brochure, call toll-free 1-866-4-KIDNEY (1-866-454-3639), or visit www.nkdep.nih.gov today.

You Have The Power To Prevent Kidney Disease
